the Congress was that the conventions and recommendations of the Labour Organization should be regarded as forming part of the Dominion's obligations under the Peace Treaty, and that Federal legislation should be passed to give them effect. That was not the view of the legal advisers of the Dominion Government, however, and the memorandum suggested that the Unemployment Conference might make a recommendation that steps be taken to bring the subjects covered by the conventions under Part 13 of the Treaty of Versailles, within the scope of Federal legislation. Failing such action it was proposed that steps be taken to ensure united action by the several provinces which would give effect to the conventions. The legislatures of Ontario and New Brunswick had already passed resolutions calling for a conference of Federal and Provincial representatives on this subject, and British Columbia had passed laws on the lines of the conventions, subject however to the passing of similar laws by the provincial legislatures. Failing action on the lines suggested above the memorandum proposed that all Provincial governments send a representative to each conference of the International Labour Organization to act as advisers to the Dominion delegates, and that an annual conference be held in Canada between Dominion and Provincial representatives for the purpose of securing coordinated action by all Provinces to give legislative effect to the conventions and recommendations of the International Labour Organization.

In the ensuing discussion close attention was given by the conference to various aspects of the responsibilities resting on Canada under the provisions of Part XIII of the Treaties of Peace which provided for the creation of the International Labour Conference, and a resolution was adopted unanimously as follows: "That the Conference has had under consideration the various proposals relative to labour which have emanated during the past three years from the International Labour Confer-

ence of the League of Nations. It is provided under the Treaties of Peace that the draft conventions and recommendations of this body must be brought to the attention of the authority or authorities within whose competence the matter lies for the enactment of legislation or other action, and this Conference is of the view that the authorities deemed to be respectively competent to deal with the matters in question should give

careful and sympathetic attention to such draft conventions and recommendations with a view to enacting necessary legislation where this may be found practicable, and that the Federal Government undertakes on request from a majority of Provincial Governments to call a conference for the consideration of any aspects of these matters when this may be deemed necessary."

UNEMPLOYMENT CONFERENCE OF WESTERN MUNICIPALITIES.

AN unemployment conference of representatives of the cities of the western provinces, Manitoba, Saskatchewan, Alberta and British Columbia was held at Calgary on August 4 and 5. The meeting, which was called at the instance of the Mayor and Council of Calgary, had for its objects—first, to endeavour to obtain further aid from the Dominion and provincial governments for unemployment relief next winter, and, secondly, the adoption of some uniform method on the part of all the western cities and provinces in dealing with the problem. Among those present at the conference were Honourable James Murdock, Dominion Minister of Labour; Honourable Herbert Greenfield, Premier of Alberta, and Honourable Alex. Ross, Minister of Public Works, representing the government of Alberta; Mr. T. M. Molloy, Commissioner of Labour of Saskatchewan, and delegates from the following cities: Winnipeg, Brandon, Moose Jaw, Regina, Medicine Hat, Edmonton, Calgary, Macleod, Lethbridge, and Victoria.

Action was taken by the conference on the following matters, and it was subsequently decided to appoint a committee to present the resolutions and recommendations to the Unemployment Conference meeting at Ottawa on September 5:

(1) *Centralization of Control*:—The conference agreed to the necessity of the establishment of centralization of control with particular reference to

municipalities, cities, rural districts and government civil departments.

(2) *Unemployment Conference, Ottawa, September 5*:—The opinion was expressed that the conference at Ottawa should be broadened sufficiently to include representatives of municipalities who have had to deal with relief during the past year.

(3) *Re-Establishment and maintenance of ex-service men*:—A resolution was approved declaring that no plan for the solution of the unemployed problem would be likely to prove effective which ignored Federal responsibility for the re-establishment and maintenance of ex-service men.

(4) *Maintenance of unemployed*:—It was agreed that proper maintenance be provided for the unemployed.

(5) *Unemployment relief*:—The following resolution was passed:

Whereas the first charge upon industry is of right and ought to be the adequate maintenance of the workers engaged therein, and, whereas the Federal Government was a signatory to the principle of unemployment insurance at the Washington Conference, we, therefore, believe it to be a duty of the Federal Government to immediately call a conference of the Provincial Government, Municipal Councils and organized labour and employers of the larger industries to prepare a plan of unemployment insurance.

That in the interim between now and the time when permanent machinery is set up by the Federal and Provincial Governments to cope with the unemployed situation, this Con-

ference requests that the Federal Government:—

First:—Restrict and guard against unwarranted immigration. Second:—Enact the 8 hour day, at least for its own employees. Third:—Construct all necessary public works such as customs houses, post offices and other buildings which are badly needed in many cities and towns throughout the Dominion. Fourth:—Renew and repair all public buildings during winter months. Fifth:—Continue money grants for immediate relief and immediate needs. Sixth:—Overhaul all rolling stock, etc., on the Government Railways also all other equipment belonging to the various spending departments of the Federal Government;

And that the Provinces:

First:—Engage in road building on a large scale. Second:—Repair and renew old public buildings and construct necessary new ones. Third:—Attend to afforestation. Fourth:—Develop agricultural lands. Fifth:—Make a money grant for immediate needs.

And further, that Municipal Councils undertake at the earliest moment the construction of sewers, water mains, roads, schools, firehalls and also make the necessary appropriations for immediate relief.

(6) *Credit system*:—The principle was endorsed that the Dominion Government be requested at the next session of Parliament to institute a searching and complete public enquiry into the credit system as to its proper function, its control and its relation to unemployment.

(7) *Improvement of wild lands*:—It was resolved that legislation be sought from both the Dominion and Provincial Legislatures to ensure that any future prosperity shall not raise the value of wild lands so that the owners shall be tempted to hold up the price of the same and prevent its purchase and development by immigration with limited capital, for the general prosperity, and that means be considered whereby wild lands forfeited for taxes and also pri-

vately owned wild lands, could be leased to suitable settlers upon very easy terms.

(8) *Unemployment relief*:—The Dominion and provincial governments were asked to continue assistance along more adequate lines subject to resolutions adopted by this Conference.

(9) *Land Settlements*:—It was resolved that a campaign be launched in Canada to settle suitable workers on the land.

(10) *Housing*:—It was resolved that the present Dominion housing scheme should be broadened to assist farmers to construct homes for resident hired help.

(11) *Harvest help*:—It was resolved that immediate action be taken to secure some guarantee that the men coming to the Western provinces for the harvesting will not be dependent on the results of their labour in the fields for their transportation home.

(12) *Physically unfit immigrants*:—It was resolved that physically unfit men should be prevented from coming into the country and that the maintenance of such immigrants applying for relief who have been less than six months in Canada should be a direct charge against the Dominion.

(13) *Highway scheme*:—The Dominion government was requested immediately to plan with the provincial and municipal governments to carry out a Dominion wide highway scheme in order to provide work for the unemployed.

(14) *Unemployed insurance*:—The Conference agreed to recommend to the Dominion Government and the various provincial governments that they institute a scheme of insurance against unemployment.

THIRTEENTH SESSION OF THE GOVERNING BODY OF THE INTERNATIONAL LABOUR OFFICE.

THE thirteenth session of the Governing Body of the International Labour Office was held at Interlaken, Switzerland, on July 25-27. Colonel David Carnegie, of London, England, attended the meeting as substitute representative of the Government of Canada. The members of the Governing Body were guests of the Swiss Government during their stay in Interlaken and on a visit which was made to some of the principal points of interest in the parts of Switzerland thereabout.

It was decided that the Diplomatic Division of the International Labour Office should undertake a study of certain of the problems connected with native labour. A proposal was made that the governments of the various countries participating in the International Labour Conference should send to Geneva on the occasion of the approaching annual conference in October representatives of their respective Factory Inspection Departments. This proposal was, however, not approved by the Governing Body. The Italian Government

delegate suggested that factory inspectors from different countries should be called together for a special conference; this suggestion will receive consideration at a subsequent meeting. It was agreed that a report would be submitted to the International Labour Conference by the Director at the meeting this fall comprising information obtained by the International Labour Office as to the unemployment situation in various countries. The following subjects were referred for purposes of study to the Immigration Commission of the International Labour Office: (1) Definition of an immigrant, (2) Equality of treatment of immigrants, (3) The limit of financial assistance which should be given to immigrants.

It is understood that Viscount Burnham, of London, England, who presided at the 1921 session of the International Labour Conference, will be proposed as Chairman for the Conference session which is to be held in October next. The next meeting of the Governing Body will be held in Geneva on October 12.

RECENT LABOUR LEGISLATION IN NOVA SCOTIA.

THE second session of the 37th Annual Assembly of the Province of Nova Scotia opened at Halifax on March 2 and concluded on April 13, 1922. The opening Speech from the Throne stated that during the previous year the provincial Technical College at Halifax had extended its service by offering a wide range of correspondence studies, and that short courses had been re-established after a recess of five years occasioned by the use of the College for the re-training of disabled soldiers.

Several amendments were made in the Workmen's Compensation Act of the province. The limit of one year within

which an injured worker or his dependents must apply for compensation is defined as dating from the occurrence of the "accident" instead of from the occurrence of the "injury." A new provision is made with respect to injuries for which a workman receives medical aid within 30 days, but for which disability compensation does not arise until after one year from the date of the accident, the Board being given power to exercise discretion in extending the period within which such application must be made. (This amendment is retroactive as from January 1, 1920.) A widow in receipt of compensation for

the death of her husband by an accident compensable under Part 1 of the Act, is debarred from receiving any further compensation as a dependent of any other workmen, and the same restriction applies to invalid widowers who are in receipt of compensation as such. The section of the Act which provides for the payment of compensation to persons committed to institutions was amended by the addition of a clause to the effect that compensation payable to a child under 16 may, in the discretion of the Board, be paid to the institution to which the child has been committed. By another amendment the Board may revise previous awards in cases where a workman otherwise entitled to compensation is likely to use the money in gambling, or otherwise than for the benefit of his dependents; the Board may withhold the money or pay it direct to the dependents, or to a trustee on their behalf. In regard to the non-payment by employers of their assessments, the Board may without leave of any Court or judge, enter judgment, not only against the person so defaulting, but in the event of his death, against his executors. Another amendment defined more particularly the division of liability for compensation as between principals, contractors and sub-contractors; where the principal may become liable in respect to work being carried out for him by a contractor he may in settling accounts with the latter withhold the probable amount of compensation, this amount to be estimated by the Board, final adjustments to be made later; contractors, in regard to sub-contractors are in the position of principals. The provision that compensation forms a first lien upon property used in connection with the industry, is extended to property "produced in or by" the industry assessed; and any real estate of an employer not otherwise subject to a lien, "shall be bound to the same extent as a registered judgment or mortgage." The existing section excluding farm labourers, or domestic or menial servants or their employers from the Act is modified

by allowing the admission of these classes on the application of an employer, and on terms and conditions imposed by the Board. The section providing that a workman who sustains injury for which compensation is payable under Part 1 of the Act is precluded from taking action, statutory or otherwise, against his employer, was amended to apply also to workmen involved in an accident "which arises in the course of the workman's employment."

New Trust Companies and Loan Companies Acts contain provisions that the directors of such companies shall be jointly and severally liable to their clerks and servants for all debts due for service rendered not exceeding three months' salary or wages, provided a company is sued within one year after the debt falls due, and provided also that a director who is sued has not ceased to be a director for a longer period than one year.

The Mines Act was amended in the section relating to the reservation of barriers along the boundary lines of mine leases, the Minister being given authority, on the report and recommendation of the inspector setting forth that the opening or working of any barrier will tend to the safety of any mine or of the workmen, to order that the barrier be opened or worked, and to fix the manner, terms and conditions of so doing.

The operation of the Fair Rent Act of 1919 was further extended and the act will remain in force until April 30, 1923.

The Children's Protection Act was amended in respect to the contributions which may be required from parents or guardians toward the support of children placed in temporary homes or shelters, the limit of such contributions being raised from \$3 to \$5 per week. Administrative amendments were also made in the same act in regard to children committed to reformatories. By an amendment to the Education Act the prohibiting of the employment of child-

ren under 16 years in business or in street trades during school hours without a certificate was made more stringent, the "permitting" or "allowing" of such children to be so engaged being made unlawful.

The Fire Prevention Act of 1919 was amended in regard to the right to enforce compliance with laws, bylaws and regulations in factories and other places, other officials as well as the Fire Marshal being authorized to exercise this right or duty.

Among other amendments to the Assessment Act, the clause was repealed which exempted from municipal taxation shipyards and ships in course of construction and timber, machinery, and materials in shipyards.

The Graduated Nurses' Association Act of 1910 was amended, the Association being given power to establish and maintain local branches throughout the Province, and required to keep a register, containing the names of its mem-

bers, only those persons who are entered on the register to be qualified to advertise themselves as qualified nurses. Persons so registered, male or female, are required to pass an examination by the Association unless they have graduated from a training school. Reciprocal privileges are provided, however, for nurses coming from other provinces. Nurses' certificates may be revoked, by a unanimous vote, for gross incompetency and other causes.

✓ The town of New Glasgow was authorized and empowered to borrow the sum of \$50,000 for the purpose of providing work for the unemployed.

An Act was passed to incorporate the Ukrainian Labour Temple Association.

Regulation Number 25 under the Nova Scotia Coal Mines Regulation Act governing the use of electric locomotives in coal mines, which was approved on August 31, 1915, was revoked by an Order-in-Council dated March 13, 1922, a new regulation being issued to take its place.

MOTHERS' ALLOWANCES IN ONTARIO.

First Annual Report covering year ended October 31, 1921

THE Ontario Mothers' Allowances Act came into force on October 1, 1920, and the first annual report of the Board covers operations during the fiscal year from November 1, 1920, to October 31, 1921.

Provisions of the Act.—It will be recalled that under the Act as amended applications for allowances are considered only on behalf of a mother who is a widow, or the wife of an inmate of an insane asylum in Canada, or the wife of a man who is permanently disabled and incapable of contributing to the support of his family. The mother must have been resident in Canada at the time of the death or total disability of the father,

and for a period of three years immediately prior to the application for an allowance; she must further be resident in Ontario at the time of application, have resided in the province for two years immediately before that date, and continue resident in the province while in receipt of an allowance. She must also have been resident continuously for at least one year in the municipality in which she resides at the time of application. The applicant is required to be a British subject by birth or naturalization, or the wife or widow of a British subject, as well as to be a fit and proper person to have custody of her children. If the mother is a widow she must have two or more of her own children under

16 * years of age living with her, or one of her own children under 16 years of age, and one over 16 years of age totally and permanently incapacitated, both in her care; or, if the wife of a husband totally and permanently incapacitated, she must have one of her own children under 16 years of age, and the husband, both in her care; or if she is the wife of a man in a hospital for the insane in Canada, she must have two or more children under 16 years of age in her care. A mother having children in institutional homes may make application for an allowance, but it is expected that she will have made a home for these children before receiving an allowance, as allowances are not paid to mothers whose children are in institutions. The applicant is not eligible for an allowance if she has other adequate means of properly caring for her children. An allowance under similar conditions as to residence, naturalization, etc., may be granted also, to a woman, married or unmarried, who has resident with her under her care two or more orphan children under 16 years of age, and is the grandmother, sister, aunt, or other suitable person acting as foster mother, and who has not sufficient means otherwise, to care for them properly. The husband may be presumed to be dead if the mother can submit legal proof in the form of a statutory declaration, that she has not heard of or from her husband for five years prior to making application, and that no support either directly or indirectly was received from the husband during that period. In such cases the mother must have under her care two or more children of her own under 16 years of age.

The Commission in a recent bulletin declared that it "does not wish applicants to be considered as applying for charity; but that the mother be regard-

ed as an employee of the State, receiving remuneration for services rendered in the proper care of her children. . . . The mother, as an employee of the Government, must not only satisfy the Commission of her fitness to receive an allowance at the time of her application, but she must satisfy it that she is fulfilling the trust which is being placed in her."

Amount of Allowances.—The following rates are used as a basis in calculating the amount of allowances paid in cities:

	Per month
Beneficiaries with two children	\$40
Beneficiaries with three children	\$45
Beneficiaries with four children	\$50
Beneficiaries with five or more children.	\$55

Rates in municipalities which are not cities are \$10 lower than the city rates. In calculating the amount of an allowance reductions are made for equity in real property and the earnings of wage-earning children. The amounts of other property and assets held by beneficiaries are also considered. The allowance received by an applicant under the Workmen's Compensation Act is supplemented by the Mothers' Allowance Board if the amount of such allowance is less than the Mothers' Allowances.

In most cases the cost of the allowances is met jointly by the Province and the local authority.

The municipality is chargeable with half the amount of the allowance where the beneficiary has resided within its boundaries for a year. In the event of a change of residence the municipality from which the beneficiary moved is liable for the number of months which are required to complete the year of residence. Where a person otherwise qualified for an allowance has had no continued residence, as required, she is only eligible to receive that half of the allowance which is payable by the Province until she has qualified by residence for the municipal contribution to

*It should be stated that previous to September 1, 1921, the age limit of children towards whose support an allowance may be made was fixed at under 14 years. In 1921 the Mothers' Allowances Act was amended to provide that such children should be under the age of 16 years, to conform to an amendment to the Ontario Adolescent School Attendance Act which took effect on September 1, 1921. The higher age limit governed, therefore, only during the last two months of the period under review.

her allowance. In unorganized districts the whole amount of the allowance is paid by the Province.

Statistics for year.—The number of beneficiaries on the payrolls of the Commission on October 31, 1921, was as follows:

Widows.	2,320*
Incapacitation of husbands.	268
Presumption of death of husband.	54
Foster mothers.	18
	<hr/>
	2,660

The most frequent causes of death of the fathers were influenza, pneumonia and tuberculosis, which together accounted for 1,146 out of 2,338 deaths. The occupation of the fathers is given as follows: 1,002 were labourers, 142 were clerical, 675 were in trade, 151 were in business, 25 were professional, 288 were farmers, while the remainder of the 2,660 fathers reported on were unclassified. By nationality, 1,882 of the same number were Canadian, 502 were English, 113 was Scottish, 59 were Irish, the remainder being from various countries.

The number of children by families is shown in the following table:

	Families	Children
Families of one child and incapacitated husband or older child.	11	11
Families of two children.	1,088	2,076
“ “ three “	802	2,406
“ “ four “	460	1,840
“ “ five “	224	1,120
“ “ six “	78	468
“ “ seven “	29	203
“ “ eight “	16	128
“ “ nine “	1	9
“ “ ten “	1	10
	<hr/>	
	2,660	8,271

The amount appropriated for allowances from November 1, 1920 to October 31, 1921, was \$775,000, of which all but \$333 was expended. Of the total expenditure of \$774,667, \$416,153 was contributed by the Province and \$358,514 by the municipalities. The amount of administration expenses during the year was \$77,941.

The work of the Commission is carried on with the help of local boards in each city, separated town, county and judicial district. Ninety-six local boards are in existence in the Province, each, like the Commission itself, consisting of five members, except a few with six members each. All members of local boards serve gratuitously, receiving only travelling expenses. Allowances are not passed by the Commission without the recommendation of the local boards, while on the other hand many applications approved by local boards have been declared ineligible by the Commission. The number of ineligible cases, however, is diminished as the local boards grow more familiar with the Act and its amendments.

Suggested Legislation.—Referring to the need for new legislation as revealed by the year's work the Commission refers to the “appalling problem” raised by family desertion, which it considers should be met by the Government “in a more fundamental way” (The amending act of 1921 lowered the period necessary for presumption of death from seven to five years). The Commission does not recommend the granting of an allowance to a widow with one child, this class being equal in numbers to widows with two or more children. Government action is recommended in relation to the feeble-minded, venereal disease, housing, and medical inspection of rural schools.

General Results.—Among the special points noted by the Investigation Department during the year, it is stated that very few mothers were found to be lax in regard to the attendance of their children at school, the investigators commenting upon the eagerness of the mothers to give their children the advantage of the raising of the school age to 16 years. A marked improvement was noted during the year in the health of both the mothers and children. In every case in which the mother was employed the Board's agents endeavoured to obtain part-time instead of full-time employment in order that she might ar-

*Of these widows 180 were widowed during the current year.

range to spend more time in her home. "There is little difficulty," the report states, "in getting mothers to see that their best service is to their children in their own home, not through their greater earning power when separated

from them". The most important effect of the Mothers' Allowances Act is declared to be that it keeps homes together, and makes it possible for mothers who have been forced to separate their families to bring them together again.

MINIMUM WAGES FOR FEMALE EMPLOYEES IN BRITISH COLUMBIA AND ONTARIO.

(a) Annual Report of British Columbia Board for 1921. (b) Orders of Ontario Board governing the needle trades.

THE fourth annual report of the Minimum Wage Board of British Columbia, covering the year 1921, is contained in the annual report of the Department of Labour of the same Province. (This latter report is outlined elsewhere in the present issue. The various orders issued by the Board from time to time have been noted in previous issues of the LABOUR GAZETTE.) Orders are now in effect governing the following industries and occupations: mercantile; laundry, cleaning and dyeing industry; public housekeeping; offices; manufacturing; personal service; telephones and telegraphs; fish industry and fruit and vegetable industry. In all these industries the maximum number of working hours in the week was fixed by the Board at 48.

The following table, which is based on returns from 1,923 employers relating to 9,722 female employees, shows the legal minimum wages, the average weekly wages actually paid, and the number of hours per week actually worked in the various industries during 1921.

According to the report there was a general improvement shown in hours of employment and in the greater number of workers receiving wages above the minimum in 1921 as compared with 1920 and other years. "While here and there girls may have lost their positions because employers did not consider them worth the legal minimum wage," the report states, "the returns show a better balance in wages of the whole body of women workers in British Columbia than in former years. More employees are

Industry or occupation	No. of firms reporting	No. of employees		Legal minimum wages		Average weekly wages actually paid		Average hours per week
		Over 18	Under 18	Over 18	Under 18	Over 18	Under 18	
Mercantile	278	1,788	256	\$12.75	\$ 7.50 to \$12.75	\$15.99	\$ 9.33	44.17

		Inex- perienced 158			Inexperienced		Inex- perienced	41.7
					11.00 to 15.00		13.38	

*Rates for inexperienced workers were under consideration.

passing up into the better-paid classifications. For example, in the mercantile industry the returns indicate that adult women receiving the highest salaries (\$25 a week or over) number more than twice as many in 1921 as in 1920. The pay-rolls show no justification for the fear sometimes expressed that the setting of a legal minimum wage for adult workers would cause wholesale replacement by those under age."

Considerable difficulty was experienced by the Board in fixing schedules of wages for inexperienced workers in the manufacturing industries owing to the varying length of time required for training in different manufacturing processes. Public meetings were held during the year, and advisory committees were appointed by the British Columbia Manufacturers' Association and the Vancouver Trades and Labour Council. The question was still under consideration as the year closed, but the report contains an appendix in which it is pointed out that on March 20, 1922, the Board issued a notice tabulating certain schedules of wages which it was proposed to adopt in regard to inexperienced female workers in the manufacturing industries. These schedules classify inexperienced workers by industrial groups, with varying periods allowed for training according to the comparative difficulty of the processes to be learned. Inexperienced girls under 18 are assigned in all cases a longer learning period than women over 18 years. In the first group, which covers the manufacturing or preparing of certain enumerated articles involving slight technical knowledge in their handling, the wages are graduated in four stages each of one month for inexperienced women, and in four 2-month stages for young girls. In the second group the four successive stages are respectively 2 months and 3 months for the adult and juvenile classes. In the third group the stages are 3 months and 4 months, while in the fourth group, including the more highly specialized callings, such as custom tailoring, dressmaking, etc., the four

stages of the learning period are respectively four and six months each. In all four groups the weekly wage is advanced from \$8.00 to \$14.00, the latter figure being the legal minimum for inexperienced workers in the manufacturing industries. The new schedules, however, do not apply to those trades and crafts in which indentured apprenticeship is still customary; to work at these latter trades applicants must first secure special permits from the Board. The Board, it is pointed out, has no stated order regarding part time workers, "as it has been legally advised that no authority may require an employer to pay for hours during which the employee is neither working nor on duty. Part time, under British common law, is paid for on the basis of time actually worked."

The highest minimum wage so far set for any class of female employees in British Columbia is that in the fishing industry in which skill and experience are required and the conditions are somewhat trying. The average actual wage was below the legal minimum for an 8-hour day, short hours having been worked. The labour was formerly supplied by Old Country women, but Canadian girls and women, it is stated, are gradually entering the industry. The year's record showed a decrease in the number of inexperienced, with a gain for experienced workers.

The fruit and vegetable industry differs from other industries in being highly seasonal, and no restriction has been fixed as to the length of overtime which may be worked for 90 days in the year, but overtime rates must be paid beyond 48 hours per week.

Orders of Ontario Board Governing Needle Trades.

The Ontario Minimum Wage Board issued during August a series of orders (Nos. 17 to 20) governing female employees in the Needle Trades, which include the making of garments, tents, awnings, flags, and allied machine sewing trades. Previous orders have been

outlined in the LABOUR GAZETTE as they were issued. Order No. 17 governs employment in the needle trades in Toronto; Order No. 18 applies to cities of 30,000 population or over; Order No. 19 to cities having a population from 5,000 to 30,000; and Order No. 20, to the remainder of the Province. The minimum wages fixed by these orders for experienced and inexperienced adults and for girls under 18 years of age are shown in the following table:—

MINIMUM WAGES OF FEMALE EMPLOYEES IN
NEEDLE TRADES (ONTARIO)

	Toronto (Order No. 17)	Cities of 30,000 population (except Toronto) (Order No. 18)	Cities and towns having from 5,000 to 30,000 pp. (Order No. 19)	Rest of Ontario (Order No. 20)
Experienced adults....	\$12.50	\$11.50	\$11.00	\$10.00
Inexperienced adults—				
1st 6 months.....	10.00	9.50	9.00	8.00
2nd 6 months.....	11.00	10.50	10.00	9.00
Girls under 18 years—				
1st 6 months.....	8.00	8.00	7.00	6.00
2nd 6 months.....	9.00	9.00	8.50	7.50
3rd 6 months.....	10.00	10.00	10.00	9.00

All these orders provide that any employee who has worked in the industry for a year or more before reaching the age of 18 years is entitled to the full minimum wage on attaining that age; or if she has worked for less than a year on attaining that age she becomes entitled to the minimum wage on completing

a year of work in the industry. No employee of 18 years or over may be paid less than the rate fixed for inexperienced adults. The number of inexperienced adults or young girls employed in any establishment must not exceed one-third and the number of inexperienced adults and young girls together must not exceed one-half of the total female working force, temporary employees whose term of employment is less than one month, not being included. The foregoing rule does not apply to plants employing four or less female workers. The rule governing piece-workers is that at least 80 per cent of these must receive wages conformable to the order. The piece-work rates may be averaged for any worker provided that the average is maintained at each payment. No deductions below the minimum wage line for absence may exceed the value of the time lost, reckoned in proportion to the normal working hours. An employee who is required to wait on the premises is entitled to be paid for time so spent. The usual penalties for violations of the orders are imposed under Section 22 of the Act, namely, a fine of not more than \$500 or less than \$50 for each employee affected, the employer being also required to pay to such employee the amount by which her wages fell short of the prescribed minimum. All establishments are required to keep copies of these orders posted in a conspicuous place.

ANNUAL REPORT OF THE BRITISH COLUMBIA DEPARTMENT OF LABOUR.

THE annual report of the Department of Labour of British Columbia, recently published, contains full information on the work of the Department in the Province during the calendar year 1921. The annual reports of the Minimum Wage Board and of the Factory Inspector are also included. The report of the Minimum Wage Board is summarized elsewhere in this issue.

The year was one of unusual difficulty owing to the unprecedented amount

of unemployment which continued throughout 1921. This condition is attributed to the collapse of the lumbering industry late in the preceding year, many mills and camps remaining closed for nearly twelve months. The unemployed workers crowded to the cities of the Province, causing a labour surplus which resulted in a marked reduction in wages. The report states that, as usual in a period of falling wages, there were

few strikes or labour disputes during the year.

To meet the unemployment crisis the Provincial Government decided to assist in carrying out the plan for relief initiated by the Dominion Government, whereby the Dominion contributed one-third of the cost of relief expenditures, provided one-third was provided by the Province and one-third by the municipality concerned. Under this arrangement the initiative rested with the municipalities, the Province having only the power to agree or decline to contribute. In furthering this joint scheme the Province expended \$167,850 during the year. Besides this expenditure public Provincial works were carried out to the value of \$250,000, most of which sum was paid in wages.

Different methods of unemployment relief were employed in the two main centres of population in the Province. In the first place Vancouver adopted the Dominion Government's scheme, with the result, it is claimed, that the city "quickly became the assembling place for unemployed men from all parts of Western Canada," that is, from centres in which the scheme was not in operation. By the middle of the summer of 1921, 8,200 unemployed persons were registered, about one-half of this number not belonging to the city, and fully 2,000 being from other western provinces. Various relief works were undertaken, including compulsory clearing of vacant lots at the owners' expense, general city improvements, rock-breaking and wood-cutting. At the middle of April the City Council discontinued special relief works, but employment continued to be found for between 300 to 500 men with families. The dispensing of relief under the joint scheme continued throughout summer, the weekly number of recipients falling below 200 in July and August, and afterwards rising until winter, when a relief camp was opened at Hastings Park. On the other hand, Victoria City Council decided against adopting the Dominion

plan on the ground that it would result in attracting to the city many unemployed workers from places outside. Instead, the unemployed were registered, assistance was given in the form of orders for groceries and meat, and relief work provided when available. About 300 men availed themselves of this scheme. In addition the Provincial Government advanced \$50,000 to the city to be spent on sewerage work in Saanich Municipality, and on special work in the city, 200 men finding employment on these operations. The cost of providing work for these 500 men and dealing with the unemployment situation in Victoria during the winter of 1920-21 was estimated as under \$10,000. "At the end of the winter," the report states, "those administering the affairs of the city were still of the opinion that it would have been a mistake to adopt the Dominion Government scheme. They considered that the City Council, by dealing with the situation in its own way, accomplished better results at much smaller cost."

The Provincial Government also accepted its share in the revised Dominion relief plan for the winter of 1921-22. Under this plan municipalities paid the normal cost of any necessary public works, while the excess cost resulting from the fact that such work was undertaken at an unsuitable season, was to be shared equally by the Dominion Government, the Province, and the Municipality. (By a later order, on January 25, 1922, the Dominion Government increased its contribution to one-half of the "cost over normal," the remainder to be shared equally by the other two parties to the arrangements.) Up to the end of 1921, however, no municipalities had commenced operations under the revised scheme, but the earlier plan still remained in effect where the necessary public works could not be undertaken.

In August the Provincial Government summoned representative employers and labour men to a conference, at

which many suggestions were considered. Some relief was afforded in the fall by the departure of about 6,000 men for harvest work in the Prairie provinces. "At the time of writing," the report states, "the conditions appear to be favourable for a revival of trade, and with it the passing of probably the most critical period the industries of this Province have ever known."

Statistics of Trade and Industries.

The figures which appear in the following table are based upon returns made by 2,275 employing firms. For the first time the report covers the calendar year. The total salary and wage payments made by these employers during the year were as follows:

Officers, superintendents and managers.	\$7,201,474
Clerks, stenographers, salesmen, etc.	7,226,281
Wage-earners (including piece workers).	65,314,625
Total.	\$79,742,380

The average number of wage-earners in the several months of 1921 is shown in the following table:—

Month	Males	Females
January.	42,111	3,042
February	43,086	3,091
March.	45,288	3,057
April.	46,830	3,113
May.	48,715	3,145
June.	49,731	3,474
July.	50,496	3,893
August.	50,283	4 117
September.	49,336	4,266
October.	48,109	4,118
November.	46,471	3,596
December.	43,165	3,289

It was ascertained that the number of male industrial workers who had been employed by the 2,275 firms at their busiest period during the past two years, namely in July, 1920, was 63,649, which indicated that in the worst period of unemployment in 1921 there were about 20,000 men who had been discharged by these firms, or probably 25,000 men in all unemployed in the province.

The report contains monthly statistics of employment in the chief industries of

the province, from which the following table is derived, showing for each industry the approximate number of employees in the months of least and greatest employment.

Industry.	No. of employees
Coal mining (12 firms) from	5,090 to 5,685
Coast shipping (79 firms)	
from.	2,850 to 3,360
Contracting (517 firms) from	3,400 to 5,400
Building materials (32 firms)	
from.	360 to 550
Food products (216 firms)	
from.	2,200 to 5,400
Garment making (49 firms)	
from.	500 to 600
Laundries (38 firms) about	900
Lumber (533 firms) from..	10 000 to 15,500
Metal trades (292 firms)	
from.	1,700 to 2,250
Metal mining (98 firms)	
from.	1,750 to 2,400
Printing and publishing (86 firms) from.	650 to 900
Pulp and paper (7 firms)	
from.	1,850 to 2,725
Ship building (31 firms)	
from.	590 to 2,780
Smelting (3 firms) from....	1,390 to 1,650
Street railways, gas, power, telephone, etc. (66 firms)	
from.	4,500 to 5,100

The numbers of wage earners by classified weekly wage rates, are shown in the following table:—

For week of employment of greatest number	Males		Females		Apprentices
	18 yrs. and over	Under 18 yrs.	18 yrs. and over	Under 18 yrs.	
Under \$6.	15	18	17	9	21
\$6 to \$6.99....	3	18	4	6	44
\$7 to \$7.99....	22	40	19	23	29
\$8 to \$8.99....	11	85	15	18	56
\$9 to \$9.99....	171	73	16	39	38
\$10 to \$10.99..	386	110	69	73	43
\$11 to \$11.99..	395	91	58	29	45
\$12 to \$12.99..	602	102	178	47	237
\$13 to \$13.99..	764	58	314	34	85
\$14 to \$14.99..	490	37	566	33	15
\$15 to \$15.99..	1,388	161	687	48	23
\$16 to \$16.99..	1,350	36	406	25	8
\$17 to \$17.99..	1,540	62	232	4	19
\$18 to \$18.99..	2,985	75	364	9	15
\$19 to \$19.99..	1,389	13	205	3	18
\$20 to \$20.99..	1,814	12	307	4	12
\$21 to \$21.99..	3,612	20	135	10
\$22 to \$22.99..	3,088	9	114	2	8
\$23 to \$23.99..	1,924	9	79	4
\$24 to \$24.99..	5,798	5	49	6
\$25 to \$25.99..	3,165	5	57	3
\$26 to \$26.99..	3,471	3	9	7
\$27 to \$27.99..	3,881	18	4
\$28 to \$28.99..	2,250	1	6	1	1
\$29 to \$29.99..	2,083	2	10	3
\$30 to \$34.99..	9,934	2	67
\$35 to \$39.99..	7,601	14
\$40 to \$44.99..	3,214	1	3
\$45 to \$49.99..	1,359	1
\$50 and over..	1,224

The report states that there was an average decrease of 12.34 per cent in the amount of wages paid in 1921 as compared with the previous year, the chief declines being evident in the rates paid in the lumbering, pulp, and paper, metal mining, coal mining, and building industries. On the other hand the oil refining, coast shipping, and shipyard industries showed increases.

The following table shows the numbers of workers grouped according to the number of working hours each week.

	No. of
Under 44 hours per week...	2,226
44 hours per week.....	13,523
45 to 47 hours per week....	1,351

The report contains a chapter dealing with the work of the Provincial Employment Service. "The Employment Service in British Columbia," it is stated, "has steadily strengthened its position in the industrial life of the Province, the system is becoming better known, and hundreds of workmen have been saved large amounts that would have been expended in fruitless journeys."

The total number of workers who obtained employment through the service during the year was 41,744, of whom 34,836 were placed in British Columbia, and 6,908 in other provinces. For the first time the harvest labour problem was handled by the various branches of the Employment Service of Canada.

Another chapter deals with labour disputes in the Province during the year. Comparatively few stoppages of work occurred, the most serious dispute being in the printing industry in which there was a strike which lasted for the greater part of the year, the question at issue being a proposed reduction in working hours from 48 to 44 per week. A dispute in the lumber trade at Vancouver had certain unusual features. Japanese workers who were engaged in the handling, piling and landing of lumber on receiving notice of a reduction in their pay from 30 cents to 25 cents per hour declared a strike, on which, after one day's stoppage, they were replaced by a crew of white men at 36 cents an hour for single men and 40 cents an hour for married men.

The report contains, also, an index of Associations of employers and a labour union directory for the Province.

Report of the Inspector of Factories.

The work of factory inspection in the Province, formerly under the direction of the Department of Public Works, was taken over during 1921 by the Department of Labour, and the annual report on this subject is now included for the first time in the Department's report. A general decrease in the number of accidents is noted, and is attributed to the growing concern of employers for the working conditions and health of their workers. The conditions in factories where females are employed are particularly good in the Province, it is stated. For the further safeguarding of passenger elevators the report recommends that they be equipped with an approved interlocking device which would prevent the door being opened before the elevator is level, or nearly so, with the landing, and also to prevent the operation of the car until the door is locked. Employers, it is pointed out, must insist upon the production of a birth certificate by juvenile workers, and not merely accept the applicant's statement that he is of the required minimum age.

LABOUR AND WAGES IN VARIOUS INDUSTRIES IN CANADA.

Reports by the Dominion Bureau of Statistics on (a) the Clothing Industry, 1920; (b) the Malt Liquor Industry, 1919 and 1920; (c) the Linseed Oil Industry, 1919 and 1920.

THE Dominion Bureau of Statistics has recently issued advance reports on the clothing industry for the calendar year 1920, Section I (women's wear) and Section II (men's wear); the

malt liquor industry for 1919 and 1920; and the linseed oil industry for 1919 and 1920. Previous reports in this series have been outlined in various issues of the LABOUR GAZETTE.

The Clothing Industry, 1920. Section I—Women's Wear

An advance report of the Dominion Bureau of Statistics on the clothing industry in Canada in 1920 is divided into two parts, Section I dealing with women's wear and Section 2 with men's wear. The following statistics relate to women's wear.

The statistics for women's wear are divided into three parts as follows: (a) factory-made clothing, (b) custom-made clothing and (c) millinery. The statistics are based on returns from 1,810 establishments, of which 1,320 were millinery shops, 216, custom tailoring shops, and 274 clothing factories.

The following table shows the location of establishments reporting:

Province	Factory-made clothing	Custom-made clothing	Millinery	Total
Prince Edward Island			3	3
Nova Scotia		2	80	82
New Brunswick	2	1	62	65
Quebec	123	84	413	620

The Clothing Industry 1920, Section II—Men's Wear.

Section II of the advance report on the Clothing Industry in 1920, which deals with Men's Wear, contains statistics based on reports from 1,816 establishments, of which 196 were clothing factories and 1,620 custom tailoring shops.

The following table shows the location by provinces of the establishments reporting:

Provinces	Factory-made clothing	Custom-made clothing	All establishments
Prince Edward Island.....	26	26
Nova Scotia.....	94	95
New Brunswick.....	2	57
Quebec.....	117	439	556
Ontario.....	72	663	735
Manitoba.....	3	88	91
Saskatchewan.....	60	60
Alberta.....	65	65
British Columbia and Yukon	1	130	131
Totals	196	1,620	1,816

In the clothing factories the average of lost time per employee due to factory idleness was 29 days in 1920. The average number of employees occupied was stated to have been considerably higher than in 1919. The total number of working days and the average per factory is shown below:

	Total	Average per factory
Days worked on full time.....	65,487	239.0
Days worked on part time.....	9,857	36.0
Days, factories idle.....	7,952	29.0
Average number of hours worked per day.....	8.2
Average number of hours worked per week.....	45.0

A table giving the monthly fluctuations of employment shows that in the clothing factories the month of greatest employment was March, when there were 12,993 employees. From that month there was a steady decline until December, in which month there were 8,766 employees. In both custom tailoring and millinery shops the peak of employment was in April when there were respectively 1,150 and 3,221 employees, and the month of least employment was August, when there were in these shops 623 and 2,183 employees respectively.

The following table gives some of the principal statistics of the industry:

Items	Factory-made clothing	Custom-made clothing	Total
Establishments.....No.	196	1,620	1,816

\$30 and over.....	1,007	82	4	1	1,094
Totals	3,157	2,370	91	104	5,722

In the men's clothing factories the average of lost time per employee due to factory idleness was 34.6 days. The average number of employees occupied

was stated to have been considerably higher than in 1919. The total number of working days and the average per factory is shown in the following table:

	Total	Average per factory
Days worked on full time.....	46,118	235.3
Days worked on part time.....	6,682	34.1
Days, factories idle.....	6,784	34.6
Average number of hours worked per day.....	8.2
Average number of hours worked per week.....	45.8

A table giving the monthly fluctuations of employment shows that in the clothing factories the month of greatest employment was April, when there were 12,344 employees, from which period there was a steady decline until December when there were 7,420 employees. In the custom tailoring shops there was little variation in employment from month to month, ranging from 5,503 in May to 4,973 in August.

The Malt Liquor Industry

The statistics of the malt liquor industry in Canada cover the years 1919 and 1920. In each of these years reports were received from 57 breweries, which were distributed among the different provinces as follows:

	1919	1920
Alberta	4	5
British Columbia	13	13
Manitoba	5	5
New Brunswick	2	2
Nova Scotia	1	1
Ontario	21	20
Quebec	10	10
Saskatchewan	1	1
Totals	57	57

The following table gives some of the principal statistics of this industry for the two years:

Items	1919	1920
Establishments	No. 57	57
Capital investment.....	\$ 28,119,447	37,494,396
Salaried employees—		
Male	No. 405	490
Female	No. 45	68
Salaries	\$ 558,557	1,089,664
Wage-earners—		
Male	No. 2,181	2,777
Female	No. 55	33
Wages	\$ 2,272,908	3,289,996
Cost of materials.....	\$ 8,093,403	12,525,107
Value of products.....	\$ 20,169,074	29,695,859

In the following table the employees in 1920 are classified according to their weekly earnings:

Weekly wage groups	1919			
	16 years and over		Under 16 years	Total employees
	Male	Female		
Under \$5.....	4	3	7
\$5 but under \$10.....	36	18	4	58

In 1919, the month of greatest employment was July with 2,870 employees, and January with 1,770 employees was the lowest month. In 1920, the highest month was August with 3,310 employees, and the lowest month was January with 2,352 employees.

The Linseed Oil Industry

A report has been issued covering the linseed oil industry in Canada for the years 1919 and 1920. In both years reports were received from eight mills, of which three were located in the province of Quebec, two each in Ontario and Manitoba, and one in Alberta. The following table contains some of the principal statistics of this industry:

	1919	1920
No. of establishments.....	8	8
Capital investment.....	\$2,358,062	\$2,911,634
Salaried employees.....	44	42
Salaries.....	\$ 84,870	\$ 81,744
Wage earners.....	172	181
Wages.....	\$ 197,119	\$ 224,324
Cost of materials.....	\$6,921,801	\$7,180,011
Value of products.....	\$8,080,107	\$9,230,084

In the following table the employees are classified for the two years accord-

ing to weekly wage payments in specified groups. All the employees were over sixteen years of age and there was only one female employee in each year.

Weekly wage groups	1919	1920
Under \$5.....		
\$5 to under \$10.....		6
\$10 to under \$15.....	1	3
\$15 to under \$20.....	11	7

\$24 to under \$28.....	72	55
\$28 to under \$30.....	18	18
\$30 and over.....	17	30
Totals	189	197

Monthly statistics show that employment ranged in 1919 from 192 in March to 132 in October, and in 1920 from 202 in April to 158 in October.

HOW ONE MANUFACTURER DEALS WITH THE UNEMPLOYMENT PROBLEM.

A RECENT issue of *Law and Labour*, (New York) gives some interesting details with respect to the manner in which the Dennison Manufacturing Company of Framingham, Mass., have dealt with the unemployment problem as it affects their industry, which is of a seasonal character.

Some years ago the Dennison Manufacturing Company started in the business of manufacturing Christmas trinkets and novelties. Their busy season began in September, when the retailers ordered their goods, and ended with about three or four months of intense crowding and overwork. In order to reduce these annual peaks of employment and the depressions that naturally followed, they adopted a definite policy for stabilizing their business. They co-ordinated their sales department with their productions department and it became the business of their salesmen to induce the retailers to order in advance so that the manufacturing could be carried on throughout the year instead of being concentrated in one season. Then they began manufacturing Christmas

cards fifteen months before they were actually sold to the ultimate consumer. They introduced the manufacturing of many other products to which their employees could be transferred and they trained their workers so that they might transfer from one occupation to another if necessary. It is claimed they have stabilized employment in their industry by thus dovetailing and spreading out. The Company now manufactures several hundred different articles, and for the past few years have had practically no unemployment. For example, it is stated that on January 2, 1920, the company had 2,640 employees, and that on November 1, 1921, it had 2,671 employees; and that during the entire period, which was one of depression, it had run close to capacity.

Guiding Principles for Prevention of Unemployment.

The six guiding principles adopted by the Dennison Manufacturing Company in its self-appointed task of decreasing the fluctuations of employment due to seasonal conditions of demand or of

production facilities, are stated in *Law and Labour* as follows:

1. Reduction of seasonal orders by getting customers to order at least a minimum amount well in advance of the season. This has been accomplished partly by merely asking for the business, partly by persuasive salesmanship, partly by promising a greater security as to delivery and sometimes by reducing prices to "buy-early" customers.

2. The increase of the proportion of non-seasonal orders with a long delivery time.

3. The planning of all holiday and other stock items more than a year in advance.

4. The planning of inter-departmental needs well in advance.

(The Company states that by the means suggested in the foregoing principles they have converted all possible seasonal and time-limited orders into articles on which they have long delivery time, and they can thus produce according to a schedule based on production rather than delivery needs. The Company further states that it would probably be impossible to realize as full benefits if it were in a trade characterized by sharp style variations, but feels that, even under such conditions, some benefit should be received.)

5. The building up of "out-of-season" items and the varying of lines so as to balance one demand against another.

6. The distribution of these long-time orders and out-of-season staple items in such a way as to fill up periods when the work on quick delivery items is small, so as to bring a more uniform flow of work.

Besides these methods of decreasing the pressure of seasonal demands and evening the inequalities, the decrease in work in one department is balanced against the surplus of another. Operatives not needed in one line are transferred to another where there is work at hand. In doing this the operatives are transferred to the same off-season work each time, so that they develop proficiency in these off-season trades.

Relief of Unemployment.

In addition to providing measures for the prevention of unemployment the Company in 1916 instituted a plan for the relief of unemployment under which the Company sets aside each year from the profits of the business a certain sum which is paid into an Unemployment Fund. The working out of the administration of this fund was placed in the hands of a special committee, consisting of two representatives of the employees and two from the management.

This committee, in drafting the rules governing the use of the Fund, gave to the term "unemployment" a broad interpretation, not regarding total or even partial idleness as necessary in order to establish unemployment within the intent of the Fund, but regarding any loss involved by the inability of a willing worker to continue employment at his normal and qualified duties, while being retained on the books of the Company, as an unemployment loss.

The actual laying-off of any employee is avoided wherever possible by temporarily transferring those for whom there is no work to other parts of the plant where there is work. If this results in a materially lowered wage rate it is recognized as constituting a basis for a claim upon the Unemployment Fund. Employees, regardless of length of service, are paid for all unemployment of one-half day or over.

The Fund is operated in the following manner:

Employees who are temporarily laid off receive 80 per cent of their regular wages if they have dependents and 60 per cent if they have no dependents. Both classes of employees, when they secure temporary work outside, are entitled to an amount equal to 10 per cent of their outside earnings plus 90 per cent of their earnings with the Dennison Company, the Unemployment Fund being used to make up the difference between this amount and what they receive outside.

Employees who are transferred inside to other work are paid their full wages if they are time workers and 90 per cent of a six weeks' average if piece workers. Whatever they are worth on their new job is charged to operating expenses and the rest is made up out of the Unemployment Fund.

At any time after six days' payments have been made the Unemployment Fund Committee may stop payments to any employees who, in its opinion, are not making proper efforts to secure outside work.

The demands upon the Fund, it is stated, have been light because of the success the Company has had in preventing unemployment. Until January, 1921, but \$9,500 had been expended. A

formal distribution plan was then worked out and as a result of its application expenditures totalling \$25,750 were made up to November, 1921.

POWERS OF UNITED STATES RAILROAD LABOUR BOARD.

Decision of Circuit Court of Appeals.

AN interesting decision has recently been rendered by the United States Circuit Court of Appeals with reference to the jurisdiction of the United States Railroad Labour Board. The case, which was referred to in the July issue of the LABOUR GAZETTE, arose from a dispute between the Pennsylvania Railroad Company and the Board. It appears that in May, 1921, the management of the Company had conducted among its employees an election of representatives to a conference on rules. These representatives were chosen as individuals, not as officers of trade unions. The Federated Shop Crafts, affiliated with the Railway Employees' Department of the American Federation of Labour, lodged a protest with the United States Railroad Labour Board against this election. They complained that the Company had refused to negotiate with representatives of System Federation No. 70, which claimed to represent the employees of the Pennsylvania Railroad, and that at the election no opportunity was afforded to elect any union organization as representative, but only individuals actually in the employ of the Railroad. By Decision 218, the Board directed the Company and its employees to set the election aside and to hold a new one with a ballot on which the names of the various unions of the railway service appeared. The Company ignored this order on the ground that it exceeded the power of the Board. The Board then summoned the Company to show cause why it should not publish a declaration, as it was authorized by law to do, that the Pennsylvania Railroad had violated Decision No. 218, one

of its lawful orders. The Company obtained a temporary injunction in the United States District Court for the northern district of Illinois restraining the Board from publishing this declaration. The Board moved to dismiss the bill for a permanent injunction, claiming that it was an administrative arm of the government over which the courts had no jurisdiction, and asserted its powers exercised in the issue of the order to which exception had been taken.

In the judgment delivered by Federal Judge Page it was held that the Labour Board was a body corporate subject to the jurisdiction of the federal courts with capacity to sue and be sued; that the law gave the Board no power to intervene in an industrial dispute except on joint reference by the parties; that a provision of the statute that the Board "may make regulations necessary for the efficient execution of the functions vested in it" did not justify the Board in undertaking to control the appointment or method of election of conferees to deal with such disputes. The power of the Board to publish its findings was restricted to the findings which it was authorized to make, and as the subject matter of Decision No. 218 was held to be beyond the scope of the Board's authority, the Court declared that the injunction against its publication would stand, and the motion to dismiss was denied.

The Railroad Labour Board appealed against this decision to the federal Circuit Court of Appeals. The Company claimed before this Court that when the Transportation Act ended the railroad

administration of the government, jurisdiction over rules and working conditions automatically reverted to the railroads, and a railroad might adopt such as it saw fit, and unless a complaint was made by the employees and a dispute arose between the railroad and its employees, the Board had no jurisdiction to interfere. The Court, however, pointed out that prior to the passage of the Transportation Act there was pending a serious dispute respecting wages and working conditions, and that dispute was submitted to the Board, the Pennsylvania Railroad being one of the carriers that consented to this submission. In view of the fact that at the time this dispute was submitted the National agreements were in effect and working conditions were then determined by negotiations between the railroads and the trade unions, and in view of the fact that the National agreements continued until the adoption of new rules and working conditions either by the carriers and their employees in accordance with the direction of the Railroad Labour Board, or by the decision of the Board itself, the Court held that the question of rules and working conditions involved the question of who should represent the employees in negotiations with the carriers, and that question was properly before the Board. The judgment of the Court was in part as follows:

The Transportation Act changed the law, but it did not change the fact of the pendency of the serious dispute respecting wages and working conditions. The fact that the dispute existed long before the Board was created made it none the less a dispute cognizable by the Board if continuing to exist after the Board began to function. It is thus apparent that at the very outset, this dispute as to rules and working conditions was before the Board, and was so treated by both parties to the dispute, including appellee. . . Title III confers on the Board important duties and prescribes in Section 308 (4) that it "may make regulations

necessary for the efficient execution of the functions vested in it by this title." This, alone, if indeed in the very nature of things it were not necessarily so, would empower the Board to make provision for determining whether those purporting to represent disputants before the Board do in fact so represent them. If it is claimed that a pending dispute has been adjusted between the parties to it, it is very essential that the body before whom the dispute is pending assure itself of the authority to so dispose of the controversy of those who purport to act for the parties. This is especially true where one side of the dispute is a body of individuals such as employees of a great carrier. . . It was eminently proper that the Board, either by general rule or otherwise, indicate how in its best judgment such representation should be manifested and the election conducted. . . Whether the employees may, if they so choose, be represented by an organization as held by the Board, or whether they may be represented only by individuals who were employees of the same employer as contended by appellee, is not properly a question for a court. . . But in so far as it was for the Board in its discretion to determine who was in fact the authorized representative of bodies of employees, that question, and the manner of its disposition, was for the Board, no question here arising as to the Board's good faith or its abuse of discretion. . . True it is, that if the employees select as their representatives System Federation No. 90 or some other organization, the carrier may decline to confer. . . This is merely to state that when representatives are selected either of the parties may, for any cause or no cause at all, decline to enter into conference with them. As applied to this situation it would simply mean that the Board had failed in its effort to dispose of a pending dispute by effecting an agreement between the parties interested, with the result that the dispute still remains with the Board just as if it had not undertaken to bring the parties to a mutual understanding.

The decision of the lower Court was reversed and the injunction against the Railroad Labour Board declaring the Pennsylvania Railroad was violating a lawful order of the Board was ordered vacated.

It is understood that the Railroad Company intends to bring the case before the Supreme Court of the United States.

FAIR WAGE CONTRACTS, AUGUST, 1922.

DURING August the Department of Labour received for insertion in the LABOUR GAZETTE the following information relative to eleven fair wage contracts awarded by the Department of Public Works. These contracts contained the usual fair wage clause which provides for the prompt payment of such wages as are current in the district in which the work is to be performed, and for observance on the various works under contract of the prevailing hours of labour, and which otherwise prevents abuses and secures the legitimate rights of the labour employed.

A statement was also received as to supplies ordered by the Post Office Department, subject to the Regulations for the Suppression of the Sweating System and the securing of fair wages, etc.

DEPARTMENT OF PUBLIC WORKS

Overhauling and repairing of dredge No. 305 (King Edward), Vancouver, B. C. Name of contractor, B. C. Marine Engineers & Shipbuilding, Ltd., Vancouver, B. C. Date of contract, August 9, 1922. Amount of contract, \$8,986 and unit prices for any additional work which may be required.

Overhauling and repairing of dredge No. 303 (Fruhling), at Vancouver, B.C. Name of contractor, Wallace Shipbuilding & Dry Dock Company, Ltd., Vancouver, B. C. Date of contract, August 8, 1922. Amount of contract, \$10,592.50 and unit prices for any additional work which may be required.

Electric wiring and fittings in public building at Port Hope, Ont. Name of contractor, Harris Bros., Toronto. Date of contract, August 15, 1922. Amount of contract, \$1,340 and \$10 per light in excess of number specified; a similar sum to be deducted from contract price for any single light which may be cancelled.

Repairs to the breakwater at Port Burwell, Ont. Name of contractor, Wm. Bermingham, Kingston, Ont. Date of contract, August 17, 1922. Amount of contract, unit prices.

Repairs to wharf at St. Laurent d'Orleans, Que. Name of contractors, L. Lemieux, Odilon Roberge and Edouard Lemieux, Levis, Que. Date of contract, August 19, 1922. Amount of contract, unit prices.

Repairs to superstructure of eastern and western breakwaters at Port Colborne, Ont. Name of contractor, M. J. Hogan, Port Colborne, Ont. Amount of contract, unit prices.

Supply and installation of steam boiler in Savings Bank building at St. John, N.B. Name of contractor, St. John Plumbing Supply Co., St. John, N.B. Date of contract, August 21, 1922. Amount of contract, \$898.

Repairs to wharf at Melford, N.S. Name of contractor, Thos. D. Morrison, D'Escousse, N.S. Date of contract, August 22, 1922. Amount of contract, 12½ cents per cubic foot.

Supply and installation of two hot water furnaces at lazaretto at Tracadie, N.B. Name of contractor, St. John Plumbing Company, St. John, N.B. Date of contract, August 21, 1922. Amount of contract, \$1,775 less allowance of \$75 for existing furnace.

Dredging eastern entrance channel at Toronto, Ont. Name of contractor, The Randolph Macdonald Company, Ltd., Toronto. Date of contract, August 21, 1922. Amount of contract, Class "B" 45 cents per cubic yard (scow measure).

Dredging water berths at St. John, N.B. Name of contractor, St. John Dry Dock and Shipbuilding Company, Ltd.,

St. John, N.B. Date of contract, August 26, 1922. Amount of contract, Class "B" 34 cents per cubic yard (scow measure).

POST OFFICE DEPARTMENT

The following is a statement of payments made in August for supplies ordered by the Post Office Department, subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages, and the per-

formance of work under sanitary conditions.

Nature of order	Amount of order
Making metal dating stamps and type, and other hand stamps and brass crown seals	\$ 598.23
Making and repairing rubber stamps, daters, etc.	365.69
Supplying mail bag fittings	62.70
Making up and supplying letter carriers' uniforms, etc.	3,730.98
Repairing letter boxes, etc.	188.81
Repairing scales	120.70
Mail clerks' tin boxes	142.25
Stamping ink, pads, etc.	630.00

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES.

A SUMMARY is given below of the more important industrial agreements and schedules of wages and working conditions that have recently been received by the Department. Such agreements are summarized each month in the LABOUR GAZETTE. In the majority of cases the agreements are signed by both employers and employees, but verbal agreements are also included in the records, the latter being schedules of rates of wages, hours of labour and other conditions of employment agreed upon between the parties concerned, and in effect though not signed. In addition to these, other important schedules of wages are summarized, including civic schedules. In the case of each agreement or schedule the rates of wages for the principal classes of labour are given, with other information of general interest.

Mining—Coal

ALBERTA AND BRITISH COLUMBIA.—WESTERN CANADA COAL OPERATORS' ASSOCIATION AND UNITED MINE WORKERS OF AMERICA, DISTRICT 18. This agreement, which was signed on August 23, 1922, is given in full on page 955 of this issue.

Manufacturing—Iron, Steel and Products

GUELPH, ONT.—CROWE'S IRON WORKS, LTD., AND INTERNATIONAL IRON MOULDERS' UNION No. 212. Agreement to be effective from July 1, 1922, to July 1,

1923, with 30 days' notice of change prior to conclusion.

Hours of work and shop conditions to be same as during previous year.

Minimum wage per day for journeymen moulders and coremakers, \$5.25. Piece work bench moulders to be paid board price of their work plus 15 per cent.

Prices paid for piano plates to be adjusted on a basis of \$6.15 per moulder per day. Each pattern to be a 6-up, 7-up, 8-up, or 9-up according to what it has been in the past year.

Manufacturing—Pulp, Paper and Paper Goods

CAP MAGDELEINE, QUE.—ST. MAURICE PAPER COMPANY, LIMITED, AND EMPLOYEES, MEMBERS OF THE FOLLOWING ORGANIZATIONS: INTERNATIONAL BROTHERHOOD OF PAPERMAKERS, INTERNATIONAL ASSOCIATION OF MACHINISTS, UNITED BROTHERHOOD OF CARPENTERS AND JOINERS, INTERNATIONAL BROTHERHOOD OF FIREMEN AND INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS. Agreement in effect from May 1, 1922, to May 1, 1923.

This agreement is similar to those in effect between certain other pulp and paper companies and their employees, notably that in effect between the Abitibi Power and Paper Company, Limited, and its employees, as summarized in the

LABOUR GAZETTE for August, 1922, on page 888.

The wages per hour in effect for the principal classes of labour at Cap Magdeleine are as follows, per tour or per day of 8 hours unless specified: skilled and semi-skilled machine tenders, \$1.07; back tenders, 90 cents; third hands, 68 cents; fourth hands, 54 cents; fifth hands, 42 cents; turbine men, 54 cents; beater-mixer men, 75 cents; weighers, 40 cents; paper loaders, 54 cents. Sulphite department: acid makers, 61 cents; cooks, 65 cents; tour foremen, 61 cents; screenmen, 40 cents; head pressmen, 65 cents; head grindermen, 65 cents; screenmen, 38 and 40 cents. Kraft department: cooks, 65 cents; washmen, 54 cents; liquor makers, 54 cents; swenson evaporator men, 41 cents; assistant head pressmen, 38 cents. Boiler house: 1st firemen, 59 cents; stokers, 54 cents. Electrical: switchboard operators, 56 cents; motor oilers, 41 cents; 1st class electricians, 67 cents and 77 cents; helpers, 65 cents. Pipe shop: pipefitters, blacksmith and plumber, 65 cents; helper, 54 cents. Machine shop: pattern maker, 90 cents; assistant pattern maker, 77 cents; millwrights, 65 and 75 cents; carpenter, 66 cents; machinists, 65 cents; 2nd class machinists, 59 cents. In other departments: millwrights, 65, 71 and 75 cents; hydraulic repairmen, 65 cents; cylinder repairmen, 54 cents.

SAULT STE. MARIE, ESPANOLA AND STURGEON FALLS, ONT.—SPANISH RIVER PULP AND PAPER MILLS, LIMITED, AND THE INTERNATIONAL BROTHERHOOD OF PAPER MAKERS. Agreement to be effective from May 1, 1922, to May 1, 1923. This agreement is also similar to that in effect between the Abitibi Power and Paper Company, Limited, and the International Brotherhood of Papermakers. (See LABOUR GAZETTE for August, 1922, page 888).

The rates given for the principal classes in the wage schedule forming part of this agreement are as follows: rate depending on size of machines: per hour: at Soo Mills—Machine tenders, \$1.03-\$1.19; back tenders, 83 cents to

\$1.07; 3rd hands, 69 cents to 75 cents; 4th hands, 57 and 60 cents; 5th hands, 54 to 59 cents. At Espanola—machine tenders, 73 to 90 cents; 3rd hands, 60 to 68 cents; 4th hands, 48 to 56 cents; 5th hands, 47 to 55 cents. At Sturgeon Falls—machine tender, \$1.03; back tender, 83 cents; 3rd hand, 69 cents; 4th hand, 58 cents; 5th hand, 54 cents. These rates at Sturgeon Falls are all for 156" machines, other and lower rates are given for 120" (news) and 120" (only when on hanging). Beater engineers at Soo and Espanola mills, 87 cents; at Sturgeon Falls, 79 cents. Board Mill at Sault Ste. Marie: machine tender, 83 cents; back tender, 61 cents; 3rd hand, 40 cents; others, 38 cents; beater engineer, 61 cents.

THOROLD, ONT.—ONTARIO PAPER COMPANY, LIMITED, AND THE INTERNATIONAL BROTHERHOOD OF PAPER MAKERS AND THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS. Agreement to be effective from May 12, 1922, to May 1, 1923. This agreement is also similar to that in effect between the Abitibi Power and Paper Company, Limited. (See the LABOUR GAZETTE for August, 1922, page 888).

The wages are unchanged from those summarized in the LABOUR GAZETTE for February, 1922, page 230, for the same trade union locals.

Manufacturing—Printing and Publishing

KINGSTON, ONT. — CERTAIN LOCAL NEWS AND JOB OFFICES AND TYPOGRAPHICAL UNION No. 204. Agreement in effect from April 30, 1922, until April 30, 1923.

In printing offices under the jurisdiction of this union all printers employed must be active members of this local.

Hours per week: book and job offices, 44 hours; newspaper offices, 47 hours.

Wages per week—machinist operators: book and job, \$33; newspaper, \$35; operators and all other journeymen employed by the week: book and job, \$31;

newspaper, \$33. Night work in all departments, \$2 extra per night.

All work must be time work.

Overtime, or work done after regular hours, first three hours, time and one-half; thereafter, double time. Holidays, double time.

None but journeymen members of the union or apprentice members in the last six months of apprenticeship to be allowed to operate and practice on typesetting machines in any office under jurisdiction of this union.

Apprentices: one apprentice to five journeymen printers, or major fraction thereof, number not to exceed two. Apprentice not to be less than 15 years of age and to have had common school education. Wages, in third year not less than \$11 per week with \$2 per week increase every six months till expiration of apprenticeship.

Term of apprenticeship, 5 years. A committee on the question of apprentices to be appointed by this union to enquire into qualifications for apprenticeship, and to examine apprentices as to progress being made.

KITCHENER, ONT. — CERTAIN LOCAL FIRMS, AND TYPOGRAPHICAL UNION No. 366. Contract and scale to be in effect from January 1, 1922, until December 31, 1922.

Hours per week, 5 days of 8 hours and 4 hours on Saturday. Six nights of 8 hours to constitute a week in news offices.

Wages for hand compositors, operators, make-ups, proof readers and journeymen not otherwise specified, day work, 65 cents per hour, (\$28.60 per week) and not less than \$30 per week for night work. Machinist operators, day work, not less than \$35 per week. Overtime, time and one-half. Sundays and holidays, time and one-half.

Apprentices: wages, per week—first year, \$6; second year, \$7; third year,

\$9; fourth year, 1st 6 months, \$12; 2nd 6 months, \$14; fifth year, \$16 and \$18.

One apprentice to every four journeymen.

Foreman and local apprentice committee to examine applicants as to whether they are mentally and physically fitted to the trade. Apprentices to be not less than sixteen years of age; to be registered by the secretary of the local and to serve 5 years. Opportunities must be provided for apprentices to learn the different processes of the trade.

If an apprentice is careless or neglectful, case to be investigated and presented to the union for action.

Apprentices must undergo yearly examination as to whether they are entitled to increased wage scale.

Foremen of printing offices may employ help and discharge for incompetency, for neglect of duty or to decrease the force.

REGINA, SASKATCHEWAN. — CERTAIN LOCAL FIRMS AND INTERNATIONAL BROTHERHOOD OF BOOKBINDERS No. 205. Agreement to be in effect from May 1, 1922, until April 30, 1923.

Hours per week, 44. Wages, per hour, journeymen, 91 2-3 cents. Overtime, 1st three hours, time and one-half; thereafter, double time. Sundays and holidays, double time.

Apprentice scale for men: first six months, per week, \$10, increasing every six months as follows; \$12, \$14, \$17, \$21, \$25, \$30, and 8th six months, \$34. Thereafter, minimum wage per hour, 91 2-3 cents.

One apprentice to every four journeymen or major fraction thereof.

Girls' scale: hours per week, 44. Wages per week, \$19. Overtime, 1st three hours, time and one-half; thereafter, double time.

Apprentices: wage per week, 1st six months, \$10; 2nd six months, \$12; 3rd

six months, \$15; 4th six months, \$18; thereafter, \$19.

In case of reduction, those last employed to be first discharged; in case of temporary lay-off, it must be of the persons last employed. In increase of staff, persons laid off to be first reinstated, and in reverse order to that in which they were discharged.

Provision made for arbitration in case of disputes.

CALGARY, ALTA.—CERTAIN EMPLOYING FIRMS AND BOOKBINDERS' UNION, No. 211. Agreement to be in effect from May 1, 1922, until October 31, 1923.

The agreement is similar to the one summarized in the LABOUR GAZETTE for July, 1921, page 945, in all respects except the wage scale.

The revised wage scale is as follows:

Minimum wage per week, journeymen bookbinders, finishers and rulers, \$40.70; journeywomen, \$19.50.

Apprentices: men, per week, 1st 6 months, \$9; 2nd 6 months, \$10; 3rd 6 months, \$12; 4th 6 months, \$14; 5th 6 months, \$16; 6th 6 months, \$18; 7th 6 months, \$20; 8th 6 months, \$22. Thereafter, scale.

Girl apprentices: per week—1st 6 months, \$9; 2nd 6 months, \$10; 3rd 6 months, \$12; 4th 6 months, \$14; 5th 6 months, \$16; 6th 6 months, \$18; thereafter, scale.

A further reduction of wages is agreed upon for November 1, 1922.

CALGARY, ALTA.—DAILY NEWSPAPER PUBLISHERS AND CALGARY TYPOGRAPHICAL UNION No. 449. Agreement as to scale of prices and hours to be effective from May 16, 1922, to November 15, 1922.

Minimum scale of prices to members of the union departments covered by the contract now in force, per hour, from May 16, 1922, to November 15, 1922, 92½ cents; from November 16,

1922, to May 15, 1923, 90 cents; 45 hours day or night to constitute a week's work.

"If the cost of living, same to be compiled on the basis of the budget as published in the *Labour Gazette*, but for the Province of Alberta only, does not show a greater fluctuation as between the month of April, 1922, and the month of April, 1923, than 12½ per cent, then the aforesaid rate of 90 cents per hour shall apply to journeymen members of Typographical Union No. 449 for one year longer, viz.,—from May 16, 1923, to May 15, 1924. The figures of the Labour Department at Ottawa shall be accepted by both parties to this agreement. In the event of a greater fluctuation than 12½ per cent, this agreement shall expire on May 15, 1923, and both parties agree that negotiations will be opened for reconsideration of this scale."

MEDICINE HAT, ALTA.—MEDICINE HAT NEWS, LIMITED, AND TYPOGRAPHICAL UNION No. 451. Agreement to be in effect from May 16, 1922, to May 15, 1923.

Employers to employ in composing rooms and departments thereof only mechanics and workmen who are good standing members of the local.

Scale of prices: per hour—make-ups, admen, bankmen, journeymen engaged in hand composition or distribution, operators of typesetting machines, machine tenders (machinists), proof readers, copy preparers; for six months from May 16, 1922, to November 15, 1922, 92½ cents; for six months from November 16, 1922, to May 15, 1923, 90 cents. Machinist operators, for same two periods, \$1.02½ and \$1.00. (On one machine; 10 cents per hour extra for each additional machine.)

Hours per week, 44, not more than 8 hours per day on each of five days, and not more than 4 hours on a sixth day to be arranged.

The provision for cost of living is identical with that quoted above from the Calgary Typographical agreement.

Manufacturing—Clothing

SAULT STE. MARIE, ONT.—CERTAIN LOCAL FIRMS AND JOURNEYMEN TAILORS' UNION No. 73. Agreement to be in effect from March 10, 1922, until March 10, 1923, and for one additional year unless 15 days' notice of change be given.

Wages: per week—tailors, pressers, operators, \$30; helpers, \$21. Women to be paid same scale as men providing they do the same class of work.

One helper to be allowed for every three skilled workmen.

All employees in shops of employers signing the agreement to be union members. Non-union employees to become members within 10 days.

Hours per week, not more than 48. Overtime, time and one-half. Sundays and holidays, double time. Weekly system to prevail in all departments.

No cessation of work in case of any disagreement as to hours and wages until matter is investigated according to the constitution of the union.

Work to be equally divided, particularly in the slack months. No person to be discharged through scarcity of work during the slack season.

Manufacturing—Vegetable Foods, Drink and Tobacco

FERNIE, B.C.—FERNIE FORT STEELE BREWERY COMPANY, LIMITED, AND UNITED BREWERY, FLOUR, CEREAL AND SOFT DRINK WORKERS No. 308. Agreement to be effective from June 1, 1922, until May 31, 1923.

Only union members to be employed as brewers, bottlers, coopers, teamsters, engineers and firemen.

Firm to notify union secretary to furnish help when required. Should union be unable to furnish help during the busy season, extra help may be employed. all extra men having permit cards, issued by the union.

None to be discharged or discriminated against for upholding union principles, or for serving on committees.

Hours per day, eight. Overtime, time and one-half. Six days per week in all departments excepting engineers. Sundays and holidays, double time, engineers excepted.

Minimum wages: per day, brewers, cellarmen, kettlemen, coopers, \$5.75; wash-house men and other men employed in the brewery, \$5.50; men in bottle-shop, \$5.15; teamsters, per month, \$137.50; first engineers, \$175 per month; second engineers, \$165 per month, Sundays and legal holidays included; black barrel coopers, \$5.15 per day. New men, first six months, \$4.15 per day; second six months, \$4.65 per day.

Sickness to be no excuse for discharge.

Differences arising over interpretation of this agreement to be referred to arbitration.

During working hours all employees to receive beer free of charge, as heretofore, providing this privilege is allowed by law.

VANCOUVER, B.C.—CERTAIN BREWERY PROPRIETORS AND UNITED BREWERY, FLOUR, CEREAL AND SOFT DRINK WORKERS OF AMERICA, No. 281. Agreement to be effective from April 1, 1922, to April 1, 1923.

Skilled workers to join the union within fifteen days of being engaged. Present employees to be admitted to membership at the signing of this agreement. Extra help may be employed during busy season if supply of union men fails, such help to have permit cards.

No union member to be discharged or discriminated against for upholding union principles or working on a committee.

Hours per day, nine for five days and five on Saturdays, or if nine hours are worked on Saturdays, man so working to have a half holiday during the week. Engineers and firemen to work seven days, and after one year to have two weeks' vacation each year without deduction of pay.

In case of reduction of staff through curtailment of business, seniority of service to govern.

Sundays and holidays, double time, except for engineers and firemen. Overtime, time and one-half.

Minimum wages: per week—brewers, cellar and kettle, \$26; wash-house men, \$26; coopers with tools, \$27; firemen (seven days), \$25; bottlers, machine operators and packers, \$25; all other labourers over three months' service, \$25; truck drivers, \$27.50; helpers on trucks, \$25; apprentices, \$18. Company to be entitled to four apprentices in the bottling department to start apprenticeship between the ages of 16 and 18 years and serve one year.

Differences to be adjusted by a Board of Arbitration, the Minister of Labour, if necessary, appointing the fifth member. Pending the settlement of a dispute or arbitration of same there shall be no strike or lockout.

If no competent union men with references are available, company may employ as they see fit.

Construction

WINDSOR, ONT.—THE BUILDERS' AND CONTRACTORS' ASSOCIATION OF ESSEX COUNTY (MASONS' SECTION) AND BRICKLAYERS', MASONS' AND PLASTERERS' UNION No. 6. Wage agreement to be in effect from July 5, 1922, until March 31, 1924.

Wages per hour to be \$1.15.

OTTAWA, ONT. — MASTER PLUMBERS' ASSOCIATION AND UNITED ASSOCIATION OF PLUMBERS AND STEAMFITTERS, LOCAL 71. Agreement to be in effect from July 1, 1922, until April 30, 1924, or from year to year unless notice is given not later than January 2 in each year.

Hours of labour—On five days, 8 a.m. to 5 p.m., with one hour for lunch; on Saturdays from 8 a.m. to 12 noon.

Minimum wages: per hour, journey-men, 80 cents.

Overtime after 5 p.m. on eight-hour days and after 12 noon on Saturdays, time and one-half until midnight; thereafter, double time. Sundays and holidays, double time. Absolutely necessary repairs and finishing up a repair job on regular working days, if not more than one hour's time, regular rate.

Men working out of Ottawa to have fare and board paid. Travelling time to be paid up to 9 p.m.

Employers to use their efforts that all in their employ at present or in the future shall be union members, but they may hire non-union labour when union labour cannot be provided. Employees agree that no union member shall work except for a member of the Master Plumbers' Association when the same can provide work.

All apprentices to serve continuously in one shop unless otherwise agreed upon; to serve two years as helpers and then pass a satisfactory examination before a joint examining board. After this, apprentice may work with the tools for two years, at not less than 40 cents per hour for the first 12 months and 50 cents for the second. Apprentice must then pass a final examination for journeyman. If he fails, he is to continue as an improver for six months and then be examined again. No more than one apprentice for every three journeymen in each shop to apply for this examination during any one year. One apprentice only to be employed for each steamfitter and plumber employed.

Grievances to be settled by arbitration. In event of a dispute arising which cannot be settled thus, or of any violations of the agreement, matter to be referred to the General Office of the United Association and no strike or lock-out shall take place until a decision has been rendered.

OTTAWA, ONT.—ASSOCIATION OF CANADIAN BUILDING AND CONSTRUCTION INDUSTRIES AND STONEMASONS' UNION No. 14. Agreement to be in effect from March 3, 1922, until April 30, 1923, with four months' notice of change.

Hours per day, 8, between 8 a.m. and 5 p.m. On Saturday, 4, between 8 a.m. and 12 noon. Overtime from 5 p.m. until 10 p.m., time and one-half including Saturday afternoons; from 10 p.m. until 8 a.m., and holidays, double time. In case of two or more shifts, regular rate of wages to be paid.

Minimum wages: per hour—85 cents.

Disputes to be adjusted by a joint industrial council.

Both parties agree to adopt and enforce the national apprentice system. Members of No. 14 to be allowed to lay brick and terra-cotta where mortar is used.

VANCOUVER, B.C. — EMPLOYERS OF GRANITE CUTTERS AND GRANITE CUTTERS' INTERNATIONAL ASSOCIATION. Agreement to be effective from April 1, 1922, until March 31, 1923, or from year to year unless three months' notice of change is given.

Minimum wages, per day, for cutters, sharpeners, machine and lathe men, polishers and sawyers, \$8.

Hours per day, 8, for 5 days. No work on Saturdays. Hours may be reduced to $7\frac{1}{2}$ from December 1, until January 15 if darkness interferes.

No contractor may work men out-doors except in case of emergency, emergency cases being paid \$9 per day. Overtime and holidays, (both to be worked only in cases of emergency), double time. Sawyers, time and one-half for overtime.

No piece work or sub-contracting except to tool sharpeners.

Cut stone contractors to be allowed one apprentice for each gang or fraction thereof, to serve three years cutting granite, and one apprentice tool sharpener to three tool sharpeners, apprentice to serve two years.

No granite cutter to be employed for less than the minimum rate of wages

unless incapacitated by old age or disability, and then only by consent of the branch, this clause not to be construed to prevent an old man receiving minimum rate for an average day's work.

In cases of scarcity of stone or inclemency of weather, one man off, all off, except in case of emergency.

This branch not to cut stone for any contractor supplying cut or rough rock to any non-union firm. Any national, provincial, or municipal law enacted for betterment of wages or conditions in the trade not to be violated by this branch.

Transportation and Public Utilities

(a) Water transportation.

MONTREAL, QUE. — STEAMSHIP COMPANIES AND SHIPLINERS' ASSOCIATION OF THE PORT OF MONTREAL, LOCAL 2098. Agreement to be in effect from August 15, 1922, until December 31, 1923.

The companies on the one hand and the shipliners on the other undertake each to deposit \$500 as a guarantee for the due performance by them of this agreement. Sums to be applied in payment of judgments or orders of any court in the Province of Quebec in favour of the other party, each deposit or balance of deposit being returned to each party on expiration of the agreement.

Wages per hour—day work, 50 cents, working hours being from 7 a.m. until 12 noon and from 1 p.m. until 6 p.m., night work, per hour, 60 cents, working hours being from 7 p.m. until 11 p.m., and from midnight until 5 a.m. Sundays, double time.

Shipliners required to work any meal hour to receive double rate until discharged for meals. If ordered to work at night, men must be ordered out for 7 p.m. and paid full time until discharged or set to work. If ordered to work at 7 p.m. and services are not required, men to be paid a minimum of one hour's pay.

Running of grain in pipes to be stopped when men go into the hold to work.

Night meals to be taken between 11 p.m. and midnight, ship supplying good meals or paying the cost thereof.

Union agrees to supply necessary men to perform the work of shipliners.

(b) Telegraphs and Telephones.

MANITOBA. — THE MANITOBA TELEPHONE SYSTEM AND THE INDEPENDENT ORDER OF TELEPHONE WORKERS. Agreement to be in effect from May 1, 1922, until April 30, 1923, with 30 days' notice of amendment, or 60 days' notice of termination.

No discrimination against employees for union activities. Management at all times by appointment to receive a committee appointed by the employees.

Hours of work—on city and exchange work, 44 hours per week. Shift work, straight time for 8 consecutive hours, 44 hours per week.

Overtime, time and one-half; after midnight and Sundays and legal holidays, double time.

After one year's service, employees to receive one week's holidays with pay. After two years, two weeks.

In lay-off, last men employed to be first laid off.

Promotions to be made according to seniority and efficiency.

Apprentices to be not less than 17 years of age. Promotions of apprentices to be according to seniority with ability.

Employees detailed for work away from headquarters to be allowed \$2.50 per day for board and lodging, special cases being given special consideration.

Provisions made for travelling expenses.

Men required to do automatic maintenance repair or construction work to be given a practical course of at least 3

months' preparatory tuition in order of seniority.

The commission to assume all responsibility for and pay all loss of wages and costs due to any infections or contagious diseases contracted by an employee or his dependants as a result of authorized performance of duties.

Grievances to be investigated by a committee of employees or of the union, with right of appeal to the superintendent.

Wages: per hour—apprentices, 1st year, 35 cents; 2nd year, 45 cents; 3rd year, 58 cents; 4th year, 70 cents. Employees on staff, not journeymen at May 1, 1922, 3rd year, 70 cents, 4th year, 80 cents. Journeymen: per hour—rackmen and installers, 87 cents; inspectors (combination), 89-92 cents; P.B.X. installers, P.B.X. inspectors, test clerks, shop switchboard construction men, 89 cents; switchboard men, 92 cents; shop instrument repairmen and shop mechanic, 87 cents. Per month: power plant attendants, \$165; supervisors (automatic), \$190.

MANITOBA. — THE MANITOBA TELEPHONE SYSTEM (TRAFFIC DEPARTMENT), AND PROVINCIAL OPERATORS. Wage schedule effective May 1, 1922.

After 12 months' continuous service, all operators of the permanent telephone staff, 2 weeks' holidays with regular pay.

Overtime and all legal holidays, time and one-half. Overtime of day operators from 12 midnight until 7.30 a.m. (8 a.m. on Sundays), double time. All Sunday work, double time.

Hours per day, 8; per week, 48 for day operators.

Night operators who can sleep the greater portion of the night to be paid the regular schedule rate. Hours, 10 p.m. to 8 a.m. Overtime for Sundays and holidays, 8 a.m. to 12 midnight. Night operators at exchanges where regular relief is provided to be on duty not more than 10 hours in each 24, and to be given 2 hours rest each night.

Operators coming within this schedule not to engage in any other gainful occupation without the written consent of traffic superintendent.

Wages: class "A" Exchanges, toll and information: probationers, \$2 per day; per month, increasing from \$54.50 for first three months of first year to \$69.50 for second six months of third year; \$72 after three years, and \$77 after four years. Hours per day, general offices, from 8.30 a.m. to 5 p.m. with one hour and 15 minutes for lunch; Saturday, office hours to be 8.30 a.m. to 12 noon. (This clause not to apply to provincial offices).

After one year's service, two weeks' holiday each year with pay.

No deduction for absence from duties caused by sickness, provided the employee has been in the service for over one year and absence does not exceed two weeks in any one year.

Vacancies to be filled by promotion if possible.

Salaries: male clerks, \$100 per month; increase \$5 every six months to \$120 per month. Junior male clerks, \$65-\$95; office boys, \$40-\$60; female clerks, \$65-\$85; stenographers and typists, \$70-\$90; janitors, \$80 minimum; special rates where janitor does firemen's work.

Effective May 1, 1922, a reduction of \$5 per month to be made in the salaries of all employees covered by this agreement.

MANITOBA. — THE MANITOBA TELEPHONE SYSTEM AND INDEPENDENT ORDER OF TELEPHONE OPERATORS. Agreement to be in effect from May 1, 1922, until April 30, 1923, and from year to year thereafter unless amended by 60 days' notice in writing.

No discrimination on account of affiliation with the union. Telephone commissioner at all times to receive committee appointed by the operators.

Operators after one year's service to receive two weeks' holidays with pay in each successive year, and after three months' service but less than one year, prior to the holiday period (commencing May 1), one day's holiday with pay for each successive month's service.

Operators desiring Saturday afternoon off may with consent of the chief operator take the same without pay. All day operators to be allowed not less than 4 hours off duty with pay in each alternate week during June, July and August. During the other months they shall be allowed not less than 4 hours off duty with pay in every 4 weeks.

Overtime including all legal holidays, time and one-half. Overtime of day operators, between 12 midnight and 7.30 a.m. (8 a.m. Sunday), double time. Sunday work between 8 a.m. and 11 p.m., double time.

When an operator is suspended, matter may be taken up by a committee with the Commission.

In city and suburban exchanges, 48 hours to constitute a week for supervisors and operators.

No operator except under extraordinary circumstances to be allowed to work more than 5 hours on Sunday.

Any person appointed to visit operators when absent from duty on account of sickness to be appointed only after

consultation with a committee of the employees.

Schedule of wages: city and suburban exchanges—probationers during school period if appointed, \$2 per day. Rates per month: 1st 3 months, \$55; 2nd 3 months, \$57.50. (Hereafter when two rates per month are given the former is the rate on local and information and the other the rate on toll.) 2nd 6 months, \$60 and \$62.50; 3rd 6 months, \$62.50 and \$67.50; 4th 6 months, \$65 and \$70; 5th 6 months, \$67.50 and \$72.50; 6th 6 months, \$70 and \$75; after 3 years, \$72.50 and \$77.50; after 4 years, \$77.50 and \$82.50. Long distance rate clerks, same as toll operators. Long distance messengers, outside, \$52.50; inside, \$47.50. Supervisors and night chief operators: 1st year, \$87.50 and \$92.50; 2nd year, \$92.50 and \$97.50; 3rd year, \$97.50 and \$102.50. Assistant chief operators, 1st year, \$97.50 and \$102.50; 2nd year, \$102.50 and \$107.50; 3rd year, \$107.50 and \$112.50. Complaint clerks: 1st year, \$85; 2nd year, \$90; 3rd year, \$95. Information service clerks: 1st 6 months, \$77.50; thereafter, \$82.50. Summary clerks, 1st 6 months, \$90; thereafter, \$97.50. Routine test clerks, \$87.50.

All overtime to be paid on a basis of 48 hours per week and actual working days in the month.

All experienced routine test clerks in automatic exchange to receive \$87.50 per month and to be on duty 44 hours per week according to regulations governing plant employees. Shifts worked Sundays and legal holidays, double time.

When a new position is created or vacancy occurs on routine test clerk staff, it shall be filled by the senior applicant from operating department at salary received for 3 months. Night shift to be a junior shift and not to be paid maximum salary until 3 months' satisfactory experience has been gained on routine.

MANITOBA. — THE MANITOBA TELEPHONE SYSTEM AND INTERNATIONAL

BROTHERHOOD OF ELECTRICAL WORKERS, Nos. 1037 and 435. Agreement to be in effect from May 1, 1922, until April 30, 1923, with 30 days' notice of amendment.

Union members not to be discriminated against. The M. T. S. Commission at all times to receive a committee appointed by the employees.

Each local to appoint standing grievance committee of three, who shall have right of appeal to the superintendent on behalf of an employee with a grievance, or further, to the commissioner.

Hours per week, on city and exchange work, 44. On provincial construction and maintenance (not including district men and trouble men), 48. In shift work, any 8 consecutive hours (exception, one hour intermission for meals) to constitute a day. Employee whose shift extends over Saturday afternoons and Sundays to have time off on other days, consistent with 44 hour week.

Overtime to be computed on basis of 8 hour day; or for monthly employees, 44 hour week. Overtime rate, except Sundays and holidays, time and one-half. From 12 midnight until 8 a.m., double time.

Employees on monthly salary to be paid overtime only on emergency order. Salary deductions will be made on account of absence from duty in all cases except when on holidays or as recommended.

All members of permanent staff, after 12 months' continuous service, two weeks' holidays with pay.

Provision made for out of town work or permanent moves.

List of established seniority to be published and all such permanent employees shall participate in any benefit schemes adopted by the system.

In reduction of staff, last man employed to be first laid off, and so on.

In reemployment, last man off to be given preference.

The commission to assume all responsibility and pay all loss of wages and costs due to any infections or contagious diseases contracted by employee during performance of duties.

Wages: per hour—journeymen (city): cable splicers, 94½ cents; linemen, 89 cents; troublemen, 94 cents. Journeymen (province): cable splicers, 79½ cents; linemen, 74 cents; districtmen, \$155 per month; district troublemen, \$150 per month. Apprentices inside plant, per hour, 1st year, 35 cents; 2nd year, 45 cents; 3rd year, 58 cents; 4th year, 70 cents. Linemen—city outside plant, 1st year, 60 cents; 2nd year, 67 cents; 3rd year, 80 cents. Splicers, 1st year, 60 cents; 2nd year, 70 cents; 3rd year, 85 cents. Linemen outside plant—province, 1st year, 45 cents; 2nd year, 53 cents; 3rd year, 62 cents. Cable splicer helper: 2nd year apprentice, 70 cents.

BRITISH COLUMBIA. — THE BRITISH COLUMBIA TELEPHONE COMPANY AND INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS, Nos. 230 and 310. Agreement to be effective from February 1, 1922, until January 31, 1923, and thereafter unless terminated or changed on 30 days' notice.

Only union members to be employed under this agreement. Union will not interfere with employer for discharging employees where sufficient cause can be shown.

Any committee of employees with a union officer appointed to interview management concerning any matter affecting this agreement to be given a hearing.

Hours: per day, 8; Saturdays, 4. In shift work, any 8 consecutive hours (except intermission for meals) to constitute a day. Employees whose shift extends over Saturday afternoons and Sundays to be allowed time off on other days, consistent with the 44 hour week.

Overtime, time and one-half from 7 p.m. to 8 a.m. and Sundays. Allowance made for travelling time and for board and lodging when away from headquarters.

An apprentice without previous experience must serve 3 years for work such as shop, central office maintenance, switchboard and substation installation work, line and cable construction.

Except where journeymen are not to be obtained, ratio of apprentices to journeymen not to exceed one to four, except for shop men, when this ratio shall not apply.

Wages per day: journeymen: cable splicers, \$8; linemen, switchboard men, installers, shopmen, troublemen, inspectors, repeatermen, \$7; groundmen, \$5.50. Apprentices (linemen, cable splicers, troublemen), less than 6 months, \$4; less than 12 months, \$4.30; less than 18 months, \$4.70; less than 24 months, \$5.20; less than 30 months, \$5.80; less than 36 months, \$6.50. Apprentices—switchboardmen, repeatermen, shopmen, installers, less than 6 months, \$3.60; less than 12 months, \$4; less than 18 months, \$4.50; less than 24 months, \$5.10; less than 30 months, \$5.75; less than 36 months, \$6.50.

Nothing herein to be construed to reduce the pay of an employee now getting a higher rate of pay for work classified above. No rate of pay in excess of the amount listed to be allowed except on approval of general superintendent.

(c) *Other Public Utilities.*

BRITISH COLUMBIA. — THE BRITISH COLUMBIA ELECTRIC RAILWAY COMPANY, LIMITED; VANCOUVER POWER COMPANY, LIMITED; THE VANCOUVER ISLAND POWER COMPANY, LIMITED; AND THE WESTERN POWER COMPANY OF CANADA, LIMITED, AND THE INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS. Agreement to be effective from March 1, 1922, until February 28, 1923, and thereafter on 30 days' notice.

Only union members to be employed under the agreement by the companies signing the same or be contractors or sub-contractors working for them, except in rural districts where prospective customers may set poles to meet companies' lines.

The union representative to be furnished with a pass through all employers' shops and stations and an "all lines" transportation pass.

Representative of the union, or representative and a committee to be given an early hearing by management on any matter affecting the agreement.

Employees to be given special concessions regarding consumption of gas and electricity, and in certain cases transportation concessions.

An apprentice to mean an employee not having had three years' experience in one or more branches of the trade. All apprentices to serve three years before being rated as journeymen, except where journeymen cannot be obtained. Ratio not to exceed one apprentice to four journeymen in each department.

Overtime, time and one-half. Between 7 p.m. and 8 a.m. and on Sundays and holidays, double time.

Allowance to be made for board and lodging to employees working away from home on a temporary job.

Special provisions made for work on high voltage wires.

Station operating staff: not more than one apprentice to four journeymen. Monthly days off not to be taken whilst on night shift. When three shifts are worked, they are to be by the revolving watch. Eight hours to constitute a day's

work. In case of sickness a reasonable amount of time to be allowed with pay. Overtime: time and one-half to be allowed off for overtime work. Men working more than one shift in 24 hours to have time and one-half off for second shift.

"Four days monthly vacation and fourteen days annual vacation to be allowed with pay." Men having worked less than one year to have one day's holiday for each month.

Metermen: eight hours per day; reasonable time off for sickness with pay; time and one-half to be allowed off in the event of working overtime.

Are trimmers: eight hours per day; forty-eight per week; reasonable time off for sickness with pay; time and one-half to be allowed off in event of working overtime; one day per week to be allowed off with pay; one week's holiday a year with pay.

Wages: per day—line department and wiremen: journeymen cable splicer, \$8; journeymen lineman, wireman, armature winder, transformer winder, troubleman, repairman, track bonder, \$7; auto driver, groundman, \$5.50. Apprentice linemen and wiremen: beginners, \$4; 6 months, \$4.30; 12 months, \$4.70; 18 months, \$5.20; 24 months, \$5.80; 36 months, \$7. Apprentice cable splicer: beginners, \$7; 12 months, \$7.20; 24 months, \$7.50; 36 months, \$8. Per month: operator, according to station, \$154, \$162 and \$175; apprentice operator, 1st year, \$126; 2nd year, \$130; 3rd year, \$140; engineer in charge, according to station, \$163, \$175 and \$200; floormen, \$126; load dispatchers, \$205. Meter department: metermen, \$142; apprentices, 1st year, \$114; 2nd year, \$126; 3rd year, \$132. Are trimmers, are tester and repairman, \$136.

PRICES, RETAIL AND WHOLESALE, IN CANADA, AUGUST, 1922.

LOWER prices for grains and livestock caused a fall in the index number of wholesale prices in spite of a substantial increase in prices of coke, while prices of coal were to a great extent nominal. In retail food prices there was an increase due chiefly to advances in potatoes.

In retail prices the average cost of a weekly family budget of 29 staple foods in some sixty cities at the beginning of August was \$10.44 as compared with \$10.27 for July; \$11.44 for August, 1921; \$16.42 for August, 1920; \$11.68 for August, 1917; and \$7.68 for August, 1914. The total for food, fuel and rent averaged \$20.88 for August; \$20.67 for July; \$21.98 for August, 1921; \$26.60 for August, 1920; \$18.48 for August 1917; and \$14.41 for August, 1914. No marked changes occurred in foods except a seasonal advance in potatoes. Beef and veal were slightly lower while mutton and pork were up somewhat. Rice and evaporated apples fell slightly, but most of the other items showed small advances, the chief of which were in dairy products and sugar. Bread and flour were unchanged. Fuel was slightly higher, while rent remained practically at July levels.

In wholesale prices the Departmental index number of 271 commodities stood at 222.8 for August as compared with 225.3 for July; 224.3 for June; 236.4 for August, 1921; 330.2 for August 1920; 301.1 for August, 1919; 247.3 for August, 1917, and 136.3 for August, 1914. The chief changes for the month were substantial declines in grains, fodders, livestock, and smaller declines in meats, butter, cheese, flour, raw cotton, raw silk, jute, cement, linseed oil, and turpentine. The principal increases were in sugar, potatoes, hides, pig iron, Connelville coke, lath, and soil pipe. Some of the metals advanced slightly.

The index number of wholesale prices is based on the quotations for 271 commodities and is the simple average of the percentages of current prices of the several commodities in relation to the average prices for the base period, 1890-1899, these being, therefore, made equal to 100. The quotations for most farm products are obtained weekly and averaged for the month; the quotations for other commodities are taken for the middle of the month. The table of index numbers shows the changes by groups and sub-groups for the previous month and for the corresponding months back to 1913.

A special index number (comprising fifty of the more important commodities selected from the 271 commodities in the Departmental list) including 20 foods, 15 raw materials, and 15 manufactured goods, based upon price levels in 1913 as 100, showed a decline to 148.3 for August as compared with 150.7 for July; 149.3 for June; 158.0 for August, 1921; and 236.7 for August, 1920. The decline in this index number, as in the Departmental index, was mostly due to the declines in grain, fodder, livestock, and meats.

The index number of wholesale prices in Canada published by the United States Federal Reserve Board including 33 raw materials, 28 semi-manufactured or producers' goods, and 38 finished or consumers' goods and based upon price levels in 1913 showed a small decline in June at 153 as compared with 154 for May; 152 for April and 165 for June, 1921. Goods produced, goods exported, and raw materials fell, while goods imported and producers' goods advanced. Consumers' goods were stationary.

Professor Michell's revised index number of wholesale prices in Canada from 1919 to date, based on 40 articles with prices during 1900 to 1909 as 100,

declined slightly. The figure for August stood at 164.7 as compared with 165.3 for July; 164.5 for June; 176.7 for August, 1921, and 254.4 for August, 1920. Foodstuffs continued to decline but manufactured good advanced.

The Canadian Bank of Commerce index number of prices of imports continued to rise, owing to increases in the price of metals, coke, and sugar. For August the number stood at 171.49 compared with 161.68 in July. The index of exports declined slightly to 153.89 in August as compared with 154.23 in July. The combined index of exports and imports rose from 157.95 in July to 162.69 in August.

The table of retail prices and rentals shows the prices at the beginning of August of over one hundred staple foodstuffs, groceries, coal, wood and coal oil, and the rent for six-roomed houses in some sixty cities throughout Canada. All prices are for delivered goods. The exact quality, for which the quotation is given, is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity, in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except milk and bread, are the averages of quotations reported to the Department and to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. The prices of fuel and the rates for rent are reported by the correspondents of the LABOUR GAZETTE.

Statistics similar to these were published each month from 1910 to 1920, the figures being secured at the middle of each month by the correspondents of the LABOUR GAZETTE resident in each locality from dealers who did a considerable business with workingmen's households. From 1910 to 1915 the table contained a list of only the twenty-nine foods included in the family budget, with laundry starch, coal, wood, coal oil

and rent. In 1915, when monthly publication of the budget in the LABOUR GAZETTE was begun, it was decided to extend the list of foods to 40, and in 1920 the list of foods and groceries was still further extended to include over 100 items.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts, with good modern conveniences. The second class is of houses in fair condition less desirably located, but still fairly central without modern conveniences.

The weekly budget of a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil, and rent, these being the items for which statistics have been obtained each month and published in the LABOUR GAZETTE since January, 1910. The quantities of each commodity included are modifications of those employed in similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes, and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportion of expenditure on the various classes of foods tends to be maintained. At times when the price of an article heavily weighted for this purpose rises (or falls) abnormally the increase (or decrease) in food prices so indicated is exaggerated, and this should be taken into account in using the budget as an indicator of changes in the cost of living. In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while

(Continued on page 1026)

no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. It was estimated, when the budget was first published in 1912, that these calculations represented from sixty to eighty per cent of the expenditure of an ordinary family, according to the total income. For the average family of five the expenditure on these items of food, fuel, light and rent would be perhaps two-thirds or about sixty-five per cent of the total income. While the budget serves to show the increase or decrease from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province. The quantities of meats, dairy products, cereals, etc., included were adopted as affording a liberal supply for the healthy family of a man at hard physical work. On the other hand an average family with an income sufficient to do so would buy less meat, etc., but more fruits, fresh and canned vegetables, etc., so that the comparative expenditure would be little changed.

Retail Prices

Meats at the beginning of August on the whole averaged slightly lower. Sirloin steak was down about $\frac{1}{2}$ c in the average at 31.7c per pound. Prices in Nova Scotia and New Brunswick averaged higher but in the other provinces they averaged lower. Round steak averaged lower at 26.6c as compared with 27.1c in July, and rib roast was down in the average to 23.9c. Shoulder roast averaged 17.3c in August as compared with 17.8c in July. Veal was down in the average from 19.1c in July to 18.7c in August, increases in some localities being offset by decreases in others. Lamb averaged lower in all provinces except Ontario and Saskatchewan where prices averaged higher. Mutton, roast pork, and mess pork were steady for the most part. Pork chops were up from 34c in July to 34.8c in August. Bacon, not sliced, showed little change in the aver-

age at 42.5c in July and 42.7c in August. Ham was up 1c per pound in the average at 68.4c, the increase being fairly general. In fresh fish cod, halibut, and herring averaged slightly higher, while haddock and whitefish were lower. Salt herring and salt cod were up somewhat. Canned salmon showed little change. Lard was steady.

Eggs, fresh, advanced from an average of 33.9c in July to 35c in August. Cooking eggs also were up to 32.8c in August as compared with 31.4c in July. Milk was steady. Butter was up slightly. Dairy solids averaged 35.7c in August and 35.1c in July, being up in all provinces except Nova Scotia, Alberta, and British Columbia. Creamery prints rose from an average of 42c per pound in July to 43.3c in August. The advance was general. Old cheese was little changed but new cheese showed a general advance in all provinces, being up $\frac{1}{2}$ c per pound in the average to 26.7c.

Bread was unchanged. Flour, rolled oats, and cornmeal were steady. Rangoon rice was down from 9.9c per pound to 9.4c. Canned vegetables showed little change. Onions were generally lower, averaging 9.3c per pound. New crop potatoes were quoted for the most part. The average was up from \$1.32 per 90 pound bag to \$1.75. Evaporated apples were down slightly. Prunes, raisins, and currants were steady. Jam and canned fruits showed little change. Granulated sugar rose from 8.4c per pound in July to 8.9c in August. The advance was general. Yellow sugar showed about the same general advance as granulated. Tea rose somewhat while coffee remained steady.

Anthracite coal was up in the average from \$16.93 per ton to \$17.26. Increases occurred in Windsor, Sault Ste. Marie, Fort William, and Winnipeg. In some localities no prices of anthracite coal were available, none being on the market. Bituminous coal was up 10c per ton in the average to \$11.10. Increases occurred in Woodstock, Port Arthur,

Fort William, Calgary, and Vancouver. Wood, hard and soft, showed little change. Rentals were steady.

Wholesale Prices

GRAINS AND FODDER.—Wheat, No. 1, Manitoba Northern, at Winnipeg, which was quoted at \$1.29 per bushel the last week in July, rose to \$1.33 at the beginning of August but by the end of the month had dropped to \$1.08. Barley, No. 3 Western, at Winnipeg, fell from 61c per bushel the first week in August to 55c in the last week. Ontario barley at Toronto fell from 65c at the beginning of the month to 58c toward the end. Oats at Winnipeg, which were quoted at 46c the last week in July, rose to 49c at the first of August, but declined steadily to 44c at the end of the month. American corn fell from 81c per bushel to 79c. Flax seed declined from \$2.20 per bushel the first week in August to \$1.90 by the last week. Rye declined from 95c to 70c by the end of the month. Hay at Montreal fell \$6.00 per ton to \$20.00. Bran at Toronto declined from \$25.25 per ton to \$22.00 and shorts from \$27.00 to \$25.00.

ANIMALS AND MEATS.—Cattle at Winnipeg were down from \$6.00 per hundred pounds to \$5.75. Butcher steers at Toronto also declined 50c per hundred pounds to \$7.00. Dressed beef hind-quarters, at Toronto, fell from 21c per pound at the beginning of the month to 17c at the end. Forequarters fell from 11c per pound to 9c. Veal was steady. Live hogs at Toronto were quoted at \$13.25 per hundred pounds at the end of July but declined to \$12.00 by the end of August. Hams at Montreal fell 2c per pound to 28c. Mess pork at Toronto rose from \$33.00 per barrel to \$36.00. Sheep and mutton were steady. Dressed lamb declined from 27c per pound to 25c.

DAIRY PRODUCTS.—Creamery butter at Montreal advanced from 33½c per pound at the beginning of August to 35c at the end of the month. Dairy butter at

Toronto was steady. Cheese at Montreal declined from 16c per pound at the end of July to 15½c at the end of August. Fresh eggs at Montreal advanced 4c per dozen to 40c. New laid eggs at Toronto rose from 36c early in August to 42c in the last week. Milk at Montreal and Victoria was steady but at Toronto the price of an eight-gallon can advanced 10c to \$1.85.

FISH.—Reports from Lunenburg indicate that the spring catch of cod fish has all been sold. Adverse weather conditions for drying enabled the fishermen to maintain a price of \$7.75 per quintal. The summer catch is reported heavy and as a result the season is likely to be a profitable one for the fleet. Market conditions abroad were reported good. In pickled fish the market is very poor. Last year's herring are still plentiful at Halifax at \$5 per barrel. The catch this year was reported to be very small with prices nominal at \$5-\$6 per barrel ex-vessel. The mackerel market continued quiet at about \$8 per barrel. In canned lobsters the English market was slow with dealers well stocked. Lower prices were expected.

FRUITS AND VEGETABLES.—Peaches at Toronto were quoted at 50c to \$1.25 per eleven quart basket but later the price fell to 40c-\$7. Plums fell from 40c-50c per six quart basket at the beginning of the month to 20c-30c by the end. Pears were quoted at 60c-75c per eleven quart basket the last week in August. Bananas, lemons, and oranges were steady at the previous month's prices. New potatoes at Toronto were quoted at \$1.50 per 90 pound bag. Tomatoes fell from 60c per eleven-quart basket at the end of July to 30c at the end of August. Onions at Toronto were quoted at \$3.50 per hundred pound sack. Canned peas declined from \$1.75 per dozen tins to \$1.52. Canned tomatoes and corn were steady.

MISCELLANEOUS FOODS.—Bread was unchanged from last month's figures. Flour, spring wheat patents, at Toronto, fell 10c per barrel to \$7.90. Granulated

(*) Preliminary figures. (†) Five commodities off the market, fruits, vegetables, etc. One line of spelter was dropped in 1915. (‡) Revised. (a) The number of commodities varies from month to month.

sugar advanced from \$7.64 per hundred pounds to \$7.89. Honey declined from 18c per pound to 15c. Maple sugar rose 2c per pound to 16c.

TEXTILES.—Raw wool, yarn, and beaver cloth were steady at last month's levels. Raw cotton at New York fell from 22.2c per pound to 20.85c. Most lines of manufactured cottons were reported to be unchanged. Raw silk fell from \$7.60 per pound to \$7.20 but machine silk advanced from \$17.25 per pound to \$18.25. Jute was down from 11.08c per pound to 9.64c. Hessians also declined from 13.27c per pound to 12.51c.

HIDES, LEATHER, BOOTS, AND SHOES.—Hides, steers and cows, at Toronto rose 2c per pound to 10c. Calf skins also showed an advance from 12c per pound to 16c. No changes were reported in leathers or boots

METALS AND IMPLEMENTS.—Pig iron rose from \$32.00 per ton to \$37.00. Iron bar also showed a small advance to \$3.25 per hundred pounds. Steel billets were steady. Copper, lead, quicksilver, spelter, and tin advanced slightly while aluminum, antimony, and nickel were unchanged. Silver bar at New York fell from 70 3/8c per ounce to 69 3/8c.

FUEL AND LIGHTING.—Quotations on coal were nominal at last month's levels. Connellsville coke at the ovens advanced

from \$9.50 per ton about the middle of July to \$14.50 about the middle of August, but by the end of the month had declined to about \$11.00 per ton. Gasoline was down 1/2c per gallon to 34c. Coal oil was down from 21c per gallon to 20c.

BUILDING MATERIALS.—Lath at Ottawa advanced from \$10.00 per M to \$11.00. Very few changes were reported in lumber. Cement declined 5c per barrel to \$3.70. Roofing pitch was down from \$1.65 per hundred pounds to \$1.55. Soil pipe rose from 38 3/4c per foot to 45 1/3c. Cut nails advanced 20c per keg to \$4.60 while wire nails declined from \$3.70 per keg to \$3.50. Sash weights were up 25c per hundred pounds to \$3. Linseed oil declined from \$1.13 per gallon to \$1.12. Turpentine was down 10c per gallon to \$1.70. Benzine was 1 1/2c per gallon lower at 34c. Shellac fell from \$4.85 per gallon to \$4.70. Window glass was down about 10 per cent from last month's levels.

HOUSE FURNISHINGS.—No changes of importance were reported in house furnishings.

DRUGS AND CHEMICALS.—Copperas was up from \$1.65 per pound to \$1.75. Other lines were reported steady.

MISCELLANEOUS.—Mink skins declined 50c each to \$12.50. Raw rubber at New York was up from 17 1/4c per pound to 17 3/4c. Newsprint was steady.

PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes and the accompanying tables give the latest information available as to the movement of prices in other countries as compared with Canada. An official index number of wholesale prices in Sweden is the subject of another article in this issue.

The index numbers of retail prices which are listed are from official sources unless otherwise stated. The authorities for the wholesale price index numbers are named in all cases.

Great Britain

WHOLESALE PRICES.—The Board of Trade's index number of wholesale prices which has for base prices in 1919=100, was 163.7 for July as compared with 163.2 for June. In foods the increase for the month under review was barely over .2 per cent. In articles other than food, the chief rise was one of 2.9 per cent in cotton, the total increase for the group being .3 per cent.

(Continued on page 1032)

*For France, South Africa, Australia and New Zealand base is taken as 1000 instead of 100. (a) Cost of food budget. (b) 15th of month up to end of 1920; beginning of month thereafter. (c) Beginning of month. (d) Calculated from annual index number. (e) Quarter beginning in specified month. (f) 15th of month. (g) Foods, fuel and lighting, and rent. (h) Average of prices returned at two dates in the month. (i) Issued by Union of Swiss Co-operative stores. (j) Beginning of previous month. (k) Municipal Labour Office, Rome. (l) Food, clothing, rent, heating, lighting and sundries. (m) End of previous month. (n) Average for April-September. (o) Average for October-March. (p) Average for year. (q) Base is average for 6 capital towns. (r) Four chief cities. (s) U.S. Bureau of Labour Statistics. From January, 1913, up to and including December, 1920, only 22 articles of food included. (t) Massachusetts Special Commission on Necessaries of Life. (u) In 1920, 50 articles in 49 towns.

*For South Africa, Australia and New Zealand base is taken as 1000 instead of 100. a. Average for year. b. Quarter beginning in specified month. c. 230 commodities, 1890-1909; 272, 1910-1914; 271, 1915-1922. d. New index number is joined to old index number (38 commodities) and all converted to base 1913-100. e. The commodities in these two new index numbers are in the one case articles chiefly exported; in the other case, articles chiefly imported. f. First of month. g. Middle of month. h. End of month. j. Monthly average.

The *Statist* index number, in continuation of Sauerbeck's figures, showed a decrease for July 31 of 1.2 per cent on June 30. In the foodstuff group, advances in vegetable and animal foods were partially offset by a decline in groceries. A slight decline in materials brings the index of that group back to the May level.

The *Economist* index number of wholesale prices for July showed another very slight increase, being .15 per cent above the figure for June, making the number for July 199.8. The main food group declined 6 per cent during the month owing to reductions in potatoes and barley, although wheat, flour, oats, mutton and rice were slightly dearer. In "other foods", there was a drop in the price of butter; the textile group decreased 1.3 per cent; and there was a rise in the mineral group of 3 per cent, due to a quickening in the export demand for steam coal for the United States.

COST OF LIVING.—The Ministry of Labour index number of cost of living for September was 1.1 per cent below that of the previous month. On the base prices in July, 1914=100, the group figures were as follows: food, 172; rent, 153; clothing, 235; fuel and light, 190; sundries, 195.

France

WHOLESALE PRICES.—The official index number of wholesale prices stood at 375.8 in July as compared with 375.7 in June, showing scarcely any change. Foods decreased 3.3 per cent and industrial materials increased 2.9 per cent during the month.

Germany

COST OF LIVING.—The official index number of cost of living—food, heating, lighting and rent (based on prices in 1913-14=100) rose to 4990 in July as compared with 3779 in June. Figures compiled by the revised method as described in the LABOUR GAZETTE for July, page 801, are published in the ac-

companying table, compilation by the old method having been discontinued. The increase for the month under review is extraordinarily large, being 32 per cent, whilst from May to June the increase was 9.2 per cent. The increase in July for foods alone was 33.5 per cent, an important factor being the seasonal change in potatoes. In none of the cities of the enquiry was the increase in the cost of living less than 20 per cent.

Switzerland

COST OF LIVING.—The index number issued by the Union of Swiss Co-operative Societies for foods, fuel and washing materials has stood at practically the same level for four months: May, 1, 158; June 1, 157; July 1, and August 1, 158—(base, June 1, 1914=100). Of the 46 articles 26 showed no change from July 1 to August 1; 11 showed increases of 1-11 per cent; and 9, decreases of 1-11 per cent. In foods the only decrease was a seasonal one of 10 per cent in potatoes, counterbalanced by slight increases in other articles.

The Swiss Labour Office is now publishing an index number of cost of foods, fuel and lighting. This is calculated (1) on the base June, 1914=100, (2) on the base, the corresponding month in the previous year=100, and (3) as a chain index. It is published as for three classes of consumers: officials and non-manual workers (Beamte und Angestellte), skilled manual workers (Gelernte Arbeiter), and unskilled manual workers (Hilfsarbeiter). The index is based on daily records of household consumption and expenditure kept for the whole year, 1920, by 222 families. Thus the new index differs from that computed by the Union of Swiss Co-operative Societies in that the latter is based on the 1914 standard of consumption. The official figures for July, on base June, 1914=100, follow:

	Food	Fuel & Light	All
Non-manual workers.	158	176	160
Skilled or semi-skilled manual workers.	157	177	159
Unskilled manual workers	157	169	158

India

COST OF LIVING.—The official index number of cost of living in Bombay was 2 points or 1.2 per cent higher for July than for June, but is considerably below the levels of July, 1919, 1920, and 1921 (186, 190, and 177). The index of foods increased 3.4 per cent, while fuel and lighting, clothing and house rent remained unchanged.

United States

WHOLESALE PRICES.—The index number for July, compiled by the Federal Reserve Board (prices in 1913=100) showed that prices during July increased 4 points or 2.6 per cent as compared with June. Imported goods advanced 5 points, to 129 and domestic goods increased 4 points, to 162. Raw materials rose 6 per cent, producers' goods, 1.4 per cent, but consumers' goods declined .6 per cent.

The index number of wholesale prices compiled by the Bureau of Labour Statistics rose 3 1/3 per cent for July. The largest increase was for the group fuel and lighting, the index of which rose nearly 13 per cent. Farm products advanced 3 per cent, foodstuffs, 1 1/2 per cent, and building materials 1 3/4 per cent. Smaller increases were shown in

cloths and clothing and metals and metal products. Slight decreases were shown in house-furnishing goods and chemicals and drugs. Miscellaneous commodities showed no change.

Gibson's average index number of wholesale prices of 22 articles of food for August was 67.4, a decrease of 7.5 per cent on the July figure. This is the lowest figure since January, and the second decline during the year 1922.

Bradstreet's general index number for September showed that even less change had taken place during August than during July. The index stood at 12.0793, eight one-hundredths of one per cent higher than at August 1. Thirty commodities advanced, thirty-three declined, and forty-three remained unchanged.

RETAIL PRICES.—The index number of retail prices of foods compiled by the Bureau of Labour Statistics showed an increase of .7 per cent for the month ending July 1. The chief increases were granulated sugar, 7 per cent; strictly fresh eggs, 6 per cent; navy beans, 5 per cent; potatoes, 3 per cent. The chief decreases were onions, 13 per cent; cabbage, 10 per cent; hens, 3 per cent.

OFFICIAL INDEX NUMBER OF WHOLESALE PRICES IN SWEDEN.

A DESCRIPTION of an official price investigation by the Commerce Department of Sweden, involving the construction of an index number of wholesale prices is given in the July issue of the *Federal Reserve Bulletin*, the official journal of the United States Federal Reserve Board, the information being taken from the issue of *Kommersiella Meddelanden* for May 26, 1922.

The new index number is described as follows:

The indexes constructed for commodities and commodity groups measure the fluctuations in monthly prices since January, 1920, in terms of the prices for the corresponding months of 1913. Thus January, 1921, is ex-

pressed as a percentage of January, 1913, etc. For individual commodities, on the other hand, additional monthly indexes are also computed, using the average price during the entire year 1913 as a base. The field of this official inquiry is limited to the course of wholesale prices from the beginning of 1920, and no effort has been made to cover the abnormal war period.

The selection and inclusion of commodities in the index was largely determined by the relative rank of the different articles entering into the 1913 domestic trade. A deviation from this standard was made, however, in the case of agricultural products whose output is strongly affected by seasonal influences. For such commodities the average value for a five-year period, 1909-1913, was used as a criterion. A trade turnover value of 5,000,000 kronor was set as the minimum for the in-

clusion of the majority of the commodities. In certain instances products with a value of 1,000,000 kronor were included in order to obtain balanced proportions between different commodity groups with characteristic price movements. The final selection comprised a list of 160 series of market quotations. Each commodity was weighted ac-

cording to its estimated trade value in 1913. The aggregate weight or value represented by the commodities amounted to 1,783,000,000 kronor according to 1913 prices, or about two-thirds of the total domestic trade of Sweden.

The accompanying table shows the index numbers by groups.

INDEX NUMBER OF WHOLESALE PRICES IN SWEDEN CONSTRUCTED BY THE COMMERCE DEPARTMENT
(Respective months, 1913=100)

RECENT LEGAL DECISIONS AFFECTING LABOUR

THE two legal decisions summarized below have reference respectively to compensation for injured employees of the Dominion government in Quebec, and to workmen's compensation in Sas-

katchewan. A legal decision of a United States Court respecting the powers of the United States Railroad Labour Board is summarized elsewhere in this issue.

Dominion Government railway employee in Quebec may elect after injury to come under compensation law of that province, notwithstanding any agreement to the contrary.

A workman employed in laying bricks at St. Malo, Que., for the Canadian National Railways was permanently injured when the scaffold on which he was standing collapsed. He brought an action under the workmen's compensation law of Quebec against the deputy minister of the Department of Railways and Canals, alleging inexcusable fault, and claiming \$7,000 indemnity. The action was taken under the Dominion Workmen's Compensation Act, 1918, as amended in 1919, and under an order-in-council of May 29, 1920.

The act of 1918 provides that an employee of the Dominion Government injured in the course of his employment, or the dependant of such an employee who was killed, is entitled to compensation according to the law of the province in which the accident occurred, but employees of government railways in order to come under this act must elect, *prior to the injury*, to accept compensation under it in lieu of the benefits provided by the Provident Fund Act. By the amendment of 1919 election may be made *before or after the injury*. The order-in-council named as defendant in any action taken under a provincial workmen's compensation law by an injured government employee the deputy minister of the department in which the injured workman had been employed.

It appears that on the day before the accident a locomotive engineer had removed some supports from under a scaffold in order to allow room to take a tender out of the shop. The engineer and the employee responsible for scaffolds

had neglected to replace the supports, and their absence caused the scaffold to collapse. On behalf of the defence it was claimed that the plaintiff had participated in the Provident Fund of the Government Railways, and that following the accident and before commencing this action he had drawn benefits from this fund; that the State contributed to the Provident Fund; and that the plaintiff in drawing his benefits had signed receipts freeing the government from all claims for damages or compensation of any kind to which he might be entitled. Against this argument the plaintiff opposed Article 7339 of the Quebec Civil Code, which declares absolutely null every agreement contrary to the workmen's compensation provisions of the Code. To this the defence replied that the discharge which the plaintiff had given had been in accordance with an agreement made *prior* to the date of the order-in-council which placed the Crown within the scope of the law of workmen's compensation.

It was held by the Court that Article 7339 should be interpreted as making void every agreement which had the effect of depriving the workman of the advantages which the workmen's compensation law assured him, whether the agreement was made *before or after* the law came into effect, that is to say, it refused to recognize any agreement between an employer and workman incompatible with its provisions. The Dominion government, in decreeing that in case of industrial accidents its employees might come under the compensation

law of the province in which they were employed, renounced every advantage and privilege which its participation in the benefit organizations of its employees assured it.

The proof having been established that the accident was due to the inex-

cusable fault of the employees of the defendant, the sum of \$3,000 to which the plaintiff was entitled as compensation was raised to \$4,000, and judgment was given for this amount with costs.

(*Quebec—Fiset vs. Bell*).

Workmen's compensation awarded in Saskatchewan after failure to recover damages at common law, but costs deducted.

A railway employee in Saskatchewan had lost a leg in an accident in the course of his employment. He brought an action against his employer at common law. In the trial court the jury brought in a verdict for the plaintiff and judgment was entered in his favour for the amount awarded. The company appealed against this judgment, and the judgment was reversed in the Court of Appeal on the ground that there was no evidence of any negligence on the part of the company. The workman then applied for compensation under the Workmen's Compensation Act of Saskatchewan and was awarded \$2,000 compensation. (Particulars of this case were given in the April issue of the LABOUR GAZETTE on pages 454 and 455.) The company appealed against this decision and the case was heard in the Saskatchewan Court of Appeal. The grounds upon which the appeal was based were as follows:

(1) The trial judge had no power to assess compensation and adjudge that the same be paid to the plaintiff because, (a) he did not make any finding on the trial or endorse on the record that the injury to the plaintiff was one for which the defendants would be liable to the plaintiff under the Workmen's Compensation Act, and (b) he did not assess the compensation within thirty days after the judgment of this Court on the appeal; (2) The learned judge erred in not deducting from the compensation which he awarded the defendants' cost of the trial and the costs of appeal.

The Court held that the trial judge was right in rejecting the contention of

the defendants on both branches of the first grounds of appeal. With regard to the first branch, a previous judgment of the Supreme Court of Canada (*Marshall Brick Company vs. York Farmers Colonization Company*) was held to be conclusive. With regard to the second branch, in the opinion of the Court the law does not require that the assessment should be actually made within the thirty days.

With regard to the second ground of appeal the Court held that the trial judge erred in refusing to deduct from the compensation awarded the costs of the trial and of the appeal which had been awarded to the defendant company. While the disposition of costs is in the discretion of the trial judge "that discretion must be a judicial one and based upon proper principles. The reasons given by the learned judge show that he exercised his discretion, not judicially, but benevolently toward the workman." It was the opinion of the Court that except where special circumstances are shown, a workman who brings an unsuccessful action independently of the Act should have deducted from the compensation awarded him under the Act the costs which he compelled the defendant to waste by his improper demand.

Costs, with respect to the original trial and appeal were therefore allowed to the defendant company, but no costs of the present appeal were allowed as the company had failed on the major part of their appeal.

(*Saskatchewan—Perry vs. Canadian Pacific Railway Company*).

DEPUTY MINISTER—F. A. AGLAND.

Volume 22

OCTOBER, 1922.

Number 10.

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST.

**This issue
in brief**

In addition to the regular monthly articles relating to industrial conditions, strikes, wage agreements, wholesale and retail prices, etc., in Canada, this issue contains a number of articles of general interest, among which may be mentioned one describing the new co-ordination policy for immigration and land settlement, and another summarizing the two decisions of the Permanent Court of International Justice on matters of interest to labour.

At the beginning of September the percentage of unemployment as reported by trade unions stood at 3.6 as compared with 4.1 per cent at the beginning of August, and with 8.7 per cent at the commencement of September, 1921. Employment, as indicated by returns furnished by over 6,100 employing firms, showed a further upward movement during August and the situation was again more favourable than during the same month of last year.

The average cost of the weekly family budget of 29 staple foods was \$10.28 at the beginning of September as compared with \$10.44 for August; \$11.82 for September, 1921; \$15.95 for September, 1920; and \$7.83 for September, 1914. The total for food, fuel and rent averaged \$20.90 for September as compared with \$20.88 for August; \$22.37 for September, 1921; \$26.38 for Sep-

tember, 1920; and \$14.33 for September, 1914. In wholesale prices the index number stood at 220.5 for September as compared with 222.8 for August; 232.7 for September, 1921; 326.6 for September, 1920; and 141.3 for September, 1914.

The time loss due to industrial disputes was less during September than during the previous month but greater than during September, 1921. There were in existence during the month 18 strikes involving about 15,275 workpeople with an estimated time loss of 91,900 working days. Three of the strikes were reported as having commenced during September. One of the strikes commencing prior to September and one of those commencing during September terminated during the month, leaving 16 strikes involving about 2,465 workpeople on record at the beginning of October.

**Proceedings
under the
Industrial
Disputes
Investigation
Act, 1907.**

During the month of September the Department received the reports of seven Boards of Conciliation and Investigation established to deal with disputes between (1) the Michigan Central Railway Company and certain of its employees, being machinists, boilermakers, blacksmiths, carmen, electricians

and sheet metal workers, members of the Federated Shop Crafts; (2) the Père Marquette Railway Company and certain of its shop craft employees, being machinists, boilermakers, blacksmiths, electricians, carmen, etc.; (3) the Père Marquette Railway Company and certain of its employees, being members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees; (4) the New York Central Railway Company as represented by its officers in charge of the railway shops at Ottawa and certain of its employees, being members of the Federated Shop Crafts at Ottawa; (5) the Grand Trunk Railway System and certain of its employees, being clerks, freight handlers, stationmen, stationary engineers and firemen, oilers, roundhouse shop and store labourers, etc., members respectively of the Canadian Brotherhood of Railroad Employees and the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees; (6) the Marconi Wireless Telegraph Company of Canada, Limited, and certain of its employees, being members of Federal Labour Union No. 16570, American Federation of Labour; and (7) the Marconi Wireless Telegraph Company of Canada, Limited, and certain of its employees, being certified Marconi Wireless Operators, members of the Commercial Telegraphers' Union of America, System Division No. 59.

During the month three applications were received for the establishment of Boards, and in one case a Board was established.

Jottings.

It is stated that the British Empire Steel Corporation have made plans to build a number of new dwellings for their employees at Sydney Mines next year, in accordance with recommendations contained in the report of a Board of Conciliation. The report of the Board was printed in the June issue of the LABOUR GAZETTE. It is further stated that the

Corporation propose selling building lots to their employees at a nominal cost on easy instalments, for the benefit of those who wish to build their own houses. Further recommendations of the Board as to the pulling down of old houses and the repair of others are being carried out by the Corporation.

A Minimum Wage Board has been appointed in Alberta in conformity with the Minimum Wage Act which was passed at the recent session of the Provincial Legislature. The new Board, which began to function early in October, is composed as follows: Chairman, Mr. A. G. Browning, Edmonton, deputy attorney-general of Alberta; employees' representative, Mrs. Harriet J. Ingram, of the Garment Workers' Union, Edmonton; employers' representative, Mr. James Kellas, secretary of Retail Merchants' Association; secretary of the Board, Mr. Walter Smitten, Calgary.

The requirements of the Manitoba Electricians' License Act of 1917 will henceforth be strictly enforced, according to an announcement by the provincial Department of Labour. During September, at Winnipeg, a journeyman electrician was found guilty of and given suspended sentence for failing to obtain a license as required by the act.

The New Brunswick Schools Act of 1922, which consolidates and revises the previous Schools Acts, contains a section providing that School Boards may, subject to such regulations as may be approved by the Board of Education of the Province, make arrangements for establishing savings banks in the schools. The work connected with these banks must not be done in hours prescribed for teaching, except in schools in which the teaching hours are not less than six each day.

The Canadian Association of Child Protection Officers, at a convention held at Toronto on September 29, passed a resolution, which was proposed by Mr. K. C. McLeod, of the Alberta Mothers' Allowance Board, calling for a reciprocal agreement between the provinces

whereby a widowed mother moving from one province to another could have her allowance paid by the Board of the province to which she removes.

The Western Ontario United Boards of Trade, at a recent convention, endorsed a proposed amendment to the Provincial Workmen's Compensation Act to provide for an extension of the principle of "merit rating." It was alleged that careful manufacturers with a good accident record were at present made to pay for firms which were careless of the safety of their employees. A proposed Town Planning bill was also approved by the convention.

The Dominion Association of Fire Chiefs, in convention at Chatham in August last, appointed a committee which was instructed to apply to the Dominion Government for assistance in drafting a scheme for insurance protection and old age pensions for firemen, and to bring such scheme before the next convention.

The Ontario Safety League displayed an exhibit of safety appliances at the Canadian National Exhibition which was held in Toronto recently. Among the exhibits were guarded punch presses, cutting machines, belt guards, safety cabinets and goggles. A safety window was shown which enables the upper sashes to be cleaned from the inside of the window. The exhibit also contained various other safety devices.

It is announced that a department of commercial economics is planned for the Western University, London, Ont. The study courses will include industrial management and factory management, in addition to commercial law, statistics, commercial distribution, sales management, advertising, and other phases of business. Professor Morrow will be in charge of the department.

The Masonic Lodges of Saskatchewan are offering 30 scholarships of \$300 each to secure properly qualified teachers for the pioneer rural districts of the province. A copy of conditions on which

these scholarships are awarded can be had from Principal George M. Weir, Normal School, Saskatoon, or Mr. W. B. Tate, grand secretary, A. F. and A. M., Regina. Thirty-one such scholarships were awarded by the Masonic lodges last year.

A movement to establish a labour college in Cape Breton, Nova Scotia, has recently been set on foot at Sydney and Glace Bay. Committees of labour men have co-operated in both places in obtaining lecturers for the current term, and during the coming winter it is proposed to arrange a series of lectures by college professors and others. It is stated that the proposed college has the support of the membership of District 26 of the United Mine Workers of America.

Mr. J. Arthur Nelson, general manager of the Federation Service, a labour-owned and operated moving picture education company in New York, has announced that the organization will shortly begin the production and distribution of a motion picture series to be known as the "Labour News Weekly," to organized labour bodies of the United States and Canada for exhibition at their regular weekly meetings.

The building tradesmen of Bloomington, Illinois, have announced the formation of a co-operative building guild to provide workmen with houses at cost. The guild is stated to be on similar lines to the British co-operative building guilds and is headed by a former vice-president of the Illinois State Federation of Labour.

Unemployment benefits distributed in Great Britain, under government unemployment insurance, during the last two years amount to £77,000,000, according to a recent statement by the Minister of Labour, the Right Honourable T. J. Macnamara. The cost of distribution of this relief amounted to £7,500,000. During the coming winter, the Minister announced, the Government would be prepared to assist the unemployed with fresh relief work schemes

up to £10,000,000, while a further £45,000,000 was available for the payment of benefits under the unemployment insurance scheme.

The American Federation of Labour is stated to be preparing to organize a law information bureau and service to check the use of injunctions in labour disputes, to help to secure the repeal of the Kansas Court of Industrial Relations Act and the abolition of the Colorado Industrial Commission, and to defeat the measures cropping up in various state legislatures for the incorporation of unions. Information will be furnished to labour journals and to speakers for use at union meetings, and a legal staff will be organized to deal with the situation.

The second international congress on mutual aid and social economics will meet at Rio de Janeiro, March 15 to 31, 1923, in connection with the centenary celebration of the independence of Brazil. The subjects to be considered will come under the following five heads: Mutual aid, co-operation, insurance, social economy and social hygiene.

At the International Conference of Central Organizations for Workers' Education, which took place at Brussels in August last, a resolution was passed requesting the Belgian organization to ensure the maintenance of relations between the organizations represented at the Conference until the next conference in 1924, and to consult the International Federation of Trade Unions on the possibility of setting up a permanent central office for the international movement for workers' education.

**Labour
representative
on directorate
of Canadian
National
Railways.**

A new Board of Directors has recently been appointed by the Dominion Government for the Canadian National Railways and the Grand Trunk Railway,

the two railway systems being now combined into a single organization. The Directors for the combined system are as follows: Major-General Sir Henry

Worth Thornton, K.B.E., London, England, and Messrs. John H. Sinclair, K.C., New Glasgow, N.S., Richard P. Gough, Toronto, of the firm of Sellers-Gough; James Stewart, Winnipeg, General Manager of the Maple Leaf Milling Company, formerly chairman of the Canadian Wheat Board; Ernest R. Decary, Montreal, ex-president of the Montreal Civic Commission; Frederick G. Dawson, Prince Rupert, B.C., wholesale merchant; Tom Moore, Ottawa, president of the Trades and Labour Congress of Canada; Graham A. Bell, Ottawa, Deputy Minister of Railways and Canals; and Gerald G. Ruel, Toronto, General Counsel. Special interest to labour attaches to the appointment of Mr. Moore as labour representative on this Board.

**Interprovincial
boiler
regulations.**

The Canadian Interprovincial regulations for the construction and inspection of boilers and

machinery were recently adopted by the Province of Ontario, as noted in the LABOUR GAZETTE for July, 1922, (p. 705). They had been already adopted by the four western provinces. These regulations, which are published in the *Ontario Gazette*, September 9, 1922, are the result of a movement which had been in progress for the past twelve years. They are designed to secure uniformity in the various provisions made under Provincial laws for the safety of boilers. Moreover, as the introduction to the regulations points out, the "standardization of design and construction is an important desideratum for economic production, and the maintenance of a good standard both of design and workmanship is of vital importance not only to steam users, but it is also in the best interests of the industrial welfare of the Dominion. The members of the Conference have endeavoured to keep all the above objectives in view, and hope that the general adoption of these regulations throughout the Dominion will materially assist in the furtherance of these aims." The movement toward the desired uniformity was

begun by an interprovincial conference which was held at Regina in December, 1909, and was attended by representatives of the governments of British Columbia, Alberta, Saskatchewan, Manitoba and Ontario. Regulations were then drawn up to govern construction and provide for the registration of designs of boilers and fittings. These regulations were adopted by Alberta, Saskatchewan and Ontario, but subsequently differences of interpretation arose between these provinces, and no central committee or board existed which could give authoritative rulings. Accordingly in June, 1914, the Ontario government organized another conference, but the work of this conference was interrupted by the outbreak of the war, and its recommendations were not officially adopted by the provinces represented. In 1918 the Manitoba government invited the other provinces to a further conference which was held at Winnipeg in September of that year. This conference was attended by representatives of Nova Scotia, Quebec, Ontario, Manitoba, Saskatchewan, Alberta and British Columbia. Many new sections were added, and the regulations were redrafted and submitted to the Boiler Code Committee of the Engineering Institute of Canada, the Canadian Manufacturers' Association, and others, for criticism. In April, 1920, a meeting was held at New Westminster to consider the replies received and to revise the regulations where a change appeared advisable. Rules governing air and gas tanks were added, and other amendments were made. The revised regulations were then submitted for approval to the several Provincial Governments, with the results described above.

**Safety work
of Algoma
Steel
Corporation.**

Mr. Frank J. McGue
who is in charge of the
Safety work of the
Algoma Steel Corpora-
tion has outlined in

The Canadian Manufacturer for August last, the methods employed toward reducing accidents during a year's organization. For the year ended November 29, 1921, as compared with the previous

year, the Corporation's records show that there was a reduction in accidents of 69 per cent, in lost time of 72 per cent and in compensation of over 66 per cent, the accident cost for 1920 being \$95,772 while for 1921 it was \$32,089. The article states that it was found necessary to educate everybody on the real cause of accidents, that every accident is due either directly or indirectly to the carelessness of somebody, and that it was necessary to inculcate a sense of personal responsibility as over 90 per cent of accidents occurring in industry were due, not to a failure of the mechanical, but rather to a falling down of the human element. The campaign carried out under Mr. McGue had the backing of the superintendent and general manager, without which he claims it would not have been a success. Appeals were made to the personal pride and interest of the superintendents, foremen and the men by means of publicity in the local press, in the publication of the Corporation, by posters in the way of mottoes and pictures, translated into the languages spoken by the various workmen, and tacked up wherever available, and by safety instruction. New men were required to pass at least a day in a safety demonstration room getting instruction in a particular part of plant where they were to go to work, the room being equipped with instructor, and posters and pictures designed to press upon their minds that there is danger. Power was given to Mr. McGue to investigate any or every accident, to summon any works witness whether superintendent or workman, and to make public full particulars regarding accidents including the names of superintendent and foremen who had been in charge of the injured workers. A prize in the form of a bonus to be determined by the executive was given to a superintendent or foreman who had no accident in any given month, or had reduced his percentage appreciably, and all information respecting this bonus was published in the daily press and in the Corporation's publication. All injured men were given attention by surgeons employed by the Corporation who are on duty at

the plant, and these surgeons furnished daily reports to the Safety Department of all accidents whether there was liability of the injury resulting in absence from work to such an extent as to become a compensation case or not. These reports showed probable period of disability, how frequently the injured man was ordered to report for dressings, and dressings performed. In addition to the checking up of each case through the medical reports there was a system of home visitations, a member of the Safety Department being detailed to do this work.

**Trade union
membership
in United
Kingdom.**

Statistics of the membership of Trade Unions in the United Kingdom at the end of 1921 are given in the British

Labour Gazette for September. The total number of trade unions known to the Ministry of Labour at the end of 1921 was 1,296 as compared with 1,425 at the end of the previous year, the reductions being attributed mainly to amalgamations. The total membership at the end of 1921 was approximately 6,793,000 as compared with 8,493,000 at the end of 1920, a decrease of 1,700,000, or 20 per cent. The number of male members was about 5,760,000 a decrease of 1,371,000, or 19 per cent in the year, and the number of female members was about 1,033,000, a decrease of 24 per cent. These figures include about 71,000 members of overseas branches of certain unions, and a number of persons, principally teachers, who being members of more than one society are counted twice. The net number of members within the United Kingdom is placed at about 6,700,000. From 1913 to 1920 there had been a steady increase in membership, and notwithstanding the decline in 1921, at the end of that year the male membership showed an increase of over 50 per cent compared with 1913, and the female membership an increase of over 130 per cent.

**British
Unemployment
Insurance
(No. 2) Act,
1922.**

The LABOUR GAZETTE for May, 1922, on page 499 contains a summary of the British Unemployment Insurance Act which became law in April last. That Act has since been amended by the Unemployment Insurance (No. 2) Act which came into operation on July 20. Under the former Act unemployment was provided for up to July, 1923, as follows: 37 weeks' benefit was to be given, of which 22 were reserved for the coming winter, the remaining 15 being spread over the period from April 6 to the end of October, 1922, in three periods of five weeks' benefit, each followed by a five weeks' gap. When the first five weeks' gap was reached, the Ministry of Labour received representations from the Poor Law authorities urging that the system of gaps be abolished, as large numbers of persons till then on the insurance funds were brought under the Board of Guardians, thereby increasing the burden of the local ratepayers. As a result the unemployment situation was reviewed and it was found that the situation was better than had been anticipated. The financial position of the unemployment fund showed that only £15,000,000 had been borrowed instead of the £19,000,000 estimated for the period up to July, 1922.

The amending Act increases the maximum number of weeks' benefit that may be authorized during the period from April 6, 1922, to the end of October, 1922, subject to the fulfilment of certain conditions, from fifteen weeks' to twenty-two weeks' benefit, and reduces from five weeks to one week the interval which must elapse after each five weeks' "uncovenanted" benefit (i.e., benefit paid irrespective of contributions) has been received. It provides that for those who have drawn ten weeks' uncovenanted benefit since April, and remained unemployed, there will be one week's gap and five weeks' benefit, one week's gap and five weeks' benefit, and one week's gap and two weeks' benefit. The cost of reducing the gaps

from July 20 to the end of October is estimated by the Government actuary at £2,750,000. The amending act does not affect the payment of "covenanted" benefits (i.e., benefits paid in respect of unexhausted contributions).

British National Building Guild.

The annual conference of the British National Building Guild, Limited, was held at Birmingham on August

12. The president, Mr. H. Frankland stated that there were 150 Guild Committees in existence, of which 70 were actually operating. Work to the value of £1,250,000 had been completed and there was in hand work to the value of £2,500,000, as compared with £600,000 at the time of the previous conference. The Board of the Guild proposed the formation of a Guild Building Society to which the members wanting houses would contribute a fixed weekly sum. When a sufficient sum had been subscribed in certain region the Guild would apportion the number of houses to be built by it in that district, according to the desires of the customers and according to the amount of money subscribed. If possible, ballots would be taken among the subscribers to decide the order of possession. It was estimated that if subscribers paid a weekly sum equal to the current rentals, they would become owners of the houses in twelve years. The conference unanimously agreed to empower the Board to proceed with the Guild Building society scheme.

Employers and the building guilds.

At a conference of the National Federation of Building Trades employers of Great Britain

and Ireland in June last, it was explained that the formation of the National Industrial Council for the industry had given the building guild movement a strong impetus and that the local authorities in those where there were labour members on the Council, had encouraged the guilds. Instances were quoted to show

that advantages had been conferred on guilds under the terms of their contracts which a private employer could not obtain. The following methods of combatting the guilds were suggested: (1) Payment by results, or a standard rate, plus a bonus on output. (2) Payment for wet time, accepting the principle that the workers shall not be put to any loss through causes beyond their control. (3) A constant readjustment of existing conditions and working rules.

Apprenticeship plans for building trades.

Steps are being taken in New York city to introduce a comprehensive apprenticeship system

to meet the need for skilled workers in the building trades. The movement originated at a meeting of the Executive Board of the New York Building Congress on January 10 last, when a general committee on apprenticeship was appointed, which included representatives of investment, design, engineering, material supply, management, labour and related interests. The plan which is being put into operation is based on the principle of having the trade processes taught on the job, instead of in a school. While part of the employment time of an apprentice and his evenings will be devoted to theoretical and technical instruction, the most essential part of the instruction will be given under actual trade conditions. The direct management and operation of the system is in the hands of a General Board composed of equal numbers of representatives from the building trades employers' associations and the building trades unions and jointly financed by employers and workers. Similar joint trade boards have been set up in each trade. It is planned to offer definite assurance of continuous employment by placing the responsibility of obtaining employment for apprentices with the joint trade board of each particular industry instead of with the employer only. It is stated that the New York Building Trades Employers' Association and the New York Building Trades' Labour Council have officially approved

the operation of this system in the Metropolitan district.

The Industrial Association of San Francisco has adopted a scheme for the intensive training of apprentices in the building trades. Schools for plasterers and plumbers have already been opened, and it is intended to set up as soon as possible schools for bricklayers, tile setters, painters and other craftsmen. Applicants for admission to the school of plasterers have to pass an intelligence as well as a physical test. The training lasts eight hours a day, five and a half days a week, and continues for three months. Those who have taken the full course are put to work at once and after a year's experience they are considered competent journeymen plasterers. Applicants for admission to the school of plumbers are also required to pass an intelligence test and they are divided into three groups according to their rating in this test. The members of the first group work two weeks in the school and four weeks in outside shops. At the end of the first two weeks the second group begins a two weeks' course in the school followed by four weeks outside. It is then succeeded in the third group, and after the two weeks' course of this group is completed, the first group again returns to the school. The rotation is kept up until each group has had a minimum of eight weeks in the school. The students receive no pay when at school, but when at work outside they receive the regular apprenticeship wage of \$2.50 per day.

Safety methods for coal mines.

At the annual meeting of the Mine Inspectors' Institute of America which was held in Chicago, Illinois, on July 11, 12 and 13, a number of important recommendations were made to promote greater safety in the coal mines. Among these were four recommendations for standardized methods which the Institute hopes to have adopted and made uniform throughout the United States, as follows:

(1) That a new type of underground danger signal of the following description be made uniform in all mining regions: A square divided into four quarters by two lines drawn from opposite corners so as to cross at the middle. Each quarter of the square should be devoted to a single class of dangers: thus, the upper left hand quarter should be devoted to gas; the lower left hand quarter to bad roof; the upper right hand quarter to electric wires and the lower left hand quarter to "blackdamp".

It was stated that with this arrangement made uniform it would be possible for any man who is capable of making a cross to chalk up a danger warning that all could understand whether they could write and read the English language or not.

(2) That worked-out and abandoned portions of mines either be thoroughly ventilated or sealed off with a masonry wall provided with a valve permitting periodic tests of the atmosphere within; and that such areas have vents drilled through from the surface.

(3) That tests for gas be made with a non-luminous flame, using a flame safety lamp of one of the types approved by the United States Bureau of Mines, and burning fuel also approved by the Bureau for each specific type.

The Institute held that portable electric lamps should be used for general lighting and flame safety lamps always for testing.

(4) That in cases where machine runners are equipped with electric lamps, men possessing certificates of competence as gas inspectors test every working place before a machine starts to work in the place, and make another test during the machine run or immediately thereafter.

Mr. J. W. Paul, mining engineer at the Pittsburgh Experimental Station of the United States Bureau of Mines is secretary of the Institute.

Modification of eight-hour day in France.

A Decree was promulgated in September by the Government of France requiring seamen on French merchant vessels to be on duty in future for twelve hours a day instead of eight. This does not imply twelve hours of actual work, however, as a distinction is drawn between

hours of attendance and hours of active service. It was explained that the measure was essential in the interests of the French mercantile marine, as for the past two years France was the only country which had attempted to enforce an eight-hour day in its merchant service, and it was felt that to continue this effort would have involved the ruin of the French shipping industry. The revocation of the eight-hour day law for seamen has led to strikes at various ports of France, which have reached serious proportions at Havre and Marseilles.

**Proposal for
Labour
"university"
in Paris.**

A scheme for a "university of labour" in Paris, France, has been drawn up by the education and leisure committee of the Federation of Trade Unions of the Seine, which proposes that the institution comprise (1) A "school for militant trade unionists," where they could be taught how the principal commodities are purchased, transported and distributed; the effects of the present economic system; objects, methods and utility of co-operative societies; the history of the labour movement, its aims and means of action; the functions and methods of working of every labour body, from the workshop committee in the factory to the international trade union federation; the working of foreign organization; an international language; the working inter-relations and power of financial organizations, their influence on the life of nations, how they are to be fought and replaced, and labour solutions of present day problems. The school would also train its pupils in public speaking by teaching methods of debate, how to prepare speeches, etc. (2) A "popular university" addressing itself to the general public, for the purpose of diffusing and popularizing ideas on social, scientific, economic and literary progress. (3) Technical courses. (4) Courses in industrial law and social jurisprudence. (5) A section for sports and health. (6) A children's section (guardianship, holiday camps, nurseries, crèches, etc.). (7) A section for domes-

tic training, and matters of interest to women. (8) A library and publications section. The organization would be managed by an administrative council consisting of representatives of the federations of trade unions, co-operatives, teachers, labour sporting clubs, mutual aid societies, the Federation of Popular Universities, the Advisory Chamber of Labour, Associations for Production, as well as of technical bodies and others. The expense of the university would be met by the various organizations concerned.

**International
conference of
Personnel
(Welfare)
Workers.**

The First International Conference of Welfare Workers, organized by the Welfare Workers' Institute of Great Britain and the Association of Welfare Workers of France, took place from July 2 to 8 at the Chateau d'Argeronne in Normandy. There were present delegates from Australia, Belgium, China, France, Great Britain, India, the Netherlands, Roumania, Sweden, Switzerland and the United States, as well as a representative from the International Labour Office. Reports submitted to the convention showed that remarkable progress had been made in the movement in several countries, particularly the United States and that everywhere a change in the character of the movement has been observed. The welfare department is losing the character of a charitable and quasi-paternal institution and is coming to be regarded as a service to which the workers have a right. In recognition of the change the conference adopted the expression "personnel service" instead of the former term "welfare work", and agreed upon the following statement of objects:

In fulfilling its true function industry should render the best possible service to the community with the least possible effort and cost. At the same time it should conserve and develop in industrial life the spiritual, mental and physical wellbeing of all who share in rendering this service.

In any economic system the management of an industrial organization should include the function of properly co-ordinating the human relations and making the best possible adjustments between the individual and the work. This function is called "Personnel Work."

The person who assists the management in carrying out this function is called the 'Personnel Secretary, Manager or Worker'. (No exact title is recommended owing to the different stages of development in each country.

Arrangements were also made for the holding of an international welfare congress in Holland in 1924. A provisional committee was appointed for organizing the congress, and for uniting for this purpose all organizations interested in these questions in every country, including those not represented at the Argeronne conference. The secretariat of this committee is established at Leerdam, Holland (Secretary: Miss Fledderus, personnel secretary in the glass industry).

GENERAL REVIEW OF THE INDUSTRIAL SITUATION.

The Labour Market, Strikes, Prices.

The Labour Market.

CONTINUED expansion on a moderate scale was indicated by the employers making returns during August and the situation was considerably more favourable than during the same period of last year. A slight decline in unemployment was reported by trade unions at the close of the month, the percentage of idleness again being very much smaller than for the corresponding period of 1921. The volume of business transacted by the offices of the Employment Service showed a further increase, largely on account of harvest activity. The number of applications for work, of vacancies notified and of placements effected all exceeded those recorded during July.

on the other hand, contractions were recorded. The declines in the latter region were partly of a temporary character, being due to the slackening up of operations in railroad construction and maintenance on account of men leaving the railways for the harvest fields. The volume of employment in Quebec, Ontario and British Columbia was considerably greater than during the corresponding period of last year; in the Prairie provinces it was slightly larger, while in the Maritime provinces the situation was not quite so favourable.

The most pronounced increases in staff recorded during August were those in iron and steel, which were partly in the nature of recovery from recent losses. Of the additions to staffs of over 2,700 workers, by far the greater number were reinstated in factories producing land vehicles, principally automobiles. Iron and steel fabrication plants, steel shipyards, foundries and machine shops were busier than during July, but offsetting reductions in payroll were recorded by rolling mills and by agricultural implement, weighing and measuring instrument works. Automobile concerns at Ford and Windsor were much more fully staffed than during the preceding month. At Hamilton, Brantford and Walkerville, on the other hand, employment in that industry declined.

EMPLOYERS' REPORTS

The trend of employment as indicated by some 6,100 concerns continued to be upward during August, although the movement was not particularly marked. Conditions were very much better than in the same month of last year, the index number standing 5 points above that for August 31, 1921. In Quebec, Ontario and British Columbia the level of activity was higher than in the preceding month, the gains in personnel in Ontario being the largest. In the Maritime and Prairie provinces,

Locomotive works and steel shipyards in Montreal reported increased activity. Rolling mills in the Sydney district in Nova Scotia were very much less fully employed. Increases of practically the same magnitude as those in the iron and steel group were recorded during August in logging, indicating the commencement of seasonal activity. Additions to staffs were especially pronounced in the Gatineau district and around Three Rivers in Quebec. In Ontario, the largest gains occurred at Pembroke and other Upper Ottawa points, at Haileybury, Massey, Iroquois Falls and Chapleau. Expansion on a rather smaller scale was recorded in British Columbia, at Union Bay, White Rock and Stillwater. On the other hand, activity at Headquarters and Wattsburg in the same province declined. Summer operations in canneries caused considerable activity to be indicated in the edible plant products group during August, mainly in Ontario and especially at Blenheim, Delhi, Hamilton, Harrow, Port Hope, Tilbury, Wellington, Tecumseh, Bloomfield, Dunnville, Leamington and Toronto. Less extensive increases were also indicated in British Columbia. Flour mills, biscuit, chocolate and confectionery factories were busier than in the preceding month, but the sugar plants eased off. The expansion in biscuit and confectionery plants occurred chiefly at Toronto, while Montreal reported the largest declines in the sugar industry. Shipping and stevedoring companies afforded more employment than in July, particularly at Montreal and Vancouver. At St. John, N.B., on the other hand, somewhat smaller staffs were employed. Considerable increases in activity were indicated in the non-ferrous metal industries, especially in nickel and copper smelters and refineries at Copper Cliff and Port Colborne, Ont., and in tin can factories in Vancouver and copper plants at Anyox, B.C. Employment in railway transportation showed an increase in Ontario and the four western provinces. In Quebec and the Maritime district, on the other hand, moderate reductions in employment

were registered. The Canadian Pacific Railway reported the addition of over 400 men to their operation staffs, the Canadian National Railways enlarged their working forces by more than 300 persons, while a minor increase only was recorded by the Grand Trunk Railway. Continued expansion on a smaller scale than in the last few reports was indicated in building construction, especially in Quebec, and British Columbia. General improvement was manifested in the pulp and paper industries, both in the production of pulp and paper and in printing and publishing establishments. The gains in the latter industry occurred chiefly in Winnipeg, while paper mills at Mont Rolland and Montreal, Que., and in Ottawa, Toronto and Kapuskasing, Ont., were much more active. Employment in boot and shoe factories was in slightly greater volume than in July, mainly at Montreal, Que., St. Thomas, Ont., and Vancouver, B.C. The production of electrical apparatus continued to increase. Concerns at Hamilton, Toronto, Stratford and Welland, Ont., and at Montreal, Que., were busier than during the preceding month. The termination of the strike in the western coal fields, which had been in existence for some time, caused the situation to be better. Improvement was also recorded at Inverness and Joggins Mines, N.S. Employment in wholesale and retail trade establishments increased moderately, the gains being of a general character. Fur factories were busier owing to the conclusion of the holiday season. Increases were registered in several centres, notably St. John, N.B., and Ottawa and Toronto, Ont. Telephone concerns reported larger payrolls, chiefly at Toronto. Additions to staff were recorded by musical instrument manufacturers, mainly at Oshawa and Toronto, Ont.

Railway construction and maintenance suffered the heaviest losses in personnel reported during the month, almost 2,400 men having been released by the concerns and divisional superintendents making returns. The declines, as mentioned above, were largely

caused by the exodus of workers to the harvest fields. The Canadian Pacific Railway recorded contractions affecting nearly 2,900 workers, while the Grand Trunk and Canadian National Railways indicated rather small increases in payroll. The Prairie provinces and Ontario registered reductions, those in Saskatchewan of nearly 1,200 workers being the most pronounced. In all other provinces there were increases on a moderate scale. Employment on street railways declined considerably, principally at Toronto. Montreal and Winnipeg companies reported slightly increased activity. Rubber factories at Montreal, Que., and at Kitchener, Hamilton and Toronto, Ont., were busier during August; but employment in the rubber and elastic goods factories decreased to a marked degree, very largely on account of the closing of important plants at St. Jerome, Que., for holidays, supplemented by smaller reductions in payroll at Kitchener, Merriton, New Toronto, Bowmanville and Guelph, Ont. Activity in road construction declined to some extent during August, especially in the regions of Ottawa, Ont., and Oxford, New Glasgow, Sydney and Clyde River, N.S. Increased activity, however, was reported at Walkerville, Pembroke and Toronto, Ont. The completion of the season's cut caused fairly large reductions in personnel, in sawmills, especially in Ontario, Quebec and New Brunswick. The declines, which were of a general character, were recorded by a large number of concerns. Varying conditions were noted in the textile industries. Expansion, partly in the nature of recovery, was indicated in garment factories. On the other hand, the production of thread, yarn and cloth and of hosiery and knitted goods decreased considerably, causing an unfavourable balance in the textile group as a whole. Knitting mills at Truro, N.S., and at Almonte and Woodstock, Ont., were much slacker. Silk goods manufacturers at Brantford and St. Catharines also indicated smaller staffs. Garment concerns in Toronto, Cobourg and Guelph, Ont., and at Montreal and Quebec City

on the other hand, reported a more favourable situation. Petroleum refineries at Montreal, Que., and Sarnia, Ont., registered reductions in payroll.

The volume of employment during August, as mentioned before, was larger than during the corresponding period of last year, a large majority of industrial groups reporting a more favourable situation. Notable among these were lumber and its products, pulp and paper, textiles, electric current, rubber, iron and steel, non-ferrous metal products, mineral products, transportation, construction and maintenance. On the other hand, the index numbers of employment in logging, communication and trade were somewhat lower than at the close of August, 1921.

TRADE UNION REPORTS

Statements tabulated from 1,474 labour organizations with a combined membership of 148,408 persons showed that 3.6 per cent of the members were unemployed at the end of August as compared with 4.1 per cent at the end of July, and with 8.7 per cent in August of last year. (Unemployment as used here has reference to involuntary idleness due to economic causes. Persons engaged in work other than their own trades or who are idle because of sickness, or as a direct result of strikes or lockouts, are not considered as unemployed. As the number of unions making returns varies from month to month with consequent variation in the membership upon which the percentage of unemployment is based; it should be understood that such figures have reference only to the organizations reporting). Greater activity as compared with July was indicated in all provinces with the exception of Nova Scotia and British Columbia and in these two provinces the declines were slight. Improvement was shown in all districts as compared with last year. The situation in the manufacturing industries was better than in July and also than in August of last year. Within the manufacturing group, increased activity was registered by cigar, tobacco, paper mill, furniture,

brass, iron, steel and glass workers. Sugar refinery employees, boot and shoe workers and tradesmen in the printing, publishing and textile trades were not as busy. Garment workers reported practically the same amount of unemployment as in July. Mine workers reported more inactivity, largely in the British Columbia coal fields as an indirect result of the strike situation. In Quebec, asbestos miners were more fully employed. The construction trades recorded slightly more activity than in the previous month, bricklayers, masons and plasterers, electrical workers, granite workers and stonecutters, painters, decorators and paperhangers, plumbers and steamfitters, tile layers, lathers and roofers showing smaller percentages of idleness. More unemployment was reported among steam shovel and dredgemen, bridge and structural iron workers, carpenters and joiners, and hod carriers and building labourers. Slight increases in activity were registered in the transportation group, both steam railways and the shipping and stevedoring divisions sharing in the improvement. Fishermen recorded more employment, while retail clerks indicated a small percentage of slackness. Slightly more idleness was shown by hotel and restaurant employees and stationary engineers and firemen than in July, but civic employees, barbers and theatre and stage employees were somewhat busier.

EMPLOYMENT OFFICE REPORTS

During the month of August, 1922, the reports from the offices indicated a substantial gain in the number of positions offered and placements made as compared with the preceding month. Marked expansion was due to the heavy demands for harvest labour and threshing hands in the Prairie provinces. The offices reported that they had made 58,553 references to positions and effected a total of 56,546 placements, (49,271 in regular employment and 7,275 in casual work). Of the placements in regular employment 45,696 were of men and 3,575 of women. The number of vacan-

cies notified by employers to the Service during the month was 73,179, of which 63,322 were for men and 9,857 for women. Applications for employment registered at the offices numbered 65,857, of which 56,518 were of men and 9,339 of women. As shown in the following table applications, vacancies, and placements increased considerably during the month when compared with the preceding month, but a comparison with the month of August, 1921, indicates that the average daily business of the offices was not so great as in the previous year. The table presents the returns from the offices on the basis of daily averages over half-month periods during July and August, 1922, and during August, 1921.

	July, 1922		August, 1922		August, 1921	
	1st half month	2nd half month	1st half month	2nd half month	1st half month	2nd half month
Applications	1,612	1,626	2,528	2,537	2,896	2,866
Vacancies...	1,444	1,483	2,562	3,061	2,846	3,162
Placements..	1,192	1,218	2,095	2,343	2,255	2,403

PRODUCTION REPORTS

According to the monthly report issued by the Dominion Bureau of Statistics the production of pig iron during August showed a decline of 14.45 per cent as compared with the record for July. A tonnage of 27,123 was reported for the month under review as compared with a production of 31,705 tons in the previous month. The amount of basic pig iron manufactured for further use by the firms reporting declined from 25,419 tons in July to 20,494 tons in August. The pig iron output in August, 1921, was 50,156 tons, an excess of 23,033 tons or 45.9 per cent over that of August of the present year. During the eight months ending August 31 last there was a total production of 251,015 tons, as compared with a total of 413,448 tons produced during the corresponding period of 1921. Three blast furnaces were in operation and seventeen were idle at the end of the month.

The production of steel in August amounted to 59,201 long tons, as compared with 62,767 in July, showing a decrease of 5.68 per cent. The cumulative steel production during the first eight months of the present year was 299,048 tons, as compared with 421,141 tons in the corresponding period of last year. The output of open hearth basic ingots in the first eight months of the present year was 285,852 tons, and the total production of steel ingots and castings for this period was 299,048 tons.

BUILDING
PERMITS AND
CONTRACTS
AWARDED

The value of the building permits issued in fifty-six cities during August showed an increase, mainly on account of marked expansion in British Columbia. Building to the value of \$16,970,125 was authorized during the month as compared with \$14,275,026 in July and with \$9,985,594 in August, 1921. There was, therefore, a gain of \$2,695,099, or 18.9 per cent, in the former comparison and of \$6,984,531, or 70 per cent, in the latter. Saskatchewan, Alberta and British Columbia reported expansion in the volume of building contemplated as compared with July, while in all other provinces the tendency was downward. As indicated above, the gains in British Columbia were especially pronounced, the value of the permits issued standing at \$6,089,240, an increase of \$5,176,330, or 567 per cent, over the July total. Ontario cities registered the largest decline, which amounted to \$1,554,867, or 21.2 per cent.

As compared with the corresponding month of last year, Nova Scotia, New Brunswick and Manitoba recorded less anticipated activity, the decline of \$249,610, or 24.7 per cent, in the value

of the permits issued in the last named province being the most decided. Of the gains in the other provinces, those of \$5,207,152, or 590.3 per cent, in British Columbia and of \$1,372,139, or 31.2 per cent, in Ontario were the largest.

Of the larger cities, Vancouver alone recorded expansion in the amount of building authorized as compared with both July, 1922, and August, 1921. Montreal and Toronto reported contractions in the former and increases in the latter comparisons, while at Winnipeg there were losses in both comparisons. Of the smaller centres, Westmount, Belleville, Oshawa, Stratford, St. Catharines, Windsor, St. Boniface, Saskatoon, Edmonton, Prince Rupert and Victoria indicated expansion both as compared with the previous month and with the corresponding month of last year.

According to the *Canadian Building Review*, issued by Maclean's Building Reports, Limited, the value of the contracts awarded during August totalled \$25,187,500 as compared with \$26,694,200 in the preceding month and with \$36,307,200 in the corresponding month of last year. There was, therefore, a decrease of 5.6 per cent in the former and of 30.6 per cent in the latter comparison. Of the total for the month under review, \$19,905,500 or 79.0 per cent, was to be expended in Quebec and Ontario; \$1,080,000, or 4.3 per cent, in the Maritime District; and \$4,202,000, or 16.7 per cent, in the Western provinces. A further analysis of the figures shows that \$8,612,000 was to be spent for residential purposes, \$7,281,800 on business buildings, \$2,649,000 on industrial projects and \$6,644,700 on engineering contracts.

Strikes.

The time loss due to industrial disputes was less during September than during the previous month but greater than during September, 1921. There were in existence at some time or other during the month 18 strikes involving about 15,275 workpeople with an estimated time loss of 91,900 working days, as compared with 24 strikes, involving 24,006 workpeople and 437,017 working days in August, 1922; and 26 strikes, 3,948 workpeople and 59,849 working days in September, 1921. On September 1, there were on record 15 strikes affecting 14,842 workpeople. Three strikes were reported as having commenced during September as compared with five during August. One of the strikes commencing prior to September and one of those commencing during September terminated during the month, leaving 16 strikes involving about 2,465 workpeople on record at the beginning of October.

Prices.

The index number of wholesale prices continued to fall in September. The family budget of retail food prices was slightly lower than in August, while the retail price of fuel was somewhat higher.

The index number of wholesale prices stood at 220.5 for September as compared with 222.8 for August; 232.7 for September, 1921; 326.6 for September, 1920; 246.1 for September, 1917; and 141.3 for September, 1914. The fall in the index number was due chiefly to decreases, in some respects seasonal, in

prices of farm products and foods, and also in Connellsville coke which fell sharply from the high level of August. There was, however, a seasonal advance in dairy products, the other chief advances for the month being in maple sugar, raw cotton, raw silk, hides, pig iron, turpentine, and some raw furs, with less important advances in bar iron, quicksilver, axes, nails, and wire. The chief declines were in grains and fodders, cattle and beef, hogs, mutton and lamb, fruits and vegetables, flour, granulated sugar, Connellsville coke, and linseed oil.

In retail prices the average cost of a weekly family budget of 29 staple foods in some 60 cities was \$10.28 at the beginning of September as compared with \$10.44 for August; \$11.82 for September, 1921; \$15.95 for September, 1920; \$11.65 for September, 1917; and \$7.83 for September, 1914. The total for food, fuel, and rent averaged \$20.90 for September as compared with \$20.88 for August; \$22.37 for September, 1921; \$26.38 for September, 1920; \$18.57 for September, 1917; and \$14.33 for September, 1914. The only marked change in foods was a seasonal decline in potatoes, though meats, bread and flour were also lower. Eggs, butter, cheese, evaporated apples, prunes and sugar were slightly higher. Quotations on coal were considerably higher in some cities while in many others it was reported that no anthracite coal was for sale. Wood was also higher. Rent was practically unchanged.

INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907

Proceedings for the month of September, 1922.

DURING the month of September the Department received reports of seven Boards of Conciliation and Investigation established to deal with disputes between (1) the Michigan Central Railroad Company and certain of its employees, being machinists, boilermakers, blacksmiths, carmen, electricians and sheet metal workers, members of the Federated Shop Crafts; (2) the Père Marquette Railway Company and certain of its shop crafts employees being machinists, boilermakers, blacksmiths, electricians, carmen, etc.; (3) the Père Marquette Railway Company and certain of its employees, being members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees; (4) the New York Central Railway Company as represented by its officers in charge of the railway shops at Ottawa and certain of its employees at Ottawa, being members of the Federated Shop Crafts; (5) the Grand Trunk Railway System and certain of its employees, being clerks, freight handlers, stationmen, stationary engineers and firemen, oilers, roundhouse shop and store labourers, etc., members respectively of the Canadian Brotherhood of Railroad Employees and the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees; (6) the Marconi Wireless Telegraph Company of Canada, Limited, and certain of its employees, being members of Federal Labour Union No. 16570, American Federation of Labour; and (7) the Marconi Wireless Telegraph Company of Canada, Limited, and certain of its employees, being certificated Marconi wireless operators,

members of the Commercial Telegraphers' Union of America, System Division No. 59.

Applications received

During the month of September applications for the establishment of Boards of Conciliation were received as follows:

- (1) From employees of the Grand Trunk Railway System in the Dining and Parlor Car Department, members of the Canadian Brotherhood of Railroad Employees.
- (2) From employees of the Canadian National Railways, Western Lines, being members of the International Brotherhood of Steam Shovel and Dredgemen, District No. 6.
- (3) From employees of the Canadian Pacific Railway Company, Western Lines, being members of the International Brotherhood of Steam Shovel and Dredgemen, District No. 6.

Other Proceedings under the Act

In the case of a dispute between the Canadian Pacific Railway Company and certain of its employees, being shipmasters, mates and marine engineers in the British Columbia Lake and River Service of the Company, employed in vessels operating between points on Lakes Kootenay, Slocan, Arrow and Okanagan, a Board was established and Messrs. E. A. James and John Fyfe, both of Vancouver, were appointed on the recommendation of the employer and workmen respectively. A chairman had not been appointed at the close of the month.

Report of Board in Dispute between Michigan Central Railroad and its shop crafts employees

The report of the Board of Conciliation and Investigation in the case of the Michigan Central Railroad and certain of its shop crafts employees in Canada was received by the Minister of Labour on September 11, bearing the signatures of the chairman and the employer member of the Board. A minority report was received from the workman member of the Board. The membership of the Board was as follows: Chairman, Mr. J. M. McEvoy, of London, Ontario; employer member, Mr. H. T. Malcolmson, of Hamilton, Ontario; employee member, Mr. W. D. Robbins, of Toronto, Ontario. The dispute referred to the Board arose out of a proposed reduction in wages of the company's employees on its lines in Canada equal with the reduction which had been ordered by the United States Railroad Labour Board with regard to the wages of similar classes of this railway and other railways in the United States, reductions on both sides of the boundary to be effective as from July 1. The Michigan Central Railroad had undertaken with the Minister of Labour that, in view of a dispute arising and the reference of the same to a Board of Conciliation and the bearing thereon of Section 57 of the Industrial Disputes Investigation Act and representations made by the Minister to the company with regard to this matter, no change would take place in the wage rates until the Board of Conciliation and Investigation established on request of the workmen had passed upon the dispute in question. The effect of the findings of the Board is to confirm the proposed reduction, but only as from August 16.

Though not formally accepted by either party to the dispute, the findings of the Board are understood to have been effective in bringing about a working agreement which followed the lines of the Board's recommendations.

The text of the Board's findings and the minority report is as follows:

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Michigan Central Railroad, Employer, and certain of its employees being machinists, boilermakers, blacksmiths, carmen, electricians and sheet metal workers, Employees.

To the Honourable James Murdock,
Minister of Labour.

Honourable Sir,

The Board of Conciliation and Investigation appointed by you on the 8th day of July, 1922, under the Industrial Disputes Investigation Act, 1907, have the honour to report as follows:

As appears from the formal application for the appointment of a Board in this case;

The nature and cause of dispute including claims and demands of either party upon the other to which exception is taken, and the outline of efforts made by parties concerned to adjust the disputes are "company and men met in conference and endeavoured to agree on a fair, adequate rate of pay, also on proper overtime rules and general working conditions. Could not agree, and matter was referred to the United States Labour Board as the men were employees in the United States as well as Canada. No promise was given by employees in Canada that they would accept any award given by the United States Labour Board, as they repeatedly stated they could not give decisions governing Canadian employees on American Roads."

The Board was first called to meet on Monday, July 24, but at the request

of the employees, who alleged that they were not ready to proceed, an adjournment was had until the 31st of July and sittings were held in the City Hall at St. Thomas, Ont., on July 31, August 1, 2, 3, 4, 14, 15, 16, 17 and 18, when evidence and statements of all the parties were received and considered. The Board further considered the exhibits and other matters appertaining to the disputes on August 28, 29 and 30, at Ottawa, and on August 31, and September 1, 2, 4, 5, 6, 7 and 8, at Hamilton.

The Michigan Central Railroad Employees were represented by: James Size, Chairman; John Lane, President of M.C.R. system, Federation No. 67; E. A. Inglis, International Representative, Brotherhood of Electrical Workers; George Varney, Chairman of Local Grievance Committee; John Oswald; Mr. Boulain, General Vice-President, Brotherhood of Railway Carmen of America.

The Michigan Central Railroad was represented by: W. H. Flynn, Superintendent of Motive Power, Detroit, Mich.; J. T. Downs, Superintendent Rolling Stock, M.C.R., Detroit, Mich.; J. W. Fry, Chief of Wage Bureau, M.C.R., Detroit, Mich.; E. R. Webb, Division Master Mechanic, M.C.R., St. Thomas, Ont.; R. J. Mitchner, Division Car Foreman, Canada Division, M.C.R., St. Thomas, Ont.

We report that the rates of pay and general working conditions which had been agreed upon between the Michigan Central Railroad Company (which we shall hereinafter call the company) and the employees of the company (which we shall hereinafter call the men) were arrived at in conference held from time to time between committees of officers of the company on the one side, and committees of the several classes of workmen on the other side.

There were filed with your Board copies of several of these agreements, which both parties to the dispute admitted were correct copies. These date

back as early as June 10, 1909, as appears by Exhibit No. 2 herewith returned. This Exhibit was an agreement between the machinists and the company. Exhibit No. 3, a year later, was an agreement between the boiler-makers and the company. A number of these agreements are exhibited, No. 2 to No. 12 inclusive, covering a series of years, and it is alleged by both the company and the men that these agreements constituted the code of railroad working conditions and schedules of wages under which the company and the men had been "carrying on" for many years, and we report accordingly.

This was the mode of defining the rights of the men of the company up to the 25th of May, 1918.

All these mutual agreements between the company and the men make it plain that the bargaining up to this date was conducted by the men on the Canadian side of the border jointly with the men on the United States side of the line, and that the company bargained with its men as a whole irrespective of whether they were employed in the shops of the company in Canada or in the shops of the company in the United States.

These agreements were usually made for a year, and indefinitely thereafter until a revision or change was sought by either party, upon giving to the other party thirty days' notice of desire for such revision or change.

In connection with this practice of conducting negotiations, it was stated to your Board during the hearings by the representatives of the men that they desired no change in the past practices of negotiating changes in rates of pay or working conditions, and they made it clear to your Board that it was the desire of the men in Canada to act in conjunction with the men in the United States in negotiations with the company hereafter on all wage and working condition changes, including where necessary, taking part in disputed cases before the United States Railroad

Labour Board, but they also make it plain that if any decisions of the United States Board should result in bringing the Canadian workmen into conflict with Canadian law, then the Canadian employees insist upon being guided in their actions by Canadian law.

The method of bargaining as to rates of pay and conditions of work which was general until 1919 as between individual railway companies and the men of each company became impracticable by the action of the United States Government, which Government, on account of the war, took over the administration and operation of the United States Railways, (including, for practical purposes, whatever the legal position might be) the Michigan Central Railway, where it operated in Canadian territory.

As is well known by all railroad officials and employees, there had, through this method, grown up a vast and complicated body of rules, schedules, and conditions of work, creating a formidable body of railroad practice and jurisprudence. This practice and jurisprudence was found only in these multitudinous agreements and in tradition.

Following the taking over of the railways in the United States by the United States Government, all these varied, complicated and differing agreements that determined and defined the rights of individual railroad companies on the one hand and the various classes of employees of these individual railroad companies on the other hand, were of necessity rendered inapplicable and of no force, as one of the parties to each of these agreements was not a party to the operation of the railroad transportation system, and therefore something had to be found to take the place of this multitude of agreements. The endeavour to supply that "something" resulted in what is known as "General Order No. 27." In the words of the Director General of American Railroads when promulgating this General Order.

"Manifestly in a matter of such magnitude and complexity it is impossible to find any general basis or formula which would correct every irregularity or give satisfaction to every interest involved."

This General Order No. 27, with its modifications, interpretations and addenda, is filed as Exhibit No. 13 with this report. It provides that in railroad service, there shall be a basic day of eight hours. It awards for wage earners, hired and paid by the month, in positions paid less than \$46.00 per month in December, 1915, a flat increase of \$20.00 per month and a sliding percentage scale of increases tapering downward from 43 per cent increase for positions paid \$46.01 to \$47.00 per month to no increase for positions paying \$250.00 or more per month. The increase is given at a decreasing percentage at each one dollar interval. These percentage increases also were based on the rates paid for the several classes of work in the month of December, 1915, as for example:—

Ratings of positions, December, 1915	Per cent increase	Amount of increase	New rate, Jan. 1, 1918
\$ 46.01 to \$ 47.00.....	43	\$20.21	\$67.21
\$ 47.01 to \$ 48.00.....	43	\$20.64	\$68.64
\$ 48.01 to \$ 49.00.....	43	\$21.07	\$70.07
\$ 49.01 to \$ 50.00.....	43	\$21.50	\$71.50
\$ 50.01 to \$ 51.00.....	42.35	\$21.60	\$72.60
\$100.01 to \$101.00.....	31.29	\$31.60	\$132.60
\$150.01 to \$151.00.....	15.96	\$24.10	\$175.10
\$248.01 to \$249.00.....	\$ 1.00	\$250.00
\$249.01 to \$250.00.....	.00	.00	\$250.00

Intermediate rated positions receive proportionate increases over the whole of the field covered.

A similar sliding scale of increases for positions or classes of work paid on daily wage was provided by the order, commencing with positions or classes of work paying a daily wage of 75c in December, 1915, which were increased by the Order to \$1.52 per day. This order covers the field from this 75c daily wage as it was in December, 1915, to the position or class of work paying in December, 1915, a wage of \$7.60 per day, which wage, by the order,

was increased to \$8.25 per day. All intermediate daily wage positions or classes of work were given a proportionate increase based on the daily wage in effect in December, 1915.

A similar provision is made by this order for workers paid by the hour.

It applies to all such men employed by the United States Administration in railroad services. The rate of pay is determined by a table of rates. This table is to be applied to each class of work in the railroad service wherever that class of work was being paid by railroads in December, 1915, an hourly wage ranging anywhere between 10 cents an hour and 120 cents an hour.

Without reproducing the whole table here for the better understanding of it, we reproduce the first few provisions for each rate changed at each half cent interval; and we reproduce a few examples taken at random from the body of the table, pointing out, however, that the table itself provides for a rate of increase over the whole field at each half cent interval in the wages paid for the class of work as at December, 1915. The amount of the increases provided will be best appreciated by an examination of the following reproductions from the table.

Old rate per hour in cents	New rate per hour in cents	Old rate per hour in cents	New rate per hour in cents
10	19.75	35.5	50.25
10.5	20.25	50	68
11	20.75	90	99
11.5	21.25	115	120
12	21.75	120	120

This order further provided as to many classes of work that where by the general provisions in its tables for increases certain minimum wage rates are not realized, then there shall be paid to certain classes of workers a minimum hourly wage, the amount of which is fixed in the order for all workers in these certain classes.

In December, 1915, the hourly wage of machinists involved in this investigation was 35.5 cents an hour in Michigan Central shops, both in Canada and the United States. By gradual steps, from time to time, until in December, 1917, this hourly rate had been increased by conference and mutual understandings to 45 cents per hour.

The same rates and the same remarks apply in the case of boiler makers of this railroad.

The blacksmiths in 1915 were being paid 35.6c per hour by this railroad and had, by the same means, obtained increases so that they were being paid in December, 1917, at the rate of 44.5c per hour.

These were the rates of pay obtaining for these classes of men upon this railroad up to the time when General Order No. 27, heretofore mentioned, was promulgated on the 25th day of May, 1918. By this order, each of the classes of employees had their rate of pay increased so that they became entitled from the United States Government to 55 cents an hour, and a provision was made whereby this rate of pay should be retroactive and the men should receive back pay at this rate as of the 1st of January, 1918. (See Exhibit No. 13, page 17.) The employees accepted the benefits of this order, both in Canada and in the United States.

Two months after General Order No. 27, namely, on the 25th of July, 1918, Supplement No. 4 to General Order No. 27 was promulgated by the Director General of Railways of the United States. By this order, the machinists, boilermakers, and blacksmiths received a further increase in their pay of 13 cents an hour. This increase was made retroactive to the 1st day of January, 1918, so that the increase in reality resulted in a 68 cents an hour rate, after January 1st, 1918. The boilermakers, machinists and blacksmiths interested in this investigation accepted the benefit of this order and became entitled thereby to 68 cents an hour.

In September, 1919, what is usually spoken of as "National Agreement" between the United States Railroad Administration and its employees, which for practical purposes included the Canadian employees of the Michigan Central, was issued. (See Exhibit No. 15, page 21.) By this agreement, a further increase of four cents an hour was given to the machinists, boilermakers and blacksmiths. The employees interested in this investigation accepted the benefit provided by this agreement in common with their fellow workers in the United States. This resulted in their receiving an hourly wage of 72 cents, the last increase being effective May 1, 1919. Here the matter stood until the United States Transportation Act, 1920, was enacted.

After the war and on the 28th of February, 1920, under an act of Congress approved that day, known as the "Transportation Act," the Railway Administration of the United States returned control of all railroads and transportation systems to the owners thereof, effective on the 1st of March, 1920. (See Exhibit No. 15.) By this Transportation Act, a method of dealing with disputes between carriers and their employees and subordinate officials is provided. A Railroad Labour Board composed of nine members is established — three members representing the labour group, three members representing the railroad group, and three members representing the general public, all appointed by the President of the United States. The first group was required to be chosen by the President from among six nominees of the labour organizations and the second group was required to be chosen from among six nominees of the railroads, and the third or public group was to be appointed directly by the President, and all nine were required to be approved by the United States Senate. Five members of this Board must concur in main decisions and one at least of the five concurring members must be a member of the public group. The work which is

assigned to the Labour Board of the United States includes the decision of all the classes of matters referred to this Conciliation Board by your appointment. Subsection D of Section 307 provides that in determining the justness and reasonableness of wages and salaries and working conditions, the Board shall, so far as applicable, take into consideration among other relative circumstances:—

- (1) The scale of wages paid for similar kinds of work in other industries.
- (2) The relation between wages and the cost of living.
- (3) The hazards of the employment.
- (4) The training and skill required.
- (5) The degree of responsibility.
- (6) The character and regularity of the employment.
- (7) Inequalities of increases in wages or of treatment, results of previous wage orders or adjustments.

The Canadian employees of the Michigan Central Railroad in conjunction with their fellow employees residing in the United States, were parties to an application to the United States Labour Board for an increase in the rates of pay and this application was heard on July 20, 1920, and ripened into what is known as the "United States Railroad Labour Board Decision No. 2, Dockets 1, 2 and 3" (see Exhibit No. 17), effective May 1, 1920. By this decision machinists, boilermakers, blacksmiths and others were awarded an increase of 13 cents an hour; (Exhibit No. 17, page 14.) This advance was based, in the judgment of the Board, upon the continuing increase in cost of living, coupled with the fact that a higher rate of wages was then being paid to workers in similar classes of work in other industries and with the further fact that railroad employees had remained at their work, notwithstanding that higher pay might have been obtained elsewhere. The machinists, boilermakers and blacksmiths interested in this investigation became

entitled by this decision to have their rates of wages increased from 72 cents per hour as they then stood, to 85 cents an hour, and they took the benefits of this decision.

Subsequent to Decision No. 2, above referred to, many railways, including among them the Michigan Central, were parties to an application to the United States Railroad Labour Board for a reduction of the rate of wages, and the employees of the Michigan Central Railway, including their Canadian employees, were parties to the contest before the United States Railroad Labour Board, as to whether a reduction asked by the railways should be granted. The result of that contest is shown in Decision 147, Docket 353; (see Exhibit No. 23.) That decision provided that there should be a reduction of eight cents an hour in the case of machinists, boilermakers and blacksmiths. The men of these classes of employees of the Michigan Central Railroad, who are parties to the investigation now being made by your Board, accepted this reduction and acted upon it, as did their fellow employees working in the American shops. This decision is dated June 1, 1921, and was effective July 1, 1921.

On the 11th of August, 1921, the decision of the United States Railroad Labour Board, No. 222, was promulgated, effective August 16, 1921. This decision effected a radical change in the manner of paying for overtime work and extra rates for time served on Sundays and holidays. The men contend that this decision, together with other deductions in rates of pay made since July 1, 1921, works a reduction of wages in the case of each of the men interested in this investigation and that the reductions in the case of the machinists, boilermakers and blacksmiths worked by this decision, amounts to an annual reduction of \$638.60. It will be convenient to deal with this phase of the matter later when considering the rules which work the change complained of, but we add

here, that the Board does not agree with this contention of the men.

In February, 1922, application for a further reduction in the rates of pay was filed by the Michigan Central Railroad whose shop employees in both Canada and the United States filed at the same time an application for an "adequate wage increase." The decision upon these applications of each of the parties is known as Decision 1036 and is dated June 5, 1922; (see Exhibit No. 48.) The result of this decision was a further reduction of the hourly wages of machinists, boilermakers and blacksmiths amounting to 7 cents per hour. This decision was made effective July 1, 1922. The employees of the Michigan Central Railroad living in the United States declined to accept this reduction and are now on "strike" in protest against the fairness of the decision. The Canadian employees of the Michigan Central Railroad have remained at their work out of respect for the provisions of the Industrial Disputes Act, 1907, and have caused the calling of this Board of Conciliation and Investigation in protest against the decision.

The machinists, boilermakers, blacksmiths, carmen, electricians and sheet metal workers are the classes of employees named in the application for the Board now reporting.

Of these classes of employees the changes in rates of pay which have occurred since 1915 have now been indicated in this report with some explanations as to the nature of the document which brought about each change. It remains to deal with the carmen, electricians and sheet metal workers. Besides these last three classes, considerable evidence was taken and investigation made concerning grease cup fillers, material carriers and coach cleaners. So far as the changes in rates of pay for each of the classes of employees named in the application are concerned, the changes were effected by the same processes and by virtue of the same documents as were the changes affecting the machinists, boilermakers and blacksmiths. In the

cases of carmen, grease cup fillers, material carriers and coach cleaners there are some differences, and, in the schedule hereinafter appearing, reference will be made to the additional documents effecting changes in the wages of these last mentioned four classes.

It will be convenient to indicate all these changes by means of Table "A."

That portion of the dispute before your Board which relates to

"unfair general working conditions,"

resolves itself into a claim on the part of the men—

- (a) That certain rules, being in the main rules referring to overtime and time served on Sundays and holidays;
- (b) Rules requiring applicants for railroad service to submit to a physical examination by a physician before being employed, and
- (c) Rules reclassifying grease cup fillers and material carriers in such a way that their rates of pay under the schedule amounts to 37 cents an hour,

were unfair and created "general unfair working conditions."

Here again the investigation with which your Board has been charged is complicated by the fact that the rules in question were promulgated by the United States Railroad Labour Board.

The terms of the Transportation Act, 1920, (heretofore referred to as Exhibit No. 16) provides, among other things, that when railroads and their employees fail to agree:—

"The Labour Board. . . upon the application of the Chief Executive of any carrier or organization of employees or subordinate officials whose members are directly interested in the dispute. . . shall receive for hearing,

and as soon as practicable, and with due diligence decide, any dispute involving grievances, rules, or working conditions which is not decided as provided in Section 301. . ."

After the United States Government Administration had decided to relinquish control of the United States railroads, there was an absence of sufficient rules and regulations as between each one of the some two hundred railroads and the employees of each of these railroads, and almost all of these two hundred railroads failed to agree with their respective employees upon a complete set of rules covering the relationship, working conditions and wages as between each of them and their respective employees.

A plan was devised by the United States Railroad Labour Board to formulate a set of rules for general application as between a railroad company in the United States and its employees. The plan devised was embodied in Decision No. 119, Dockets 1, 2 and 3, Exhibit No. 18. In substance, it consisted of a direction to each railroad company and to the employees of each railroad company, either through their representatives or through labour organizations, to confer and try to formulate a body of rules acceptable to the railroad companies and to the employees of the several companies.

The employees of the Michigan Central Railroad interested in this investigation, after conference with the officials of the Road, agreed upon a certain number of rules, which are filed with this report: (Exhibit No. 25). This left a large part of the field required to be covered by rules and regulations, not covered. A further portion of the direction of the United States Railroad Labour Board required the railroads on the one hand and the employees by their representatives or through their labour organizations on the other hand, to prepare rules covering the

*It will be noted that while General Order No. 27 increased rates of pay of all above classes of employees, effective Jan. 1, 1918, Supplement No. 4 to General Order No. 27, which was promulgated two months later than General Order No. 27, further increased the rates of pay of these classes to the higher rates shown in the next column, thus having the effect of making the real rate in effect from Jan. 1, 1918, as shown under caption "Rate under Supplement 4."

field not occupied by the rules agreed upon as in Exhibit No. 25. The employees concerned in the investigation by the Board now reporting joined with their fellow employees in the United States in an effort to present to the United States Railroad Labour Board their conception of what the rules should be covering that part of the field not covered by the agreed upon rules.

The method of doing the work suggested by the United States Railroad Labour Board was that a document should be prepared in three parallel columns; that the men should set out in the left hand column their conception of the proper rule upon each part of the subject matter under consideration; the second column of the document should be vacant except insofar as agreed upon rules should be entered in it, and the third column of the document should be written in with the rules proposed by the railroads. This document is returned as Exhibit No. 24 hereto and is signed among others by James Size of St. Thomas, Ontario, as Chairman of the Committee in charge of the work for the Men acting for the Canadian employees as well as for the United States employees of the Michigan Central Railroad. Above the signatures of the employees' committee on this document is endorsed the words

"Accepted for the Employees represented by Michigan System Federation No. 67."

The document is also signed for the Michigan Central Railroad by H. Shearer, General Manager.

Much time and labour was expended in explaining and urging the views of both the men and the railroad company upon the United States Railroad Labour Board, and the Board now reporting was strongly urged by the Company to report that the men having elected its forum and having submitted its case to the United States Railroad Labour Board should be bound to accept the decision of that forum or to seek an

amendment to it before the same forum, both in the question of rates of wages and in the question of amendments of rules, if amendments were necessary, to the disputed rules. The Men's representatives before the Board now reporting admitted that it was thought by them that the disputes in reference to rules could be adjusted by further conference, and, if necessary, further reference to the United States Railroad Labour Board, having in mind at all times the requirements of the Canadian law. It was also pointed out by the men that joint conference was at present impossible as the employees in the United States territory were on "strike."

The rules to which objection was taken by the men were—

Nos. 6, 7, 10, 12, 14, 15, 46, 156 and 177—see Exhibits Nos. 39, 40, 40-a, 40-b, 40-c and 40-d, and 42 and 43.

Rule 6. See Exhibit 27 page 7.—"All overtime continuous at regular bulletined hours will be paid for at rate of time and one half until relieved; except as may be provided in rules hereafter set out. Work performed on Sundays and the seven legal holidays . . . shall be paid for at rate of time and one half except that employees necessary to the operation of power houses, millwright gangs, heat treating plants, train yards, running repairs and inspection forces who are regularly assigned by bulletin to work on Sundays and holidays will be compensated on the same basis as on week days. Sundays and holiday work will be required only when absolutely essential to the continuous operation of the railroad."

Rule 7.—"For continuous service after regular working hours employees will be paid time and one half on actual minute basis with a minimum of one hour for any such service performed.

"Employees shall not be required to work more than two hours without being permitted to go to meals. Time taken for meals will not terminate the

continuous service and will be paid for up to 30 minutes.

"Employees called and required to report for work and reporting but not used will be paid a minimum of four hours at straight time rates."

The suggestion and contention of the Men is as to Rule 6 "that all overtime after bulletined hours should be paid for at the rate of time and one-half until relieved, with certain exceptions" and as to Rule 7 "that employees working overtime continuous with bulletined hours should be paid one hour for forty minutes services or less and will not be required to work longer than one hour before being permitted to procure meal, and that employees called or required to return before or after bulletined hours shall be paid five hours for three hours and twenty minutes service or less, and that employees called and reporting for work but not used should be paid not less than five hours for each such call."

The main contention arising out of Rule 6 is based upon the ground that for Sunday and holiday time served there should be a punitive overtime payment required, and that the taking away by the rules of this punitive time results in a serious reduction in rate of pay, and that this matter should be considered when endeavouring to arrive at an answer to the question of whether or not the reduction of wages made under Decisión 1036 ought to be considered "fair and reasonable." If the effect of taking away of overtime in the cases of the men affected by this rule in the matter now before the Board reporting, was not taken into consideration when the rate of wages which it is seeking to reduce was struck, we would feel compelled to report that this rule worked a serious reduction in the rate of pay of the men who are affected by it and that includes practically all the men who are involved in the present investigation. The conclusion which we have arrived at is, that in deciding that the reductions which were proposed by

the United States Railroad Labour Board were "fair and reasonable," account was fully taken of this and that a reasonably higher general hourly rate was agreed upon for men in the classes of employments which subject the employees to the necessity of doing overtime work and Sunday and holiday work for the purpose of keeping railroads running continuously. The rule has been in operation since August 16, 1921. It is true that it works a considerable revolution in the method of arriving at a rate of pay that is "fair and reasonable" to a large class of railroad workers. In the Exhibits filed before us and in the statements and discussion we heard, it was made plain that the "new method" of arriving at what is "fair and reasonable" in these cases, is supported by a large body of opinions of a character commanding respectful and serious consideration. The dissenting opinion of Members of the United States Railroad Labour Board will be found commencing at page 1 of the second part of Exhibit No. 27 herewith returned.

While these opinions were discussed before us, and while the conclusions arrived at before the United States Railroad Labour Board are entitled to very great respect, we, of course, feel that we are not in any way bound by these decisions.

Our conclusion, however, is, and we report, that (in) a matter so complicated and so woven into a general system or plan of rules and rates, ought not to be disturbed until it has had a further trial. We are of the opinion that experience will enable the men and the Company to make such changes and amendments to these rules as will render them useful and we are not able to report now that the same are not "fair and reasonable," notwithstanding that they do not provide a specific rate of pay for what before these rules were promulgated, had been known as overtime rates of pay.

The reduction of wages complained of are the reductions provided for in

Decision No. 1036, Exhibit No. 48. It results, with the changes in classification, in the following reductions:

Machinists and Helpers..	7c	an	hour
Boilermakers and Helpers	7c	"	"
Blacksmiths and Helpers	7c	"	"
Sheet Metal Workers and Helpers.....	7c	"	"
Electrician and Helpers..	7c	"	"
Passenger Carmen and Helpers.....	7c	"	"
Freight Carmen.....	9c	"	"
Freight Carmen Helpers	7c	"	"

Grease cup fillers are reduced to the wages of shop laborers by reason of this decision (Decision No. 1036) and Decision No. 222; material carriers are treated in the same way, and coach cleaners are reduced 5 cents an hour.

These reductions are the substantial matter complained of by the men and it is contended that with these reductions a "fair and reasonable" wage is not provided. There was considerable contention before your Board as to whether the posting of the notices before mentioned herein, announcing that these reductions in wages were about to be made by the Company, was a violation of the Industrial Disputes Act of 1907. We report briefly an history of this matter:

On the 15th of November, 1921, the Company posted a notice on the shop bulletin board that the Company desired to confer with the various classes of employees with a view to arriving at an agreement upon the reduction of wages (see Exhibit No. 29). On the 15th day of December, 1921, the Company posted a notice (see Exhibit No. 34) saying that the reductions which it was proposed to make in the case of machinists, boilermakers, blacksmiths, sheet metal workers, electricians and passenger carmen were from 77 cents an hour to 62 cents an hour, and in the case of freight carmen from 72 cents an hour to 52 cents an hour, and to establish differentials at somewhat higher rates for these various classes of mechanics depending on their higher

degree of skill. All helpers in all these classes would be decreased from 54 cents an hour to 42 cents an hour, and the car cleaners would be reduced from 42 cents an hour to 32 cents an hour. No mention was made in this notice of grease cup fillers or material carriers for the reason that under Decision 222, Exhibit No. 26, by a reclassification, these classes of employees had been reduced to the status of common labourers and were covered by separate notice which proposed to reduce their wages from 42 cents an hour to 32 cents an hour. On December 23rd, 1921, a further notice (see Exhibit No. 35) was sent to the men stating that by oversight the effective date of the proposed reductions had not been stated and that the date the Company proposed to make the reductions effective was the 16th of January, 1922. On the 17th of January, 1922, a conference was held between the officers of the Company and the men's committee. At the opening of this conference, the men insisted upon first reaching an understanding with the Company that the practice of conducting such negotiations in the past should be adhered to and that decisions of the United States Railroad Labour Board should continue to apply alike to shopmen working in the shops of the Company both in Canada and the United States. The officers of the Company concurred, and this understanding was definitely concluded; (see Exhibit No. 36). In the conferences which followed, the representatives of the Company and the Men's Committee failed to agree upon what should be a "fair and reasonable" wage. An application was made on the 18th of February, 1922, to the United States Railroad Labour Board by the Company for a reduction in wages in keeping with their notice of the 15th of December, 1921, and by the Men on the 20th of February, 1922, for an "adequate wage increase." These two applications ripened into a hearing upon each of the applications of the Company and of the Men on the 6th of March, 1922. Nearly a month

was spent by the parties presenting their contentions, and the reductions shown on page 15 of this report were the results announced by the United States Railroad Labour Board on the 5th of June, 1922. On the 8th of June, 1922, the employees sent out circulars to take a strike vote as to whether these reductions ought or ought not to be submitted to, requiring the ballots to be returned before the 1st of July, 1922; (see Exhibit No. 46.) The vote on both sides of the International line was, as stated to your Board, in the neighborhood of 97 or 98 per cent against submitting to the reductions.

We had submitted to us a considerable body of evidence upon the question of the cost of living. A large body of interesting and instructive evidence was given before us upon the question of the national public benefits to be obtained by maintaining food supply and general living conditions of railroad workers at an "adequate standard." Your Board reports that we are in accord with this general proposition; (see Exhibit Nos. 61 and 62). A family budget which was alleged by the men to be in keeping with this "adequate standard" of living was submitted and totaled \$1,958.24 a year; (see Exhibit No. 63). It was urged by the men that there had been no serious reductions in the cost of food, rent, clothing, cost of entertainment, doctor bills, dentist bills, street car transportation, furniture repairs, church, insurance and other items which ought to be available out of his wages to every respectable artisan who was industrious and honest. At the opening, the men presented evidence tending to substantiate their contention on this point. After the evidence, presently to be mentioned as being presented by the Company, the men presented Exhibit No. 63½ showing a list of articles which go into making up a family budget with prices obtained at various points. For example: for Muskegon, Mich., two family budgets were presented by the men, one showing the annual cost of food at \$620.48 and another, showing the an-

nual cost of food for a similar family at the same point, at \$958.22; one at Blue Island, Ill., showing food cost, \$1,048.03, and another at the same place showing food cost at \$681.67. The highest among these varying family budgets is \$2,796.43 per annum for all items, and the lowest is \$2,206.61. The variations among these budgets are so great that your Board are of opinion that the evidence upon this point as collected by the United States Department of Labour, the National Industrial Conference Board, the Department of Labour of Canada as published in the *Labour Gazette* and by other public investigators, are more likely to afford a safe guide as to the true cost of living than can be found in these budgets presented by the men. The figures taken from the four such independent public investigators are shown in Exhibit No. 64, in the form of a chart. The results of these four independent studies show a striking sameness of rise and decline in the price of the "cost of living" over a period from the year 1913 to June, 1922. In our opinion the safest conclusion upon this question would be based upon the average resulting from an amalgamation of these four studies. This would seem to show a decline of about 23 per cent in the cost of living from the high point in midsummer of 1920, to June, 1922.

The Board now reporting realize the difficulty upon the mass of evidence presented and from such other matters as have come to the attention of the members of the Board, in determining with accuracy the exact percentage that the cost of living has shrunk since the midsummer of 1920. It was not contended by either of the parties that there had not been a considerable shrinkage in the cost of living since that period. Both parties relied upon the figures supplied by the Labour Department of Canada. The men pointed out that these figures did not take into account the cost of clothing, furnishings and furniture, except in the case of the special study made, the result of which was published in 1921 in the

Labour Gazette. These figures show the weekly cost of living for a family of five in December, 1917, to have been \$19.30 and to have been a little less than this for some months just previous to that date. At that date the rates of wages for the bulk of the men interested in this investigation was from 40 to 45 cents an hour. This was the last month that the railroads made the rates of wages directly with their men until after the war. The figures from the same source show that the weekly cost of living in July, 1918, was \$20.66 and at that time the United States Railroad Administration fixed a wage of 68 cents an hour and made the rate retroactive to January 1, 1918. The figures from the same source show the cost of living to have been in June, 1922, \$20.58, for a similar family, and for the three months previous to June, 1922, they show the cost of living to have been about the same amount. In none of these figures cost of clothing, furnishing nor furniture are included so that a comparison is reasonably fair.

Working an eight-hour day in December, 1917, the more numerous classes of employees concerned in this investigation would earn, exclusive of Sundays and holidays, \$1,101.60 per annum. If they worked eight hours a day half of the Sundays and holidays during the year, they would have carried an advance of \$159.30 or a total annual earnings of \$1,260.90. The same men working eight hours a day in July, 1918, after the rate was fixed at 68 cents an hour, would, exclusive of Sundays and holidays, have earned \$1,664.64. If they worked half of the Sundays and holidays that would have added to their yearly wage \$240.72 or a total annual wage of \$1,905.36. The same men working an eight-hour day under the rate now in dispute would earn, exclusive of Sundays and holidays, \$1,713.60. By working half of the Sundays and holidays another \$165.20 would be earned, making a total of \$1,878.80 as the annual wage under the disputed rates.

This would seem to make the total earnings for an eight-hour day at the disputed rates about 49 per cent better than the rate in effect in December, 1917, would yield.

We do not overlook the fact that many of the men involved will probably increase this annual income by some overtime or by some more agreeable occupation such as gardening or the like.

The figures here mentioned are applicable to machinists, boilermakers, blacksmiths, electrical workers, sheet metal workers and passenger carmen, and these classes constitute the bulk of the men whose rates are under consideration by this Board. The remaining classes will be dealt with in another paragraph of this report.

There was a considerable mass of evidence submitted to this Board as to the rate of pay received by artisans performing similar work in other institutions in the neighborhood where the men interested in this investigation perform their duties. Making just allowances for human frailties in collecting and giving evidence in matters as complicated and difficult as this is, we feel ourselves compelled to report that workers in similar classes of work in other industries are not receiving as high an hourly rate as is offered to the bulk of the employees of the Michigan Central Railroad involved in this investigation.

The Board realizes that rates of wages paid in the United States have an important effect upon the wages which can be paid and stabilized in Canada, and particularly in the case of a railroad operating in both countries. Nor can the members of this Board shut their eyes to the fact that the employees of the Michigan Central Railroad working in United States territory, have expressed their readiness to resume work at the disputed rates if their "seniority rights" are respected. In the case before us, no "seniority rights" have yet been affected.

Having in mind the fluctuations in the cost of living and the fluctuations in the wages of same by the bulk of the employees of the Michigan Central Railroad over a period between 1914 and July, 1922, the hazards of employment, the skill required, responsibility, permanency of employment and the wages obtained by men in similar employment, we feel ourselves compelled to report that the reduction of nine cents an hour for freight carmen and seven cents an hour for machinists, boilermakers, blacksmiths, electricians, passenger carmen and sheet metal workers and their helpers, is "fair and reasonable." This reduction leaves a freight carman, whose work does not require great mechanical efficiency, a rate of 63 cents an hour, and it leaves the other classes of workmen just named, 70 cents an hour. The helpers for each of the classes mentioned in this paragraph have been asked to submit to a reduction of seven cents an hour which would leave their hourly rate at 47 cents. This we report to be "fair and reasonable" hourly wage for this class of work.

This leaves three classes of employees to be considered, "Grease cup fillers," "Material carriers" and "Coach cleaners." The reduction in the hourly pay of the first two of these has been largely brought about by a reclassification of these two occupations. In July, 1921, grease cup fillers and material carriers were being paid an hourly rate of 54 cents. By the reclassification effected by Decision No. 222, Exhibit No. 26, herewith returned, the men who were grease cup fillers and material carriers in the reclassification were left as shop laborers and received a wage of 42 cents an hour. The reduction

proposed under Decision No. 1036 of United States Railroad Labour Board takes off that hourly wage five cents an hour, leaving the men of these two occupations, after applying the proposed reductions, an hourly wage of 37 cents, which is the wage of shop labourers. Your Board was impressed with the thought that the performance of the duties of these two classes of employees did not require considerable experience or training nor the expenditure of much physical strength. The coach cleaner was receiving in July 1, 1921, 42 cents an hour. His highest wage had been 50 cents an hour. The reduction complained of is a reduction from 42 cents an hour to 37 cents an hour. This means reducing the wage of a coach cleaner to the level of the wage of a shop labourer. It was urged upon the Board that this class of work needed no skill or experience and that it was in reality work of a common labourer. The Company involved in this investigation is a Company with many more employees working in the United States than they have working in Canada. The wages of these three classes of employees have been fixed by the United States Railroad Labour Board at 37 cents an hour. Not only has it been fixed for the employees of the Michigan Central, but this rate for this class of work has been fixed for employees on railroads generally in the United States. It appears to this Board that it would be unwise to report that the classification of these men as labourers is wrong. At the same time, we believe that it is in the interest of both the Company and the employees to confer further upon the question of the classification of these three classes of workers as shop

labourers. This is a matter which we think could with advantage be presented to the United States Railroad Labour Board for further consideration with a view to maintaining throughout the Michigan Central System as well as on other United States railroads, the uniformity of classification and wage rate, the obtaining of which has cost so much struggle. We do not consider in all the circumstances that we are able to report that the wages of these three classes are not "fair and reasonable" and we recommend that the Company and the men, as soon as circumstances will give promise of a fruitful conference, confer further on this matter, when we believe that an arrangement satisfactory to both parties can be reached.

Further, your Board directs attention to the Company's statement (Exhibit No. 67) which indicates that after applying the reductions of 5, 7 and 9 cents per hour in the basic rates of pay of the men involved in this dispute, that the new basic rate, if considered solely as such, will still be higher than were the basic rates in December, 1915, by the following percentages:

	Per cent
Machinists and boilermakers...	97.2
Blacksmiths.	96.6
Sheet metal workers.....	133.3
Machinist helpers.....	176.4
Boilermaker helpers.....	168.5
Blacksmith helpers.....	154
Passenger carmen.....	225.5
Freight carmen.....	231.5
Coach cleaners.....	131.2

and a corresponding comparison with December 1917, as shown on Exhibit No. 69, indicates the following percentages of increase in favor of the new rates:

	Per cent
Machinists and boilermakers...	55.5
Blacksmiths.	57.3
Sheet metal workers.....	81.8
Machinist helpers.....	95.8
Boilermaker helpers.....	108.8
Blacksmith helpers.....	100
Passenger carmen.....	166.1
Freight carmen.....	165.8
Coach cleaners.....	68.2

Considering all the circumstances of this case, the length of notice required under the Industrial Disputes Act before either party is entitled to change rates or working conditions and the notices given by both parties, the Board reports that the reductions in rates of pay should apply on and after the 16th day of August, 1922.

The Members of the Board report to you that we received very valuable assistance in the making of this investigation by the able manner in which the matters in dispute were presented by the representatives of the Men as well as by the representatives of the Company.

Dated at Hamilton, Ontario, this 8th day of September, 1922.

(Signed) J. M. McEvoy,
Chairman.

Member.

Minority Report

To the Hon. James Murdock,
Minister of Labour.

Dear Sir:—

In the matter of the Board of Conciliation appointed by you on the 8th day of July, 1922, to inquire into and report on the dispute between the Michigan Central Railway, and its Federated Shop Crafts comprising Machinists, Boilermakers, Blacksmiths,

Electricians, Sheet Metal Workers, Passenger Carmen, Freight Carmen, Grease Cup Fillers, Coach Cleaners and Material Carriers.

My colleagues on the Board have made a report in their own peculiar way, which I do not agree with and wish to make a minority report as follows:—

On July 1, 1921, the United States Railroad Board reduced all classes of the above mentioned men 8 cents per hour which they accepted.

On August 11, 1921, the United States Railroad Board made a further reduction in the rates of pay, by giving a decision that the time and one-half for Sunday and holiday work would be discontinued, notwithstanding the fact that this overtime had been paid for many years and amounted to 52 Sundays and 7 holidays, making in all 59 days a year at time and one-half, or

a further reduction of \$181.72 a year for the 50 per cent of the men who work on Sundays. This decision of the Railway Board was, of course, readily put in effect by the different Railway Companies.

The third decision of a reduction within a year was given by this Board on July 1, 1922, of another 5, 7 and 9 cents per hour, if you please. The decision was resented by the men of the United States and they went on strike in consequence. The Canadian employees of the Michigan Central Railway would also have gone on strike, but as they are good Canadian citizens they stood by our laws and applied for a Board of Conciliation under the Act of 1907.

Just here let me present a table showing just what these three decisions meant to the workmen employed:—

Class	No. of days per week	High wages	Proposed wages	Average total loss per hour	Total loss	Loss per cent
Machinists	7	85	70 less half time for 59 Sundays and Holidays.	cents 21½	638.60	25½
Boilermakers						
Blacksmiths						
Electricians						
Sheet Metal Workers.....						
Passenger Carmen.....	7	80	63 less half time for 59 Sundays and Holidays.	23½	685.20	29½
Freight Carmen.....						
Grease Cup Fillers.... (All 7 day men)	7	62	37 do	30	876.32	48
Coach Cleaners..... (All 7 day men)	7	50	37 do	17½	506.60	35
Machinists	6	85	70	15	367.20
Boilermakers						
Blacksmiths						
Electricians						
Sheet Metal Workers.....						
Passenger Carmen.....	6	80	63	17	412.16
Freight Carmen.....						
Material Carriers..... (All 7 day men)	6	62	37	25	612.06

You will notice the seven-day men were cut from 25½ to 48 per cent, including some of their reclassification, a proportion much beyond the decrease in the cost of living. Some of the main

things that keep the living costs up are rent and fuel, which form no small part of the expenditure of a family, which are yet high or higher than ever. A very significant fact, and one that

the public is interested in, is that the Railway has only reduced their passenger rates about 10 per cent, and their freight rates 11 per cent, and then ask the men to take this enormous reduction in wages.

You will also notice the geographical position of this railway, or system of railways to be more proper. Running across Ontario at break neck speed with their heavy loads of passengers and freight, connecting the two cities of Detroit and Buffalo, thereby saving many miles of travel than by going around the south side of the Lake, and in my opinion this portion of the Michigan Central line is a real money maker. In fact, it was admitted at the hearings that the Company was paying 6 per cent dividends and the men presented a report (see Men's Exhibit 17) that in the first five months of this year they had a net after rentals of five and one-half millions of dollars. I do not agree with the findings of the majority of this Board, for I think this last cut of 5, 7 and 9 cents per hour is not justified and the Company is well able to pay these men, who every one knows

that has been in a railway shop or roundhouse that these men's work is very hard and it is particular work, for if a mistake or poor workmanship is made, the lives of the travelling public would be endangered.

My firm opinion is that such a Railway Board for Canada controlling the operations of both men and Companies, is not at all desirable for this country, and certainly would not be in the interests of the men.

I may also report that during the sittings I made several proposals and offers of a compromising nature in order to avoid any trouble on our railways at this time, but the Company's representative, Mr. H. Macolmson of Hamilton, was firm and would not move even a fractional part of a cent, so the Chairman, Mr. J. M. McEvoy of London, joined him in signing the majority award granting the Company's contentions almost wholly.

I have the honour to be,

Yours very truly,

(Sgd.) W. D. ROBBINS,

Member of the Board.

Report of Board in Dispute between the Père Marquette Railway Company and certain of its shop crafts employees

A report was received from the Board of Conciliation and Investigation established to deal with differences between the Père Marquette Railway Company and certain of its employees being members of the International Brotherhood of Machinists, Boilermakers, Blacksmiths, Carmen and Electrical Workers. The Board was composed as follows: Mr. W. T. R. Preston, Port Hope, Ont., chairman, appointed by the Minister

in the absence of a joint recommendation from the other two members of the Board, Messrs. Alexander Leslie, Kingsville, Ont., and W. D. Robbins, Toronto, nominees of the company and employees respectively. The report was signed by the chairman and Mr. Leslie, and contained recommendations as to a settlement of the dispute. Mr. Robbins presented a minority report.

The findings of the Board were accepted by the employing company and, though not formally accepted by the representatives of the employees, are understood to have been regarded as definitely closing the dispute.

Report of Board.

In the matter of the Industrial Disputes Investigation Act 1907, and in the matter of a dispute between the Père Marquette Railway Company and certain of the employees being members of the Brotherhood of Machinists, Boilermakers, Carmen and Electricians.

Windsor, Ont., Sept. 15, 1922.

To the Hon. James Murdock,
Minister of Labour,
Ottawa, Ontario.

This Board of Conciliation was authorized by the Honourable the Minister of Labour under date July 10th, 1922.

The Board was convened at Windsor, July 26th and held further sittings at St. Thomas August 16th and 17th, and at the Prince Edward Hotel, Windsor, August 22, 23, 24, September 11, 12, 13 and 14.

The subject matter of this dispute developed from the fact that the Père Marquette Railway put into effect on the Canadian Division of its Railway the scale of wages adopted by the United States Labour Board, known as Decision 1074, the same to become operative as of July 1, 1922. The general question of the rates of pay of certain railway employees had previously been referred to the United States Labour Board by mutual consent of the great labour organizations of the United States and the railway systems of the country.

The United States Labour Board was created under the Transportation Act of 1920, enacted by the Congress of the United States. This Act provided for the termination of the United States government control of railways and systems of transportation respecting which the said Government had assumed control during the war. This Transportation Act further provided for the establishment of a Railway Labour Board consisting of nine members, three members constituting the labour group, three representing the railways, these to be chosen from six nominees of each class to be submitted to the President of the United States, and three other members constituting the public group to be appointed directly by the President, all subject the approval of the Senate of the United States.

The legislation further provided that the Labour Board should be a special tribunal, to which might be referred by mutual consent of the respective parties, all questions dealing with salaries, wages and general working conditions of the employees in the railways throughout the United States. The Railway [Labour] Board was clothed with large powers of investigation in order that exhaustive evidence might be secured upon all questions bearing upon disputes between railroads and employees.

With respect to this dispute it is admitted that Canadian employees upon United States railways running through or on Canadian territory should be governed generally by the rules, regulations, rates of wages, etc., that were effective with respect to the employees who were living upon the American side of the boundary line. In the case in dispute the employees interested numbered only

a small percentage of the total number of the same class of employees in the service of the Père Marquette Railway. The Canadian employees of this dispute are members of the American Federal Railway Employees known as Division No. 2, as distinct from the employees on Canadian Railways, who are members of Division No. 4.

These employees on the Canadian Branch of the Père Marquette Railway had been subject to a wage increase heretofore issued under previous decision of the United States Labour Board, subsequent to the railways being returned by the United States Government to the private owners, together with earlier arrangements as to regulations, rules and wages generally consistent with the operation of this Railway in the territory covered by the said Railway, and accepted a wage reduction as made by the United States Labour Board on July 1, 1921.

The Père Marquette Railway Company had in the increase, ordered by the United States Labour Board, of wages which was effective May 12, 1920, increased the wages of the Canadian employees in the same manner as they had increased the United States employees in the same class of employment, the Railway was in no way legally obliged to at any time in the past or in the future, put increased rates of pay into effect in Canada if same were ordered by the United States Labour Board, and subsequent to this increase being put into effect in Canada, the United States Labour Board decided in the grievance case before mentioned that it had no jurisdiction outside the United States. It would also appear that by reason of this decision that the Canadian employ-

ees had no tribunal to which they could apply for relief as to grievances, the Père Marquette not being a party to the Canadian Board of Adjustment.

The Board of Conciliation found itself in a peculiar position at the outset—due to the following circumstances:—

The Railway is an American corporation; the greater part of the mileage and the greater proportion of its employees are in the United States.

The employees in Canada have by preference attached themselves to the Railway Association, Division No. 2, which is altogether under the control of the United States Labour organizations, rather than with the Canadian Labour organization known as Division No. 4.

The Railway contended that the Canadian employees on its system were parties to the wages and working condition references to the United States Labour Board, and were represented officially in the prosecution of their case when the proposed readjustment of wages was being considered by the said Board. While the employees contended that as the Railway had itself objected to the jurisdiction of the United States Labour Board in grievance of Canadian employees, which had been submitted to the Board for adjudication (which said objection was sustained by the Board) that although their organization (which represents both the United States employees and the Canadian employees concerned in this dispute) had appeared before the Board, the Canadian employees could not possibly be considered parties to the reference nor officially represented, the United States Labour Board having held in said grievance that it had no jurisdiction beyond the territorial boundaries of the United States.

The general decision of the United States Labour Board was therefore, from the viewpoint of the Company, quite naturally put into effect by it over the Canadian sections of the Railway, although the Labour Board had previously distinctly affirmed its absence of jurisdiction in the consideration of individual grievances of employees in Canada upon this Railway.

From this it will be seen this Board was asked to revise and reverse decisions that had been rendered by another Labour Tribunal, that of the United States Labour Board, before which the same organization which represents both the United States employees and the Canadian employees concerned in this dispute had appeared and been a party to the reference upon the questions now at issue.

Evidence was presented to the Board establishing the fact that the larger number of the United States employees of the classes concerned in this dispute went out on strike in protest against the reduction in their wages as from July 1st, also announcing their intention to appeal to the Labour Board for a general revision of Decision 1036.

Under these circumstances your Board hesitated in taking direct issue with a Labour Tribunal in a foreign country before which the same organizations as represent the employees concerned in this dispute had appeared for the adjudication of the questions at issue between them and which tribunal the same organizations will undoubtedly appeal again on behalf of the United States employees on these identical questions.

A brief reference to the great volume of documents and verbal evidence submitted to your Board may not be out of place.

It will be seen by the file of exhibits accompanying this Report that the Board of Conciliation heard evidence and arguments from many standpoints upon the questions in dispute between the Père Marquette Railway and its employees.

The main arguments of the employees were that the proposed reductions were not justified (1) view of the high cost of living (2) the proposed reductions were out of proportion to the actual in the cost of living, and (3) that labour is entitled to a higher wage than covers the actual living. The last point needs no argument. Civilization accepts this principle unhesitatingly.

A partly comprehensive view of wage conditions as they affected the membership of the crafts really interested in the subject matter of this dispute, will be secured by studying the following schedule. Here is set forth in detail the increases and reductions in the yearly [hourly?] rate of wages which became operative on the Père Marquette Railway between December 17, 1917, and the proposed reduction July 1, 1922, with the exception of one, and this was the order issued in August, 1921, doing away with the payment of penalty overtime, for work done on Sundays and holidays. This phase is referred to in later paragraphs.

COMPARATIVE STATEMENT SHOWING RATES OF PAY AND INCREASES FROM DECEMBER, 1917, AND INCLUDING JULY, 1922.

Classes of employment	Rate, Dec., 1917	Rate, Jan., 1918.	Rate, July 1, 1918, effective Jan., 1918	Rate, May 1, 1918	Rate, May 1, 1920	Rate, July 1, 1921	Rate, July 1, 1922
Machinists	42½	55	68	72	85	77	70
Boilermakers	42½	55	68	72	85	77	70
Blacksmiths	42½	55	68	72	85	77	70
Sheet Metal Workers	40½	45	68	72	85	77	70
Electricians	41½	45	68	72	85	77	70
Carmen (except Freight Carmen)...	30½	34½	68	72	85	77	70
Apprentices	17	20	25	39	42	34	27
Helper Apprentices	26	27½	45	49	62	54	47
Helpers	27½	29½	58	67	80	72	63
Freight Carmen	24½	27½	45	49	62	54	47
Car Cleaners	24½	27½	45	45	50	42	37

In order to prove the extent of the recent reductions in the scale of wages upon individual workmen, and particularly the withdrawal of overtime pay, the following schedule was presented to the Board by a representative of the employees. The first table gives the

aggregate loss in dollars, the men who are scheduled for seven days' work every week compared with their earning power under the conditions subsequent to May, 1920, and previous to July, 1921. It was admitted that about 21 per cent of the men employed in the Company's shops are affected, as is shown hereunder.

EMPLOYEES WORKING SEVEN DAYS A WEEK, IF WORKING TO THE FULL EXTENT OF THEIR EARNING POWER.

	1st reduction effective July 1, 1921.	2nd reduction effective December 1, 1921.	Proposed 3rd reduction effective July 1, 1922.	Total loss in a year.
Machinists	c.		c.	
Boilermakers	8	38½ cents per hour 59 days a year.	7	\$638.60
Blacksmiths				
Electricians				
Sheet Metal Workers				
Carmen (except Freight Carmen)....	8	36 cents per hour 59 days a year.	9	\$685.25
Freight Carmen.....	8	27 cents per hour 59 days a year.	7	\$497.64
Helpers				

And it was likewise contended that ordinary employees working only six days a week, if working to the full extent of their earning power, were subject to the aggregate reductions set forth in the following schedule, compared with the earning capacity under the scale of wages and conditions in between May, 1920, and July, 1922.

EMPLOYEES WORKING SIX DAYS A WEEK, IF WORKING TO FULL EXTENT OF WORKING POWER.

	1st reduction effective July 1, 1921.	2nd proposed reduction effective July 1, 1922.	Would total.
Machinists	8 cents	7 cents	\$367.20
Boilermakers			
Blacksmiths			
Electricians			
Sheet Metal Workers	8 cents	9 cents	\$416.16
Carmen (except Freight Carmen)...			
Freight Carmen.....			
Helpers			

The Railway Company admitted that reductions had been made in wages since the rates were fixed under the so-called McAdoo Award, but claimed that the reductions were just and reasonable in view of the changing conditions subsequent to the period.

The Railway submitted the following schedule of wages as offering a more reasonable comparison of the general effect of all increases and reductions embracing changing conditions between 1915 and the recent decision of the United States Labour Board which was intended to bring into effect on the Canadian Branch of the Railway, July 1, 1922, and which is now in effect in the United States.

Statement showing yearly wage of certain mechanical department occupations on the Canadian Division on Basis of full number of working hours six days per week, excluding holidays.

	1915	1917	1918	1918	1920	1921	1922
Machinists	\$950.13	\$1170.45	\$1346.40	\$1664.64	\$2080.80	\$1884.96	\$1713.60
Boilermakers	950.13	1170.45	1346.40	1664.64	2080.80	1884.96	1713.60
Blacksmiths	950.13	1170.45	1346.40	1664.64	2080.80	1884.96	1713.60
Machinists' Helpers.....	495.72	716.04	679.32	1101.60	1517.76	1321.92	1150.56

NOTE.—Regular working days each year, 306; regular working hours each day, 1915 and 1917, 9 hours; other periods, 8 hours.

The following statement shows the yearly wage of certain mechanical department occupations on the Canadian Division on the basis of full number of working hours, seven days per week, in-

cluding time and one half for Sundays and legal holidays until August 1, 1921, when the allowance for time and a half for Sundays and holidays was reduced to pro-rata of wages.

	1915	1917	1918	1920	1921	1921	1922	Per cent increase over 1915
Machinists	\$1225.09	\$1509.17	\$1735.80	\$2682.60	\$2430.12	\$2248.40	\$2044.40	66.8
Boilermakers	1225.09	1509.17	1735.80	2682.60	2430.12	2248.40	2044.40	66.8
Machinist Helpers.....	639.18	923.26	875.79	1956.72	1704.24	1576.80	1372.40	114.7
Boilermaker Helpers.....	710.20	994.28	938.91	1956.72	1704.24	1576.80	1372.40	93.2
Freight Carmen.....	639.18	976.52	923.13	2524.80	2272.32	2102.40	1839.80	188.1

This schedule is worked out on the basis of nine hours per day in 1915 and 1916, and only eight hours per day for the other years.

Taking these figures presented by both the labour representatives and the Railway, which are not disputed, the Board notes that notwithstanding the reduction of \$638.60, \$685.25 and \$497.64 the pay of these employees after this reduction is made is

\$2,044.40 \$1,839.80 \$1,372.40
which is

\$819.31 \$1,200.62 \$662.20
more than they received in 1915.

And in the reduction of employees working six days of

\$367.20 \$416.16 and \$367.20
Their pay is still

\$1,713.60 \$1,542.24 \$1,150.56
or

\$1,052.64 \$1,046.52 \$599.76
per year above 1915 rates of pay.

Strong objection was taken by the employees to the amended working conditions and wages for employees when away from home terminal. This was taken as affecting crews engaged in extraordinary work such as might be caused by accidents or wrecks. It was claimed that the new regulations withdrew special privileges to which the employees were properly entitled.

In reply the Railway Company file the accompanying schedules in support of the contention that the present allowances for the class of work are not wanting in fair consideration toward the employees. These schedules are on a basis of three days, (72 hours) absence from terminal base.

Statement showing what would be paid wrecking crew of 5 away from home 72 hours under various working conditions from 1917 to the present standard of wages.

	Hours	Rate	Amount	Hours	Rate	Amount	Hours	Rate	Amount
	1917			1918			1918		
Wrecking foreman (1).....	72	.31½	\$ 22.68	72	.35½	\$ 25.56	72	.84	\$ 60.48
Carmen (3).....	216	.27½	59.40	216	.29½	63.18	216	.77½	167.04
Labourers (1).....	72	.23	16.56	72	.27¾	19.98	72	.52¾	37.90
	1920			1921			1921		
Wrecking foreman (1).....	72	1.27½	\$ 91.80	72	1.15½	\$ 83.16	72	1.02½	\$ 73.92
Carmen (3).....	216	1.20	259.20	216	1.08	233.28	216	.96	207.36
Labourers (1).....	72	.63¾	45.80	72	.52¾	37.90	72	.52¾	37.90
	1922								
Wrecking foreman (1).....	72	.93¾	\$ 67.20						
Carmen (3).....	216	.84	181.44						
Labourers (1).....	72	.46¾	33.25						

A clearer understanding of the contention of the Railway that the present conditions are not unfavourable as

shown by comparison of the amounts which the members of wrecking crews could earn in 1917 and 1922 respectively.

	1917			1922		
	Hours	Rate	Amount	Hours	Rate	Amount
Wrecking foreman (1).....	72	.31½	\$22.68	72	.93½	\$ 67.20
Carmen (3).....	216	.27½	59.40	216	.84	181.44
Labourers (1).....	72	.23	16.56	72	.46¼	33.25

The Board does not feel called upon to deal at length with the arguments that were presented upon the general question of the high cost of living; nor of the comparative cost of living between Canada and the United States, nor to the reduction in wages being on a larger percentage than is warranted in the decrease in the cost of living.

But the Board is compelled to take notice of the matter from the manner in which their attention has been drawn to this general subject. It is undoubtedly clear that the percentage of reduction in wages from the peak (1920, the McAdoo Award) is greater than the decline in the cost of living since 1920. The Board, however, is inclined to the view that this is not a correct basis for a fair comparison. But that a clear conception of the situation is furnished by a comparison of the changed wage conditions and cost of living between

1915 and 1922, as shown in the following schedule:

COMPARISON OF INCREASE AND DECREASE IN LIVING COSTS AS SHOWN BY STATISTICS PUBLISHED IN "LABOUR GAZETTE" OF CANADA AND RATES OF PAY RECEIVED BY MACHINISTS, BOILERMAKERS AND BLACKSMITHS USING 1915 AS A BASIS.

	Weekly cost	Per cent	Hourly wage	Per cent
December 1915....	\$13.93 (base)	Zero	.34½	Zero
December 1917....	19.30	38.5	.42½	23.2
April 1920....	25.33	81.8	.72	108.7
May 1920....	26.64	89.8	.85	146.4
July 1921....	21.55	54.7	.77	123.2
May 1922....	20.53	47.3	.70	102.9

There was placed before the Board a statement of wages paid to certain crafts in outside industries for the purposes of comparison with the wages paid by the railway. The following therefore may be of interest and is self-explanatory..

TABLE COMPARING RATES OF PAY PER HOUR IN OUTSIDE INDUSTRIES WITH THE RATES AUTHORIZED BY UNITED STATES LABOUR BOARD EFFECTIVE JULY 1, 1922, NOT YET APPLIED TO CANADA.

	E. Leonard & Sons, London	Park Bros., Chatham	Waterson's Engine Works, Brantford	Canada Iron Foundry, St. Thomas	Père Marquette Railway
Machinists	54 to 58	50	58	65	70
Blacksmiths	59	50	51	70
Blacksmith Helpers	38	47
Boilermakers	59	40 to 50	61	70
Boilermaker Helpers	40	47

With respect to the suggestion of the Department that the Board should enquire into complaints that had reached the Department about alleged improper rates of pay to labourers employed at St. Thomas by the Père Marquette Railway, the Board is pleased to report that

this matter is now before the United States Labour Board and it is said that the complaint will be remedied at an early date.

The Board desires to express its appreciation to all concerned for the tem-

perate and courteous manner in which the various aspects of the questions involved in the dispute were presented by the representatives of both the Railway and the employees.

In reviewing the evidence presented the Board has reached the following conclusions:—

1. That the alleged extra cost of living at St. Thomas cannot be considered, inasmuch as the rate of wages on the Père Marquette Railway must be considered as affecting the entire system.

2. That the time given to the consideration of this wage reduction by this Board cannot compare with the exhaustive and systematic enquiry given by the Labour Board in the United States. Still from the evidence produced the facts are unquestionable that the percentage of the general increase in wages is far in excess of any increase in the cost of living.

3. The amended scale of wages in the Père Marquette Railway shops are in excess of rates of pay for skilled labour of a similar character throughout Western Ontario.

4. Consequently the Board cannot but conclude that the wage reductions proposed by the United States Labour Board to be effective July 1, are just and reasonable, and this Board recommends that they shall be effective in the Père Marquette Railway as from September 16.

5. The Board has been assisted in arriving at this conclusion in view of the fact that Mr. Jewell, head of the Railroad Shop Craftsmen, in response to the President Harding's proposal to accept the cut pending a further consideration by the United States Labour Board on August 2, accepted President Harding's proposition provided the seniority rights of the striking men were retained. As there is no dispute in Canada as to seniority the employees in Canada are justified in accepting this

decision, pending further consideration of the United States Labour Board.

All of which is respectfully submitted.

(Sgd.) W. T. R. PRESTON,
Chairman.

(Sgd.) A. LESLIE,
Member of Board.

Minority Report.

The Honourable Mr. James Murdock,
Minister of Labour.

Dear Sir,—

In the matter of the Board of Conciliation appointed by you on the 10th day of July, 1922, consisting of Mr. W. T. R. Preston, of Port Hope, Chairman; Mr. Alexander Leslie of Walkerville, member of the Board representing the Père Marquette Railway Company, and Mr. W. D. Robbins of Toronto, representing the employees of the said Railway, to enquire into and report on the dispute between the Père Marquette Railway and its Federated Shop Crafts comprising Machinists, Boilermakers, Blacksmiths, Electricians, Sheet Metal Workers, Passenger Carmen, Freight Carmen, Grease Cup Fillers, Coach Cleaners, and Material Carriers.

My colleagues on the Board have made a report which I do not agree with and wish to make a minority report as follows:

On July 1, 1921, the United States Railway Board reduced all classes of the above mentioned men 8 cents per hour, which they accepted.

On August 11, 1921, the United States Railway Board made a further reduction in the rates of pay, by giving a decision that the time and one-half for Sunday and holiday work would be discontinued, notwithstanding the fact that this overtime had been paid for many years and amounted to 52 Sundays and 7 holidays, making in all 59 days a year at time and one-half or a further reduction of \$181.72 a year for the 50 per cent of the men who work on Sundays. This decision of the Railway

Board was, of course, readily put in effect by the different railway companies.

The third decision of a reduction within a year was given by the said Railway on July 1, 1922, of another 5, 7 and 9 cents per hour. The decision was resented by the men of the United States and they went on strike in con-

sequence. The Canadian employees of the Père Marquette Railway would also have gone on strike but as they are good Canadian citizens, they stood by our laws and applied for a Board of Conciliation under the Act of 1907.

Just here let me present a table showing just what these three decisions meant to the workmen employed:

Class	No. of days per week	High wages	Proposed wages	Average total loss per hour	Total loss	Loss per cent
				cents	\$	
Machinists	7	85	70 less half time for 59 Sundays and Holidays.	21½	638.60	25½
Boilermakers						
Blacksmiths						
Electricians						
Sheet Metal Workers						
Passenger Carmen....	7	80	63 less half time for 59 Sundays and Holidays.	23¾	685.20	29¾
Freight Carmen.....						
Grease Cup Fillers... (all 7-day men)	7	62	37 do	30	876.32	48
Coach Cleaners..... (all 7-day men)	7	50	37 do	17½	506.60	35
Machinists	6	85	70	15	367.20
Boilermakers						
Blacksmiths						
Electricians						
Sheet Metal Workers						
Passenger Carmen....						
Freight Carmen.....	6	80	63	17	412.16
Material Carriers.... (all 7-day men)	6	62	37	25	612.06

You will notice the seven-day men were cut from 25½ to 48 per cent, including some of their re-classification, a proportion much beyond the decrease in the cost of living. Some of the main things that keep the living costs up are rent and fuel, which are yet high or higher than ever, and which form no small part of the expenditure of a family.

A very significant fact and one which the public is interested in is that the Railway has only reduced their passenger rates about 10 per cent and their freight rates 11 per cent, and then ask the men to take this enormous reduction in wages.

You will also notice the geographical position of this Railway, running across Ontario with their heavy loads, connecting the two cities of Detroit and Buffalo, thereby saving many miles of travel than by going around the south side of the

Lake, and in my opinion this portion of the Père Marquette is a good paying proposition, in fact, it was admitted at the hearings that the Company was paying 53¼ per cent dividends.

I do not agree with the findings of the majority of this Board, for I think this last cut of 5, 7 and 9 cents per hour is not justified, and that the Company is well able to pay these men, as everyone who has been in a railway shop or roundhouse knows that these men have very hard and very particular work, for if a mistake is made or if there is poor workmanship, the lives of the travelling public would be endangered.

My firm opinion is that a Railway Board for Canada controlling the operations of both men and companies, is not at all desirable for this country and certainly would not be in the interests of the men.

I may also report that during the sittings I made several proposals and offers of compromising nature in order to avoid any trouble on our railways at this time, but I am of the opinion that the companies are all pledged to stand firmly together and not yield a fractional part of a cent in this matter, so

the Chairman and the Company's representative on the Board signed the majority award, granting most of the contentions of the Company.

I have the honour to be,

Yours very truly,

(Sgd.) W. D. ROBBINS,
Member of the Board.

Report of Board in Dispute between the Père Marquette Railway Company and certain of its employees, being clerks, checkers, freight handlers, baggage-men, etc.

A report was received from the Board of Conciliation and Investigation established to deal with differences between the Père Marquette Railway Company and certain of its employees being members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees. The Board was composed as follows: Mr. W. T. R. Preston, Port Hope, Ont., chairman, appointed by the Minister in the absence of a joint recommendation from the other two members of the Board, Messrs. Alexander Leslie, Kingsville, Ont., and Charles B. McClurg, St. Thomas, Ont., nominees of the company and employees respectively. The report was unanimous and contained recommendations as to the settlement of the dispute. Both parties expressed their willingness to accept the findings of the Board.

Report of Board.

In the matter of the Industrial Disputes Investigation Act, 1907, and in the matter of a dispute between the Pere Marquette Railway Company and certain of the employees being members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees.

Windsor, Ont., Sept. 14, 1922.

To the Honourable James Murdock,
Minister of Labour, Ottawa, Ont.

This Board of Conciliation was authorized by the Honourable the Minister of Labour under date July 31st, 1922.

The Board was convened at Windsor, August 18th, and held further sittings at the Prince Edward Hotel, Windsor, August 19, 21, 22, 25, 26, 28, September 7, 8, and 9, and 14.

The subject matter of this dispute developed from the fact that the Père Marquette Railway put into effect on the Canadian Division of its Railway, the scale of wages adopted by the United States Labour Board, known as Decision 1074, the same to become operative as of July 1, 1922. The general question of the rates of pay of certain railway employees had previously been referred to the United States Labour Board by mutual consent of the great labour organizations of the United States and the Railway systems of that country.

The United States Labour Board was created under the Transportation Act of 1920, passed by the Congress of the United States. This Act was passed for the purpose of providing for the termination of the United States government control of railways and systems of transportation respecting which the said government had assumed control during the war. This Transportation Act provided for the establishment of a Railway Labour Board consisting of nine members, three members constituting the labour group, three representing the railways, these to be chosen from six nominees of each class to be submitted to the President of the United States, and three other members constituting the public group to be appointed directly by the President, all to be by and with the

consent of the Senate of the United States.

The legislation further provided that the Labour Board should be a tribunal, to which might be referred by mutual consent of the respective parties, all questions dealing with salaries, wages and general working conditions of the employees in the railways throughout the United States. The Railway Board was clothed with large powers of investigation in order that exhaustive evidence might be secured upon all questions bearing upon the subject matter of disputes between railroads and employees.

With respect to this dispute it is admitted that Canadian employees upon United States railways running through or on Canadian territory should be governed generally by the rules, regulations, rates of wages, etc., that were effective with respect to the employees who were living upon the American side of the boundary line. In the case in dispute the employees interested numbered only a small percentage of the total number of the same class of employees in the service of the Père Marquette Railway. The Canadian employees of this dispute are members of the American Federal Railway Employees known as Division No. 2, as distinct from the employees on Canadian Railways, who are members of Division No. 4.

These employees on the Canadian Branch of the Père Marquette Railway had been subject to a wage increase heretofore issued under a previous decision of the United States Labour Board, subsequent to the railways being returned by the United States Government to the private owners, together with earlier arrangements as to regulations, rules and wages generally consistent with the operation of this Railway in the territory covered by the said Railway in the United States and had also been subject to and accepted a wage reduction as made by the United States Labour Board on July 1, 1921.

At the first meeting of the Board notice was taken of the fact that the Railway had brought the proposed reductions in wages and working conditions into effect without the usual thirty-day notice to the employees and in contravention with the provisions of the Industrial Disputes Investigation Act. Upon the matter being brought officially to the notice of the President and General Manager of the Railway, F. H. Alfred, Esq., Detroit, he issued instructions for the payment of wages and salaries at the rate in existence prior to July 1, pending action by this Board.

The Board found itself in a peculiar position at the outset—due to the following circumstances:—

The Railway is an American Corporation, the greater part of the mileage and the greater proportion of its employees are in the United States.

The employees in Canada have by preference attached themselves to the Railway Association, Division No. 2, which is altogether under the control of the United States organization, rather than with the Canadian Labour organization known as Division No. 4.

The Railway contended that the Canadian employees on its system were parties to the wages and working condition references to the United States Labour Board, and were represented officially in the prosecution of their case when the proposed readjustment of wages was being considered by the said Board, while the employees contended that as the Railway had itself objected to the jurisdiction of the United States Labour Board in grievances of Canadian employees which had been submitted to the Board for adjudication (which said objection was sustained by the Board) that although their organization (which represents both the United States employees and the Canadian employees concerned in this dispute) had appeared before the Board, the Canadian employees could not possibly be considered parties to the reference nor officially represented, the United States Labour

Board having held in said grievance that it had no jurisdiction beyond the territorial boundaries of the United States.

The general decision of the United States Labour Board was therefore from the viewpoint of the Company, quite naturally put into effect by it over the Canadian sections of the railway, although the Labour Board had previously distinctly affirmed its absence of jurisdiction in the consideration of individual grievances of employees in Canada upon this Railway.

From this it will be seen this Board was asked to revise and reverse decisions that had been rendered by another Labour Tribunal, that of the United States Labour Board, before which the same organization which represents both the United States employees and the Canadian employees concerned in this dispute had appeared and been a party to the reference upon the questions now at issue.

Evidence was presented to the Board establishing the fact that the larger number of the United States employees of the classes concerned in this dispute have protested against the reduction in their wages as from July 1, and have announced their intention to appeal to the Labour Board for a general revision of Decision 1074.

Under these circumstances your Board hesitated in taking direct issue with a Labour Tribunal in a foreign country before which the same organization as represents the employees concerned in this dispute, had appeared for the adjudication of the questions at issue between them and to which tribunal the same organization is now appealing again on behalf of the United States employees on these identical questions. It would also appear that under private management, prior to the time when the United States Government took over the railways, the Canadian employees were in some cases paid salaries considerably less than those paid employees on the American side of the line in the same class of employment, and that

although the Père Marquette Company had, in the only instance in which an increase had been ordered by the United States Labour Board since the return of the railways to private ownership, increased the wages of the Canadian employees in the same manner as they had increased the United States employees in the same class of employment, that the railways were in no way legally obliged at any time in the past or in the future, to put increased rates of pay into effect in Canada if same were ordered by the United States Labour Board, and that subsequent to this increase being put into effect in Canada, the United States Labour Board decided in the grievance case before mentioned that it had no jurisdiction outside of the United States. It would also appear that by reason of this decision that the Canadian employees had no tribunal to which they could apply for relief as to grievances, the Père Marquette not being a party to the Canadian Board of Adjustment.

A brief reference to the great volume of documents and verbal evidence submitted to your Board may not be out of place.

Having as a basis the actual returns from 165 employees of the Railway and showing what it cost them to live, using the month of November, 1921, as a basic month, the following table gives the average wages and average expenditures of the employees in question. And it was submitted that this is a fair basis for the general consideration of the question as to the rate of wages which *should* prevail.

	Average wage	Average expenditure
Chief clerks and foreman.....	\$122.09	\$129.50
Clerks less than 1 yr. experience	107.15	159.23
Clerks less than 2 yrs. experience	111.83	114.07
Clerks over 2 yrs. experience....	115.15	136.00
Train and engine callers.....	111.78	114.00
Truckers (freight).....	99.35	117.78

Carefully prepared schedules were presented by representatives of the em-

ployees giving details to establish the contention that the actual cost of living in Canada exceeds that of the United States. In the case of St. Thomas the employees apparently presented in the lists of prices of necessary commodities of life, a statement worthy of careful consideration.

The railway contended that due consideration had been given upon general principles to the employees here in the matter of wages and salaries. To substantiate this contention a schedule was laid before the Board giving the salaries of the varied classes of those interested in this dispute between 1915 and 1922.

	1915	1918	1918 (2)	1918 (3)	1920	1921	1922
Clerks	\$50.00	\$50.00	\$71.50	\$87.50	\$114.02	\$101.75	\$95.66
Warehouseman	50.00	65.00	71.50	90.00	114.75	102.26	94.10
Checkers	40.00	52.50	60.00	87.50	114.02	101.78	96.66
Cashiers	75.00	102.15	105.75	127.15	153.67	141.43	135.31
Shedmen	50.00	60.00	71.50	87.50	114.02	101.75	95.66
Call boys	30.00	34.50	50.00	87.50	114.02	93.62	87.50

Following a request for the information, the Railway submitted a statement showing the number of clerks, etc., at Detroit, Chicago and Grand Rapids who received an increase on July 16, 1922, equal to the amount, in the case of the employees at Detroit and Chicago, of the reduction under the provisions of Decision 1074 and equal to one-half the amount, in the case of the employees at Grand Rapids, of the reduction under the provisions of said Decision 1074 effective July 1, 1922.

Total number of clerks, etc., of the class in this dispute in the employ of the Company on its entire system.... 1,599

Fully restored—

Detroit.....	714	
Chicago.....	39	
		753

One-half restored—

Chicago.....	3	
Grand Rapids.....	106	
		109

Total wholly or partially restored.... 862

actually showing fifty-three per cent for whom a higher scale of wages had been allowed by the Company than was given under Decision 1074 of the United States Labour Board which the Railway desired to and did put into effect in Canada on July 1, last.

The Railway explained the special conditions prevailing in Chicago and Detroit as justification of the increase in rates of wages in those localities. The representatives of the clerks, etc., con-

tend that equally adverse conditions prevail in the Company's railway centres in Canada. The Railway admitted its willingness to have this question fully and sympathetically considered by the responsible officials of the Company, and this Board ventures to suggest that in making its decision, the Railway take into consideration the fact that the clerks, etc., are the second poorest paid class of employees in railway service, that the cost of living at the points in Canada on its system where the clerks, etc., are employed, would seem to be excessive in proportion to the salaries paid the clerks, etc., and that since May, 1921, according to figures published in the *Canada Labour Gazette*, the cost of living has only decreased between ten and eleven per cent, whereas with the proposed reduction under Decision 1074, the clerks will have suffered a cut of approximately sixteen per cent since the peak.

Following extended negotiations between the Board and the parties to this dispute and through their representatives, the following memorandum was recommended by Mr. A. J. Ayearst, General Chairman of the Brotherhood of Railway Clerks and Mr. D. A. Klumph, Inspector, Père Marquette Railway, to form part of the report of the Board of Conciliation, and which it is agreed, shall be the basis for the settlement of all the questions that have been presented for adjudication or recommendation by this Board of Conciliation.

The Board of Conciliation with the consent and approval by the parties to this dispute, in view of the fact that the employees of the Père Marquette Railway in Canada, concerned in this dispute, are only a small portion of the total number of the clerical staff of the Père Marquette and that they by the decision of the United States Labour Board have no tribunal to which they can appeal for wage adjustments or personal grievances hereby recommend:

1. That an agreement be entered into between the employees in Canada concerned in this dispute and the Père Marquette Railway Company whereby the decision of the United States Labour Board on the question of wages and grievances shall be accepted by the employees in Canada, concerned in this dispute and by the said Company, the intention of this recommendation being that there shall be absolutely no adverse distinction or discrimination made by the said Company between the employees in Canada concerned in this dispute and those in the United States in the same class of employment, and that in case of working conditions and individual grievances now before this Board or hereafter arising, that these shall be submitted to the United States Labour Board for adjudication is possible, and that its decision be binding upon the said Company and its employees in Canada concerned in this dispute, and further in the event that the United States Labour Board refuses to entertain such disputes as to working conditions and grievances or either of them, that a tribunal be appointed jointly by the Company and the employees in Canada concerned in this dispute to adjust such working conditions and grievances and that the decision of such tribunal be binding upon the said employees in Canada concerned in this dispute and the said Company.

2. That the rates of pay effective prior to July 1, 1922, be continued in force by the Company until the fifteenth day of September, 1922, and thereafter pending a new decision of the United States Labour Board or as may be arranged such rate of wages as may be mutually agreed upon by the said Railway and its employees in Canada, shall be paid, and failing such an agreement being arrived at or no conference being held, then the employees concerned in this dispute shall, until such time as a new decision is made by the United States Labour Board or an agreement arrived at, be paid upon the basis of the rates set forth in Decision 1074.

This arrangement is being made on the express understanding that the most cordial relations shall continue to exist between the management of the Père Marquette Railway and its employees.

We hereby approve of the above recommendation by the Board of Conciliation.

(Sgd.) A. J. AYERST.

(Sgd.) D. A. KLUMPH.

Dated at Windsor, September 9, 1922.

This Board therefore recommends that:—

1. There shall be no adverse discrimination made by the Père Marquette Railway between the employees in Canada concerned in this dispute and those in the United States in the same class of employment.
2. The present rate of wages shall continue until September 15th instant.
3. After that date such rate of wages as may be mutually agreed upon between the said Railway and its employees shall be paid and that in the event that no agreement is arrived at or no conference held, the wages shall then revert to the standard fixed by the United States Labour Board Decision 1074 which would have been effective July 1st, until such time as a new decision is rendered by the United States Labour Board or an agreement arrived at.
4. If the United States Labour Board increases the rate of wages, the said increase shall apply automatically to the Canadian employees of the Railway.
5. If the United States Labour Board fails to consider grievances of the clerks, through alleged absence of jurisdiction, the Company shall agree with the employees for a reference to an impartial tribunal to be agreed upon.

All of which is respectfully submitted.

(Sgd.) W. T. R. PRESTON,
Chairman.

(Sgd.) A. LESLIE.

(Sgd.) CHAS. B. McCLEURG.

Report of Board in Dispute between the New York Central Railway Company and its Shop Crafts employees at Ottawa

A report was received from the Board established to deal with the dispute between the New York Central Railway Company as represented by its officers in charge of the railway shops located at Ottawa, and certain of its employees, being members of the Federated Shop Crafts. The Board was composed as follows: the Honourable Senator G. D. Robertson, Ottawa, chairman, and Messrs. Max Goodrich, Ottawa, and John T. Foster, Montreal, nominees of the Company and employees respectively. The report was unanimous and contained recommendations as to the settlement of the dispute. The recommendations were accepted by both parties to the dispute.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the New York Central Railway Company and certain of its employees on the New York and Ottawa Division, working in the Railway Shops.

To the Hon. James Murdock,
Minister of Labour, Ottawa, Ont.

Sir:—

The undersigned members of the Board of Conciliation, appointed by you to investigate the above mentioned dispute, herewith submit the following unanimous report and recommendation:—

Meetings of the Board were held at Ottawa, Ont., on August 14th, 15th, 28th, 29th, and 31st, exhibits received, witnesses heard and examined, and all presentations, both verbal and written, carefully considered.

Although the matters in dispute referred to the Board included both working conditions and wages, we are glad to report that at the second sitting a satisfactory understanding was reached with reference to the working con-

ditions claimed to be in dispute leaving only the question of wages unsettled.

The Railway Company proposed a wage reduction for its employees engaged in various capacities in its shops, ranging from five to nine cents per hour. Two reasons were advanced in justification of the proposed action, viz:—(1) A decline in the cost of living, and (2) That wages paid similar workmen in other industries were lower than those prevailing in railway shops. It was stated that these reasons had been advanced to the United States Labour Board, which body, after careful and exhaustive inquiry, had issued Decision No. 1036, upon which the Company's present proposal was based. It was admitted that the proposals and conclusions of the Company were based solely upon United States conditions only, no inquiry having been made by it in Canada, very few men being affected.

The representatives of the employees submitted a number of exhibits, which were obviously prepared with much care, as evidence supporting their oral contention that no reduction in living costs had occurred since the last wage cut took place as would justify any further decline in wage rates. The exhibits were also intended to prove that existing rates were insufficient to reasonably meet the needs of an average workman's family. These exhibits were carefully analysed by the Board and generally accepted as reasonable estimates. No evidence was submitted by either party in support or denial of the Company's contention that similar workmen in industries outside transportation were receiving a lower rate of wages. During the discussion, the Company's representatives indicated a willingness to adopt Canadian standards in Canadian territory. The Board is of the opinion that both parties should accept, as a reasonable solution of their differences as to wage rates,

the adoption of the same scale of rates as is now being paid, or as may hereafter be accepted as applicable to similar employees in similar service on the large Canadian Railway Systems operating in this territory.

While recommending the adoption of Canadian standard rates on the New York and Ottawa Division of the New York Central System, it is obviously impossible and improper for this Board to suggest what those rates should be. The scope of our inquiry is confined to a very small area with only a small number of men affected, while the same question as affecting more than thirty thousand similar workmen throughout all Canada, is, we believe, under review and investigation by another Board ap-

pointed for the purpose, and before which, evidence both voluminous and country wide, will undoubtedly be submitted.

We therefore respectfully beg to report that the dispute respecting working conditions referred to this Board has been satisfactorily adjusted by agreement between the parties before the Board, and recommend the adoption of Canadian standards as to rates of pay in the manner above outlined.

All of which is respectfully submitted.

(Sgd.) G. D. ROBERTSON,
Chairman.

(Sgd.) MAX GOODRICH.

(Sgd.) J. T. FOSTER.

Ottawa, September 1, 1922.

Interim Report of Board in Dispute between the Grand Trunk Railway System and certain of its employees being clerks, freight handlers, stationary engineers and firemen, etc.

An interim report was received from the Board established to deal with the dispute between the Grand Trunk Railway System and certain of its employees, being clerks, freight handlers, stationary engineers and firemen, oilers, roundhouse shop and store labourers, etc., members respectively of the Canadian Brotherhood of Railroad Employees and the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees. The Board was composed of Messrs. E. McG. Quirk, chairman, U. E. Gillen and Howard S. Ross, K.C. The report contained a memorandum of agreement signed by representatives of both parties to the dispute which provided means looking to the settlement of the points at issue.

tween the Grand Trunk Railway System and certain of its employees, being clerks, freight handlers, stationary engineers and firemen, oilers, roundhouse shop and store labourers, etc., members respectively of the Canadian Brotherhood of Railroad Employees and the Brotherhood of Railway Steamship Clerks, Freight Handlers, Express and Station Employees.

Montreal, Quebec,
September 29th, 1922.

Hon. James Murdock, M.P.,
Minister of Labour, Ottawa, Ont.

Sir,

The Board of Conciliation appointed by you has the honour to submit the attached agreement as an interim report.

The Board will convene at a later date for the purpose of submitting its final report, but we are hopeful that, in the meantime, the parties to the dis-

Interim Report of Board

Re Industrial Disputes Investigation Act, 1907, and re differences be-

pute will agree on permanent rates of pay.

We have the honour to be,

Sir,

Your obedient servants,

(Sgd.) E. MCG. QUIRK,
Chairman.

(Sgd.) U. E. GILLEN,
Member.

(Sgd.) HOWARD S. ROSS,
Member.

MEMORANDUM OF AGREEMENT made the twenty-eighth of Sept., 1922, between the Grand Trunk Railway and its Employees' Committee, representing employees covered by schedule for clerks, stationmen, roundhouse men, etc., in respect to rates of pay of such employees, which matter has been placed before a Board of Conciliation under the Industrial Disputes Investigation Act, 1907; the said Board consisting of Mr. E. McG. Quirk, Chairman; Mr. U. E. Gillen, representing the employer; and Mr. Howard S. Ross, K.C., representing the employees.

The rates of pay having been restored under certain conditions, namely:

The Grand Trunk, while maintaining its position that it was legally justified in putting into effect reduced rates of pay as of July 20th, 1922, is, pending an anticipated early report of the Board of Conciliation, prepared, in the interests of harmony and co-operation with its employees, to continue the former scale of rates, on the understanding that this is done without prejudice to the company's case before the Board and that the company shall not be prevented in negotiating any agreement during or subsequent to the proceedings before the Board from taking the position that the new scale should be retroactive to 20th July last.

and with a view to reaching a mutual understanding as suggested by the Board of Conciliation, the railway and the employees have agreed as follows:

1. The restored rates of pay shall continue in effect as outlined to and including October 15th, 1922, and failing to reach a mutual agreement on or before October 16th, 1922, in respect to rates to be effective on and after October 16th, 1922, the restored rates shall be so continued in effect to and including October 31st, 1922.

2. Promptly upon notice from either the railway or employees to the other, conference shall be held with a view to reaching a mutual agreement in respect to rates

of pay to be effective on and after October 16th, or November 1st, 1922.

3. If representatives of the railway and employees are unable to agree on permanent rates of pay effective not later than November 1st, 1922, then each hereby agrees with the other to request the Chairman of the Board to reconvene the Board to establish rates to be paid on and after November 1st, 1922.

4. Pending the final report of the Board of Conciliation the Railway may withhold from the employees on and after November 1st, 1922, tentatively, the amount of the reductions involved in the dispute at present before the Board. It is understood and agreed that the acceptance of this condition by the employees is not to be considered as an admission on their part that any reduction whatever is justifiable.

5. In the event that mutual agreement is not reached on or before October 31st, 1922, the railway agrees to adjust, to a uniform graded scale as may be mutually agreed, rates for certain individual positions paid at hourly rates; such adjustment to be effective on and after November 1st, 1922. In order to make such adjustments with the least possible disturbance to higher rates now prevailing, the railway agrees to absorb the increase to the lower rated positions to the extent of approximately \$3,500 per month. It is, however, understood that should the final recommendation of the Board embody a provision in respect to uniform or graded rates that this amount would be considered as being absorbed thereby.

6. The effective date that the rates resulting from this agreement shall appear in the schedule shall be as agreed upon, or in accordance with the final finding of the Board as herein provided.

Accepted by the Railway:

(Sgd.) C. F. NEEDHAM,
Chairman, Committee of Officers.

Accepted by Committee representing Employees:

(Sgd.) A. R. MOSHFR.
(Sgd.) J. E. MCGUIRE.
(Sgd.) A. E. LAWRENCE.
(Sgd.) J. E. CHICK.
(Sgd.) F. J. AINSBOROUGH.

Report of Board in Dispute between the Marconi Wireless Telegraph Company of Canada, Limited, and certain of its employees being members of Federal Labour Union No. 16570, American Federation of Labour.

A report was received from the Board established to deal with the dispute between the Marconi Wireless Telegraph Company of Canada, Limited, and certain of its employees, being members of Federal Labour Union No. 16570, American Federation of Labour. The Board was composed of Rev. Dr. Clarence Mackinnon, chairman, and Messrs. Stuart McCawley and William Ulric Cotton. The report of the Board was unanimous and was accompanied by a copy of an agreement signed by representatives of both parties to the dispute.

Report of Board

Report of the Board of Conciliation—
Re dispute between Marconi Wireless Telegraph Company and Employees.

To the Minister of Labour,
Ottawa, Canada.

Sir,

Your Board of Conciliation have pleasure in forwarding their report with accompanying copy of agreement. Both the management and the representative of the men approached the problem in a reasonable and conciliatory spirit. The agreement has the unanimous approval of the Board, and it is believed the settlement will be productive of very harmonious relationship in the future.

(Sgd.) CLARENCE MACKINNON,
Chairman.

(Sgd.) STUART MCCAWLEY,
On behalf of the Company.

(Sgd.) W. U. COTTON,
On behalf of the Employees.

WAGE AGREEMENT.

This agreement between the Marconi Wireless Telegraph Company of Canada Limited and its employees being members of Federal Labor Union No. 16570, American Federation

of Labor, at the Marconi Towers, Glace Bay, Nova Scotia.

The terms of this agreement are:—

- (1) That the Company agrees to pay and the workers agree to accept the wages set forth in the so-called Mackinnon award, which governed the wages of the Glace Bay miners prior to November, 1920.
- (2) That the rate of wages under the said Mackinnon agreement shall be retroactive to the first day of April, 1922. This to apply to men on Pay Roll at date of signing of this agreement.
- (3) That the rate of wages above set forth shall continue to be paid and accepted till the 15th day of January, 1914, inclusive, with the proviso that if there is a readjustment of wages between the Dominion Coal Company and its employees, any increase over, or any decrease under, the Mackinnon award rates shall be paid to the employees of the Marconi Wireless Telegraph Company at the Towers, Glace Bay, said increase, or decrease, to be paid for the same time as the Dominion Coal Company pay them.
- (4) That the contract shall continue beyond the 15th day of January, 1924, unless either party gives notice of a desire to terminate this agreement forty-five days prior to its termination, and if no such notice is given the agreement shall continue for forty-five days after any notice of termination shall be given, after the expiry of the said date of January 15th, 1924.

Dated at Marconi Towers, County of Cape Breton this 18th day of September, 1922.

Signed on behalf of the Company:

The Marconi Wireless Telegraph Company
of Canada, Limited.

Glace Bay and Louisburg Stations.

(Sgd.) J. W. MULLIN,
Engineer in Charge.

Signed on behalf of the employees:

(Sgd.) JAMES E. ROBERTS,
President Federal Labour Union,
No. 16570, A. F. of L.

(Sgd.) A. E. WILCOX,
Secretary.

Witness to the signing of above agreement:

(Sgd.) ALEX. BROWN.

(Sgd.) P. KRIFTON.

Report of Board in Dispute between the Marconi Wireless Telegraph Company of Canada Limited, and its Marconi wireless operator employees

A report was received from the Board established to deal with the dispute between the Marconi Wireless Telegraph Company of Canada, Limited, and its certificated Marconi wireless operator employees, members of the Commercial Telegraphers' Union of America, System Division No. 59. The report was signed by Messrs. E. McG. Quirk, chairman and Melville R. White, representing the Company, and contained recommendations as to the settlement of the dispute. Mr. Thomas Taylor, representing the employees, did not concur in these findings and presented a minority report. The findings of the Board were accepted by both the Company and the employees.

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Marconi Wireless Telegraph Company of Canada, Limited, and certain of its employees, all certificated Wireless Operators, members of the Commercial Telegraphers' Union of America, System Division No. 59.

Honourable James Murdock, M.P.
Minister of Labour, Ottawa, Ont.

Sir,—

The Board appointed by you, composed of Mr. E. McG. Quirk, chairman, Mr. Melville P. White, representing the employing Company, and Mr. Thomas Taylor, representing the Employees, has the honour to submit its report herewith.

The Board's preliminary meeting was held in Toronto on September 5th, and its subsequent meetings were at Montreal.

The Company's representatives before the Board were Messrs. A. H. Morse, Managing Director, A. L. MacCallum, Manager; G. H. Pearson, Traf-

fic Manager; and W. J. Gray. The Employees' representatives were Messrs. F. C. Allen, General Chairman; Thomas R. Ives, H. G. Leslie, V. H. Soares, and Paul F. Schnur, Vice-President for Canada, C.T.U.A.

The questions submitted to the Board for consideration were:—(a) The establishing of a fixed definite rate for overtime; (b) Claim for proportion of a retroactive wage allowance for Coast Station Operators covering the last three months of the year 1919; (c) Contention that the proposed reduction of fifteen per cent, which the Company proposes to put into effect, is not justified.

The subject matter of the items in dispute were very fully discussed "across the table". The contentions and arguments of the respective parties, were supported by written statements. Evidence of a confidential nature was submitted to the Board for its information.

It is most gratifying to the Board to be able to record its observation of the commendable and excellent relations existing between the Company and employees. Taking practical advantage of this good feeling, the Chairman suggested the advisability of the parties going into conference with the desired object of endeavouring to reach a mutually satisfactory settlement. Through these conferences, the parties were able to reach a tentative agreement as to general working conditions, including the matter of overtime, but were unable to reach an agreement as to a wage schedule.

The agreement under which the respective parties are at present governed is that of the findings and recommendations of a Board of Conciliation, dated October 29th, 1919, of which the Honourable Justice F. S. MacLennan was Chairman, and Mr. Thomas Taylor

and Mr. Bernard Rose members of the Board.

FINDINGS AND RECOMMENDATIONS OF THE BOARD.

Before considering the matters in dispute, it will not be irrelevant to outline briefly the status of the disputants.

THE MARCONI WIRELESS TELEGRAPH COMPANY OF CANADA, LIMITED.

A public utility corporation engaged in the maintenance and operation of some two hundred ship stations and twenty-two coast stations at various points on the Atlantic Coast and Great Lakes, all of which coast stations are owned by the Canadian Government. These stations are established as aids to navigation, life-saving, etc., in addition to receiving and transmitting governmental, commercial and social messages.

THE EMPLOYEES.

Are all certificated wireless operators engaged at the widely distributed stations operated by the Company on behalf of the Canadian Government, including also those engaged as ship Wireless Officers. They have varying lengths of service in the company. Seniority governs, providing the older men with all-year-round employment, while the junior men are more or less subject to seasonal engagement. The basic day for coast station operators is eight hours, seven days a week, two weeks' holidays per annum with pay and allowance. These coast stations are in continuous twenty-four hours' operation during the season of navigation. Qualifications call for a knowledge of radio telegraphy, elementary electricity, and competence to look after wireless machinery in their charge. It is an occupation requiring intelligence and qualifications necessary in emergency calls, life-saving, aid to navigation, receipt and transmission of governmental, commercial and social messages, etc.

(a) *In the matter of overtime:* As stated in a previous paragraph, a tentative agreement has been reached between the parties, a copy of which has been submitted to the Board. The Board observes that the matter of overtime, working and general conditions are covered by this tentative agreement and it recommends that the agreement be accepted and that the terms and clauses contained therein be incorporated in such general agreement as may be entered into between the respective parties.

(b) *In the matter of retroactive wage allowance:* The Board is of the opinion that nothing can be gained by advancing a claim in regard to a proportional amount of retroactive wages involved in the dispute with the Company in 1919.

(c) *In the matter of reduction in wage schedule:* The major part of the discussions were on this subject, and the Company endeavoured to show that it had urgent need to cut its operating costs to meet falling revenues, and the men endeavoured to show reasons why they should not be cut. The Board finds, after giving due consideration to all the arguments presented, that some reduction is in order, and recommends that it be made ten per cent all around instead of fifteen per cent as first proposed by the Company; that the rates so established should date from 1st of October, 1922, and remain in force for one year till September 30th, 1923, and thereafter, subject to sixty days' notice of change by either party prior to September 30th, 1923.

The Board sincerely hopes that these recommendations will be acceptable to both the Company and its employees.

Respectfully submitted,

(Sgd.) E. MCG. QUIRK,

Chairman.

(Sgd.) MELVILLE P. WHITE.

September 27th, 1922.

WORKING CONDITIONS.

ARTICLE 1.

Clause A.—A list showing the seniority of all telegraphers shall be supplied the General Chairman and the General Secretary-Treasurer; and such list shall be kept up to date monthly by advising these officers of any changes.

Clause B.—The right of seniority shall govern in all cases, and such seniority shall be determined by accumulated service, fitness and ability being equal.

Clause C.—It is agreed that no telegrapher working under this agreement shall be precluded from promotion.

ARTICLE 2.

Clause A.—Any telegrapher in good standing, whose services have been dispensed with on account of reduction in staff, shall be given preference in the filling of new positions or vacancies, fitness and ability being equal.

ARTICLE 3.

Clause A.—In case of reduction in staff, the junior telegrapher shall be dispensed with first, fitness and ability being equal.

ARTICLE 4.

Clause A.—Coast station telegraphers on completion of one year's service, shall be granted two weeks' leave of absence at the Company's convenience each year with full wages per scale and maintenance allowance.

ARTICLE 5.

Clause A.—In the event of a three-man station being short-staffed, thereby making it necessary for the remaining two telegraphers to keep a constant watch between them, overtime for the extra duty in excess of eight (8) hours per day shall be paid at the rate of time and one-half of the regular daily wage computed on the basis of 365 working days per year, exclusive of allowances.

ARTICLE 6.

Clause A.—The Company shall, upon request, meet a Committee of not more than five (5) of its telegraphers to deal with matters in dispute, such as wages, working conditions, grievances, etc., whether the foregoing be actual or alleged. In such case the Company shall not be called upon to pay the wages, allowances, or travelling expenses of the members of the Committee while they are absent from their regular duties.

ARTICLE 7.

Clause A.—Telegraphers leaving the Service of their own accord shall be required to give the Company fifteen (15) days previous notice in writing.

Clause B.—The Company shall be required in the event of reduction in staff to give fifteen (15) days previous notice in writing.

Clause C.—Dismissal cases consequent upon proven misdemeanour shall not be entitled to previous notice as provided in the foregoing clause.

Clause D.—No telegrapher shall be transferred unjustly or unfairly.

Clause E.—Any telegrapher who has been suspended or discharged and disproving the charge made against him, shall be reinstated without a prejudice, and shall be reimbursed for all loss of pay.

Clause F.—A telegrapher leaving the Service shall, upon request, as soon as practicable, be furnished with a certificate by the Company stating length of service, capacity in which employed, and (if desired by the telegrapher) a recommendation as to character and ability.

WAGE SCALE AND ALLOWANCES

ARTICLE 8.

Clause A.—(Rates pending).

Clause B.—In addition to the above scale an allowance of . . . dollars per month shall be paid where maintenance is not furnished.

Clause C.—Full maintenance allowance shall be paid in all cases where a coast station telegrapher has been temporarily assigned to ship service for a period of two weeks or less.

Clause D.—In addition to the above scale and allowances, a bonus of . . . dollars per month shall be payable to regularly appointed Officers-in-Charge of coast stations, and a bonus of . . . dollars per month shall be payable to Officers-in-Charge of ship stations carrying two or more telegraphers.

Clause E.—Regularly appointed Officers-in-Charge shall suffer no loss of bonus through absence on regular vacations, but such bonus shall not be payable to substitutes.

Clause F.—In the event of a regularly appointed Officer-in-Charge being on leave of absence other than vacation the bonus payable to his position shall be paid to the telegrapher performing the duties of Officer-in-Charge.

Clause G.—Uniform allowance of . . . dollars per annum shall be paid to telegraphers serving on ships where uniform is required to be worn. In the event of a telegrapher leaving the Service of his own accord, he shall rebate to the Company a monthly *pro rata* of his uniform allowance to cover any unexpired time short of twelve (12) months. Uniform allowance shall cover twelve (12) months' service on vessels where uniform is required to be worn. In the case of a telegrapher who, through no fault of his own, is

laid off or transferred to a coast station, or a ship where uniform is not required, he shall keep on deposit with the Company the unexpired proportion of his uniform allowance which proportion shall be included in his first pay check upon re-engagement on a ship where uniform is required.

All uniform trimmings shall be supplied by the Company.

ARTICLE 9.

Clause A.—Fuel shall be supplied by the Company in accordance with actual requirements for operating individual stations other than dwellings, it being understood that the foregoing shall not apply to coast stations where maintenance allowance is not paid.

Clause B.—The Company will supply light for all stations and dwellings attached thereto.

Clause C.—The Company will pay all taxes on station property and buildings.

Clause D.—Rentals on dwellings shall be not more than. . . dollars per month.

ARTICLE 10.

Clause A.—Wages shall commence from and shall include the date upon which the telegrapher is engaged by the Company, which date of engagement shall mean the day upon which the telegrapher receives written instructions to proceed and does proceed to move to assume the duties to which he has been appointed.

Clause B.—A telegrapher upon being laid off as provided herein, shall be entitled to wages, transportation, and expenses until his return to his divisional headquarters to which he shall proceed with due expedition.

Clause C.—A ship's telegrapher whose vessel is laid up at a point away from his divisional headquarters, and there being no further work available for said telegrapher, necessitating his being laid off, he shall be entitled to wages, transportation, and expenses until his return to his divisional headquarters.

Clause D.—A telegrapher who quits the Service of his own accord or who is dismissed on account of proven misdemeanour shall not be entitled to wages as from the date of his resignation or dismissal, or to transportation and expenses to his divisional headquarters.

ARTICLE 11.

Clause A.—In all cases of transfer, sufficient funds shall be advanced to cover reasonable expenses incurred, and telegraphers travelling upon the Company's service shall be entitled to first class rail and steamship fare, hotel accommodation and board.

Clause B.—Vouchers (where procurable) shall be secured and filed with the Company when statements of expense are submitted.

Clause C.—Orders of transfer shall be in writing and may be communicated by message, letter, or transfer card.

ARTICLE 12.

Clause A.—The Company undertakes to insert in its future agreements with ship-owners, for the provision of telegraphers' services, a clause, providing that the ship-owners shall furnish Wireless Officers with medical and other attendance and comfortable sleeping accommodation in accordance with the terms of the ship's articles; and board in the saloon or in the Officers' Mess at sea or in port, and where more than one Wireless Officer is employed, to provide sleeping accommodation for them in a suitable room separate from the wireless cabin.

Clause B.—The telegrapher aboard ship shall hold the title of "Wireless Officer."

-ARTICLE 13.

Clause A.—No déduction from wages or allowances shall be made where a telegrapher is travelling on the Company's service or transferring to another station.

ARTICLE 14.

Clause A.—This agreement is effective. . . 1922, and shall remain in effect for twelve months, subject to sixty days' notice thereafter in writing by either party hereto.

Clause B.—In the event of either party serving notice of revision a copy of the proposed amendments shall accompany the notice. Montreal, Sept. 27th, 1922.

Minority Report

Montreal, P. Q.,
September 28th, 1922.

Honourable James Myrdock, M.P.,
Minister of Labour, Ottawa, Ont.

Sir,—

In dissenting from my colleagues in the matter of the dispute between the Marconi Wireless Telegraph Company of Canada, Limited, and its telegraphers, members of the Commercial Telegraphers' Union of America, System Division No. 59, I am compelled to report as follows.

It developed at the outset that advances had been made by the Company with a view to establishing the need for a reduction in the wages of ships' operators.

The main reason given for these advances was that pressure was being brought to bear upon the Company by the ship-owners.

Evidence was submitted that the Company specifically desired to confer with the employees' general chairman, relative to a reduction in the wages of ships' operators alone.

While efforts were being made by the general chairman to convene the committee, with a view to conference on the Company's proposal as affecting ships' operators, it was intimated by the Company that a general wage reduction affecting the entire operating service would be taken up. Conferences were held with the Company as stated in the formal application for this Board.

My views relative to the questions in dispute are as follows:—

The Company ask that a fifteen per cent reduction in the wages and allowances of all operators in their service be made effective. They further seek a revision of the present working conditions.

The men protest any reduction, and ask that the present wages and allowances be maintained. They seek the payment of the retroactive feature of the 1919 Award, and further ask that a fixed rate of overtime be established.

It was brought out that the present wage as affecting coast and ship operators was recommended by a Board of Conciliation in November, 1919, retroactive as from October, 1919, and in the case of Coast Stations, made operative by the Company as from January 1st, 1920.

The Company contends that the increased subsidy recently granted by the Government is inadequate to meet the

wages recommended by the 1919 Board; in so far as it affects coast stations, and further that the decline in traffic earnings now makes imperative their demand for a fifteen per cent reduction in wages.

It was adduced that the Company is working under contract arrangement with ship-owners for the operation of wireless aboard ships, and that said ship-owners were pressing for a reduction in the cost to them by reason of operators' services.

The evidence submitted by the Company in support of their contention along these lines is far from conclusive, while that submitted by the men clearly establishes the fact that ship-owners as a whole have not urged interference with existing conditions respecting wages.

Further, from evidence accessible to the Board, it is apparent that the Company have certain very lucrative, fixed, and assured sources of revenue under ships' contracts extending over a period of some five years yet unexpired.

If, as is alleged by the Company, they are desirous of meeting certain pressure, it seems to me that it can best be met by a modification of the contracts as between the Company and the ship-owners seeking a reduction, without in any way placing the burden on those least able to bear it.

The Company submitted statements purporting to uphold their contention that they were in financial difficulties as a result of declining traffic. I must contend that these statements were not conclusive, as they failed to show all revenues accruing to the Company.

It has been contended by the men, that the subsidy increase was granted to enable the Company to pay a living wage.

This, I submit, was well established. The *prima facie* evidence is contained in the report of the Privy Council which follows:

CERTIFIED COPY OF A REPORT OF THE
COMMITTEE OF THE PRIVY COUNCIL,
APPROVED BY HIS EXCELLENCY
THE GOVERNOR GENERAL ON
THE 31st AUGUST, 1921.

The Committee of the Privy Council have had before them a report, dated 2nd May, 1921, from the Honourable C. C. Ballantyne, Sir James Loughheed and G. D. Robertson, a sub-committee of the Cabinet, submitting that a petition has been received from the Marconi Wireless Telegraph Company of Canada, Limited, relative to their contract with the Government covering the maintenance and operation of the thirty Government-owned radiotelegraph stations on the Great Lakes and East Coast.

The petition sets out that:—

Since the contracts were entered into in 1911 and 1912, conditions have arisen which could not possibly have been foreseen at that time; that the amount of the subsidy fixed in these contracts, viz., \$89,200 per annum, or an average of \$2,973 per station until 1921, then reducing by 10 per cent each year until 1931, is now entirely inadequate in the light of present conditions, and that an increase in the subsidies should be allowed by the Government to offset the unprecedented increase which has taken place in wages and operating expenses.

The Company represents:—

(1) that the wages established for their operators by the Board of Conciliation in October, 1919, show an increase of 93 per cent or a total of \$70,000.00 per annum over 1914 wages;

(2) that the above mentioned Board of Conciliation submitted a strong recommendation to the Government that the subsidy be increased to the extent of the increase in wage schedule recommended, otherwise the Company could not finance the schedule;

(3) that their other operating costs such as travelling expenses, gasoline, coal and other commodities show a corresponding increase during the same period;

(4) that the large volume of Government messages now handled free by the stations constitutes a burden and that tolls should be paid on such traffic;

(5) that all other public utilities have been permitted to increase their rates to meet present day costs and conditions and that the Government has met similar situations in other cases by granting increases;

(6) that while under the existing contracts the average subsidy for the past ten years has been \$2,973.00 per station per annum, this will be reduced to an average subsidy of \$2,081.00 per station per annum for the next five years ending April, 1926, owing to the percentage decrease which applies in the last ten years of the contracts;

(7) that the Company has never paid a dividend to the shareholders in the 17 years of its existence.

The Ministers state that they are of the opinion that these representations are borne out by the facts of the case and that relief should be afforded the Company, and the following proposal has been drawn up to meet the situation:

(1) that 6 admittedly redundant stations be closed this year and that as soon as said stations are turned over to the Department in good condition, the Company be permanently relieved of all further obligations under the contracts in regard to the same;

(2) that the Government shall be at liberty to close, and to cancel the subsidies for any further stations which it may at any time during the period of five years, specified in paragraph 3, consider redundant;

(3) that for a period of 5 years, April 1st, 1921, to April 1st, 1926, the subsidy in respect of each of the stations remaining open be increased from an average of \$2,081.00 per station per annum to \$5,500.00 per station per annum, to offset the increased operating expenses;

(4) that all Government messages be charged for at half the rates charged on commercial messages. The tolls, estimated at \$10,750.00 per annum, will be paid by the Departments using the service;

(5) that the modification of the existing contracts as herein provided shall be effective only for the said period of five years ending on the 1st day of April, 1926, and from and after that date the original contracts shall be in full force and effect and payments of subsidies shall thereafter be made in accordance with the provisions thereof without any modifications except in so far as the stations closed under paragraphs 1 and 2 above are concerned;

(6) that the Government shall be at liberty at any time within the said period of five years to transfer any subsidy from one existing station to another or from any existing station to any new station which the Government may erect, and to change the service to be given by the respective stations accordingly;

(7) when any station is closed payment of subsidy shall cease as and from the date of closing.

The recommended increase in subsidies, assuming 6 stations closed and 24 left open, is as follows:

Fiscal year ending 31st	Total subsidies for 30 stations payable under existing contracts	Total subsidy for 24 stations payable under this proposal	Additional amount called for under this proposal
March 1922	\$ 80,280.00	\$132,000.00	\$ 51,720.00
1923	71,360.00	132,000.00	60,640.00
1924	62,440.00	132,000.00	69,560.00
1925	53,520.00	132,000.00	78,480.00
1926	44,600.00	132,000.00	87,400.00
	\$312,200.00	\$660,000.00	\$347,800.00
Additional for 1921-22 on account of stations to be, but not yet closed.....			3,700.00
			<u>\$351,500.00</u>

The Ministers accordingly recommend that, subject to the Company's figures submitted being certified to by Messrs. Price Waterhouse and Company, Chartered Accountants, as Government auditors, these proposals be approved, and that the Minister of the Naval Service be authorized to modify the contracts accordingly, and that the sum of \$55,420.00 for 1921-22 be paid out of the Demobilization Vote for the current fiscal year and that the following sums be provided in the estimates of the different fiscal years enumerated to provide for the increase in subsidies, the whole amounting to \$351,500:

1922-23.....	\$60,640
1923-24.....	69,560
1924-25.....	78,480
1925-26.....	87,400

The Committee concur in the foregoing recommendations and submit the same for approval.

(Sgd.) RODOLPHE BOUDREAU,
Clerk of the Privy Council.

The Board, after considering the report of the Privy Council decided that it was not within its province to interpret its full meaning, and I would here suggest that the Honourable the Minister of Labour obtain a clear interpretation as to the intent and purpose of the report with respect to the wages recommended by the 1919 Board.

It will be noted by careful perusal of the Privy Council's report that the increased subsidy was predicated on the Company's representations as outlined in the following:—

(1) that the wages established for the operators by the Board of Conciliation in October, 1919, show an increase of 93 per cent or a total of \$70,000.00 per annum over 1914 wages;

(2) that the above mentioned Board of Conciliation submitted a strong recommendation to the Government that the subsidy be increased to the extent of the increase in wage schedule recommended, otherwise the Company could not finance the schedule;

(3) that their other operating costs such as travelling expenses, gasoline, coal and other commodities show a corresponding increase during the same period;

(4) that the large volume of Government messages now handled free by the stations constitutes a burden and that tolls should be paid on such traffic.

The Company argues that the increase in wages established by the 1919 Board amounted to \$70,000.00 per annum over 1914 wages, and that the subsidy should be increased to the extent of the increase in wages.

I would draw your attention to the total increase in subsidy granted by the Privy Council which amounts to \$351,500.00 for the five-year period ending March 31st, 1926.

Would it not be fair to assume that in arriving at this figure the Privy Council acted upon the petition of the Marconi Company that they be granted an increased subsidy to meet the \$70,000.00 per annum in increased wages, bearing in mind that this \$70,000.00 covers a period of five years, and totals \$350,000.00 ?

In addition to the increased subsidy of \$351,000.00 which I contend was to meet the increased wage of \$350,000, for a period of five years, the Privy Council, in allocating a further sum of \$55,250, for five years on account of Government messages hitherto handled free, must have had in mind Clauses 3 and 4 of the Company's petition.

Coast station operators claim retro-active pay as from October 1st, 1919, to January 1st, 1920. They argue that while consideration was given by the 1919 Board to the Company's financial condition, this could have had no effect

on the Board's decision as to what was a fair and just wage, and that inasmuch as the Award was dated from October 1st, they are convinced that they are entitled to payment as from that date.

The Company set forth that the Government did not recognize the justice of its (the Company's) claim for increased subsidy as affecting coast stations until fifteen months after the Award of the Board, during twelve of which they (the Company) had made operative its findings.

I fully concur with the views of the men in their claim for retroactive pay.

A tentative agreement covering working conditions and overtime has been

reached between the parties and presented to the Board.

I would therefore recommend that this Agreement be accepted and incorporated in a general Agreement as affecting said parties.

In arriving at my decision I have also taken into consideration the fair wage policy of the Government as applied to companies subsidized by the Government.

In the face of the evidence submitted I cannot do other than contend that no reduction in wages is justified.

(Sgd.) THOMAS TAYLOR.

STRIKES AND LOCKOUTS IN CANADA DURING SEPTEMBER, 1922

THE following table shows the number of strikes in existence in Canada at some time or another during September, 1922, together with the number of employees involved and the time loss in working days, as compared with the previous month and with September, 1921.

	Dis- putes	Employees involved	Time loss in working days
September, 1922.....	18	15,275	91,900
August, 1922.....	24	24,006	437,017
September, 1921.....	26	3,948	59,849

The greatest time loss during September was in the group including the printing and publishing trades, in which 10 strikes involving 1,778 workpeople and resulting in a time loss of 44,175 working days were recorded. Of these strikes in the printing trades, three were in one city (Montreal), and were closely allied, but since each had a separate beginning they are counted separately.

Three strikes commenced during the month, involving 433 employees and resulting in a time loss of 2,494 working

days. Of the 24 strikes in existence in August, 15 were carried over into September, these causing a time loss of 89,406 working days during the month under review. One of the strikes in existence in August, that of coal miners in Nova Scotia, and one of the strikes which commenced in September, that of musicians at Regina, terminated in September. At the end of the month there were, therefore, still on record 16 strikes, affecting 2,465 workpeople as follows: photo engravers, Montreal; three strikes of printing compositors at Montreal; printing compositors, Hamilton; printing compositors, Toronto; printing compositors, Vancouver; printing compositors, Winnipeg; printing compositors and pressmen, Halifax; printing compositors and pressmen, Ottawa; narrow gauge engine-men of steel plant, Sydney; painters, Toronto; shipbuilders, Three Rivers; railway employees of steel and coal companies, Sydney; electric railway employees of the Park and River Division of the International Railway Company, Niagara Falls, and restaurant employees at Edmonton.

Disputes by Industries.

The following is a review of disputes by industries in the order in which they appear in the statistical table. A brief reference is made to the more important strikes.

MINING, NON-FERROUS SMELTING AND QUARRYING.

The coal miners of Nova Scotia resumed work on September 5, a settlement having been effected early in the month as related in the September issue of the LABOUR GAZETTE.

MANUFACTURING.

Printing and Publishing. — During September a strike of printing compositors commenced at Montreal when the employer refused to negotiate a new agreement. The employees were still on strike at the end of September.

In the strikes of printing compositors and pressmen which commenced in a number of cities in May, June and July, 1921, for the 44-hour week with in some cases a compensating hourly wage increase and in others an actual increase in weekly wages, there were at the end of September 1,748 employees on strike, as compared with 2,287 at the end of July, 1921. In some cases employers have entered into agreements with the unions and in other cases have replaced the strikers. At Vernon, B.C., although the employers had reported that the strikers had been replaced there was a small number of men still on the strike list of the Union. As to the strike of the photo engravers at Ottawa which commenced May 2, 1921, information received in the Department indicates that employment conditions are no longer affected.

Iron, steel and products.—One strike, that of narrow gauge enginemen of a steel company at Sydney, was carried over from the previous month's record and remained untermiated at the end of September. In the case of the moulders' strike at Galt information received indicated that the strikers' places had been filled, but the union still had a number of men on the strike list. In the case of the moulders' strike at Guelph information was received that the strikers had secured work elsewhere.

CONSTRUCTION.

Shipbuilding.—A strike of 400 shipbuilders occurred at Three Rivers on September 26, when their demand for an increase of 10 per cent in wages was refused and the strike was untermiated at the end of the month.

SERVICE.

Recreational. — On September 4, a strike of musicians occurred in theatres at Regina owing to the employers refusing to enter into new agreements which called for an increase in wages from \$25 to \$30 per week and changes in working conditions including a provision for a minimum of four men in each orchestra. After negotiations the men returned to work at the same rates of pay as before with a provision for a minimum of three men per orchestra during nine months of the year.

Personal.—Early in September two of the four firms affected by the strike of their restaurant employees at Edmonton effected a settlement with such employees who returned to work at a reduction of 12½ per cent in their wages. At the end of the month there were two firms and 10 cooks, waiters and waitresses still affected by the strike.

STRIKES AND LOCKOUTS DURING SEPTEMBER, 1922.

Industry, occupation and locality	Particulars	Number of employees involved	Time loss in working days
(a) Strikes commencing prior to September, 1922.			
MINING, NON-FERROUS SMELTING AND QUARRYING—			
Coal miners, Nova Scotia.....	Commenced August 15, to regain 1921 rates of wages. Work was resumed September 5, when the men received an increase of 12½ per cent on contract rates, and an increase in the day rates of 40c and 52c with a minimum day rate of \$3.25.	12,802	38,406
MANUFACTURING—			
<i>Printing and publishing:</i>			
Photo engravers, Montreal, Que...	Commenced May 2, 1921. For shorter hours. Un-terminated.	30	750
Photo engravers, Ottawa, Ont....	Commenced May 2, 1921. For increased wages and 44-hour week. Information received indicates employment conditions no longer affected.
Compositors, Hamilton, Ont.....	Commenced May 2, 1921. Alleged violation by employers of 44-hour clause in agreement. Un-terminated.	47	1,175
Compositors, Montreal, Que.....	Commenced June 14, 1921. Objection of men to perform work that came from shop where strike existed. Unterminated.	25	625
Compositors, Montreal, Que.....	Commenced July 1, 1921. For increased wages and 44-hour week. Unterminated.	370	9,250
Compositors, Toronto, Ont.....	Commenced June 1, 1921. For increased wages and 44-hour week. Unterminated.	853	21,325

Musicians, Regina, Sask.....	Commenced September 4, when employers refused to sign new agreements. After negotiations men resumed work September 25 at the same rates as paid last year with certain changes in working conditions.	8	144

TERMINATION OF THE UNITED STATES COAL STRIKE

Regulation of Distribution and Prices in Canada

WITH the termination in August of the strike of bituminous coal miners in the United States, as described in the last issue of the LABOUR GAZETTE, there remained on September 1 only the dispute in the anthracite coal fields. Negotiations between the miners and operators which were being carried on in Philadelphia were broken off on August 22, but were resumed in Washington a week later. An agreement was finally reached on September 2, subsequently ratified by membership of Union, and mining was resumed on September 11. According to the *Coal Age* of September 14, "the men go back to work at the same wages and with the same working conditions they had before the strike. They are under contract to stay at work until September 1, 1923. They were obliged to forego the advance in wages they had demanded and they did not get the check-off, which they also had among their nineteen demands of last January. On the other hand, the operators did not get the wages of the men reduced, as they

had desired, nor did they succeed in providing for arbitration of future wage contracts, a point on which they were urgent." The agreement, embodied in a resolution passed at a meeting of the anthracite coal operators, contained the following terms:

(1) The contracts in force March 31, 1922, to be extended to August 31, 1923.

(2) The production of coal to begin at once.

(3) The organization of operators and miners to join in a recommendation to Congress that legislation be forthwith enacted creating a separate Anthracite Coal Commission, with authority to investigate and report promptly on every phase of the industry.

(4) The continuance of production after the extension date to be upon such terms as the parties may agree upon in the light of the report of the commission.

In compliance with the recommendation of President Harding an Act was passed by the United States Congress, which became law on September 22, to establish a commission to be known as the United States Coal Commission "for the purpose of securing information in connection with questions relative to interstate commerce in coal and for other purposes." The Commission is instructed to report on the following subjects:

As to the ownership and titles of the mines; prices of coal; the organizations and persons connected with the coal industry; cost of production; profits realized by the operators or owners of said mines during the last ten years; profits of other persons or corporations having to do with production, distribution, or sale of coal; labour costs; wages paid; wage contracts; irregular production; waste of coal, and suggestions as to the remedy for the same; the conditions generally under which coal is produced; distribution; the causes which from time to time induce strikes, thereby depriving interstate carriers of their fuel supply and otherwise interrupting the flow of interstate commerce; and all facts, circumstances, or conditions which would be deemed helpful in determining and establishing a wise and efficient policy by the government relative to said industry.

The Commission is required to make a separate investigation and report for the anthracite industry. It is also required to submit recommendations relative to—

(a) Standardizing the mines upon the basis of their economic productive capacity and regarding the closing down of mines which, by reason of their natural limitations, or other conditions, fall below the standard.

(b) Ascertaining and standardizing the cost of living for mine workers and the living conditions which must be supplied or afforded in order to surround the workman with reasonable comforts, and standardizing also as far as practicable the amount of work a man shall perform for a reasonable wage, recognizing the value and effect of such surroundings in respect to their efficiency.

(c) Standardizing a basis of arriving at the overhead cost of producing and distributing the coal, including delivery at the door of the consumer, recognizing in this compilation that the standardized cost of living to the miners should be the first and irreducible item of expense.

(d) The advisability of any legislation having to do with government or private ownership, regulation, or control in the coal industry.

The Commission is to make its first report not later than January 15, 1923, and its separate report on the anthracite industry on or before July 1, 1923.

Distribution and Prices in Canada

It was mentioned in the August issue of the LABOUR GAZETTE that the Dominion Government had appointed an Advisory Fuel Committee and that the Government of Ontario had appointed a Fuel Controller for Ontario. The Dominion Advisory Fuel Committee proceeded to the United States with a view to making arrangements with the authorities whereby Canada should share in the distribution of the coal available. As a result the Fuel Commission for the State of Pennsylvania agreed to provide that Canada should have 60 per cent of the normal supply. The Fuel Controller for Ontario then issued an order which fixed the price of coal at Toronto at \$15.50 per ton and which provided for distribution in other cities. The order of the Fuel Controller for Ontario was as follows:—

Whereas practically all the anthracite coal produced in the United States of America is produced in the State of Pennsylvania.

And whereas the Governor of the State of Pennsylvania has by proclamation approved of the fixing by the State of Pennsylvania Fuel Commission of a maximum price to be charged for prepared domestic sizes of such anthracite coal at \$8.50 per gross ton at the mine.

And whereas such maximum price of \$8.50 at the mine may be increased in a special case or cases upon application to the State of Pennsylvania Fuel Commission if it is proved to the satisfaction of such Commission that the mine owner making the application is unable to produce coal at that price.

And whereas the Fuel Commission for the State of Pennsylvania has determined that there cannot be shipped between now and first April, 1923, to any State in the United States or to any Province in Canada, more than sixty per cent of the anthracite coal supplied last winter to such State or Province.

And whereas under the provisions of Clause (d) of Section 6, of The Fuel Supply Act,

being Chapter 13 of The Statutes of the Legislative Assembly of the Province of Ontario, 1918, it is provided that the Fuel Controller for Ontario, subject to the approval of the Lieutenant-Governor-in-Council, may "make orders fixing the price at which wood, peat or other fuel may be sold or disposed of, having regard to the cost of getting out, distributing and marketing same."

And whereas under the provisions of Clause (b) of Section 6, of said Act, it is also provided that the Fuel Controller for Ontario may, subject to the approval of the Lieutenant-Governor-in-Council, "make orders from time to time regulating the quantity of fuel which may be used, held or stored by any person, and directing that any amount in excess of such quantity shall be taken over from such person."

Now therefore, I do order as follows:—

1. Until further order, the maximum retail price in the City of Toronto of anthracite coal in domestic sizes, produced in the State of Pennsylvania, or in any of the United States of America, shall be \$15.50 cash per ton of 2,000 lbs. delivered, and \$8.00 cash per half ton delivered; provided, however, that in any special case or cases where it can be proved to the satisfaction of the Fuel Controller for Ontario, that a greater price than \$8.50 per gross ton has been paid for anthracite coal at the mine, he may allow an increased retail price to be charged for such coal.

2. Any person or persons, partnership or corporation in the Province of Ontario, holding or storing American anthracite coal for his or their own use, and, not being a dealer in coal, shall not hold or store more than one month's supply of such coal; Provided, however, that this shall not apply to any such anthracite coal delivered before the date of this order.

3. No retail coal dealer in the Province of Ontario shall deliver in any case, whether under contract or not, more than one month's supply of American anthracite coal to any person or persons, partnership or corporation, and shall not deliver any such coal to any person or persons, partnership or corporation who already holds or has stored two weeks' supply or more of such coal.

4. Any Municipal Council may appoint a Local Fuel Administrator to carry out the provisions of these orders and of any other order or regulation which may be made from time to time under the provisions of the Fuel Supply Act for 1918. Any salary and expenses of such Local Fuel Administrator shall be borne by the Municipal Council appointing him.

(Sgd.) J. A. ELLIS,
Fuel Controller for Ontario.

Dated at the City of Toronto, this 27th day of September, A.D., 1922.

The Fuel Controller further issued a statement that he would fix a maximum price for anthracite coal for any municipality of Ontario on the request of the municipal council concerned.

In the early fall a number of municipalities in Ontario and Quebec, where the shortage of anthracite coal was most felt, made arrangements to purchase supplies of coal or wood; and many coal dealers imported supplies from Great Britain, especially anthracite coal from Wales.

SETTLEMENT OF RAILWAY STRIKE IN UNITED STATES

THE causes and progress of the strike of railway shop crafts in the United States which began on July 1 have been described in recent issues of the LABOUR GAZETTE. It will be remembered that the strike was against a reduction in wages of about ten per cent ordered by the United States Railroad Labour Board and also in protest against certain changes in rules and working conditions which had been ordered by the Board

earlier in the year. Early in September, following the breaking off of negotiations initiated through the mediation of the heads of the brotherhoods of train service employees, negotiations were entered into between the representatives of the strikers and the heads of several railroads which resulted in agreements to settle the strike on a number of the railroads followed by similar settlements on other roads.

Soon after the strike began the railway companies announced that after a certain day strikers would lose their seniority on returning to work, and would be taken on again only as new employees. In the negotiations that were carried on during July and August little objection was raised by the strikers to proposals that they should return to work at the reduced rate of wages pending a reconsideration of the changes by the Railroad Labour Board. The maintenance of way employees, freight handlers, clerks, etc., had remained at work at the reduced rates pending a reconsideration by the Board of the wage changes that had been ordered. But on the seniority question the negotiations broke down repeatedly, the unions insisting on the restoration of seniority to all who had struck. The draft agreement reached early in September between the shop craft unions and the heads of the railroads who entered into the negotiations provided among other things that the strikers should be called back to work or be put under pay within thirty days (clause 2), and that any dispute as to seniority would be settled by a commission for each railroad consisting of six representatives of each party (clauses 4 and 5). The terms of the draft agreement as printed in the "Times," New York, were as follows:

- 1—In order to bring to an end the existing strike of employees upon the railroads and relieve the country from the adverse effects thereof and to expedite the movement of essential traffic, the following memorandum of agreement is made upon the understanding, which the parties hereto accept, that the terms hereof shall be carried out by the officers of the companies and the representatives of the employees in a spirit of conciliation and sincere purpose to effect a genuine settlement of the matters in controversy referred to below. This paragraph does not apply to or include strikes in effect prior to July 1, 1922.
- 2—All men to return to work in positions of the class they originally held on June 30, 1922, and at the same point. As many of such men as possible are to be immediately put to work at present rates of pay, and all such employees who have been on strike shall be put to work or under pay, not

later than thirty days after the signing of this agreement, except such men as have been proved guilty of acts of violence which in the opinion of the commission, hereinafter provided for, shall be sufficient cause for dismissal from service.

- 3—The relative standing as between themselves, of men returning to work and men laid off, furloughed or on leave of absence, including General Chairmen and others who were as of June 30, 1922, properly on leave of absence, will be restored as of June 30, 1922, and they will be called back to work in that order.
- 4—If a dispute arises as to the relative standing of an employee or if any other controversy arises growing out of the strike that cannot be otherwise adjusted by the carrier and said employee or the duly authorized representatives thereof, the matter shall be referred by the organizations parties to this agreement, the employees or the carrier in the interest of any employee who may be aggrieved, to a commission to be established and constituted as hereinafter provided, for final decision by a majority vote.
- 5—The commission referred to in paragraph 4 thereof shall be composed of six representatives to be named by the chief officers of the organizations parties hereto and six railroad officers or representatives selected from and by the railroads agreeing hereto. This commission shall be constituted within fifteen days from the signing of this agreement and shall have jurisdiction to decide all cases that may properly be referred to it on or before May 31, 1923, but not thereafter.
- 6—Inasmuch as this agreement is reached for the purpose of composing in a spirit of compromise this controversy, all parties hereto agree that neither this settlement nor any decision of the commission above provided for shall be used or cited in any controversy between these parties or between the railroads signing the same, or any other class or classes of their employees in any other controversy that may hereafter arise.
- 7—Both parties pledge themselves that no intimidation nor oppression shall be practiced or permitted against any of the employees who have remained at work or have taken service or as against those who resume work under this understanding.
- 8—All suits at law now pending as the result of the strike to be withdrawn and cancelled by both parties.

The Federated Shop Crafts' General Conference Committee of ninety mem-

bers authorized settlements to be made in accordance with the terms outlined above with individual roads, although having previously insisted upon a general settlement. The agreement was therefore entered into between the Federation and various railroads. The other roads claimed that the strikers had been replaced substantially.

In the meantime the United States Railroad Labour Board heard arguments from the other unions in the reconsideration of the wage changes ordered for July 1, but by the end of September had not rendered any further decision. By this time, however, a number of the large railroads had made agreements with the train service brotherhoods to continue for another year the wage rates in force since July, 1921, and to withdraw the proposals for further cuts which had been for some time before the United States Railroad Labour Board.

In Canada four Boards of Conciliation and Investigation dealing with disputes between three railroads in Canada operating as branches of railroads in the United States and their employees submitted their reports to the

Department during September. The Boards recommended that the wage reductions of approximately ten per cent proposed by the railway companies should be put into effect from August 16. These reductions had already been put into effect on these railroads in the United States from July 1, under decision of the United States Railroad Labour Board. The Board dealing with the dispute as to wages of shop employees on the principal Canadian railways recommended that the reductions proposed by the companies, which were similar to those put into effect on railroads in the United States, should be put into effect from the middle of August subject to the adoption of a new permanent wage scale by agreement of the parties concerned which should be retroactive to July 16 and that the parties should confer with respect to permanent rates. The Boards dealing with proposed wage changes for freight handlers, clerks, etc., on the principal Canadian railways had not reported at the end of September except for an interim report in one case.

STRIKES AND LOCKOUTS IN GREAT BRITAIN DURING AUGUST 1922

THE *British Labour Gazette* for September contains the following information respecting strikes and lockouts in Great Britain during August, 1922, based upon returns from employers and workpeople.

NUMBER, MAGNITUDE AND DURATION.—The number of trade disputes involving a stoppage of work, reported to the Department as beginning in August, was 32, as compared with 21 in the previous month, and 62 in August, 1921. In these new disputes about 11,000 workpeople were involved either directly or indirectly (i.e., thrown out of work at the establishment where the disputes occurred, though not themselves parties to the disputes). In addition, about

20,000 workpeople were involved in 35 disputes which began before August and were still in progress at the beginning of that month. The number of new and old disputes in progress in August was thus 61, involving about 31,000 workpeople, and resulting in a loss during August of about 312,000 working days. The principal dispute in progress in August was that which began in July involving in all about 14,000 workpeople in the printing trades at various centres in England and Wales, and at Belfast.

CAUSES.—Of the 32 disputes beginning in August, 14, directly involving 6,600 workpeople, arose out of proposed reductions in wages; 7, directly in-

volving 2,700 workpeople, on other wages questions; 7, directly involving 1,300 workpeople, on questions respecting the employment of particular classes or persons; and 4, directly involving 200 workpeople, on other questions.

RESULTS.—Settlements were effected in the case of 14 new disputes, directly involving about 5,000 workpeople, and 15 old disputes, directly involving about 14,000 workpeople. The dispute in the printing trades resulted in a compromise. Of the remaining settlements, 4 were in favour of the workpeople, 6 in favour of the employers, and 18 were compromises. In the case of 5 disputes, directly involving about 4,000 workpeople, work was resumed pending negotiations.

The following table classifies the disputes in progress in August by groups of industries:—

Groups of industries	No. of disputes in progress in August			Number of workpeople involved in all disputes in progress in August.	Aggregate duration in working days of all disputes in progress in August.
	Started before August 1.	Started in August.	Total		
Building	7	4	11	2,000	22,000
Mining and quarrying	9	6	15	11,000	94,000
Metal, engineering and shipbuilding	8	8	16	3,000	28,000
Printing, etc.	1	2	3	14,000	160,000
Other trades.	10	12	22	1,000	8,000
Total, Aug. 1922..	35	32	67	31,000	312,000
Total, July 1922..	36	21	57	46,000	443,000
Total, Aug. 1921..	43	62	105	40,000*	458,000*

*Revised figure.

ANNUAL CONVENTION OF THE CANADIAN FEDERATION OF LABOUR

THE Canadian Federation of Labour held their fourteenth annual convention at Toronto on September 18, delegates from the following unions attending: hoisting engineers, piano workers, pattern workers, Canadian Electrical Trades, Canadian Street Railwaymen, Canadian Association of Enginemen, Printers and Pressmen's Union (Toronto), Canadian Brotherhood of Railway Employees, Press Assistants' Union and Bricklayers Plasterers and Masons' Federation (Quebec). Messrs. A. R. Mosher and J. J. Coulter attended as fraternal delegates respectively from the Canadian Brotherhood of Railroad Employees and the Canadian Association of Railway Enginemen. The Dominion Department of Labour was represented by Mr. E. N. Compton, Mr. M. F. Tumpane, president of the Federation, occupied the chair.

Mr. Mosher expressed the view that the workers of Canada should be organized on both national and international lines, having their own national organ-

ization as a basis, while being able to affiliate internationally with other national organizations of workers.

Mr. Coulter suggested that the Canadian Federation of Labour should send an officer to the next executive meeting of the Railway Enginemen to explain the principles of the Federation.

A resolution to the effect that all workers in Canada be asked to affiliate with the Canadian Federation was carried, this action being taken in reply to a recommendation from the One Big Union that all unions should "get together."

Among the more important resolutions passed by the convention were the following:

That all electrical workers be compelled to pass an examination.

That electrical inspection be carried out under the fire marshals.

That legislation be passed for the proper examination and licensing of electrical contractors and journeymen.

That an act be passed in Ontario, similar to the act now in force in Alberta, providing protection for outside electrical workers.

Protesting against the practice of building contractors in coupling up two or more derricks or hoisting engines on one boiler, and running them with inexperienced men without certificates, and requesting that the Ontario Act governing the licensing of hoisting and portable engineers be amended accordingly.

Pledging support to the Canadian Labour Party, and recommending the development of Provincial labour parties.

Supporting the workers' educational movement.

Officers for the coming year were elected as follows:

President, D. Giroux; first vice-president, G. Potts; second vice-president, W. Margueratt; third vice-president, A. Moore; fourth vice-president, J. Netterfield; vice-president for Alberta, R. Haysey; vice-president for Ontario, M. F. Tumpane; vice-president for Quebec, A. Marois; secretary-treasurer, J. T. Gunn.

BRITISH TRADES UNION CONGRESS

THE fifty-fourth annual conference of the British Trades Union Congress was held at Southport, England, from September 4 to 10, and was presided over by the chairman of the General Council, Mr. R. B. Walker. There were present 716 delegates representing 157 organizations with a membership of 5,065,170. The number of organizations represented showed a decrease of 94 in comparison with 1921, largely due to amalgamation; and the total membership showed a decrease of 1,325,000, or 20.7 per cent, due almost entirely to losses in individual membership and only in a slight degree to the non-representation in 1922 of unions which were included in the figures for 1921. In all the trades groups, except the building trades, there was a decrease of more than 10 per cent in membership.

A lengthy discussion took place in regard to a scheme outlined in a memorandum previously issued by the General Council to all affiliated bodies making proposals for giving effect to certain paragraphs contained in the Trades Union Congress Standing Orders. These paragraphs required the General Council to keep a watch on all indus-

trial movements and where possible to coordinate industrial action, to promote common action by the trade union movement on general questions, and to assist any union attacked on any vital question of trade union principle. The Council stated that it was their object to consult the unions regarding the action to be taken on a national basis so as to resist efforts being made by employers to secure an increase in the working day or week, but that they had no desire to intervene so long as there was prospect of the differences being settled by negotiation within the industry. The scheme provided that the General Council should be kept informed by the affiliated unions of all disputes as they arise and the progress of negotiations at each stage so that they might be able to render such assistance as circumstances required. The scheme also provided for the creation of machinery to enable the whole trade union movement to combat effectively any general and widespread attempt on the part of employers of labour to impose unsatisfactory conditions of work on the workers. They proposed to secure financial support for the scheme by the creation of a defence fund by means of

a levy, under the control of the General Council, although it was felt that this principle "would be almost impracticable owing to the depleted state of trade union funds and the state of employment in the principal industries" but that it could not be "ruled out of any final provision for co-ordinating the resources of the movement." Replies to the memorandum showed that 73 unions, representing 2,982,300 members, agreed with the principle of reporting disputes to the General Council, which should then be empowered to call into consultation the representatives of the unions concerned; 4 unions, representing 1,037,200 members, were opposed to the scheme in its entirety. With respect to the creation of a defence fund the membership of the unions absolutely in favour of such a fund was 553,600; those in favour, but with reservations, 1,643,600; and those against, 2,115,000. The resolution finally put before the Congress did not, accordingly, contemplate the creation of a defence fund, but proposed (a) that the Council should be kept informed of all disputes arising between one union and another or between unions and employers, particularly where large bodies of workers might be involved; (b) that the Council should not intervene so long as there was a prospect of the dispute being amicably settled by the ordinary machinery of negotiation; (c) that, in the event of a deadlock of such a character as to involve large bodies of workpeople in a stoppage of work or to imperil standard wages, hours, or conditions, the Council should have power to call representatives of the unions concerned into consultation, and to use its influence to effect a settlement; (d) that, if the unions accept the advice of the Council but nevertheless become involved in a stoppage of work, the Council should organize moral and material support, and for this purpose should have power to raise funds by a call upon affiliated unions; and (e) that the Council should have power to require a dispute between unions to be submitted to the Disputes Committee of the Council.

The resolution, however, was not voted on, the question being tabled by a vote of 3,576,000 to 1,205,000.

UNEMPLOYMENT.

In discussing the unemployment question, the Congress protested against unemployed persons being left idle while their services might be used for the national benefit, and was opposed to any reductions of benefits under the Unemployed Insurance Act, and alleged refusals to meet reasonable claims for the maintenance of people wholly unable to secure employment. A resolution was adopted unanimously calling upon the Government "to devise national schemes of work to enable unemployed workpeople to maintain themselves in reasonable comfort, and for those for whom work cannot be found adequate maintenance, (1) by regulating national or local work so as to provide for additional employment during the seasonal or local fluctuations of trade; (2) by organizing schemes of useful work and training, with full maintenance for all workers who cannot find suitable employment; such schemes of work, training, or maintenance to be made a national charge and not placed upon local rates." The resolution, in addition, called for a revision of the Treaty of Versailles and for the opening up of trade with Russia, "as only by a general resumption of European trade can the present state of unemployment be remedied."

Another resolution asked the General Council to consult with the Labour Party in promoting an amending Act forthwith to provide for complete administration of the National Unemployment Insurance Acts through the trade unions instead of through employment exchanges, and requesting that everything possible be done to prevent administration of these Acts through approved societies known to be subsidized and controlled by employers and capable of making discrimination against trade unionists or filling vacancies with non-unionists.

A resolution was adopted protesting against instructions of the Labour Ministry on uncovenanted benefits which were said to impose grave hardships by borrowing benefits from those who had contributed them, and paying them to those who had not. Women, it was claimed, were made to suffer under this system.

APPRENTICESHIP.

At the instance of the Ship Constructors and Shipwrights' Association, the General Council was instructed to consider the whole question of apprenticeship, the number and payment of apprentices, and other matters which would give the unions more control over apprentices.

EDUCATION.

A resolution was adopted protesting against the curtailment of financial provisions for education and requesting that the full extension of the Education Act, 1918, be put immediately into operation. Practical effect was given to the views of Congress by the granting of £250 each to Ruskin College, the Central College, London, and the Workers' Educational Association.

THE INTERNATIONAL SITUATION.

A resolution was carried emphasizing "the imperative need for an immediate and final settlement of the reparations problem" and urging the admission of Germany and Russia to the League of Nations with exactly the same rights and duties as the present members of the League. The work of the International Labour Congress was also discussed, and, in particular, it was urged that the "maternity" and "hours" conventions of the Washington Conference should be ratified by the British Government.

In regard to the National Guild movement, a resolution was adopted expressing appreciation of the efforts of the building, furnishing, and other trades to establish National Guilds; and approving the formation of a National Guild Council and instructing the Gen-

eral Council to assist that body in educational and propaganda work. (A provisional National Guild Council was constituted at a conference held under the auspices of the National Guild League in April for the purpose of making provision for research and propaganda work in connection with the formation and development of Guild organizations).

Among other resolutions adopted by the Congress were the following: calling for legislation to give effect to the "Holman-Gregory" report on Workmen's Compensation (this report, which was issued by a departmental committee of the British Home Department under the chairmanship of Mr. Holman Gregory, K.C., M.P., was reviewed in the LABOUR GAZETTE issue of November, 1920); urging the carrying out of adequate housing schemes; protesting against employers' superannuation schemes being conditioned on non-membership of unions; seeking the re-establishment of a Wages Board for agriculture; calling for an extension of the Rent Restriction Act after June, 1923; protesting against the recommendations of the Cave Committee on Trade Boards; in favour of a forty-four hour week; and calling for the government to provide pensions for mothers.

To enable the General Council to assume joint financial responsibility with the Labour Party for the publication of the "Daily Herald" newspaper, Congress agreed to an increase of the annual affiliation fee from 1d. to 3d. per member.

The General Council was instructed to provide for the next conference a report showing the extent of unionism, amalgamations, federations, the powers they possess, and other information necessary in the shaping of policy and unifying of forces.

It was decided that no full-time official of the Congress should retain office after reaching 70 years. The General Council was re-elected with but two changes in personnel, Mr. H. T. Jones

replacing Mr. Murnin in the miners' group, and Mr. A. Hayday, M.P., replacing Mr. Davenport in the General Workers' group. Mr. W. C. Robinson of the Beamers, Twisters' and Drawers' Association, and Mr. R. B. Walker, of

the Agricultural Workers, were chosen as the delegation to the United States; Mr. Frank Hodges, (Miners) as delegate to Canada; and Mr. John Turner (Shop Assistants) to the Co-operative Congress.

OPINIONS OF PERMANENT COURT OF INTERNATIONAL JUSTICE ON LABOUR MATTERS

THE Permanent Court of International Justice of the League of Nations, sitting at The Hague, recently delivered two important decisions affecting labour. The first of these deals with the method of appointing workers' delegates to the International Labour Con-

ferences and involves an interpretation of Article 389 of the Treaty of Versailles, and the second deals with the competence of the International Labour Organization in questions relating to agricultural labour.

Appointment of Workers' delegates to International Labour Conferences (League of Nations).

The question with regard to the appointment of workers' delegates to International Labour Conferences (League of Nations) arose out of the action of the government of the Netherlands in appointing to the Third International Labour Conference a workers' delegate who was not the nominee of the Netherlands Confederation of Trade Unions which is the largest of the five federations of trade unions of the country. The delegate was, however, the choice of three of the federations of trade unions, which had a combined membership of 282,455 compared with 218,596 members of the Netherlands Confederation of Trade Unions. The Confederation thereupon wrote to the International Labour Office protesting against this nomination, maintaining that it was in violation of the provisions of Article 389 of the Treaty of Versailles, as the delegate was not selected in agreement with the Netherlands Confederation, which taken singly had the largest number of members and was, therefore, the most representative workers' organization within the meaning of the above article. The International Labour Conference, however, admitted the workers' delegate ap-

pointed by the Netherlands government on the understanding that his admission should not be treated as a precedent. The conference also adopted the following resolution:—

The General Conference of the International Labour Organization invites the Governing Body of the International Labour Office to request the Council of the League of Nations to obtain, in accordance with Article 14 of the Covenant of the League of Nations, from the Permanent Court of International Justice an opinion as to the interpretation of Article 389 of the Treaty of Versailles and as to the rules which should be observed by the Members of the International Labour Organization in order to comply with the terms of this Article in appointing non-Government Delegates and Advisers to the Sessions of the General Conference.

In accordance with this resolution the Governing Body of the International Labour Office requested the Council of the League of Nations to obtain from the Court of International Justice an opinion on this question. On May 12 last, in compliance with this request the Council passed a resolution asking the Court to give an advisory opinion on the following question:—

Was the Workers' Delegate for the Netherlands at the Third Session of the International

al Labour Conference nominated in accordance with the provisions of paragraph 3 of Article 389 of the Treaty of Versailles?

The opinion of the Court was in part as follows:—

Since the Netherlands Workers' Delegate to the Third Session of the International Labour Conference was admitted by the Conference, the Court is of opinion that the sole object of the question submitted to it is to obtain an interpretation of the provisions of paragraph 3 of Article 389. . . . The passages material to be considered are the third and seventh paragraphs of Article 389:

"Paragraph 3—The Members undertake to nominate non-Government delegates and advisers chosen in agreement with the industrial organizations, if such organizations exist, which are most representative of employers or workpeople, as the case may be, in their respective countries."

"Paragraph 7—The credentials of delegates and their advisers shall be subject to scrutiny by the Conference, which may, by two-thirds of the votes cast by the delegates present, refuse to admit any delegate or adviser whom it deems not to have been nominated in accordance with this Article."

The Netherlands Confederation of Trade Unions is on the statements before the Court, the most numerous organization of the kind in Holland. It would not necessarily follow that it is the most representative, but for the purposes of this opinion it may be assumed to be so. . . .

The engagement contained in the third paragraph is not a mere moral obligation. It is part of the Treaty and constitutes an obligation by which the parties to the Treaty are bound to one another.

The obligation is that the person nominated should have been chosen in agreement with the organizations most representative of employers or workpeople, as the case may be. There is no definition of the word "representative" in the Treaty. The most representative organizations for this purpose are, of course, those organizations which best represent the employers and the workers respectively. What these organizations are, is a question to be decided in the particular case, having regard to the circumstances in each particular country at the time when the choice falls to be made. . . . The Article throws upon the Government of the State the duty of deciding, on the data at its disposal, what organizations are, in point of fact, the most representative. Its decision on this question may, however,

be reviewed under the seventh paragraph of this Article, and the Conference has the power, by a two-thirds majority, to refuse to admit any delegate whom it deems not to have been nominated in accordance with the Article. Such a refusal to admit may be based on any grounds, either of fact or law, which satisfy the Conference that the delegates have not been so nominated.

The Netherlands Government, whose good faith in this matter has not been contested, came to the conclusion that three organizations, the Catholic Confederation, the Christian Confederation and the General Confederation were collectively more representative of the workpeople of the Netherlands than the Netherlands Confederation. The Government accordingly nominated the delegate in agreement with those three organizations.

Could the Netherlands Government dispense with an agreement with the Netherlands Confederation of Trade Unions, and content itself with an agreement with the three other organizations? In order to reply to this question it must first of all be decided whether the agreement must be with only one organization.

It was suggested that the third paragraph of Article 389 spoke of organizations in the plural only because it was dealing with the case of the employers as well as with the case of the workers, and that what was meant was that the Government in nominating the Employers' Delegate, should proceed in agreement with the views of the one organization most important amongst those representative of the employers, and in choosing the Workers' Delegate, in accordance with the views of the one organization most important amongst those representative of the workers.

The Court cannot accept this interpretation.

The view maintained by the Netherlands Confederation is not sufficiently supported by the text of the Article, and it is at all events obvious that the ideas inspiring the provisions of paragraph 3 clearly demonstrate that the only possible construction that can be given to the word "organizations" is that the plural refers as well to employers' as to workers' organizations.

In accordance with the terms of the first paragraph of Article 389, the Workers' Delegate represents all workers belonging to a particular Member. The only object of the intervention of industrial organizations, in connection with the selection of delegates and technical advisers, is to ensure, as far as possible; that the Governments should nominate

persons whose opinions are in harmony with the opinions of employers and workers respectively. If, therefore, in a particular country there exist several industrial organizations representing the working classes, the Government must take all of them into consideration, when it is proceeding to the nomination of the Workers' Delegate and its technical advisers. Only by acting in this way can the Government succeed in choosing persons who, having regard to the particular circumstances, will be able to represent at the Conference the views of the working classes concerned. . .

The Netherlands Confederation of Trade Unions has also contended that, even admitting that the text of paragraph 3 of Article 389 purports to include several workers' and employers' organizations the Delegate was not nominated in accordance with the provisions of the paragraph in question, because an agreement with three organizations, which do not include the most numerous organization, is not an agreement with the most representative organizations. The meaning of this appears to be that if the plural construction of the text is adopted, the agreement should be made with all the most representative organizations. Even admitting that such an interpretation is reconcilable with the letter of paragraph 3 of Article 389, it is clearly inadmissible. In order to realize this, it will suffice to point out that the construction in question would make it possible, in opposition to the wishes of the great majority of workers, for one single organization to prevent the

reaching of an agreement. A construction which would have this result must be rejected.

The aim of each Government must, of course, be an agreement with all the most representative organizations of employers and workers as the case may be; that, however, is only an ideal which it is extremely difficult to attain, and which cannot, therefore, be considered as the normal case and that contemplated in paragraph 3 of Article 389.

What is required of the Governments is that they should do their best to effect an agreement, which, in the circumstances, may be regarded as the best for the purpose of ensuring the representation of the workers of the country.

This is precisely what the Netherlands Government did, when, after failing to reach an agreement with all the industrial organizations which it regarded as the most representative, it nominated the Workers' Delegate in agreement with the organizations which, taken together, included a majority of the organized workers of the country. . .

For these reasons: The Court is of opinion that the Workers' Delegate for the Netherlands of the Third Session of the International Labour Conference was nominated in accordance with the provisions of paragraph 3 of Article 389 of the Treaty of Versailles, and therefore answers in the affirmative the question referred to it.

Competence of the International Labour Organization to deal with Agricultural Labour.

At the request of the French Government the Council of the League of Nations submitted the following question to the Permanent Court of International Justice:—

Does the competence of the International Labour Organization extend to international regulation of the labour conditions of persons employed in agriculture?

At the hearings of the case *M. de Lapradelle*, representative of the French Government, explained that in their view neither that part of the Peace Treaty which embodies the constitution of the International Labour Organization, nor the documents on which it was based established precise rules with regard to the competence of the International Labour Organization in agricultural matters. He pointed out,

moreover, that owing to its very character agricultural labour was hardly suitable for uniform national regulation and still less for uniform international regulation. Mr. Talbot, on behalf of the British Government, expressed the opinion that from a legal point of view the Organization was competent to deal with agriculture, since if agriculture were excluded because of its special character this would apply also to other important industries such as fishing, and the lack of special mention of agriculture in the preamble to the labour part of the Treaty was not sufficient argument for its exclusion, the preamble being worded in general terms and including all kinds of labour. This view was supported by *M. Caeiro da Matta*, representative for Portugal,

M. Albert Thomas on behalf of the International Labour Office, and M. Jouhaux on behalf of the International Federation of Trade Union. The contrary opinion was expressed by Mr. Charles de Mayer for the Hungarian government, and M. Jules Maenhaut for the International Commission of Agriculture at Paris.

The following advisory opinion, with two judges dissenting, was delivered by the Court:

The Court is of opinion that the competence of the International Labour Organization does extend to international regulation of the conditions of labour of persons employed in agriculture and, therefore, answers in the affirmative the question referred to it.

It is interesting to note that M. Thomas, in the course of his argument before the Court, stated that an agreement had already been concluded between the International Labour Office and the International Institute of Agriculture at Rome which recognized the competence of the Labour Organization with regard to agricultural labour.

The following additional question on agricultural matters was also referred to the Court by the Council of the League on the request of the French Government:

Does examination of proposals for the organization and development of methods of

agricultural production and of other questions of a like character fall within the competence of the International Labour Organization?

The point of view and opinion of the Court on this second question was expressed in the following paragraphs:

The organization and development of the means of production are not committed to the Organization. . .

It does not follow that the International Labour Organization must totally exclude from its consideration the effect upon production of measures which it may seek to promote for the benefit of the workers. . . So, for instance, protection against sickness, disease and injury arising out of employment may involve the consideration of methods and processes of production, such as the use of white phosphorus, and of white lead, both of which have been dealt with as subjects within the scope of international regulation as affecting the conditions of labour. But the consideration of methods of organizing and developing production from the economic point of view is in itself alien to the sphere of activity marked out for the International Labour Organization by Part XIII of the Treaty; and, broadly speaking, any effect which the performance by the Organization of its functions under the Treaty may have on production is only incidental. . .

It follows from what has been said, that the Court understands the question to be whether the consideration of the means of production in itself, and particularly from the specific points in respect of which powers are conferred upon the International Labour Organization by the Treaty, falls within the competence of that Organization.

This question, for the reasons above stated, the Court answers in the negative.

CO-ORDINATION POLICY FOR IMMIGRATION AND LAND SETTLEMENT IN CANADA

Dominion and Provincial Governments to co-operate with Western Canada Colonization Association.

THE Dominion Government, in furtherance of the immigration policy recently adopted, is taking definite measures to secure the co-ordination of the efforts of the various agencies, Imperial, Dominion, Provincial and others, hitherto operating to attract suitable immigrants to Canada. In connection with this object the offer of co-oper-

ation on the part of the Western Canada Colonization Association, a new organization which is described below, has been accepted. The new policy will implement, as far as settlement on the land in Canada is concerned, the British scheme for overseas settlement which was described in the *LABOUR GAZETTE* for February, 1922, and is in line with

the recommendations of the British Overseas Settlement Committee, contained in the report which was outlined in the LABOUR GAZETTE, May, 1922.

The Canadian government's policy is set forth in a memorandum issued during September by the Hon. Charles Stewart, Minister of the Interior, Immigration and Colonization, in part as follows:—

The government of Canada have been giving attention to the whole question of immigration, and the minister, Hon. Charles Stewart, and the officials of the department, having in mind the statement of the prime minister that our agricultural settlers must be carefully selected in the country of origin, wisely directed on arrival so that they will not drift into the ranks of the unemployed in our cities, and so placed on the land that they will become substantial citizens of the Dominion, decided that the first thing to do is to have a survey of conditions existing in the countries from which we might expect to derive our settlers, as well as throughout Canada.

In order to co-ordinate the efforts of the officials in those countries with the officials in Canada so as to secure the best class of settlers and locate them on land where they will have the best chance to succeed, the minister has interviewed the provincial governments and discussed the question very thoroughly with them, and has succeeded in securing their hearty co-operation in this work.

Later a conference will be called at Ottawa of representative officials of those governments, and field officers of the Dominion department of immigration, at which a definite program will be set out for each year's activities.

After pointing out that with urban employment in its present state it is unwise to add still more to the numbers looking for work in the cities, the memorandum proceeds:

Our activities for the present must therefore be confined to people who will engage in agriculture and household work and to 'teen age boys and girls.

A committee, representative of the government, have had many conferences with the Canadian Colonization Association, an organization backed by private capital that is going to endeavour to settle annually a large acreage of lands lying adjacent to the railways in Canada. This organization is en-

deavoring to work in conjunction with the British Overseas Settlement scheme, as well as bringing settlers with means from Great Britain, United States, Scandinavia and the continent. They will also encourage migration from our cities to the country. The government will assist them with a grant in order that they may thoroughly organize their welfare scheme.

The department of immigration will make a strong drive to secure agricultural workers who will go upon our free lands located in the northern portions of Canada. The department hopes to work out this scheme in co-operation with the provincial governments, which will assist in the direction of those very desirable settlers when they arrive within the provinces. It is hoped they can be settled in congenial surroundings so far as schools, churches and social activities are concerned.

"A very important field, in the opinion of the minister, is that to be dealt with in bringing to Canada carefully selected boys and girls from Great Britain. Mr. J. Bogue Smart, who is in charge of the juvenile work has just returned from Great Britain and reports that there are a very large number of desirable children who can be brought to Canada, and he is now engaged in working out arrangements for the placing of them in the rural homes of Canada.

Another promising field is that of the repatriation of many of our splendid Canadian people who in recent years have gone to the New England States. It is hoped to attract a very large number of them back to their native provinces as well as to Western Canada.

Western Canada Colonization Association's land settlement plan.

The recently organized Western Canada Colonization Association, in a statement issued about the same time, sketched the duties assigned, under the new national land settlement plan to the various governments and agencies concerned.

The Imperial government will assume a liberal share of the cost of the welfare work to be carried on in Canada, on behalf of incoming settlers. (The British Government has established a fund of \$225,000,000 for assisted settlement in the various Dominions, under the administration of the Right Hon. L. S. Amery. Part of this fund will be ap-

plied to settlement in Canada under the new plan).

The Dominion government will (a) Rejuvenate and extend the immigration agencies abroad, in order to stimulate the flow of qualified agricultural settlers to Canada. (b) Employ a large number of active field men abroad, and (c) Carry on a widespread publicity campaign with this end in view.

The provincial governments are asked to (a) Assist the Colonization Association in selecting suitable districts for settlement. (b) Assist in directing settlers through the instrumentality of the district agricultural representatives during the initial period of their pioneer careers, and (c) Provide the Colonization Association with literature regarding the agricultural attractions of the respective provinces.

The Canada Colonization Association will (a) List land for sale. (b) Assist the government in securing settlers from Great Britain, the United States and other countries. (c) Act as a national land selling agency in bringing settlers and vendors together. (d) Set up a national welfare organization, embracing local community clubs, to care for incoming settlers until they become thoroughly established as successful farmers. (e) Direct the movement of British farm labourers to Canada, where they can in time become proprietary farmers. (f) Promote an extensive movement of British boys to Canadian farms, and (g) Encourage the migration of British women to Canada for employment on farms and in domestic service.

The Canadian railways are to co-ordinate their colonization activities with those of the Colonization Association, and also provide special transportation rates for settlers and settlers' effects and colonization agents.

The officers of the Western Canada Colonization Association are as follows:—

President—Sir John Willison, K.B., LL.D., president Canadian Reconstruction Association.

Vice-President—Mr. M. A. Brown, formerly Mayor of Medicine Hat.

General Manager—Mr. Howard Everett, formerly president of Luse Land Company.

Eastern Manager—Dr. George C. Creelman, formerly president of Ontario Agricultural College, Guelph, and later agent general for Ontario in London.

Secretary-Treasurer—Mr. F. D. L. Smith.

A Committee to assist the general manager has been appointed composed of Messrs. M. A. Brown, F. A. Field, chief land commissioner, Canadian National Railways; Colonel J. S. Dennis of the resources department, Canadian Pacific Railway; G. F. Chipman, editor of *Grain Growers' Guide*; A. E. Mackenzie Branden, and W. D. Evans, Winnipeg.

At recent meetings of the eastern and western boards of the Association it was decided to proceed immediately with the creation of an active organization to carry out the new forward policy. The head office for Eastern Canada will be at Ottawa, and that for the West at Winnipeg. The activities of the Association will embrace the entire Dominion.

The Association's statement declares that settlers are available not only in Great Britain, the United States and other countries, but in urban centres in Canada, and that awaiting settlement are millions of fertile, well situated lands close to existing railways. Settlers will be carefully selected and will be conducted directly to the land, and so looked after that they will not drift into the cities. The full amount of working capital originally contemplated by the Association, namely \$1,500,-

000, has already been over-subscribed, but it is estimated that the working out of the plan will involve expenditure between \$30,000,000 and \$40,000,000 within the next five or ten years. The greater part of this amount will be furnished by commissions earned on

the sale of privately owned land. The Association anticipates that at least ten million acres of vacant land will be settled within the next few years. In the western provinces the land will be sold at 32-year purchase, and in the east on terms governed by local conditions.

SUMMARY OF IMPORTS AND EXPORTS FOR AUGUST, 1922

THE figures in the present article are derived from a statement prepared by the Department of Customs and Excise showing the imports of various classes of commodities, free and dutiable for the months of August, 1921 and 1922, and for the five months ending in

August of those years, and the exports domestic and foreign of similar classes of goods for the same periods.

The following table shows the imports and exports, free and dutiable, of the various classes of products for the month of August, 1922:

Classes of goods	Imports		Exports	
	Free	Dutiable	Domestic	Foreign
Agricultural and vegetable products, mainly foods	\$ 2,141,916	\$ 8,038,640	\$ 23,891,301	\$ 73,627
Agricultural and vegetable products, other than foods	1,666,761	2,380,486	1,637,883	268,605
Animals and animal products	1,506,804	2,206,504	14,822,142	95,466
Fibres, textiles and textile products	4,588,634	9,907,405	890,956	106,993
Wood, wood products and paper	1,142,454	1,946,977	21,192,741	23,549
Iron and its products	1,999,204	11,535,063	3,293,627	262,554
Non-ferrous metals and their products	977,141	1,990,040	2,623,322	43,106
Non-metallic minerals and products	4,722,982	4,335,346	2,803,062	83,986
Chemicals and allied products	910,985	1,252,895	1,143,522	11,175
Miscellaneous commodities	2,017,411	2,069,102	1,087,643	131,159
Totals	21,674,292	45,680,458	73,386,199	1,100,220

In August, 1922, the duty collected amounted to \$11,759,792 as compared with \$10,452,208 in August, 1921.

The following comparative table shows the values of the merchandise entered

for consumption and the merchandise domestic and foreign, exported in the months of August, 1922 and 1921, and in the five month periods ending August 31 of these years respectively:

	Month or August		Five months ending August 31	
	1921	1922	1921	1922
Merchandise entered for consumption	\$ 65,147,301	\$ 67,354,750	\$ 319,009,763	\$ 303,597,326
Merchandise, domestic, exported	61,485,993	73,386,199	277,413,949	316,640,668
Total	126,633,294	140,740,949	596,423,712	620,237,994
Merchandise, foreign, exported	877,005	1,100,220	5,891,326	5,884,195
Grand total, Canadian trade	127,510,299	141,841,169	602,315,038	626,122,189

In the five-month period ending August 31, 1922, duty collected amount-

ed to \$55,516,217 as compared with \$49,509,724 in the same period in 1921.

REPORT ON DISASTER IN BRITISH COLUMBIA COAL MINE

FOLLOWING an explosion on August 30 last in No. 4 coal mine, Cumberland, British Columbia, Canadian Collieries (Dunsmuir) Limited, in which eighteen lives were lost, the Honourable William Sloan, provincial Minister of Mines, appointed a special commission under Mr. George Wilkinson, former chief inspector of mines for British Columbia, to investigate and submit a report on the disaster. Of those fatally injured two were British subjects, one Russian, six Japanese and nine Chinese.

The report which has recently been issued shows that the source of the trouble was a flash or open sparking caused by an arc in the electric trailing cable at the socket used in connecting this cable with the main electric circuit. This electrical system was used to furnish the power necessary for the operation of a coal-cutting machine of a type approved by the United States Bureau of Mines for use in gaseous mines. The cutting machines were installed at these collieries seven years ago and this accident is the first recorded. The report states:

It was a small explosion to take such a heavy toll and it was a combination of circumstances which made it do so. Occurring on a longwall face it naturally brought a number of men in the path of the flame in a short distance. Owing to the most of these men being engaged working in the face, and the seam not being very high there was no way of escaping. It is the opinion of the writer that if the current had been cut off the cable while the shot was being fired there would have been no explosion and it was an error of judgment on the part of the fireboss in not having this done when the terminals of the feed cables were in such close proximity to the shot. It would have been better if the terminals of the main feed line had not been located so close to the face and fixed, flameproof, terminal boxes had been used. This does not suggest that it would not have been possible for an arc to be created if the above-named terminal boxes had been used because if the blow had been

of sufficient force to draw the bare end of the connecting cable clear of the insulated material it may still have created an arc, but the chances of doing so would have been less. It is questionable owing to the amount of gas being given off and the peculiar conditions existing if it would be wise to continue the use of electric mining machines in this section. At present there are no specific regulations governing the use of electric power in mines of British Columbia, this power having been used only to a limited extent. No doubt the use of this power will be increased in the future when further electrical developments take place in the province. Electric power is used extensively in the United States and Great Britain in and about coal mines.

These electric coal cutting machines were installed by the Canadian Collieries (Dunsmuir) Limited nearly seven years ago, and the recent accident is the first recorded. While approved by the United States Bureau of Mines, the standard of safety must be judged by the weakest link. The weakest link in my opinion is in cables, and connection, in close proximity to the working face.

It is suggested that the whole question of the use of electricity be fully investigated by the Department of Mines and if possible definite conclusions reached with reference to the permitted use of this power.

As a result of the findings of the Commission the British Columbia Government on October 2 passed orders-in-council which became effective immediately, making the following recommendations a part of the Coal Mines Regulation Act:

1. No terminals of main feed lines shall be located nearer any coal face than fifty feet.
2. When blasting is being done the current shall be cut off and the cables made dead in that vicinity and the current shall not be switched on again until blasting is finished, and the places are examined and pronounced safe, and the cables have been examined and found free from any damage which may cause defects.

3. All permanent electrical installations, and transforming stations underground shall be made fireproof.

4. All switches and terminal connections shall be protected or enclosed so as to prevent accidental contact by persons and danger from arcs or short circuits, fire or water, and where there may be risk of igniting gas, coal dust or other inflammable material, all parts

shall be so protected as to prevent open sparking.

5. All cables used underground shall be covered with insulating material, and where high pressure voltage is in use, properly armoured cables of standard thickness shall be used.

6. All trailing cables shall be of properly armoured construction whatever voltage is used.

CONVENTION OF THE AMPUTATIONS' ASSOCIATION OF THE GREAT WAR

SOME twenty delegates attended a convention of the Amputations' Association of the Great War which was held at Vancouver on September 21, 22 and 23. They represented more than 2,000 veterans throughout Canada each of whom had lost one or more limbs, or had suffered the total loss of eyesight. The president Rev. G. E. Lambert of Toronto was in the chair. Among those who addressed the convention were Brigadier General J. A. Clark, M.P., Brigadier General A. D. McRae and Mr. W. H. McInnes of the Civil Service Commission of British Columbia.

The president, in his address stated that the greatest problem before the Association was unemployment; that last winter about 164 amputation cases were unemployed in Toronto, 44 in Vancouver, 31 in Winnipeg, 25 in Victoria, 12 in Hamilton, and 5 in Regina, as well as others scattered throughout the country making an estimated total of 325, or about 10 per cent of the total cases. As a result of correspondence with the Civil Service Commission the Association is now receiving notice regarding vacant portmasterships throughout the Dominion.

Two resolutions were passed dealing with the unemployment situation. It was decided to petition the Federal and Provincial governments "that in every office in their control where over ten men are employed, regulations be so

made that a certain percentage of their staff shall be men suffering from 40 per cent or over war disability, with particular reference to amputation cases, and that this regulation be made to apply to all firms who receive State contracts." The other resolution urged upon the government the appointment of an amputation case as a member of the Civil Service Commission.

The convention decided to request that the Dominion Government reorganize and enlarge the entire system known as Vetreraft shops to provide for the re-establishment of disabled men along the lines suggested in the report of the Federal parliamentary committee on pensions, and that eventually the control of this scheme pass into the hands of disabled soldiers' organizations; also that the Government grant sufficient capital to enable men who have suffered amputations to engage in business, and it was proposed that the interest accruing to the Canadian Patriotic Fund be used for this purpose. It was recommended that the Federal Government appropriate one-half of the remaining balance of canteen funds to establish in all the large cities of Canada workshops for handicapped ex-soldiers, and that the Government should be requested to supplement the amount available by subsidizing these workshops until they are able to carry on as private enterprises.

It was decided to request the Dominion government to maintain in every large centre institutions similar to the Dominion Orthopaedic Hospital at Toronto, and also to maintain small artificial limb repair shops at Hamilton and at points on the prairies. Another resolution asked that there be a reorganization of the orthopaedic and surgical appliances branch of the Soldiers' Civil Re-establishment Department and suggested that wherever possible the work of administration be conducted by amputation cases. A resolution was passed requesting that the Dominion Government give hospital

treatment to maimed men who suffer accident when travelling on street cars, and in case of permanent injury compensate anyone so injured by increasing their present pension.

The convention resolved to petition the Federal Government to formulate a housing scheme to be administered by the Soldiers' Settlement Board and to apply to disabled soldiers.

Rev. S. E. Lambert, of Toronto, was re-elected president of the Association, Mr. A. Palmer, of Winnipeg, was elected vice-president and Mr. A. Sutcliffe, of Toronto, secretary-treasurer.

ENGINEERS' REPORT ON THE TWELVE-HOUR DAY

A COMMITTEE of the Federated American Engineering Societies which has been investigating for a year the subject of "Work Periods in Continuous Industries," has recently made its report. The committee states that there are few continuous industries which do not have some twelve-hour plants; but of some forty or fifty continuous industries a number are operating almost entirely on three shifts, while the majority are partly on two shifts and partly on three shifts, with three-shift operation in the preponderance. There are a half dozen industries in which two-shift operation is so nearly universal that it is difficult to find an exception. Outside the steel industry the total number of employees on eight-hour shifts is now considerably larger than the total number of employees on twelve-hour shifts. Taking into consideration all continuous industries, between one-half and two-thirds of all workers on continuous operation are on shifts averaging twelve hours.

The actual investigation was made by H. B. Drury, formerly professor at Ohio State University, and Bradley Stoughton, an engineer formerly with the Columbia University School of Mines and the Illinois Steel Company.

In his conclusions Mr. Drury stated that there were 300,000 wage earners in the United States working on twelve-hour shifts who with their families numbered more than one million persons. No technical difficulties have been encountered by the great majority of plants which have changed from a two to three-shift operation. The seeming disadvantage of having three men instead of two responsible for a given product, process or equipment is overcome by standardization and by using precision instruments. The effect of the eight-hour as compared with the twelve-hour shift operation on the quantity and quality of production, absenteeism and industrial accidents has been satisfactory where good management and co-operation of labour have been

secured. A comparison of wage rates shows a general tendency to increase the rate per hour under the eight-hour shift so that the daily earnings will be the same as they were before the change.

Mr. Stoughton reported particularly on the steel industry. He stated that in 1919 the United States Steel Corporation employed approximately 70,000 twelve-hour employees. Altogether there are, according to him, perhaps 150,000 wage earners in the entire steel industry on twelve-hour shifts. The twelve-hour day is strongly established by custom in the iron and steel industry, but recent progress has been in the direction of a shorter day as well as in a reduction of the proportion of men on duty seven days a week. The investigator was assured by blast furnace operators on more than one occasion that the cost of producing pig iron was less on the eight-hour than on the twelve-hour day.

An analysis of the practice in vogue in the various continuous process industries shows that the three-shift plan prevails in the non-ferrous metal industries, flour mills, petroleum works, and cereal food factories. The majority of plants are also on a three-shift basis in the glass industry, paper factories, water works and drug factories. The following industries have twelve-hour shifts: cotton seed crushing, cane sugar mills except those of the American Sugar Refining Company, beet sugar factories, cement, lime and fertilizer works (acid plant employees), most explosive, industrial alcohol, and soap plants.

The general conclusions of the committee were as follows:

1. The tendency throughout the world is toward the abolition of the twelve-hour shift.

2. In almost every continuous industry there are plants which are operating on an eight-hour shift basis in competition with twelve-hour shift plants.

3. To make the change to the three-shift operation successfully and economically it is desirable that:

- (a) The majority of the workmen appreciate the value of the extra leisure;
 - (b) The workmen be willing to concede something in the way of daily income. (The plan which divides the extra labour cost equally between the men and the company has been acceptable in a number of cases);
 - (c) A survey of the field be made for labour saving equipment and methods of management which will facilitate the work after the change is made;
 - (d) The plant management study equipment and methods of operation and make every change in the plant and in the organization possible to facilitate operation under the three-shift system;
 - (e) All equipment be in condition to respond to increased intensity of operation;
 - (f) The workmen be instructed in their duties under the new system and the co-operation of the whole organization be secured;
 - (g) The extra trained labour required be available;
 - (h) The time for the change be selected with great care. (Periods of labour unrest must be avoided; the success of each step should be assured before another is taken).
4. In a number of plants where the change has been made with success the management reports these results:
- (a) Better physical and mental condition of workmen;
 - (b) Improvement in class of workmen;
 - (c) Less shirking, tardiness, absenteeism and labour turnover and industrial accidents;
 - (d) Improved spirit and co-operation of workmen;
 - (e) More exact adherence to instructions as to working methods;
 - (f) More uniform methods with consequent attainments of standards, etc.;
 - (g) Better quality of product;
 - (h) Increased output per man per hour;
 - (i) Less material used;
 - (j) Wastes eliminated;
 - (k) Longer life of equipment and less repairs;
 - (l) Greater prestige with the public.

FAIR WAGE CONTRACTS, SEPTEMBER, 1922

DURING September the Department of Labour received for insertion in the LABOUR GAZETTE the following information relative to twenty fair wage contracts, eighteen of which were awarded by the Department of Public Works and two by the Department of Railways and Canals. These contracts contain the usual fair wage clause which provides for the prompt payment of such wages as are current in the district in which the work is to be performed, and for observance on the various works under contract of the prevailing hours of labour, and which otherwise prevents abuses and secures the legitimate rights of the labour employed.

A statement was also received as to supplies ordered by the Post Office Department, subject to the Regulations for the Suppression of the Sweating System and the securing of fair wages, etc.

DEPARTMENT OF PUBLIC WORKS.

Removal of Bunker Island Light Shoal and removal of Bunker Island after its abandonment by the Marine Department, at Yarmouth, N.S. Name of contractor, The Halifax Dredging Company, Limited, Halifax, N.S. Date of contract, August 31, 1922. Amount of contract, Class "B", \$1.45 per cubic yard (in situ).

Dredging at Montmagny, Que. Name of contractor, Horace Dussault & Company, Lévis, Que. Date of contract, August 28, 1922. Amount of contract, Class "B", 50 cents per cubic yard (scow).

Dredging the entrance channel and basin at Kincardine, Ont. Name of contractor, William Bermingham, Kingston, Ont. Date of contract, August 17, 1922. Amount of contract, Class "B", 50 cents per cubic yard (scow).

Dredging at St. Jean D'Orléans, Que. Name of contractor, Lachance, Ltée.,

Montréal, Que. Date of contract, September 9, 1922. Amount of contract, Class "A", \$2.50 per cubic yard (in situ), Class "B", 60 cents per cubic yard (scow measure).

Dredging channel at Gibbon's Point, (Little Current), Ont. Name of contractor, The C. S. Boone Dredging and Construction Company, Limited, Toronto, Ont. Date of contract, September 8, 1922. Amount of contract, Class "A", \$4.95 per cubic yard (in situ), Class "B", \$2.00 per cubic yard (in situ).

Deepening of basin at Digby, N.S. Name of contractor, James Stuart Gregory, St. John, N.B. Date of contract, September 6, 1922. Amount of contract, Class "B", 40 cents per cubic yard (in situ).

Dredging at Beaver Harbour, Chocolate Cove, Leonardville and St. Andrews, N.B. Name of contractor, John Alphonso Gregory, St. John, N.B. Date of contract, September 6, 1922. Amount of contract, Class "B", 60 cents per cubic yard (scow measure).

Dredging channel through shoals between Louiseville and deep water at River du Loup (En haut), Que. Name of contractor, Lachance, Ltée, Montréal, Que. Date of contract, September 9, 1922. Amount of contract, schedule of prices.

Dredging channel to wharf and a gap through to breakwater at Port Elgin, Ont. Name of contractor, William Bermingham, Kingston, Ont. Date of contract, September 8, 1922. Amount of contract, Class "B", 70 cents per cubic yard (scow) and \$1,800 for gap.

Cleaning up wholly and entirely of all obstacles and materials whatsoever, etc. the bed of St. Mary's river opposite the city of Sault Ste. Marie, Ont. Name of contractor, The Soo Dredging and Construction Company, Limited, Sault

Ste. Marie, Ont. Date of contract, September 7, 1922. Amount of contract, schedule of prices.

Dredging on the shoal to the eastward of Whitman's wharf, Canso, N.S. Name of contractor, W. McFatridge, Halifax, N.S. Date of contract, September 15, 1922. Amount of contract, \$100 per day of 10 working hours and \$5 to be deducted from rental rate for time lost at any one time and amounting to 5 hours, due to stress of weather.

Dredging at Newcastle, N.B. Name of contractor, Miramichi Dredging Co., Ltd., Newcastle, N.B. Date of contract, September 20, 1922. Amount of contract, Class "B", 68½ cents per cubic yard (in situ).

Alterations to boiler, etc., Customs Exg. Warehouse, Winnipeg, Man. Name of contractors, Green & Litster, Ltd., of Winnipeg, Man. Date of contract, September 14, 1922. Amount of contract, \$3,666.

Repairs to wharf, St. Alexis, Que. Name of contractors, Caron & Fr(re, L'Islet, Que. Date of contract, August 25, 1922. Amount of contract, unit prices.

Extension to breakwater-wharf, Chimney Corner, N.S. Name of contractor, W. E. Landry, Antigonish, N.S. Date of contract, September 12, 1922. Amount of contract, unit prices.

Repairs to wharf, St. Michel de Bellechasse, Que. Name of contractor, Jos. R. & Jos. Elz. Boulanger, Montmagny, Que. Date of contract, September 2, 1922. Amount of contract, unit prices.

Supply and installation of hot water furnace and additional radiation in Post Office, Canso, N.S. Name of con-

tractor, Jeffrey Sampson, Canso, N.S. Date of contract, August 31, 1922. Amount of contract, \$1,075.

Alterations and additions to Post Office fittings, Sudbury, Ont. Name of contractor, The J. T. Schell Co., Alexandria, Ont. Date of contract, September 9, 1922. Amount of contract, \$2,873.
DEPARTMENT OF RAILWAYS AND CANALS.

Placing of stone protection along certain portions of the Welland Canal between Lock No. 24 at Thorold and Port Colborne, principally between Thorold and Welland. Name of contractors, Walker Bros., Thorold, Ont. Date of contract, September 15, 1922. Amount of contract, \$4.65 per cubic yard.

Construction and erection of the steel superstructure of a highway fixed bridge over Sulphur Creek, on the Welland Canal, south of Dunnville, Ont. Name of contractors, Standard Steel Construction Co., Ltd., Welland, Ont. Date of contract, September 20, 1922. Amount of contract, \$7,581.

POST OFFICE DEPARTMENT.

The following is a statement of payments made in September for supplies ordered by the Post Office Department, subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages, and the performance of work under sanitary conditions:

Nature of order	Amount of order
Making metal dating stamps and type, and other hand stamps and brass crown seals	\$ 967.23
Making and repairing rubber stamps, deters, etc.	505.24
Making up and supplying letter carriers' uniforms, etc.	4,933.83
Repairing letter boxes, etc.	188.81
Repairing scales	247.10
Mail clerks' tin boxes	250.36

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

A SUMMARY is given below of the more important industrial agreements and schedules of wages and working conditions that have recently been received by the Department. Such agreements are summarized each month in the LABOUR GAZETTE. In the majority of cases the agreements are signed by both employers and employees, but verbal agreements are also included in the records, the latter being schedules of rates of wages, hours of labour and other conditions of employment agreed upon between the parties concerned, and in effect though not signed. In addition to these, other important schedules of wages are summarized, including civic schedules. In the case of each agreement or schedule the rates of wages for the principal classes of labour are given, with other information of general interest.

Manufacturing—Printing and Publishing.

CALGARY, ALTA.—CERTAIN LOCAL EMPLOYERS AND CALGARY PRINTING PRESSMEN AND ASSISTANTS' UNION No. 201. Agreement to be effective from May 27, 1922, until May 27, 1924.

Minimum scale per week—from May 27, 1922, until November 27, 1922, journeymen, day, \$41.62½, night, \$44.62½. From November 28, 1922, until May 28, 1923, journeymen, day, \$40.50; night, \$43.50.

It is further provided that if the cost of living, same to be compiled on the basis of the budget as published in the *Labour Gazette*, but for the Province of Alberta only, does not show a greater fluctuation as between the month of April, 1922, and the month of April, 1923, than 12½ per cent, the above scale shall apply for one year longer. The figures of the *Labour Gazette* shall be accepted by both parties to the agreement. In the event of a greater fluctuation than 12½ per cent, the agree-

ment shall expire on May 27, 1923, and both parties agree that negotiations will be opened for reconsideration of the scale.

Apprentices' scale: first year, one quarter of journeymen's scale; second year, one-third; third year, one-half; fourth year, two-thirds; fifth year, three-quarters.

Hours of labour: forty-five per week, day shift; forty-two per week, night shift.

Manufacturing—Clothing

MONTREAL, QUE. — THE CLOTHING MANUFACTURERS' ASSOCIATION OF MONTREAL, INCORPORATED, AND THE AMALGAMATED CLOTHING WORKERS OF AMERICA. Agreement to be effective from June 1, 1922, until May 31, 1923.

This agreement is a renewal of the previous one, as summarized in the LABOUR GAZETTE, October, 1921, pages 1306-7. The last clause has been changed, so that the Board of Arbitration shall *not* have the power to change the wages of the workers, or the working hours.

Construction—Buildings and Structures.

MONTREAL, QUE. — MASTER PLASTERERS' ASSOCIATION, AND OPERATIVE PLASTERERS' AND CEMENT FINISHERS' ASSOCIATION, LOCAL 33. Agreement to be effective from June 12, 1922, until May 1, 1923, with 3 months' notice of change.

Hours per day, 8, with 4 on Saturday. No work between noon and 6 p.m. on Saturday except on a special permit of the business agent or shop steward. On all out of town work it is permissible to work 10 hours per day, or 60 hours per week, straight time.

Wages: per hour, from June 12 to July 1, 1922, 85 cents; from July 1, 1922, until May 1, 1923, 90 cents.

Master plasterers who have been one year in the business to be allowed one apprentice, same to serve one year before another is taken on. Apprentices starting at the age of 18 to serve 4 years. Master plasterers' sons not to be included in the above conditions.

Saturday afternoons and overtime, time and one-half; after midnight and Sundays, certain holidays and on Saturdays after 6 p.m., double time.

Plasterers on out of town work to receive transportation and 12½ cents extra per hour. Travelling time to be allowed during regular working hours.

Agreement provides for an Arbitration Committee of five members from each party, with full power in all matters pertaining to the agreement, committee to meet at least once a month to discuss matters of interest to the trade.

TORONTO, ONT.—TORONTO SOCIETY OF DOMESTIC SANITARY AND HEATING ENGINEERS AND LOCAL 46, UNITED ASSOCIATION OF PLUMBERS AND STEAMFITTERS OF THE UNITED STATES AND CANADA. Agreement to be effective from July 1, 1922, until April 30, 1924, and from year to year thereafter unless one month's notice of change is given.

Hours of labour, on five days, 8 a.m. to 5 p.m. with 1 hour for lunch, and on Saturdays from 8 a.m. to 12 noon.

Wages, per hour: for skilled journeymen, 90 cents.

Overtime, until midnight, time and one-half; from midnight until 8 a.m., and Sundays and certain holidays, double time.

Absolutely necessary repairs and finishing up a repair job on regular working days, if not taking more than one hour's time, regular rates.

Men working out of Toronto to have their fare and board paid. Travelling time: single time up to 9 p.m. In localities where no local exists, hours may be extended to 10 per day on regular working days, at single time. Only union members to be employed on work under

the jurisdiction of this local. If the local is unable to furnish skilled men, employer may employ help as required.

Employee to correct his own defective work in his own time to the standard of a skilled mechanic.

Union members to work at the trade only for the Society signing the agreement.

Apprenticeship conditions to be administered by a joint committee of three members from each party. Each steamfitter to be allowed only one apprentice. Additional help must be labourers. A joint conference board to be formed composed of four members from each party, three from each party to constitute a quorum, board to meet once a month and to be empowered to act on behalf of the respective parties.

Grievances to be referred to a joint arbitration board of three masters and three journeymen, with full power to settle grievances and to appoint an arbitrator if necessary. Disputes which cannot be settled satisfactorily, or any violations by local 46 of clauses of this agreement, to be referred to the General Office of the United Association, no strike, stoppage or work or lockout to take place until matter has been investigated and a decision rendered.

BRANTFORD, ONT. — GENERAL CONTRACTORS AND BUILDERS, AND DISTRICT COUNCIL OF CARPENTERS. Agreement to be effective from May 1, 1922, until April 30, 1923, with 60 days' notice of change.

Hours per day, 8 for 5 days; 4 hours on Saturdays.

Minimum wages: per hour, 70 cents.

No work on holidays or after regular working hours unless by sanction of the Carpenters' District Council, when double time shall be paid. Time and transportation to be agreed on for any distance over three miles.

Employers to employ union carpenters only, but if same are not available, non-union men may be employed.

A joint board to be appointed to settle disputes.

Union carpenters to charge 20 cents over regular rate when hired by individuals or private corporations.

Water Transportation.

MONTREAL, QUE. — VARIOUS STEAMSHIP COMPANIES, AND THE SYNDICATED LONGSHOREMEN'S ASSOCIATION OF THE PORT OF MONTREAL. Agreement to be in effect from September 6, 1922, until December 31, 1923.

From 7 a.m. until noon and 1 p.m. until 6 p.m., wages to be 50 cents per hour; from 7 p.m. until 11 p.m. and from midnight until 5 a.m. wages to be 60 cents per hour; Sundays, double time. Work during meal hours to be paid for at double the regular rate.

Work on nitrate and bulk sulphur, and grain trimming and bagging—day work, 65 cents per hour; night work, 75 cents. Running of grain in pipes to be stopped when men go down in the hold to work. Coal handling on general cargo vessels—day work, 55 cents per hour; night work, 65 cents.

Men signing a personal agreement to be given work in preference over men not having signed.

Union to supply necessary men under their jurisdiction to perform work under this agreement.

Mails and baggage to be handled on Sundays, holidays and week days at all times at prevailing rates.

Each party to deposit \$2,000 in trust as a guarantee for the due performance by it of the agreement. The deposits to be applied by the Trustees in payment of judgments or orders of any court in the province in favour of the other party; balance, with accrued interest, to be returned by the trustees to the party entitled thereto. Companies to make up any difference in the rate of interest so the Longshoremen will get a return of not less than .6 per cent from date of deposit.

Longshoremen to have right to appoint a representative on the wharves.

Street and Electric Railways.

OTTAWA. — OTTAWA ELECTRIC RAILWAY COMPANY, AND EMPLOYEES. Agreement to be effective from May 1, 1922, to May 1, 1923, and thereafter unless changes are desired.

No discrimination to be shown against any employee on account of his membership in any association representing employees.

Company agrees employees shall not be censured in public for disobedience of rules. For serious offence employee to be suspended. No employee to be dismissed without a careful investigation, and removal of all doubt as to his guilt. Promotions and transfers in all departments to be based on merit and seniority and without discrimination; company being sole judge. In reduction of staff through slackness of work, last on, first off; last off, first on.

No employee to be granted leave of absence exceeding thirty days in any one year without loss of seniority, except when members of a committee or officers of an employees' association or delegates to a convention of the same.

Employees to be given free transportation on all lines of the Company.

Hours per day, except in water power department, 9. No employee to be compelled to do extra work beyond his regular day's work except in emergency. Special calls for men off duty to be paid at overtime rate, paying not less than one-half day's pay at regular rates. Work in excess of nine hours, on all days except Sundays and legal holidays, time and one-half. Sundays and certain holidays, time and one-quarter.

Conductors and motormen to choose runs in order of seniority, choosing to take place every three months or when necessary.

Spare men with no marks against them for failing to report, or not away on

account of sickness, or on leave (except the weekly day off) to be guaranteed a minimum of \$37.50 for each pay period of one half-month.

Company to pay full cost of specified uniforms for motormen and conductors in service over one year, and half cost for those in service the first year. Caps and badges to be supplied free of charge.

After a student conductor or motorman has passed his preliminary examination and has been accepted for employment, he shall be known as a spare man, and will be considered as on pro-

bation for four months. At the end of that period he will be subject to a final examination by the Superintendent and if satisfactory will be taken on as permanent.

In power plant, 8 hours to constitute a day's work, to be completed in 8 consecutive hours.

Wages: per hour—conductors and motormen, 1st year, 43 cents; 2nd year, 45 cents; 3rd year, 46 cents; thereafter, 48 cents. The existing wages of all other employees to be reduced by 12½ per cent.

PRICES, RETAIL AND WHOLESALE, IN CANADA, SEPTEMBER, 1922

THE index number of wholesale prices was again lower, while in retail prices a decline in foods was offset by an advance in fuel.

In retail prices the average cost of a weekly family budget of twenty-nine staple foods in some sixty cities was \$10.28 at the beginning of September as compared with \$10.44 for August; \$11.82 for September, 1921; \$15.95 for September, 1920; \$11.65 for September, 1917; and \$7.83 for September, 1914. The total for food, fuel and rent averaged \$20.90 for September as compared with \$20.88 for August; \$22.37 for September, 1921; \$26.38 for September, 1920; \$18.57 for September, 1917; and \$14.33 for September, 1914. The only marked change in foods was a seasonal decline in potatoes, though meats, bread and flour were also lower. Eggs, butter, cheese, evaporated apples, prunes and sugar were slightly higher. Quotations on cod were considerably higher in some cities, while in many others it was reported that none was for sale. Wood was also higher. Rent was practically unchanged.

In wholesale prices the departmental index number of 271 commodities stood at 220.5 for September as compared with 222.8 for August; 232.7 for September, 1921; 326.6 for September,

1920; 301.5 for September, 1919; 246.1 for September, 1917; and 141.3 for September, 1914. Except for seasonal advances in dairy products the fall in index number was due chiefly to decreases, also partially seasonal, in prices of agricultural products, and in Connellsville coke which declined sharply from its recent high levels. The chief advances for the month were in dairy products, maple sugar, raw cotton, raw silk, hides, pig iron, turpentine and some raw furs, and less important advances in bar iron, quicksilver, axes, nails and wire. The chief declines were in grains and fodders, cattle and beef, hogs, mutton and lamb, fruits and vegetables, flour, granulated sugar, Connellsville coke, and linseed oil.

The index number of wholesale prices is based on the quotations for 271 commodities and is the simple average of the percentages of current prices of the several commodities in relation to the average prices for the base period, 1890-1899, these being, therefore, made equal to 100. The quotations for most farm products are obtained weekly and averaged for the month; the quotations for other commodities are taken for the middle of the month. The table of index numbers shows the changes by groups and sub-

groups for the previous month and for the corresponding months back to 1913.

A special index number (comprising fifty of the more important commodities selected from the 271 in the departmental list) including 20 foods, 15 raw materials and 15 manufactured goods, based upon price levels in 1913 as 100, showed a decline to 145.3 for September as compared with 148.3 for August; 150.7 for July; 150.4 for September, 1921, 229.9 for September, 1920, and 102.9 for September, 1914.

The index number of wholesale prices in Canada published by the United States Federal Reserve Board including 33 raw materials, 28 semi-manufactured or producers' goods and 38 finished or consumers' goods and based upon price levels in 1913 as 100, showed a small advance in July to 154 as compared with 153 in June; 154 in May, and 163 in July, 1921. Goods produced, goods exported, producers' goods and consumers' goods advanced, while goods imported and raw materials were unchanged.

Professor Michell's revised index number of wholesale prices in Canada from 1919 to date, based on 40 articles, with prices during 1900 to 1909 as 100, again declined. The figure for September was 162.9 as compared with 164.7 in August; 165.3 in July, and 172.9 in September, 1921. Foods declined but manufactured goods advanced slightly.

The Canadian Bank of Commerce index numbers for imports and exports both declined in September, the former from 153.89 to 148.76 and the latter from 171.49 to 165.52. Exports fell chiefly because of declines in grain and livestock. The combined index for exports and imports stood at 157.14 in September and 162.69 in August.

The table of retail prices and rentals shows the prices at the beginning of September of over one hundred staple foodstuffs, groceries, coal, wood and coal oil, and the rent for six-roomed houses in some sixty cities throughout

Canada. All prices are for delivered goods. The exact quality, for which the quotation is given, is set forth in the case of each commodity and every effort has been made to ensure that the quotations in each case refer to the same class of commodity, in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except milk and bread, are the averages of quotations reported to the Department and to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. The prices of fuel and the rates for rent are reported by the correspondents of the LABOUR GAZETTE.

Statistics similar to these were published each month from 1910 to 1920, the figures during this period being secured at the middle of each month by the correspondents of the LABOUR GAZETTE resident in each locality from dealers who did a considerable business with workingmen's households. From 1910 to 1915 the table contained a list of only the twenty-nine foods included in the family budget, with laundry starch, coal, wood, coal oil and rent. In 1915, when monthly publication of the budget in the LABOUR GAZETTE was begun, it was decided to extend the list of foods to 40, and in 1920 the list of foods and groceries was still further extended to include over 100 items.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts, with good modern conveniences. The second class is of houses in fair condition less desirably located, but still fairly central, without modern conveniences.

The weekly budget of a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal

oil, and rent, these being the items for which statistics have been obtained each month and published in the LABOUR GAZETTE since January, 1910. The quantities of each commodity included are modifications of those employed in similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes, and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportion of expenditure on the various classes of foods tends to be maintained. At times when the price of an article heavily weighted for this purpose rises (or falls) abnormally the increase (or decrease) in food prices so indicated is exaggerated, and this should be taken into account in using the budget as an indicator of changes in the cost of living. In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. It was estimated, when the budget was first published in 1912, that these calculations represented from sixty to eighty per cent of the expenditure of an ordinary family, according to the total income. For the average family of five the expenditure on these items of food, fuel, light and rent would be perhaps two-thirds or about sixty-five per cent of the total income. While the budget serves to show the increase or decrease from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province. The quantities of meats, dairy products, cereals, etc., included were adopted as affording a liberal supply for the

healthy family of a man at hard physical work. On the other hand an average family with an income sufficient to do so would buy less meat, etc., but more fruits, fresh and canned vegetables, etc., so that the comparative expenditure would be little changed.

Retail Prices.

Meats again averaged lower at the beginning of September. Sirloin steak was down 1½c per pound averaging 30.2c. The decline was general in all provinces. Round steak showed about the same general decline as sirloin and averaged 25.1c per pound. Rib roast was also lower at 22.6c per pound as compared with 23.9c in August. Shoulder roast was down 1c per pound to 16.2c. Stewing beef showed a general decline, being down to 12.3c per pound. Veal fell from 18.7c in August to 18.4c in September, some localities showing advances which were offset by declines in others. Mutton averaged lower at 27.3c per pound, the decline being fairly general. Lamb also was slightly lower at 33.9c per pound and showed about the same general decline as mutton. Roast pork averaged 32c per pound in August and 31.1c in September, increases in Nova Scotia and New Brunswick being offset by declines in the other provinces. Pork chops were also down slightly in the average. Mess pork averaged 26.9c in September as compared with 27.2c in August. Bacon showed a general decline averaging 42.5c per pound. Boiled ham averaged about 1c per pound higher at 67.5c. In fresh fish, cod, haddock, halibut, and whitefish were higher while herring was unchanged. Salt cod, salt herring, and finnan haddie remained steady. Canned salmon, sockeye, was unchanged. Lard was slightly lower at 22.5c per pound.

Fresh eggs showed a small advance, averaging 35.8c per dozen as compared with 35c in August, 34c in July, and 33½c in June. The advance was general except in Ontario which averaged slightly lower. Milk was unchanged in

the average, increases in St. Hyacinthe and Trail being offset by declines in Fredericton, Kitchener, and Nelson. Dairy butter was slightly higher, while creamery butter was slightly lower. The former averaged 36.7c as compared with 35.7c in August, the increase being general except in British Columbia which was slightly lower. Creamery was down about $\frac{1}{2}$ c per pound to 42.8c. Cheese averaged slightly higher at 30.7c per pound, the increase being fairly general.

Bread averaged 6.9c in September as compared with 7c in August, being slightly lower in Nelson and higher in Trail. Soda biscuits were slightly lower. Spring wheat flour was down from 5.3c in August to 5.1c in September, the decline being general. Rolled oats and corn meal were steady. Barley was slightly lower and rice was unchanged. Canned tomatoes, peas, and corn were steady. Onions declined about $2\frac{1}{2}$ c per pound to 6.8c. Potatoes averaged \$1.44 in September per 90-pound bag as compared with \$1.75 in August. The decline was general. Evaporated apples were up about $\frac{1}{2}$ c per pound to 25c. Prunes were slightly higher and raisins slightly lower. Jam and canned fruits were practically unchanged. Marmalade was down $1\frac{1}{2}$ c to 83.3c per four-pound tin. Honey was also lower at \$1.17 per five-pound tin. Sugar showed a small advance to 9c per pound. Tea and coffee were unchanged.

Anthracite coal was up in the average but in many localities no quotations were available. Prices at Sherbrooke, Hull, Kitchener, Cobalt, Sault Ste-Marie, and Port Arthur were substantially higher. Bituminous coal was also higher in the average, all provinces showing some substantial increases. Hard wood, four feet long, was up from \$12.23 per cord in August to \$12.60 in September. Increases occurred in Fredericton, Montreal, Kingston, Peterborough, Toronto, St. Catharines, Fort William, and Winnipeg. Soft wood was up about 15c per cord in the average to \$9.53. Coal oil was un-

changed. Rentals were steady. For the regulation of prices in coal in Ontario see the article on the Termination of the United States Coal Strike on another page of this issue.

Wholesale Prices.

GRAINS AND FODDER.—Wheat, No. 1, Manitoba Northern, fell from \$1.08 per bushel in the last week in August to 97c in the last week in September. Ontario winter wheat at Toronto also declined, being quoted at about \$1.00 per bushel at the beginning of the month and 95c per bushel toward the end. Barley at Winnipeg which had been quoted at 55c per bushel at the end of August rose to 58c about the middle of September and later fell to 54c. Western oats declined from 46c per bushel to 43c. Ontario oats were unchanged at 33c-35c per bushel. American corn was steady at 79c per bushel. Flaxseed rose from \$1.90 per bushel at the end of August to \$2.11 about the middle of September and then fell to \$2.06 in the last week. Rye at Toronto fell from 70c per bushel to 67c. Hay at Montreal declined \$1. per ton to \$19. Straw, baled, at Toronto, fell from \$13. per ton to \$11. Bran and shorts declined about \$2. per ton, the former to \$21.25 per ton and the latter to \$23.25.

ANIMALS AND MEATS.—Western cattle at Winnipeg declined from \$5.75 per hundred pounds to \$5.50 while butcher steers at Toronto were steady at \$6.50-7.00 per hundred pounds. Beef, dresser, hindquarters, was steady at 12c-17c per pound, having declined toward the end of August to this figure from 17c-21c per pound. Hogs also declined from \$12.00 per hundred pounds to \$11.50 and dressed hogs from \$21. per hundred pounds to \$19. Hams fell from 28c per pound to 26c. Sheep and mutton were steady. Lamb was $1\frac{1}{2}$ c per pound lower at 22c.

DAIRY PRODUCTS. — Butter, finest creamery, advanced from 34c per pound to 35c. Dairy prints were unchanged.

(*) Preliminary figures. (†) Six commodities off the market, fruits, vegetables, etc. One line of spelter was dropped in 1915. (a) Number of commodities varies from month to month. (4) Revised.

Cheese, western, coloured, at Montreal, rose from 15½c per pound at the end of August to 17½c at the end of September. Fresh eggs at Montreal rose 2c per dozen to 42c. Milk at Montreal and Toronto was unchanged, but at Victoria advanced from 37c per gallon to 45c.

FISH.—Reports from Lunenburg indicated that the market for codfish was quiet as the spring catch was all disposed of and the summer catch was not yet available. In pickled fish the market for herring which had been very weak for some time with sales as low as \$5.00 per barrel, was reported to be further depressed by the new United States customs tariff of \$2. per barrel. The same duty is applied to mackerel, but because of the demand in the United States for this product it is reported that the market may not be seriously affected. In lobsters European demand was reported to have slackened due to high prices and unsettled business conditions but some improvement was expected.

FRUITS AND VEGETABLES. — Peaches which were quoted at 40c-\$1.00 per 11-quart basket at the last week in August fell to 30c-65c in the last week in September. Grapes came on the market at 75c-90c per six-quart basket but by the end of September were quoted at 40c-60c. Bananas, lemons, and oranges were steady at August levels. Potatoes at Toronto fell from \$1.50 per ninety pound bag to 75c. New Brunswick potatoes were quoted for the first time in the new season at Montreal at 80c per bag. Canned peas were down 10c per dozen tins to \$1.42 and tomatoes from \$1.80 to \$1.65.

MISCELLANEOUS FOODS.—Oatmeal fell from \$3.85 per 98 pound bag to \$3.75. Flour, Manitoba patents, was down \$1.00 per barrel at Toronto to \$6.90. Sugar was 50c per 100 pounds lower at \$7.39. Maple sugar advanced from 16c per pound to 28c.

TEXTILES.—Raw cotton was up from 20.85c per pound to 21.60c. Most lines of manufactured cottons were steady. Raw silk advanced from \$7.20 per pound to \$7.80.

HIDES, LEATHER, BOOTS AND SHOES.—Hides, steers' and cows', were up 1c per pound to 11c. Leather was steady. Boots were reported to be firm in view of the advancing prices of hides.

METAL AND IMPLEMENTS. — Pig iron rose from \$38.30 per ton in August to \$41.70 in September. Bar iron was up 15c per hundred pounds to \$3.40. Black sheets were up from \$4.80 per hundred pounds to \$5.30. Steel billets were unchanged. Antimony, copper, lead, and nickel were steady; quicksilver advanced from \$57 per seventy-five-pound flask to \$67. Bar silver was slightly lower at 69c per ounce. Axes advanced from \$15.00 per dozen to \$17.50.

FUEL AND LIGHTING. — Coal, bituminous, run of mines, at Montreal, was up 40c per ton to \$6.90. Connellsville coke which was quoted at \$14.50 per ton at the middle of August fell to about \$11.00 per ton toward the end and remained fairly steady at this level in September. Gasoline and coal oil were unchanged.

BUILDING MATERIALS. — Spruce deals at St. John were down \$2. per M to \$24. Oak, red, was down from \$130. per M to \$125. while birch advanced from \$48. per M to \$50. Cement showed a decline of 2c per barrel to \$2.68 at Toronto. Wire nails were up 25c per keg to \$3.75. Iron wire was also higher at \$3.80 per hundred pounds. Linseed oil declined from \$1.12 per gallon to 98c while turpentine advanced 10c per gallon to \$1.80. Shellac was slightly lower at \$4.60 per gallon. Putty was down \$5.95 per hundred pounds to \$4.45.

HOUSE FURNISHINGS.—Sad irons advanced from \$1.62 per set to \$1.81. No other changes were reported.

DRUGS AND CHEMICALS. — Alum was down slightly to $3\frac{1}{2}c$ per pound. Other lines were steady.

MISCELLANEOUS.—Muskrat skins were

10c higher at \$1.35-\$1.85 each. Malt was steady. Newsprint and pulp markets were reported to be firm but prices were unchanged. Raw rubber was down from $17\frac{3}{4}c$ per pound to 17c.

PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes and the accompanying tables give the latest information available as to the movement of prices in other countries as compared with Canada.

The index numbers of retail prices which are listed are from official sources unless otherwise stated. The authorities for the wholesale price index numbers are named in all cases.

Great Britain.

WHOLESALE PRICES.—The Board of Trade's index number of wholesale prices, calculated on the base prices in 1919=100, was at 159.1 for August, a decrease of 2.5 per cent from the revised index number for July, 163.2. This drop is due mainly to reductions in food prices, which fell on the average by over 5 per cent, while industrial materials fell 1 per cent. There were reductions in most cereals and in potatoes, apples and onions. Each group in industrial materials showed a decrease except "metals and minerals other than steel and iron," which showed an increase due mainly to the higher coal prices.

The *Economist* index number of wholesale prices at the end of August, calculated on the base prices in 1901-05=100, was 193.5, a decline of 3.2 per cent from the level of the previous month. This brings it slightly below the level at the end of February, 1922, and thus lower than any month since the middle of 1916. The change in the month under review is due chiefly to drops in wheat and oats and the seasonal decline in potatoes in the "cereals and meats" group, and to reductions in steel rails and iron bars and in lead in the "minerals" group.

The *Statist* index number, in continuation of Sauerbeck's figures, stood at 129.6 at August 31, a drop of 3.3 per cent from the level at July 31. That is the lowest figure since February, 1916, and is 51.3 per cent below the price peak of April, 1920. The decline during August was shared by all groups except textiles.

COST OF LIVING. — The Ministry of Labour index number of cost of living as at September 30 was 178, a decrease of one point from the level of the previous month. On the base prices in July, 1914=100, the group figures were: food, 172; rent, 152; clothing, 230; fuel and light, 185; sundries, 195.

Belgium.

WHOLESALE PRICES.—The index number of wholesale prices in Belgium, compiled by the Ministry of Industry and Labour, for July, showed an increase of 1 per cent on the June level. There were notable increases in resin products (13 per cent), hemp and jute (7 per cent), tar and products (6 per cent), and raw rubber (15 per cent). Several groups showed decreases of from 1 to 3 per cent and five groups showed no change.

France.

WHOLESALE PRICES. — The official number of wholesale prices, published by the *Statistique Générale* stood at 382.1 for August as compared with 375.8 for July, an increase of 1.7 per cent. While food products decreased .8 per cent, industrial materials increased 3.7 per cent, the largest increase being in textiles.

*For South Africa, Australia and New Zealand base is taken as 1000 instead of 100. a. Average for year. b. Quarter beginning in specified month. c. 230 commodities, 1890-1909; 272, 1910-1914; 271, 1915-1922. d. New index number is joined to old index number (38 commodities), and all converted to base 1913-100. e. The commodities in these two new index numbers are in the one case articles chiefly exported; in the other case, articles chiefly imported. f. First of month. g. Middle of month. h. End of month. j. Monthly average.

COST OF LIVING.—The *Quarterly Bulletin* of the *Statistique Générale* is now publishing quarterly figures compiled by the Commissions of Studies on the Cost of Living. These commissions came into being in November, 1920. The enquiries cover some twenty districts, and the cost of living budget, which is for a family of four, includes food, heat and light, lodging, clothing and sundries. The figures are published for the cities separately, the number of cities taken for each district varying from one to six.

On the base prices in 1914=100, the cost of living in Paris for the past three quarters as compiled by the Commission of Studies on the Cost of Living is as shown on the accompanying table.

Period	Food	Fuel and Light	Rent	Clothing	Sundries	All
4th quarter, 1921..	310	307	133	318	400	297
1st quarter, 1922..	301	302	140	312	400	291
2nd quarter, 1922..	316	287	160	315	400	302

Germany.

WHOLESALE PRICES. — The level of wholesale prices in Germany, as indicated by the index numbers of the Federal Statistical Office and the *Frankfurter Zeitung* moved upward with great rapidity during August. At August 15, the mark in dollars was less than one-half its average value for July, and by August 23, little more than one-third. The official index number shows that between the above dates imported goods (such as maize, rice, lard, skins and hides, cotton, copper and lead) on the base prices in 1913=1, rose from 257.4 to 405.6, an increase for ten days of 57.8 per cent. Articles mainly of German origin rose from 138.8 to 208.8, an increase of 50 per cent. Of the latter, grain rose more than three-fold, iron rose by 73 per cent, rolling mill products by 110 per cent, cattle and meat increased less, and there was a seasonal reduction in potatoes.

The *Frankfurter Zeitung* has altered its index number by changing the base period from 1920 to July, 1914, and including a new group of industrial finished products, thus increasing the number of commodities from 77 to 98. The index numbers of wholesale prices by groups for certain months in 1922 on the base prices in July, 1914=100 are given in the accompanying table. It will be noticed that the increase of all commodities for September is 107 per cent on August prices.

1922	Food	Textiles and leather	Minerals	Miscellaneous	Ind. products	All
January 1.....	3840	7168	5178	3149	3159	4238
April 1.....	6330	10585	8585	5238	4644	6722
July 1.....	6323	13938	12168	6881	6750	9140
August 1.....	13691	21910	18355	10993	8549	13935
September 1.....	29175	36398	42648	21605	19352	28919

COST OF LIVING.—The cost of living index number of the Federal Statistical Office, which includes food, heat and light and rent, was 7029 for August, a rise of 40.9 per cent on the figures 4990 of July. Foods rose 43 per cent, all foods except potatoes and other vegetables participating. Fuel and lighting were also much higher.

Switzerland.

COST OF LIVING.—The index number of retail prices of 47 articles (including foods, fuel and washing materials) published by the Union of Swiss Co-operative Societies, showed for September 1 very little change from its stand during the past few months. There was a decrease of .6 per cent in foods, and 1.3 per cent in the total. Thirty articles changed less than ½ per cent, or not at all; 6 showed an increase, and 10 a decrease; while sauerkraut was not quoted in the previous month. The largest increases are in veal and pork, and the largest decreases in honey and potatoes.

India.

COST OF LIVING.—The official index number of cost of living in Bombay, compiled by the Bombay Labour Office, on the base prices in July, 1914=100, was 164 for August, a decrease of one point from the July level. Foods fell one point, the chief decreases being in bajri, turdal and rice, while sugar rose considerably. There was a seasonal increase of 24 per cent in onions. Fuel and lighting and rent showed no change, and clothing dropped four points.

United States.

WHOLESALE PRICES.—The index number of wholesale prices compiled by the Federal Reserve Board, having as base prices in 1913=100, stood at 165 for August, thus showing no change on the whole from the July level. Raw materials rose 7 points, and consumers' goods fell 7 points.

Gibson's average index number of wholesale prices of 22 articles of food for September continued the slight decline begun during the previous month, dropping one-tenth of one per cent to 67.3. This brings the average for the first nine months of 1922 to 70.6, a lower figure than any yearly average since 1916.

Bradstreet's approximate index number of commodity prices as of October 1 stood at \$12.5039, a rise of 3.5 per cent over September 1, with every group participating in the rise, especially hides and leather. The index number at October 1 shows the greatest height since January, 1921.

Dun's index number of wholesale commodity quotations stood at \$172.479 at September 1, and at \$175.649 at October 1. This last increase brings it to the highest point in a year and a half. The increase for the month under review is one of 1.8 per cent, and is shared by all groups except "other food" and clothing, in which there were declines in sugar and raw cotton which offset advances in other commodities.

COST OF LIVING.—The index number for the cost of living in Massachusetts for the months of July and August, on the base prices in 1913=100, were 156.2 and 155.3 respectively. Food, 137.2 and 136.3; clothing, 176.1 and 174.9; shelter, 162.0 in both months; fuel, 172.0 and 172.9; and sundries, 174.0 and 172.0. Thus the levels of food, clothing and sundries were slightly lower in August than in July. Fuel rose .5 per cent, and shelter was slightly below the level for June.

RECENT LEGAL DECISIONS AFFECTING LABOUR

BOTH the legal decisions summarized below have reference to Workmen's Compensation in Quebec, the first having to do with an attempt to seize compen-

sation money before it was paid over to the injured workman, and the second dealing with right to compensation of a workman injured in a foreign country.

Compensation money under Quebec Workmen's Compensation Act is exempt from seizure, and a privilege upon it cannot be created by contract.

In an action arising out of a Workmen's Compensation case in the province of Quebec an attorney sued the injured workman, his client, claiming the right to seize the sum of \$250 out of the compensation money which was due to the workman under a judgment, but was still in the hands of his former

employer against whom he had obtained judgment. The attorney based his claim on an agreement which his client had signed giving him a "privilege" upon the sum of \$250 in the event of the action for compensation being successful. In the Superior Court the claim of the attorney was upheld, and he was

granted a "conservatory attachment" enabling him to seize \$250 out of the unpaid compensation money. The workman appealed against this seizure and the case was heard in the Court of King's Bench.

In the opinion of the Court it was held that a privilege could be derived from the law alone, and could not be created by contract. "It would be disastrous should a debtor be allowed to create a privilege by private agreement. . . . Moreover all compensation allowed under the Workmen's Compensation Act is inalienable and exempt from seizure." The memorandum of settlement upon which the plaintiff relied was worthless in so far as it sought

to create in favour of the plaintiff a privilege upon the moneys to be paid for compensation under the Act. For these reasons the appeal of the defendant was maintained with costs against the plaintiff and the judgment of the Superior Court was reversed in so far as the conservatory attachment was concerned, the attachment being declared null and void, but the said judgment was sustained in so far as it condemned the defendant to pay the plaintiff the sum of \$250 with interest from November 3, 1920, and costs for a simple action for the recovery of this sum.

(*Quebec—Kouri vs. Ferguson and Canada Maple Exchange Limited*).

Seaman injured on Quebec ship in foreign waters is entitled to benefit of Quebec Workmen's Compensation Law.

A sailor domiciled in Quebec was employed on a barge belonging to a company which had its headquarters in the province of Quebec. The vessel was engaged in exporting fish from Quebec to New York state. While the barge was being moved to a wharf in that state, the sailor became caught in the coils of a mooring cable which was paid out so quickly that it cut off his foot. He brought an action against his employer in the Superior Court of Quebec under the Workmen's Compensation Act, claiming \$1,623.36 compensation for permanent partial incapacity with wages for period of total incapacity and expenses. The employer opposed this claim on the ground that the accident having taken place in the state of New York the plaintiff had no legal recourse under the Workmen's Compensation law. It was held by the Court that the employer's plea could not be maintained

at law. In the case of an industrial accident the Court declared that it is the law of the place of origin of the undertaking which prevails, when the workman engaged in the province of Quebec performs his work in a foreign country. It is necessary that a ship resort to a single legislative authority, and it is with this view that it is agreed in international law that in virtue of the theory of extra territoriality, a vessel, wherever it is and its crew, at least with regard to their civil rights, remain subject to the laws of the country where it is registered.

For these reasons the Court maintained the action of the plaintiff and awarded him the sum of \$2,051.85 with interest and costs.

THE LABOUR GAZETTE

Prepared and edited in the Department of Labour, Ottawa

MINISTER—THE HONOURABLE JAMES MURDOCK

DEPUTY MINISTER—F. A. ACLAND.

Volume 22

NOVEMBER, 1922

Number 11.

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

**This issue
in brief**

In addition to the regular monthly articles on various subjects, this issue contains also various statistical articles respecting employment conditions during the quarter ended September 30. Among the items of general interest might be mentioned articles and notes relating to the activities of the League of Nations and the International Labour Office.

At the beginning of October the percentage of unemployment among the members of local trade unions stood at 2.8, as compared with 3.6 at the beginning of September, and with 8.5 at the commencement of October, 1921. The volume of employment as indicated by returns tabulated from over 6,200 concerns showed a further increase during September, and the situation continued to compare favourably with that reported during the same month last year.

The average cost of the weekly family budget of 29 staple foods was \$10.23 at the beginning of October, as compared with \$10.28 at the beginning of September; \$11.48 for October last year; \$15.83 for October, 1920; and \$7.99 for October, 1914. The cost of the weekly family food, fuel and rent budget was \$20.86 for October, as compared with \$20.90 for September; \$20.00 for October, 1921; \$26.46 for October, 1920; and \$17.47 for October,

1914. In wholesale prices the index number stood at 219.8 for October, as compared with 220.5 for September; 229.2 for October last year; 317.6 for October, 1920; and 138.7 for October, 1914.

The time loss due to industrial disputes was less during October than during the previous month, but greater than during October, 1921. There were in existence during the month 17 strikes involving about 3,229 workpeople with an estimated time loss of about 54,502 working days. The time loss in the previous month amounted to about 91,900 working days. Two of the strikes were reported as having commenced during October. Two of the strikes commencing prior to October and the two strikes commencing during October terminated during the month, leaving 13 strikes involving about 2,013 workpeople on record at the beginning of November.

**Proceedings
under the
Industrial
Disputes
Investigation
Act, 1907.**

During October the Department received reports of two Boards of Conciliation and Investigation established to deal with disputes between (1) the Canadian National Railways and certain of their employees, being clerks, freight handlers, etc.; and (2) the Canadian Pacific Railway Com-

pany and certain of its employees, being clerks, checkers, freight handlers, etc., members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees.

During the month one application was received with respect to the establishment of a Board.

Jottings.

The International Labour Office (League of Nations) has issued the second annual edition of the International Labour Directory for 1922. The volume contains information regarding over 1,800 employers' associations, 2,300 workers' organizations, 600 intellectual workers' associations, 45 ex-service men's groups, 450 co-operative societies, and about 40 miscellaneous international bodies. It also contains a short account of the International Labour Organization and a list of Government departments of the world which deal with labour and industry.

The Canadian Colonization Association was incorporated by letters patent during October with headquarters at Winnipeg. Its purposes are in part to assist in the settlement of vacant lands of Canada; to give advice and direction to settlers entering or now located in Canada; to in a measure direct inter-provincial colonization, and to assist in carrying on activities of national development. The programme of the Association was outlined in the last issue of the LABOUR GAZETTE.

By recent order-in-council of the Quebec Government, "in view of the industrial depression now prevailing, which makes itself felt in the asbestos industry by lower prices of asbestos and a weaker demand for this substance", the royalty of 5 per cent, which was imposed in 1920 on the gross value of the asbestos produced and sold at the shipping point, was withdrawn, and a royalty of $2\frac{1}{2}$ per cent was imposed on the gross value

of the asbestos produced by the mines and mills of the Province between January 1, 1922 and January 1, 1924.

Amendments to the Minimum Wage Act of British Columbia have been suggested to the Provincial Government by the British Columbia division of the Canadian Manufacturers' Association. These were, first, that the Board should consist of five instead of three members, namely, the deputy minister of labour as chairman, two bona fide employers of female labour, and two bona fide female employees; second, that the Board should reconsider any order on the motion of two of its members; and third, that the Board be authorized to grant licenses to employers to pay apprentices' wages to adult apprentices, and to regulate the number of apprentices allowed in the various trades. A strong protest against these proposals was subsequently made by a Labour delegation.

Under the Mothers' Pensions Act of British Columbia assistance was provided, during the administrative year ending in September 1922, for 771 mothers and 1,979 children, the total disbursements amounting to \$331,366.

Employers in Alberta in those industries which are outside the scope of the Workmen's Compensation Act have been requested to report to the Provincial Commissioner of Labour on all industrial accidents to their employees. As accidents in industries under the Act are already being reported through the Workmen's Compensation Board to the Commissioner, he will now have a fuller record of industrial accidents in the Province.

Three fatal accidents occurred within a few days recently at Toronto as the result of defective hoisting equipment on construction work. The Coroner's jury in one case made a recommendation that all cables and hoisting equipment be properly inspected. The local Building Trades Council also took up the question of

securing legislation to make such inspection compulsory.

The Vancouver Laundrymen's Association made a complaint before the City Police Commission during October as to the unfair competition to which their industry was subjected through the non-observance by Chinese laundrymen of the requirements of the Provincial Factory Act. It was alleged that although the Act prohibited night work, and limited the working week to 48 hours, the Chinese worked in some cases up to 100 hours a week not observing Sundays and holidays.

The Board of Police Commissioners of Victoria, B.C., recently refused to assume responsibility for the enforcement of the Provincial Lord's Day Act in regard to the closing of stores in the city on Sunday, on the ground that the general question of its enforcement was a matter of Provincial policy.

The Government of the Argentine Republic has introduced a Bill for the establishment of a Department of Labour. The functions of the Department will be to collect information concerning economics and social questions, to investigate conditions of labour, to compile statistics on labour questions, to draft labour laws and to enforce their observance, to institute committees to give free legal advice to workers and committees to settle disputes between landlords and tenants, and to issue a free monthly bulletin.

At the last session of the Japanese parliament an Act was passed providing for the collection of statistical information. This act empowers the Government of Japan to make investigations concerning labour. Among other measures passed during the session, was an act concerning employment exchanges for seamen.

New headquarters for the International Labour Office Steps are being taken to erect a building to house the International Labour Office which is at present occupy-

ing unsuitable quarters in the suburbs of Geneva. The Government of Switzerland has generously presented a site for this building on the lake front in the heart of Geneva, and the Assembly of the League of Nations has voted the necessary credit divided over a number of years for the cost of erection. An international committee will be appointed to decide upon the plans to be adopted. The Committee of the Assembly which had this matter in hand proposed that each member of the League of Nations should contribute to the construction of the building by sending in agreement with the architect, building material, ornaments and works of art representing the purest specimens of its national products. In this connection Mr. Adatchi, representative of the Japanese government made a declaration to the effect that his Government would no doubt contribute toward the decoration of the new office in a manner worthy both of Japan and of the International Labour Office. It is suggested that this may be the first of a series of similar offers on the parts of the various Governments, members of the International Labour Organization, to decorate certain rooms or suites in the new building.

Anthrax Advisory Committee, International Labour Office

At the Third International Labour Conference (League of Nations) which was held in Geneva in October, 1921, the subject of the disinfection of export wool as a preventive against anthrax was referred for further consideration to an advisory committee to be appointed by the Governing Body of the International Labour Office. The following countries were invited to nominate representatives on the Advisory Com-

mittee: Australia, Belgium, France, Germany, Great Britain, India, Italy, Japan, South Africa, Spain, Sweden, and the United States of America. The British Government was asked to name the chairman of the committee, and proposed Sir William Middlebrook, M.P. for that office. The president of the United States has approved the designation of Dr. Marion Dorset, Chief of the Bio-Chemic Division of the Bureau of Animal Industry to co-operate in an official consultative capacity with the Anthrax Advisory Committee. The date of the convening of the committee has been fixed for December 5, and it will meet in Geneva, Switzerland.

**Savings
scheme of
Ontario
Government**

The Province of Ontario Savings Bank, the institution of which under the Agricultural Development Finance Act of 1921 was noted in the LABOUR GAZETTE for July, had at the middle of November opened thirteen branches, the first having been opened at Toronto in March of the present year, and the latest at Ottawa in November. An Assured Savings Department is incorporated with the bank, enabling depositors to carry life insurance without any additional outlay. The bank accepts savings accounts with a dollar or upwards at 4 per cent interest compounded half-yearly. The working of the scheme is explained in an official notice as follows:

"The plan is a combination of a savings account in the bank drawing 4 per cent interest, and a life insurance policy in a life insurance company registered by the insurance department to write life insurance in Ontario. The plan is distinctly simple and sure in operation and absolutely safe. To give an illustration; suppose a man, 35 years of age, wants to save \$1,000 in ten years. He opens an account with the Province of Ontario Bank with a deposit of \$9.19 and agrees to

pay this same amount each month regularly for 120 months. At the end of this time if he is still alive, he receives \$1,000 in cash. But if he should die at any time after he has been accepted by the insurance company, his beneficiary will be paid \$1,000, the amount he intended to save plus the amount he already has saved. If he died during the tenth year, his beneficiary would receive about \$2,000, where he intended only to save \$1,000.

"The plan is open to anyone between the ages of 15 and 65, who is able to meet the medical requirements of the insurance company. The monthly deposit, of course, varies with the age at which one opens an account. At the age of fifteen, the monthly deposit is \$8.24 per month, and at the age of 65, it is \$14.52. Besides the amount saved during the ten years and the accumulated interest, there is a small cash surrender value and some profits.

"Outside of this scheme, the bank proposes to do a general banking business. Money derived from the various channels of the business will be used solely in developing natural resources and promoting agriculture, and may not be employed outside of the Province of Ontario. In this way, the Government hopes to reduce the cost of provincial financing without the necessity of floating loans in foreign countries."

**New Town
Planning bill
proposed for
Ontario**

About sixty delegates, representative of municipal councils, planning commissions, housing commissions, labour, veteran and social service bodies, and architectural and town planning organizations, attended the third convention of the Ontario Town Planning and Housing Association in Toronto on October 17 and 18. The principal business of the convention was the passing of several resolutions outlining principles to be embodied in a draft bill to be presented to a special

committee of the Ontario legislature, to take the place of the present Planning and Development Act. Among the resolutions it was decided that "housing is a municipal responsibility" it being explained that this meant that the initiative in all housing schemes should, and must, rest with the municipality, but that it did not absolve the Provincial Government from aiding the municipality in the provision of capital. It was also decided that a Provincial Bureau of Town Planning and Housing should be established, the executive head of which should have the status of a deputy minister; that all schemes should be approved by the Ontario Railway and Municipal Board, and varied only by the consent of that Board, and that before any scheme should be adopted public hearings should be held by and any appeals made to the Board. It was proposed to have two classes of town planning commissions, one class to function in individual municipalities and the other in "metropolitan" areas which include more than one municipality; that these commissions should, on their own initiative, have planning and advisory powers only, but that they could be requested to carry out any work on the initiative of the municipality. As a means of raising funds for the operating expenses of the commissions, it was decided that there should be a maximum levy of one-tenth of a mill on the rateable assessment of the municipality involved. Another resolution adopted asked for the enactment of a provincial housing code establishing minimum housing standards.

At the close of the convention a draft bill embodying the principles outlined was duly laid before the Town Planning committee of the Legislature.

The Association elected the following officers:—President, J. P. Hynes, Toronto, (re-elected); vice-presidents, T. S. Morris, Hamilton; W. W. Hiltz,

Toronto; T. J. Murphy, London; E. D. Lowe, Ottawa; secretary, W. S. B. Armstrong, Toronto; treasurer, Gordon Phillip, London.

Superannuation schemes for Policemen and Firemen in Quebec

A new pension scheme for policemen and firemen was recently adopted by the City Council of Westmount, Quebec. A pension fund commission is established, composed of the mayor, the commissioner of finance, the commissioner of police and fire, the chiefs of the police and fire departments, together with two additional members, one appointed by the city council, and the other representing the police and fire departments. The pension fund to be administered by this commission is made up of contributions from the employees and from the city. The city will pay the sum of \$1700 per year for a period of 20 years, and will also pay monthly to the fund an additional sum equal to $1\frac{5}{6}$ per cent of the salaries payable to the firemen and policemen. The employees' contributions equal seven per cent of their salaries, to be deducted from every monthly payment. Besides these sources the fund also benefits from "gratuities" received from time to time by or for the Police and Fire Departments or by any employee or other person on behalf of these departments by way of donations; and to its credit stands also the amount in reserve from the earlier pension scheme which has been in existence since 1916, amounting to \$40,541. The benefits received by employees under the scheme are as follows: After 25 years of service, on reaching the age of 50 years, an employee will receive an allowance equal to one-third of his average salary for the previous five years. After 30 years of service, on reaching the age of 55 years he will receive a pension equal to one-half of his average salary for the same period. The heirs of any employee who has been killed in the

performance of his duties will receive the sum of all the deductions made from the salary of the deceased, together with his proportion of the city's contribution, and of the gratuities received by the fund, with interest compounded annually at 5 per cent, the amount so paid to be not less than \$1,000. The heirs of an employee dying from other causes, will receive the amount contributed by the deceased with interest. For permanent incapacity an employee who has served 10 years or more will receive a pension of one-third of his average salary for the past five years of service; one who has served five years, but less than ten years, receives one-quarter; while an employee with less than five years of service receives back all his contributions, with interest, together with the City's contribution, and the gratuities received by the fund. An employee who is incapacitated by illness after 10 years' service receives a refund and also a share of the city's contribution with interest at 5 per cent; or if he has served less than 10 years he will receive a refund, but not the city's contribution.

Montreal has made similar provisions for the superannuation of its policemen and firemen, and a pension scheme which would provide for all civic employees is reported to be now under consideration by the Montreal City Council. Preliminary steps, have also been taken towards organizing a system of group insurance and superannuation for fire and police employees in the Province of Quebec outside the cities of Montreal and Westmount. A meeting of representatives of employees of the smaller municipalities was recently held in Montreal, and a committee was formed to further the movement.

Legislative programme of Labour in Quebec

Shortly before the opening of the present session of the Legislative Assembly of the Province of Quebec a delegation from the National and Catholic unions submitted to Premier Taschereau a program of legislation which it was hoped would be considered by the Legislature. The proposals were stated to be as follows: 1. Compulsory diplomas for barbers and plumbers; 2. Installation of first-aid apparatus in industrial establishments; 3. Indemnities for certain diseases contracted while employed on certain work; 4. Amendments to the Galipeault arbitration law to oblige parties to abide by decisions rendered; 5. The appointment of special officers to prepare a scale of fair wages; 6. Creation of scholarships for technical schools; 7. Interdiction of admission of children under 18 years of age to moving pictures; 9. General authorization for municipalities to pass by-laws, closing stores at 6 p. m.; 10. To forbid the holding of circuses and midways at agricultural exhibitions; 11. Creation of co-operatives; 12. Housekeeping courses; 13. Appointment of more inspectors to report on the competency of stationary engineers; 14. To oblige stationary engineers to have certificates of competency; 15. To set at 50 hours per week the number of hours of work for women and children employed in the textile industry; 16. To encourage sanitary plumbing, the unions ask that all plumbers shall hold a certificate of competency; 17. Regulations regarding sanitary plumbing.

A delegation of the Quebec Provincial Executive of the Trades and Labour Congress of Canada recently submitted to the Government of Quebec requests for legislation on the following subjects: (1) Health regulations regarding the removal of old wallpaper, the denaturing of wood alcohol used in paint and varnish, and the abolition of paint spraying ma-

chines; (2) Regulation of barber shops and compulsory examination of barbers. (3) Insertion of a fair wage clause in all Government contracts and in contracts subsidized by the government. (4) Legislation to give effect to draft conventions of the International Labour Conference respecting the eight-hour day, employment of women and night work of women and children. (5) The establishment of minimum wages for women, and mothers' allowances. (6) Establishment of advance polls in elections for railwaymen and travellers. (7) Amendment of the Workmen's Compensation Act based on state insurance with a commissioner to administer the Act. (8) Establishment of the double platoon system for firemen. (9) Amendments to the law regarding municipal strikes and lockouts. (10) Making election days legal holidays, and the adoption of proportional representation in provincial elections.

Legislative programme of Winnipeg Trades and Labour Council

During October the Winnipeg Trades and Labour Council submitted a legislative programme to the Government of Manitoba for their consideration. Among the suggestions were: An increase from 14 years to 16 years in the age at which children may leave school; amendments to the Workmen's Compensation Act increasing widows' pensions from \$30 to \$60 a month, and allowances for orphans under 16 years from \$7.50 to \$12, and increasing the compensation allowed for total disability; the further application of the Mothers' Allowance Act under powers already vested in the commissioners so as to include a mother with one child and a mother whose husband is unable to support a family. (The rules and regulations hitherto issued provide allowances only to widows with two or more children, and families in which the father is in an insane asylum); the adoption of a Trades Dispute Act

similar to the act now in force in Great Britain, which permits peaceful picketing during strikes; and the adoption of a rule that all printing authorized by the Provincial Government shall bear the union label.

Personnel of United States Coal Commission

On October 10, the president of the United States announced the names of the members of the Commission which he had appointed to investigate problems in connection with the coal industry, as provided in the Act recently passed by Congress which was outlined in the October issue of the LABOUR GAZETTE. The personnel of the Commission is as follows: John Hays Hammond, mining engineer; Thomas Riley Marshall, formerly vice-president of the United States; Judge Samuel Alschuler, of the United States Circuit Court; Clark Howell, editor of the Atlanta Constitution; George Otis Smith, Director of the United States Geological Survey; Dr. Edward T. Devine, formerly editor of the Survey and secretary of the Charity Organization Society of New York; and Charles P. Neill, manager of the Bureau of Information of the South-eastern Railways and formerly United States Commissioner of Labour.

The Workers' Educational Association in Great Britain

The Annual Report of the Workers' Educational Association of Great Britain for the year ended May 31, 1922, shows continued progress notwithstanding the industrial depression which prevented many students joining the classes and caused others to withdraw. Compared with the previous year the number of affiliated societies increased from 2,760 to 7,798 and the number of individual members from 20,703 to 26,000, the number of tutorial classes, providing three-year courses of university standard increased from 229 to 338, and the number of one-year classes rose from 326 to 635 with an increase in the number

of students from 7,118 to 16,359. The Workers' Educational Trade Union Committee established on a joint basis by the Iron and Steel Trades Confederation and the Workers' Educational Association was joined during the year by the Union of Post Office Workers, and the Railway Clerks' Association. The Association of Engineering and Shipbuilding Draughtsmen also decided to join this committee. Summer schools were held in a number of places varying in length from a week-end to several weeks. In the schools and classes industrial and economic subjects were the most popular, though an increasing interest was shown in literature, psychology, philosophy, music and biology.

**Joint Board
of Sanitary
Control of
New York**

The Joint Board of Sanitary Control of New York, which was established in 1910, recently issued its eleventh annual report. This Board, composed of representatives of employers, workers and the general public, has jurisdiction over about 3,727 workshops and about 85,000 workers in the Cloak, Skirt and Dress and Waist trades. It was established under an agreement between the employers, and the workers after a disastrous fire in a clothing factory had shown the need of such an organization. The Board employs a staff of inspectors who visit all the factories in their jurisdiction and report on their condition as regards safety and health, with a view to their improvement. The report of the Board shows that great progress has been made in the improvement of shop conditions. The eleventh annual re-inspection showed that only 13.2 per cent of the shops were defective to-day, while the first inspection, in 1911, showed that practically 90 per cent of the shops revealed serious defects. New shops which represent ten or fifteen per cent

of the total number are found to have the most flagrant defects owing to the employers' ignorance of the accepted standards of sanitation and fire protection. The inspectors of the Joint Board are constantly in touch with the workers. If shop defects are due to the workers, the inspector explains to the shop chairman or to the workers themselves how and why the defects should be rectified. Noon talks on health, sanitation, etc., are given by the Educational Supervisors of the Joint Board or by the inspectors. Two years ago a Health School was started as an experiment. During the first year courses were given in first aid, shop sanitation and problems affecting the workers' health. In the second year other courses were added such as anatomy and embryology. Once a week lectures were given by prominent physicians and specialists illustrated with moving pictures and lantern slides, on subjects relating to health. Facilities are also given for asking questions on health matters which are answered either after a lecture or on special evenings.

The question of proper seats for employees is being taken up. A preliminary survey of fifteen representative shops showed the need of an intensive survey of this subject, and it was planned to take it up at the next annual inspection. It was found that no attention had ever been paid to seats although industrial physicians have shown that improper seating is most conducive to fatigue and irritability. In 1914, the Joint Board of Sanitary Control established a medical clinic for workers on its own premises, and later on a dental clinic. When the work became greatly extended the trade unions took charge of it and later all strictly medical activities were organized as the Union Health Centre. In 1921 more than 15,000 patients were treated.

**British Trade
Unions and
Unemployment
Insurance**

At the British Trade Union Congress held at Portsmouth in September 1920, a resolution was passed de-

manding that each industry should be made responsible for its unemployed workers assuring them an income while out of work amounting to 85 per cent of their regular wages. An inquiry among the trade unions as to whether they were in favour of unemployment insurance by industries was recently conducted by the National Joint Council representing the General Council of the Trades Union Congress, the executive committee of the Labour Party, and the Parliamentary Labour Party. The results of the enquiry which have been published in a pamphlet entitled "Unemployment Insurance by Industry," showed that opinions were divided on this question, forty-three unions with a membership of 1,252,000 declared themselves in favour of unemployment insurance by industry, while twenty-one unions with 2,670,000 were opposed to it, and seventeen unions with 978,900 members were non-committal. The Joint Council accordingly recommended the adoption of the following policy:

1. That a State scheme should be combined as far as possible with provision for insurance by industry.

2. That the State should provide the increased contributions which it is anticipated will be necessary under the State general insurance scheme, as it is to be expected that trades with little unemployment will wish to contract out of the State scheme, which will thus be left with the industries with more than the average unemployment.

If contributions from the workers are considered necessary in the State scheme, an attempt should be made to reduce them, since such contributions, plus the expenditures of trade unions on out-of-work pay, represent in the aggregate a very considerable drain on working-class resources to meet an evil for which labour is not responsible and which is largely the result of defective industrial organization.

3. In schemes for insurance by industry the question of workpeople's contributions need not arise, as the expenditure involved in a scheme of insurance by industry would become part of the cost of production. As the State cannot divest itself entirely of responsibility for unemployment, it is right that it should make a contribution to the insurance fund of an industry, though its contribution would not be on the same scale as that paid to the State Insurance Fund. Contracting-out schemes should include measures for the reduction of unemployment.

GENERAL REVIEW OF THE INDUSTRIAL SITUATION.

The Labour Market, Strikes, Prices.

The Labour Market.

EMPLOYMENT during September as indicated by the firms making returns showed continued expansion and was again in greater volume than in the same period of last year. Trade unions reported a further slight decline in unemployment and the number out of work was very much smaller than in September 1921. The business transacted by the offices of the Employment Service showed a decrease, representing largely reaction from the harvest demands. The number of vacancies notified steadily declined during the month, while the applications for work and placements made showed slight recovery towards the latter part of September.

EMPLOYERS' REPORTS

As indicated above, employment as reported by some 6,200 firms experienced a further upward movement during September, the gains, however, still being on a moderate scale. The situation continued to compare favourably with that recorded during September of last year, when increased activity over the preceding month had also been shown. All provinces except British Columbia registered improvement in conditions, the gains in Ontario being the most extensive. In the former province however, reductions in personnel were noted. The level of employment in every province except the Maritimes was higher than in September 1921.

The largest increases in employment reported during September occurred in highway construction, in which over 3,000 men were additionally employed, mainly in Ontario. In the Sydney district in Nova Scotia however, a considerable number of em-

ployees were released from road work during the month. Further expansion of a seasonal character was recorded in logging camps, chiefly in Ontario. Less extensive gains were also reported in Quebec and the other provinces. In Ontario the improvement was especially pronounced in the Blind River, Thessalon, Haileybury, Tionaga, and Upper Ottawa districts. In the province of Quebec the largest increases in personnel occurred at Chicoutimi, St. Gabriel de Brandon, Nouvelle, and Louiseville. Considerable recovery from earlier losses was recorded in the textile industries, especially in garment, hosiery and knitting mills. Headwear concerns also were busier, but the production of thread, yarn and cloth showed a falling off. The increases in personnel made by garment manufacturers were especially large in Ontario, at Toronto, Kitchener and Hamilton, while the most pronounced recovery in knitting mills occurred also in the same province at Almonte, Carleton Place, Hamilton, Toronto and Woodstock. A more favourable situation was indicated by silk factories at Brantford and St. Catharines, Ont., but cotton mills at Sherbrooke and Valleyfield, Que., reported reductions in working forces. Employment in the thread, yarn and cloth division also declined at St. John, N. B. Activity attendant upon the movement of grain in the Prairie Provinces caused considerable increases in staff to be recorded in railway operation. The Canadian Pacific Railway enlarged its operation staffs by nearly 1,300 persons, the Canadian National Railways added over 800 men to their payroll, while the Grand Trunk Railway reported the addition of more than 100 workers. Railway operation in Manitoba absorbed more

than 1,100 additional employees, while the gains in the other Prairie provinces were on a much smaller scale, as were also those in Ontario and Quebec. Employment in the coal mines during September was in greater volume than during any other period of this year, nearly 1,900 men having been added to the staffs of the operators making returns. Both eastern and western coal fields shared in the expansion, but the gains in Alberta were much the largest. In Nova Scotia the greatest improvement was shown at Stellarton. The Aerial, Big Valley, Drumheller, Rosedale and Mountain Park districts reported the most noteworthy gains in Alberta. Almost all the additions to staffs in British Columbia occurred in the Fernie coal fields. The extension of operations on the Toronto municipal electric railway caused large increases in employment to be indicated in the street railway and cartage industries. Chocolate and confectionery plants reported the resumption of seasonal activity, adding a substantial number of workers to their staffs during September. Expansion was also recorded in flour and cereal mills and in biscuit factories. On the other hand fruit and vegetable preserving plants were considerably slacker than in August. An analysis of the returns by provinces shows that in Nova Scotia confectionery concerns at Halifax and evaporating plants at Windsor were more fully engaged than in August. In New Brunswick, confectionery concerns at St. John and St. Stephens were busier, but the production of sugar in the former centre eased off to some extent. Montreal biscuit and chocolate manufacturers registered decided improvement. In Ontario, reductions in personnel were reported in canning factories at Bloomfield, Dunville and Delhi, but the declines were slightly more than offset by increases in activity in chocolate and confectionery works at Toronto and other centres. Flour mills at Fort Colborne also were busier.

Fruit and vegetable canneries in British Columbia recorded seasonal curtailment of operations especially at Kelowna. Retail stores reported a decidedly more favourable situation, particularly in Montreal. General increases also occurred in other centres throughout the country. Building contractors continued to indicate increased activity, especially in Quebec and Ontario. In the latter province large gains were recorded at Brantford, Hamilton and Toronto. In Quebec, Montreal firms registered practically all of the increase. Some expansion also was evidenced in Winnipeg, Man. Rubber factories, in which lowered activity was indicated during July and August, reported some recovery during September chiefly in Quebec. In Ontario, on the other hand, the tendency continued unfavourable. Rubber footwear factories at St. Jerome and Granby in the former province registered marked improvement. The production of elastic goods and tires at Kitchener and Toronto in Ontario declined. General expansion was recorded by manufacturers of musical instruments, principally in Ontario and particularly at Oshawa and Toronto. The mining of metallic ores in Ontario and British Columbia showed some expansion. In the former province, gold mines at South Porcupine and Schumacher and nickel concerns at Copper Cliff and Conniston were busier. Copper, gold, silver and zinc mines at Trail and other centres in British Columbia reported improvement while gold mines at Stewart also registered increased activity. Printing and publishing establishments generally showed a more favourable situation and the production of paper goods increased. On the other hand, pulp and paper mills were slacker. Manufacturers of paper products at Toronto and Thorold showed the largest gains. The production of pulp and paper at Murray, N.S., Three Rivers and Chicoutimi, Que., and Ottawa, Ont., declined to some extent. Additions to staffs on

a somewhat smaller scale than in the groups mentioned above occurred also in leather, boot and shoe, electrical apparatus, petroleum, gas and cyanamid concerns and in wholesale trade establishments, the gains taking place chiefly in Ontario and Quebec.

The most pronounced contractions in employment were again reported in railway construction and maintenance, from which nearly 3,700 men were released. The decreases were general throughout the country, but the heaviest losses occurred in Quebec and Saskatchewan. The Canadian Pacific Railway recorded especially large losses in personnel, having let out nearly 3,000 workers. Reductions in employment affecting over 500 men were registered by the Canadian National Railways, while the Grand Trunk Railway increased its working force by more than 100 employees. Seasonal declines on a large scale occurred in saw mills during September. Concerns in the lumber and its products group recorded decreases in staff of approximately 3,400 workers. The reductions were general throughout the country. In New Brunswick especially sharp contractions were reported at Campbellton, Dalhousie, Bathurst and Newcastle. The Restigouche, St. Pâcome, Charlemagne, Price, St. Anne des Monts, Cabano and Ste. Marguerite districts in Quebec registered important curtailment of operations. In Ontario, the Ottawa, Spragge, Rainy River and Midland districts suffered most severely. Large losses in employment were recorded at The Pas and Bowsman, Man. In British Columbia considerable reductions in personnel were indicated at Vancouver, Waldo and Wardner. In the iron and steel group pronounced contractions were noted in automobile factories, particularly at Ford, Ont. Decreases in staff were also reported in shipyards, particularly in Vancouver, B.C. On the other hand, conditions in the crude, rolled and forged division and in heating appliances, iron and steel

fabrication, small hardware, weighing and measuring instrument works showed improvement. Rolling mills at Sydney, N.S., registered considerable recovery from the losses recorded during August and steel plants in Montreal, Que., also were much busier, but at Sault Ste. Marie, Ont., the rolling mills were very much slacker. The production of agricultural implements also showed fair improvement mainly at Hamilton. The railway car shops in the Prairie Provinces were decidedly busier. Shipping and stevedoring afforded considerably less employment during September than in August, chiefly in Montreal. In the other provinces the situation on the whole showed very little change. The closing of summer hotels released over 500 employees principally in Alberta, but also in New Brunswick, Quebec, Ontario and British Columbia. In the edible animal products group reductions in payroll in fish canneries and dairies were partly counterbalanced by expansion in abattoirs and meat packing establishments. The loss in the fish group was reported almost wholly in the salmon industry in British Columbia, the declines at Wales Island, Knight Inlet, Mill and Alert Bays being especially large. Some increases in personnel were registered in fish canneries at Port Hawkesbury and Canso, N.S. The largest increases made by meat packers occurred in Toronto and Winnipeg. Can factories at Vancouver and copper smelters and refineries at Anyox, B.C., displayed considerable inactivity. Glass factories in Montreal, tile and brick concerns at Ascot and brick works at Delson and La Prairie, Que., reported curtailment of operations. Glass factories in Ontario also were slacker especially at Wallaceburg. The production of kodaks at Toronto eased off to a considerable extent.

The general situation during the month under review was better than in September of last year, improvement being recorded in a large number

of groups. This was especially noticeable in the lumber, pulp and paper, textile, electric current, and non-ferrous metal products, and in mining, transportation and the construction industries. Employment in iron and steel was in somewhat greater volume. In the tobacco, malt and distilled liquors, logging, communication and trade groups, on the other hand, the level of employment was slightly lower.

A summary of employment conditions during the quarter ending September 30 is given elsewhere in this issue.

TRADE UNION REPORTS

The situation, among organized labour, as reported by 1,477 trade

unions representing 161,182 persons, was again more favourable during September, the percentage of unemployment standing at 2.8 as compared with 3.6 in August and with 8.5 in September of last year. (Unemployment as used here has reference to involuntary idleness due to economic causes. Persons engaged in work other than their own trades, or who are idle because of illness, or as a direct result of strikes or lockouts, are not considered as unemployed. As the number of unions making returns varies from month to month with consequent variation in membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.) Less idleness was reported in all provinces both as compared with August and with September, 1921. The manufacturing industries as a whole reported somewhat smaller percentages of unemployment than in August but there were fluctuations within the group. Tradesmen in the printing, publishing and textile, leather and jewelry divisions were more fully engaged. Match makers, glass and sheet metal workers and moulders reported more idleness. In the Nova Scotia coal mines

smaller percentages of unemployment were registered, while the situation among quarry workers in the same province remained unchanged, none of the members being out of work. There was slightly more employment shown in the building and construction group due to greater activity among workers in Quebec and Alberta. Steam shovel and dredgemen, carpenters and joiners, painters, decorators and paperhangers, and plumbers and steamfitters reported increased employment, but bridge and structural iron workers, bricklayers, masons and plasterers, electrical workers, and granite and stonecutters, were hardly as busy as in the previous month. Improvement in the transportation group was again reported during September though the change over August was slight. Steam railway and street and electric railway employees were more fully engaged but in the shipping and stevedoring division increased idleness was registered. Larger percentages of unemployment were shown among fishermen and civic employees but theatre and stage employees and stationary engineers and firemen were busier.

A summary of employment during the quarter ended September 30, as reported by trade unions, appears elsewhere in this issue.

EMPLOYMENT OFFICE REPORTS

During the month of September, 1922, the offices of the Employment Service made 46,918 references to positions and effected a total of 44,911 placements. Of these, the placements in regular employment totalled 36,615 (33,758 of men and 2,857 of women), while those in casual work numbered 8,296. Applications for employment registered at the offices numbered 54,007 (44,685 from men and 9,322 from women). Employers notified the Service during the month of 59,763 vacancies (49,868 for men and 9,895 for women). When the comparison is made with the preceding

period a considerable decline in the volume of business is shown, while compared with September 1921 a slight increase was reported.

The following table gives the average number of applications, vacancies and placements made daily by the offices during September 1922 as compared with the preceding month and with the corresponding month of 1921:—

	August, 1922		Sept., 1922		Sept., 1921	
	1st half month	2nd half month	1st half month	2nd half month	1st half month	2nd half month
Applications	2,528	2,537	2,105	2,210	2,479	1,852
Vacancies...	2,562	3,031	2,705	2,098	2,752	1,687
Placements...	2,095	2,243	1,743	1,846	2,111	1,436

A report of the work of the offices for the third quarter of 1922 will be found elsewhere in this issue.

PRODUCTION REPORTS

According to the monthly report issued by the Dominion Bureau of Statistics, the production of pig iron in September declined 7.92 per cent from the output of the previous month, the respective tonnages being 27,123 long tons in August as compared with 24,974 tons in the month under review. The production was also less than that of September last year by 40.8 per cent. A comparison of the cumulative production during the first nine months of 1922 with that of the corresponding period last year shows a decrease from 457,157 tons to 275,989 tons, or 39.6 per cent. One furnace was blown in at Hamilton and another at Sydney while one of the furnaces at Sault Ste. Marie was banked. At the end of the month, the active furnaces numbered two at Sydney, one at Hamilton and one at Sault Ste. Marie, a net gain of one furnace over the previous month. Another development was the slight increase in

the several grades of iron produced for sale. The production of basic pig iron increased from 6,577 tons in August to 7,991 tons, or 21.5 per cent. The September production intended for this purpose was also higher than in September of last year by 58.14 per cent. The foundry pig iron produced for sale increased from 6,296 tons in August to 6,895 tons in September. The output of malleable iron for sale also rose from 281 tons in August to 1,096 tons in the month under review. The production of ferro-alloys dropped slightly from 1,864 tons in August to 1,834 tons in the following month.

The production of steel in September declined by 23,373 long tons from the output of 59,160 tons in August to 35,787 tons in the month under review. The cumulative output during the first nine months of 1921 was 477,588 tons as compared with a production of 334,835 tons in the corresponding period of the present year. The closing of the steel plant at Sault Ste. Marie accounted in large measure for the decrease in production during September. The output of basic open hearth ingots for further use declined from 56,997 tons in August to 33,815 tons in September, a decrease of 23,182 tons, or 40.7 per cent. A small quantity of electric steel ingots for further use amounting to 124 tons was reported for September while none was made for direct sale. The total production of ingots was less than the output of the corresponding month of last year by 20,540 tons, or 37.7 per cent. The production of steel castings also suffered a decline. The total output in August was 2,204 tons which decreased to 1,848 tons in the month under review. The decline amounted to 356 tons, or 16.15 per cent. An opposing tendency developed in connection with basic open hearth castings of which the production increased from 208 tons to 837 tons. On the other hand the output of Bessemer and electric grades declined considerably.

A report received by the Department from the Cobalt district shows that 65 cars of ore were shipped during September from the Cobalt Camp containing about 5,023,188 pounds of ore. During the previous month about 4,664,956 pounds of ore were shipped.

With respect to bullion shipments, the Nipissing Mine shipped 264 bars containing 302,833 ounces of silver, and the Mining Corporation of Canada shipped 332 bars containing 335,548 ounces, making a total of 638,381 ounces of silver for the month, as compared with 598,815 ounces shipped in the previous month.

BUILDING PERMITS

A decrease of considerable magnitude was shown in the

volume of the building authorized by 56 cities during September, the permits issued amounting to \$10,573,163 as compared with \$16,970,125 in August, representing a loss of 38 per cent. The volume of the building contemplated during September was, however, nearly 7 per cent higher than in the same month of 1921. Prince Edward Island, Nova Scotia and Manitoba were the only provinces to record increases over the preceding month, while the decline of \$5,193,373 in British Columbia was especially pronounced. In comparison with the corresponding month of last year all provinces with the exception of Ontario, Saskatchewan and Alberta reported increases. Of the gains in the other provinces that of over \$450,000 in Manitoba was the most substantial. Of the larger cities Montreal and Winnipeg recorded greater building activity both as compared with the previous month and with September 1921, while Toronto and Vancouver reported losses in the former and gains in the latter comparison. Of the smaller cities Halifax, Sydney, Moncton, Brantford, London, Ottawa, St. Boniface, and Calgary reported increased activity as

compared with the preceding month and also with September 1921.

A summary showing in some detail the value of the building permits issued by the 56 larger cities during the quarter ending September 30, 1922, is given elsewhere in this issue.

According to the Canadian Building Review, issued by MacLean's Building Reports, Limited, the value of the contracts awarded during September amounted to \$29,313,500 as compared with \$25,187,500 in August and with \$19,565,700 in September of last year. There was, therefore, an increase of 16.4 per cent in the former and of 49.8 per cent in the latter comparison. Of the total for the month under review, \$1,234,000, or 4.2 per cent was to be spent in the Maritime Provinces; \$21,222,700, or 72.4 per cent in Quebec and Ontario; and \$6,856,800, or 23.4 per cent, in the Western Provinces. A further analysis of the total for the month shows that \$9,534,100 was to be spent on residences, \$6,275,600 on business establishments, \$5,170,200 on industrial buildings, and \$8,333,600 on engineering contracts.

Strikes.

The time lost due to industrial disputes was less during October than during the previous month but greater than during October, 1921. There were in existence at some time or other during the month 17 strikes involving about 3,229 workpeople with an estimated time loss of 54,502 working days, as compared with 18 strikes, 15,275 workpeople and 91,900 working days in September, 1922; and 17 strikes, 1,897 workpeople and 46,036 working days in October, 1921. On October 1, there were on record 15 strikes affecting 3,036 workpeople. Two strikes were reported as having commenced during October as compared with three during September. Two of the strikes commencing prior to October and the two strikes commencing during October terminated

during the month, leaving 13 strikes involving about 2,013 workpeople on record at the beginning of November.

Prices.

The prices movement for October was downward, both the index number of wholesale prices and the weekly family food budget being slightly lower than for September. The fuel group was slightly up and rent was steady but the budget of food, fuel and rent was therefore practically unchanged. The changes were chiefly seasonal, the more important being decreases in grain and livestock and increases in dairy products.

In wholesale prices the index number stood at 219.8 for October as compared with 220.5 for September; 229.2 for October last year; 317.6 for October, 1920; 244.7 for October, 1917; and 138.7 for October, 1914. Decreases for the month appeared in western grain, fodder, cattle and beef, hogs, fish, canned vegetables, groceries, hides and in fuel, with increases in Ontario grain, poultry,

fresh fruits and vegetables, textiles, metals and building materials. Nearly all the changes were comparatively slight compared with a year ago, all groups were lower except fuel, hides and woollens.

In retail prices the average cost of a weekly family budget of 29 staple foods in some sixty cities was \$10.23 at the beginning of October, as compared with \$10.28 at the beginning of September; \$11.48 for October last year; \$15.83 for October, 1920; \$11.81 for October, 1917, and \$7.99 for October, 1914. The chief changes for the month were slight decreases in meats, except veal, and in flour, bread and sugar, with slight increases in dairy products. In fuel prices, anthracite coal averaged slightly lower and bituminous coal and wood slightly higher. Rents showed no changes. The cost of the weekly family food, fuel and rent budget was \$20.86 for October as compared with \$20.90 for September; \$22.00 for October, 1921; \$26.46 for October, 1920; \$18.82 for October, 1917; and \$14.47 for October, 1914.

SUMMARY OF IMPORTS AND EXPORTS FOR SEPTEMBER, 1922

THE figures in the present article are derived from a statement prepared by the Department of Customs and Excise showing the imports of various classes of commodities, free and dutiable for the months of September 1921 and 1922, and for the six months ending in September of those years,

and the exports, domestic and foreign, of similar classes of goods for the same periods.

The following table shows the imports, free and dutiable, of the various classes of products for the month of September, 1922.

Classes of goods	Imports		Exports	
	Free	Dutiable	Domestic	Foreign
Agricultural and vegetable products, mainly foods..	\$ 1,734,631	\$ 5,465,349	\$19,996,070	\$ 58,266
Agricultural and vegetable products, other than foods	1,544,697	2,635,973	2,047,145	172,284
Animals and animal products.....	1,606,048	2,242,188	16,126,882	523,351
Fibres, textiles and textile products.....	2,952,949	9,513,380	688,972	49,512
Wood, wood products and paper.....	986,421	1,830,642	19,832,266	22,798
Iron and its products.....	1,678,466	9,197,938	3,682,903	267,260
Non-ferrous metals and their products.....	1,016,612	2,070,340	4,049,927	33,673
Non-metallic minerals and products.....	3,369,566	5,949,182	2,645,852	55,919
Chemicals and allied products.....	870,525	1,168,304	1,245,540	9,523
Miscellaneous commodities.....	2,440,009	2,045,190	1,277,071	144,067
Totals	\$18,199,924	\$42,118,486	\$71,592,628	\$1,341,653

In September, 1922, the duty collected amounted to \$10,232,943 as compared with \$9,775,510 in September, 1921.

The following comparative table shows the values of merchandise en-

tered for consumption and the merchandise domestic and foreign, exported in the months of September, 1922 and 1921, and in the six-month period ending September 30 of these years respectively:

	Month of September		Six months ending September 30	
	1921	1922	1921	1922
Merchandise entered for consumption.....	\$ 59,805,487	\$ 60,318,410	\$378,815,250	\$363,915,796
Merchandise, domestic, exported.....	58,263,182	71,592,628	335,677,131	388,233,296
Total	\$118,068,669	\$131,911,038	\$714,492,381	\$752,149,032
Merchandise, foreign, exported.....	1,327,017	1,341,653	7,218,343	7,225,848
Grand total, Canadian trade.....	\$119,395,686	\$133,252,691	\$721,710,724	\$759,374,880

INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907

Proceedings for the month of October, 1922

DURING the month of October, the Department received reports of two Boards of Conciliation and Investigation established to deal with disputes between (1) the Canadian National Railways and certain of their employees being clerks, freight handlers, roundhouse, shop and store labourers, etc., members of the Canadian Brotherhood of Railroad Employees; and (2) the Canadian Pacific Railway Company and certain of its employees, being clerks, checkers, freight handlers, baggagemen, etc., members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees.

Application received

During the month of October an application for the establishment of a Board of Conciliation was received from employees of the Canadian National Railways, Western Lines, in the Dining and Sleeping Car Department,

being members of the Canadian Brotherhood of Railroad Employees.

Other Proceedings under the Act

In the case of a dispute between the Canadian Pacific Railway Company and certain of its employees, being shipmasters, mates and marine engineers in the British Columbia Lake and River Service of the Company, employed in vessels operating between points on Lakes Kootenay, Slocan, Arrow and Okanagan, members respectively of the Canadian Navigators' Federation, Pacific Division, and of the National Association of Marine Engineers, a Board was completed by the appointment of Mr. Robert S. Lennie, Vancouver, chairman, on the joint recommendation of the other members of the Board, Messrs. E. A. James, and John Fyfe, both of Vancouver, B.C., appointed on the recommendation of the employer and workmen respectively.

Report of Board in Dispute between the Canadian National Railways and certain of their employees, being clerks, freight handlers, etc.

A report was received from the Board established to deal with the dispute between the Canadian National Railways and certain of their employees being clerks, freight handlers, round house shop and store labourers, etc., members of the Canadian Brotherhood of Railroad Employees. The Board was composed of Mr. F. T. Costello, Alexandria, Ont., chairman, and Messrs. George D. Kelley, Ottawa, and Howard S. Ross, K.C., Montreal, nominees of the Railways and employees respectively. The report was signed by the chairman and Mr. Ross and contained recommendations as to a settlement of the dispute. A supplementary report signed by the same members of the Board was also received, which dealt with other matters in dispute and which also contained recommendations as to a settlement.

The attitude of the Railways to the Board's findings had not been learnt at the close of the month.

The text of these reports is as follows:

Report of Board

Re Industrial Disputes Investigation Act, 1907, and *re* difference between the Canadian National Railways and certain of their employees being clerks, freight handlers, round-house, shop and store labourers, etc., members of the Canadian Brotherhood of Railroad Employees.

To the Hon. James Murdock, M.P.,
Minister of Labour for Canada.

Sir,

The undersigned members of the Board of Conciliation and Investigation herein beg to report as follows:

Upon the application of the employees, dated July 22nd, 1922, a Board of Conciliation and Investigation was established as of date for July 31st, 1922. Mr. George D. Kelley, Barrister, of Ottawa, representing the employers, and Mr. Howard S. Ross, Barrister, of Montreal,

representing the employees, failed to agree upon a Chairman. Mr. F. T. Costello, Barrister, of Alexandria, was appointed Chairman and arranged that the first meeting of the Board be held at Ottawa on the 11th day of August, 1922. The Board at this first meeting organized for future meetings, which were held to hear evidence or argument or for conference at Ottawa on the following days: 15th, 16th, 17th, 18th, 21st, 22nd, 23rd, 24th, 25th and 26th. Meetings were held at Toronto on the following days: 28th, 29th, 30th and 31st August. Meetings were held at Montreal on the following days: 1st and 2nd September, and again at Ottawa on the 5th, 6th, 7th and 8th September, and afterwards meetings were held for conference on the 18th September and the 3rd, 4th, 16th, 17th and 18th of October.

Witnesses gave evidence on behalf of the employees at Toronto and at Montreal. The employees were represented by Mr. A. R. Mosher, President, Canadian Brotherhood of Railroad Employees, Ottawa, and the following officers: Mr. M. M. Maclean, Secretary, Ottawa; Mr. C. H. Minchin, General Secretary, Western Lines, Calgary; Mr. Robert Dykes, Chairman, Western Lines, Winnipeg; Mr. C. E. Coles, Chairman, Eastern Lines, Moncton. The employers were represented by Mr. A. E. Crilly, Assistant to the General Manager, Montreal; Mr. George E. Smart, Mechanical Assistant to the Vice-President, Toronto; Mr. L. C. Thompson, General Storekeeper, Eastern Lines, Mr. A. E. Eagan, General Auditor, Toronto; Mr. W. H. Rippey, Superintendent of Transportation, Moncton, and Mr. W. A. Kirkpatrick, Superintendent of Transportation, Saskatoon.

At the first public meeting of the Board Mr. Mosher asked whether the employers were prepared to follow the precedent set in the shopmen's case and suspend the wage reduction until after the Board made its report. He said he

was not in a position to proceed until the employers made their policy known, and cited in support of his contention the opinion of the Department of Justice.

On the following morning Mr. Crilly stated that, while they did not admit they contravened Section 57 of the Industrial Disputes Investigation Act, it had been decided that without prejudice to the rights of the railways the proposed reduced rates would not be put in force.

Mr. Mosher at a number of the public meetings of the Board presented a lengthy and carefully prepared argument setting forth the reasons on which the employees base their objection to the proposed reduction.

The following subjects were dealt with in detail and a number of useful charts were presented to the Board: The Cost of Living; Wage Rates of Railroad Employees Involved; How Railroad Workers Live on Present Wages; Average Earnings; What Railroad Workers Buy; Present Price Trend; Railroad Finances; The Employers and the Public; Government Ownership on Trial; Efficiency of the Government Lines Toward a Railroad Wage Policy; The Fair Wages Policy of the Dominion Government; Railroad Wage Decisions in the United States.

For the employers Mr. Crilly argued in support of the proposed reduction and presented some useful tables in which were summarized the figures referred to in his argument. At the closing public meeting of the Board copies of the briefs of the employers and employees were presented to the Chairman and members of the Board.

During the course of the deliberations of the Board efforts were made to bring the different parties to agreement on the questions submitted, but as the conferences progressed and as evidenced by the attitude of both parties it became plain that no agreement could be arrived at so it is left to the Board to report to you our findings. After giving careful

consideration to the arguments and later reading the briefs submitted, the undersigned members of the Board are of the opinion that the justification for the proposed reduction in wages of the employees, whose case is submitted, would depend largely upon whether their rates of pay after the reduction would be sufficient to support them and their families in health and decency. A mass of evidence in writing was submitted by both sides and oral evidence was taken at Toronto and Montreal. Although this evidence was to some extent unsatisfactory, on account of the impossibility of obtaining any scientifically correct family budget, though many budgets were submitted, it would tend to show that the rate of pay of the employees in question was much below that of other employees in other employments on the railway, and was below the cost of family budgets prepared by different organizations and set out in the statements submitted. It would appear further that the proposed reduction affected the lower paid employees of the railway who were poorly equipped to combat any such reduction. Similar positions not covered by the schedule were not reduced. The railway endeavoured to show that many of the positions were filled by some unmarried men and more unmarried women, and, on this account, the railway was justified in having a low rate for these positions. It was suggested that some differential should be made between married and unmarried employees, and between men and women employees, but this did not meet with favour from either side. We consider that any recommendation of such a differential is not in the scope of our duties. If employees, whether married or unmarried, men or women, are to be treated alike, and ability and seniority to be the only test, then in our opinion the position of a married man with a family is the paramount consideration, and he should be left with sufficient to rear that family in health and decency.

The trend of the cost of living was fully discussed and evidence submitted by both sides. At the request of the Chairman, Mr. Charles W. Bolton of the

Statistical Branch of your Department also submitted figures and charts compiled by him. His figures did not include all the items of the family budget. The figures submitted by him showed a decrease from point 160 to point 152 between July, 1921, and July, 1922, and since that time a slight upward tendency. This decrease in cost of living according to his figures is about 5 per cent, and he at the same time admitted that in the compilation of his figures there might easily be an error of 5 per cent. Again, the probability of an increase in the price of fuel for the coming winter compared with that of last winter could easily bring the cost of living higher. On the evidence submitted and statements made we are of the opinion that there is little or no decrease in the cost of living from the time the present rate of wages was fixed in 1921 until the time the evidence was submitted to us.

The Canadian Northern and the Canadian Government Railways were not paying before they were amalgamated and had to be taken over by the Government because of the large deficits. Evidence was submitted to show that the amalgamated roads are steadily improving their financial position. It should not be expected that these roads would so soon be on a paying basis, and it should not be forgotten that these roads were built mainly for the purpose of opening up new territory, the development of which has been retarded on account of unfortunate conditions brought about by the war. These low paid employees should not be asked to bear more than their share of a burden which should be carried by the country as a whole.

At the present time, on account of industrial unrest and the absolute necessity of the smooth working of the railways of the country and particularly so as not to interfere with the movement of coal and wheat, it is essential to the welfare of the country that there should be hearty co-operation between the railway management and the employees.

The proposed cut in wages would tend to prevent this desired co-operation.

In view of the above reasons we would recommend that the proposed reductions in wages of the employees concerned should not be made.

The Stauffer award given on the 8th of November, 1921, has been mentioned in the application, the employees complaining that the company failed to put into effect the decision of the Board of Arbitration modifying certain reductions in wages. We feel no good purpose will be served by our dealing with this award at this late date.

Subsequent to the establishment of the Board and on the 14th of August, 1922, certain disputes as to complaints of several individual employees in Toronto and Moncton complaining of breaches of Article 7 of the Agreement between the railway and certain of its employees were referred to you for consideration. Our findings upon these matters are contained in a supplementary report of even date.

Respectfully submitted,
(Sgd.) F. T. COSTELLO,
Chairman.

Member of Board.

Dated this 18th day of October, 1922.

Supplementary report of Board

Re Industrial Disputes Investigation Act, 1907, and *re* difference between the Canadian National Railways and certain of their employees being clerks, freight handlers, roundhouse, shop, store labourers, etc., members of the Canadian Brotherhood of Railway Employees, and in the matter of certain disputes between the parties as to the application of rates and rules as contained in the Wage Agreement between the Railways and individual employees at Toronto and Moncton referred to the Board on the 14th of August, 1922.

To the Hon. James Murdock, M.P.,
Minister of Labour for Canada.

Sir,

The undersigned members of the Board of Conciliation and Investigation herein beg further to report as follows:

On the 14th of August, 1922, at the request of the employees, this Board of Conciliation had its scope broadened to enable it to deal with disputes which had arisen with respect to the application of certain rates and rules as contained in the Wage Agreement between the railway and certain of its employees. During the progress of the main investigation all these disputes were settled by mutual agreement of the representatives of the railway and the employees except the following:—

**THE CASE OF ALEX. AMOS, RATE CLERK,
OFFICE OF AUDITOR OF TRAFFIC, MONCTON, N.B.**

It was complained by the employees that in this case there was non-compliance with Article 7 of the Agreement between the railway and employees, in so far as it affects the seniority rights of Alex Amos, Clerk, Office of Auditor of Traffic, Moncton. In July, 1921, a superior position became vacant and was not bulletined in accordance with the agreement until April, 1922. In the meantime the office had been filled by one Blanchard. The Grievance Committee complained, and in April, 1922, the office was duly bulletined. Mr. Amos made application and supports his claim on the ground of seniority. He had entered the service on the 13th of September, 1907, and Blanchard had entered the service on the 20th September, 1907. The railway did not see fit to replace their appointment of Mr. Blanchard by that of Mr. Amos, and as against the right of seniority pleaded that of merit and ability. Mr. Estano, Superintendent of the Department, gave evidence upon the matter and showed that Mr. Blanchard had much superior ability. The railway's experience with Mr. Amos since he had

entered the service in 1907 had not been satisfactory, and he was not suitable for the position, being deficient in accounting and correspondence. Mr. Cole, who appeared on behalf of the Committee, admitted that he had made inquiries amongst the employees of the office and they had advised him that they considered Mr. Blanchard the better man of the two. By Article 7 of the Agreement, ability, merit and seniority are to govern. The matter of seniority is fixed, but the question of ability and merit is to be decided by the railway and the representative of the employees. They did not agree. In this case it would appear to us that on the question of ability and merit that the railway's decision was a correct one.

**NON-COMPLIANCE WITH ARTICLE 7 OF
THE AGREEMENT AND IN APPOINTMENT
OF MR. MCCrackEN TO POSITION OF
MILLING IN TRANSIT OFFICE OF AUDI-
TOR OF FREIGHT RECEIPTS, TORONTO.**

Mr. McCracken was appointed to a new position created by Mr. Andrews, the Superintendent of the Department, at a salary of \$127.50 a month. There were fifteen men in the office who had entered the service and were senior to Mr. McCracken. The position was duly bulletined and Mr. McCracken, who had entered the service in 1920, was appointed because Mr. Andrews considered him the most competent. It does not appear that Mr. Andrews had made proper inquiries and examination of the ability of the senior men who had applied, and it is our opinion that the appointment of Mr. McCracken was a breach of Article 7 of the Agreement.

**NON-COMPLIANCE OF ARTICLE 7 OF THE
AGREEMENT IN APPOINTMENT OF MR.
SIMPSON TO THE POSITION OF INTER-
LINE BALANCE IN THE OFFICE OF AUDI-
TOR OF FREIGHT RECEIPTS, TORONTO.**

In April, 1920, the late Mr. H. J. McRae, who held the position, obtained leave of absence on account of illness and remained off duty until April, 1921, during which time there was no one per-

manently appointed to the position to perform his duties. In the meantime, Mr. Winn was temporarily employed for eight or nine months. Mr. McRae returned to the position in April, 1921, but on account of his health only remained in the position for another three months, when he finally retired. After some delay the position was bulletined and amongst the applicants were Mr. Simpson and Mr. Winn. Mr. Winn was clearly senior of the two applicants, but Mr. Simpson was appointed, according to Mr. Andrews, the Superintendent, on account of merit and ability. Mr. Winn appeared on his own behalf and was examined. He admitted that he was lax in his duties and that some of his cor-

respondence remained unanswered for as long as six months. It would appear from his admissions and evidence of Mr. Andrews, Superintendent of the Department, that there is sufficient ground for believing that as to merit and ability Mr. Simpson, the appointee, was clearly the most competent, and we so find. We also find that there was no breach of Article 7 in this matter.

All of which is respectfully submitted.

(Sgd.) F. T. COSTELLO,
Chairman.

(Sgd.) H. S. ROSS,
Member of Board.

Dated this 18th of October, 1922.

Report of Board in dispute between the Canadian Pacific Railway Company and certain of its employees being clerks, checkers, freight handlers, etc.

A report was received from the Board established to deal with the dispute between the Canadian Pacific Railway Company and certain of its employees, being clerks, checkers, freight handlers, baggagemen, etc., members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees. The Board was composed of Mr. D. Urquhart, Toronto, chairman, and Messrs. J. T. Arundel, Oakville, Ont., and J. G. O'Donoghue, Toronto, nominees of the Company and the employees respectively. The report was signed by the chairman and Mr. J. G. O'Donoghue, and contained recommendations as to a settlement of the dispute. Mr. Arundel submitted a minority report.

The Company did not accept the findings of the Board, but expressed its willingness to consider any representation received from its employees in regard to wage inequalities and other matters of detail.

The text of the Board's findings and of the minority report is as follows:

Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of the dispute between the Canadian Pacific Railway Company (employer) and certain of its employees, being clerks, checkers, freight handlers, baggagemen, etc., members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, (employees).

To the Honourable James Murdock,
Minister of Labour.

The Board of Conciliation and Investigation appointed by you on the 19th day of August, 1922, under the Industrial Disputes Investigation Act, 1907, begs to report as follows:

The dispute, as stated in the application for the appointment of a Board of Conciliation and Investigation dated July 24th, 1922, in respect to the Eastern Lines, is as follows:

"That the railroad has announced its intention of making effective on July 19, 1922, reduction in rates of pay to the employees specified, in the amounts of three and four cents per hour and

\$6.12 and \$8.16 per month. The contention of the employees is that such reduction is unjustified and that the rate of pay resultant from such reduction will result in hardship and privation for themselves and dependants. It is also contended in connection with the reduction that the minimum rates of pay for clerical employees should be increased to conform with existing minimum of other railroads."

By notice from the Department of Labour dated the 21st day of August, 1922, the dispute was enlarged to include certain differences with regard to rules and working conditions.

The Board held its first meeting at Montreal on the 23rd day of August, 1922, and as the same board had been appointed in connection with a dispute between the company and the same employees on the Western Lines the matter was adjourned until the following day to ascertain if both disputes could be taken up at the same time, as the questions at issue were substantially the same. The representatives of the company and the employees in the dispute as to the Eastern Lines undertook to get into communication with the proper parties in respect to the dispute as to the Western Lines and to report at the adjourned meeting.

The Board again convened on the following day, August 24th, and by consent of all parties it was determined to proceed with both disputes at the same time and that representatives of both the Eastern and the Western Lines should be present to make such representations as might be thought necessary. The matter was then adjourned until Tuesday, the 29th day of August, and at the suggestion of the Board the representatives of the employer and the employees were requested to further negotiate both as to rules and working conditions and the rate of wages.

The dispute as stated in the application for the appointment of a Board of Conciliation for the Western Lines is as follows:

(a) The employer, the Canadian Pacific Railway Company, has revised and reduced the rates of pay of the employees affected, such alteration and reduction not being agreed to by the Committee representing the employees.

(b) The employer, the Canadian Pacific Railway Company, have put into effect certain alterations governing the working conditions, hours of service, payment of overtime, holidays, etc., such alterations not having been agreed to by the Committee representing the employees.

The [employee] representatives of both the Eastern and Western Lines and the representatives of the company got together and at their request the matter was not proceeded with on the 29th day of August, to permit of further negotiations between the parties.

Subsequently an agreement was reached between the parties as to rules and working conditions and the Board has therefore not been called upon to make any report as to these.

The matter of the wages, however, could not be adjusted and the parties asked to have the Board convene again.

Meetings were held at the City of Montreal on the 18th, 19th, 20th and 21st days of September, and a further meeting at the City of Toronto on the 27th day of September, and in Ottawa on the 4th day of October, and again in Toronto on the 9th, 19th and 21st days of October.

The employees of the Eastern Lines were represented by Mr. F. H. Hall, General Chairman; Mr. W. A. Rowe, Vice Chairman, and Mr. C. L. Fisher, Vice Chairman. The employees of the Western Lines were represented by Mr. W. E. Turner, General Chairman; Mr. J. Brodie, Vancouver, and Mr. Henry Carr represented the Brotherhood. Mr. George Hodge represented the company in respect to the Eastern Lines and Mr. W. A. Mather represented the Company as to the Western Lines.

At the opening of the matter on September 18th, Mr. Hodge, representing the employer, filed the following statement:

While the Company is satisfied that it is under no obligation either as a matter of law or fairness to do so, we are willing to restore rates of pay to the basis previously in effect pending the report of the Board, on the understanding that the Company's case before the Board will not be thereby prejudiced and that we shall not be thereby precluded from taking the position that eventually the new scale of rates of pay should be retroactive to July 19th, on the Eastern Lines, and to July 20th, on Western Lines.

The history of the legislation in the United States and the awards made by the United States Railroad Labour Board are so fully set out in the findings of other Conciliation Boards, particularly those presided over by Mr. McEvoy and Mr. Preston, that it is unnecessary to go into these in detail.

The findings of the majority of the Conciliation Boards in the disputes in the cases of the Michigan Central and the Père Marquette are not in our opinion precedents to guide us in determining the question at issue before this Board. These two railways are essentially American roads and it would not seem to be improper in the circumstances disclosed in the proceedings before these Boards that the scale of wages adopted on the American portions of these roads should be made applicable to the Canadian Divisions. Nor would it appear that the findings of the majority in respect to the dispute between the Canadian Railways and the shop crafts employees is in any way binding on this Board, in view of the fact that the reference to that Board as appears by the majority report was construed to be a limited one and the report did not deal with the questions at issue before this Board.

The contention was strongly made by Mr. Hodge on behalf of the railway company that the question in dispute was not one of wages, but that it was in reference to a conditional withholding of the difference between the present rate of wages and the rates proposed by the railway pending the conclusion of a definite agreement between the company and its employees, when conditions make it possible to reach an agreement. Your

Board thinks that the dispute is essentially one of wages and is not limited as suggested by Mr. Hodge. In any case, whether it is so limited or not makes no difference in view of the conclusion at which the Board has arrived.

The question to be decided is a very difficult one in view of the fact that the groups of employees represented in this dispute were until a few years ago unorganized, with a result that the rates of wages paid to a large extent depended on the labour market. There appears to have been, prior to 1918, a great variation in rates at points where it would appear that the nature of the work was practically the same.

In 1918 the company substantially put into effect the rates fixed by the McAdoo Award and subsequently put into effect the increases made by the United States Railroad Labour Board in 1919 and 1920. The adoption of these increases still left the inequalities above mentioned. The increases made in 1920 were made the subject of an agreement, a copy of which is filed herewith.

In 1921, following the decision of the United States Railroad Labour Board, the wages were decreased by the railway company effective July 16th, 1921, and after some objection on the part of the employees an agreement was entered into dated the 7th of February, 1922, under which agreement the employees accepted the decreases which were made. A copy of this agreement is also filed herewith.

On June 19th, 1922, the company gave the following notice to its employees:

Canadian Pacific Railway Company,
June 19th, 1922.

20490.

F. H. Hall, Esq.,
374 Tenth Avenue,
Rosemount, Montreal.

Dear Sir,

Pursuant to the terms of agreement effective September 1st, 1920, and Supplement thereto, I beg to notify you of the company's desire to revise the existing rates of pay of Clerks, Checkers, Freight Handlers, Baggage-men, etc.,

at certain points specified therein, by making effective July 16th next decreases in rates of pay as specified hereunder, or such other decreases as may be mutually agreed upon to produce the same aggregate decrease:

	Decrease of Per Hour cents
1.—Hourly rated employees in Baggage-rooms at points where such staffs are specified in the preamble of the agreement.	3
2.—Hourly rated employees in Freight Sheds at points where such staffs are specified in the preamble of the agreement.	4
The present differentials between hourly rated Truckers and hourly rated Sealers, Sealers, Perishable Inspectors, Stowers, Stevedores, Loaders and Coopers will be maintained.	
3.—Hourly rated Common Labourers in Freight Sheds or Baggage-rooms at points where such staffs are specified in the preamble of the agreement.	4

Monthly Rated Employees.

	Per Month
4.—Clerks (including Checkers).....	\$6.12
5.—Baggage and Parcel room employees (other than Clerks).....	\$6.12
6.—Employees engaged in assorting waybills and tickets, operating appliances or machines for perforating, addressing envelopes, numbering claims or other papers, gathering and distributing mail and other similar work	\$8.16
7.—Office Boys, Call Boys, Messengers, Chore Boys and other employees filling similar positions.....	\$8.16
8.—Freight Handlers or Truckers and others similarly employed.....	\$8.16

I shall be glad if you will advise me as early as possible how soon your Committee will be prepared to meet me to discuss the matter with a view to reaching an agreement.

Yours truly,
(Sgd.) GEO. HODGE,
For General Manager.

A similar notice dated June 20th, 1922, was given by the company in respect to employees on the Western Lines.

These notices were given following the decision made by the United States Railroad Board which became effective in United States on July 1st, 1922.

The reduction in wages proposed by these notices is the subject of the present dispute.

A contention was made before the Board on behalf of the employees that the notices were not proper legal notices as they did not give the thirty days' notice required by the Industrial Disputes Investigation Act and by the agreement made in 1920. By subsequent notices the company professed to correct the dates, but in view of the conclusion at which the Board has arrived this question is now unimportant.

It will be noticed that the decreases are not made on a percentage basis but are a fixed rate in respect to each group of employees.

Taking the groups as set out in the notice of June 19th, 1922, and which for convenience are numbered, it appears that the wages of the First Class were increased in 1920, 13c per hour. They were reduced 10c per hour in 1921, and it is now proposed to make a further reduction of 3c per hour, thus wiping out the whole of the increase made in 1920.

The wages of the Second Class were increased in 1920 by 13c per hour for checkers and 12c as to other employees. They were reduced 6c in 1921, 4c in 1922, making a total decrease of 10c per hour.

The wages of the Third Class were increased 8½c per hour in 1920. The whole of that increase was wiped out in 1921 and there is still a further deduction of 4c this year, making a total of 12½c decrease in the two years.

The wages of Class Number Four were increased \$26.52 per month in 1920. They were decreased \$12.24 in 1921 and \$6.12 in 1922 making a total decrease of \$18.36.

The wages of the Fifth Class were increased \$26.52 in 1920, decreased \$20.40 in 1921, and \$6.12 in 1922, making a total decrease of \$26.52, or wiping out the whole of the increase made in 1920.

The wages of Class Number Six were increased \$20.40 in 1920, reduced that amount in 1921, and a further amount of \$8.16 in 1922, making a total reduction of \$28.56 or \$8.16 more than the increase of 1920.

The wages of Class Number Seven were increased \$10.20 in 1920, reduced the same amount in 1921, and \$8.16 in 1922, making a total reduction for the two years of \$18.36 and being \$8.16 more than the whole increase.

The wages of Class Number Eight were increased \$24.48 in 1920, reduced \$12.24 in 1921, and \$8.16 in 1922, making a total of \$20.40 in the two years.

No sufficient explanation was offered as to why in certain classes the whole increase made in 1920 should be wiped out and in other classes more than that increase and in others less than the increase. In the absence of any sufficient explanation as to this it would appear not to be unreasonable that if a reduction is to be made it should be relatively the same in all classes and the aggregate amount of the deductions should be distributed among the employees rateably according to their respective earnings.

It is apparent that the deduction of a fixed sum from each employee, irrespective of what he is earning, works a hardship on the lower paid employee.

As pointed out in the report of one of the other Conciliation Boards, the class of employees represented in some of the groups in this dispute are the second lowest paid class in the railway service and it is strongly contended on behalf of the employees that the lower paid classes should not be attacked first, but if there is to be any wage reduction it should be general and should cover all classes of employees.

The reduction in freight and passenger rates and the decrease in the cost of living from the peak year of 1920 perhaps justifies consideration of a reduction in wages, but until a general reduction is canvassed covering all classes the lower paid employees should not be made to suffer first.

The argument that the rate of wages should follow the cost of living is no doubt a strong one, but there is great difficulty in applying it in a case like the present one. Apparently at no period from 1914 down to the present time has the minimum wage equalled the cost of living, that is "an adequate standard" or "sufficient to reasonably meet the needs of the average working man's family," and until you can get as a basis a year in which the rate of wages and the cost of living have been on an equality the application of the principle can scarcely be made. There is no doubt that the rate of wages of some in the present groups has been more than the estimated cost of living, but in many cases it has been much below and the deductions proposed would leave the latter in a worse position.

The view of the Board is that there should not be any reduction at the present time.

Your Board recommends that there should be further negotiations between the company and the employees with a view of adjusting any inequalities which exist in the wages paid to employees at different points if in fact such inequalities do exist.

The Board also wishes to compliment both the representatives of the employees and the company on the able, forceful and courteous way in which their respective cases were presented and on the apparent good feeling which exists between the representatives of both parties and which was manifest on the hearing.

This report is by the majority of the Board. Mr. J. T. Arundel does not concur in it and is presenting a minority report.

All of which is respectfully submitted.

(Sgd.) D. URQUHART,
Chairman.

(Sgd.) J. G. O'DONOGHUE,
For the Employees.

Dated at Toronto this 21st day of
October, 1922.

Minority Report

Oakville, October 20th, 1922.

In the matter of the Industrial Disputes Investigation Act, 1907, and of the dispute between the Canadian Pacific Railway Company (employers) and certain of its employees, being clerks, checkers, freight handlers, baggagemen, etc., members of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, (employees).

To the Honourable James Murdock,
Minister of Labour.

Sir,—

A majority of the Board has made a report that I am compelled to disagree with, mainly on the ground that the conclusion of it merely defers a settlement, and even this temporary result is based on matter to which it is almost unrelated.

A review of the railway wages conditions during the last four years places the Canadian Pacific Railway in an impregnable position. The Washington, 1918, unparalleled increases were given to its employees and the tremendous increase of operating costs this caused was partially relieved by additions to the tariff rates. Subsequent rises in the cost of living were met by additional increases of wages as set by the United States Labour Board and thus the Canadian Pacific Railway became a party to the application of continental rates of pay prescribed by authorities constituted by the United States Government. As wartime conditions became less oppressive, largely through the reduction of railway tariff rates, the same author-

ities began to reduce wages, and it is the second reduction from the high peak of 1920 we have been attempting to deal with. The Canadian Pacific Railway, after following the abnormal rise, followed the fall, for which no justification is needed as it remained on the continental basis. The United States Labour Board set rates of pay which have been established throughout the United States, where the railway rates had not been reduced to the extent they were in Canada even before the Crow's Nest Agreement rates' adjustment placed additional burdens on the Canadian railways which Parliament undoubtedly expected would be relieved to some extent by wage reductions, railway costs having to be reduced for the welfare of the country. The Washington rates of pay of 1918 were based on the increased cost of living compared to the cost in December, 1917, after serious and exhaustive study of the situation produced by the war. In the United States the cost of living in June, 1922, was 16.9 per cent higher than in December, 1917, and in Canada but 6.6 per cent, while the rates of pay before this Board run for hourly rated employees from 100 per cent to 122 per cent, and for monthly rated employees up to 75 per cent or more, higher than the rates in effect in December, 1917. The changes in rates of pay both up and down were based on the cost of living, and, although the reduction in Canada is greater than in the United States, and the railway rates have been reduced much more, the rates of pay set by the United States Labour Board as fair and just for existing conditions are unacceptable to a majority of your Board, although the investigation and consideration it was possible to give to the question are negligible compared to the work of the United States Labour Board. All these facts constituted a difficulty that was troublesome to deal with unless the American rates were endorsed, and I think the trouble was overcome by the conference at Ottawa; but this conference in effect changed the constitution of the Board appointed to deal with the dispute by enlarging its membership from three to

eight, something I am unable to square with the provisions of the Act, which is such a splendid instrument with its power for doing good that its integrity should be very jealously guarded by everyone who comes in contact with it.

The majority report endorses the findings of the Conciliation Boards which dealt with the Michigan Central and Père Marquette disputes. These Boards put the United States Labour Board reductions in rates of pay into effect, but, while endorsing this, the same report finds that the reductions should not be allowed on the Canadian Pacific, which operates in the same territory as the two roads mentioned, at present, thus changing the question from an economic one to one of, Who owns the road? Therefore, if the Canadian Pacific were an American owned system this Board would have given a verdict in its favour.

The Shop Crafts' case was the same as this one. The application for a Board stated it in terms different from the letter and spirit of the dispute which was this:

Pending further negotiations with reference to definite revisions of rates of pay the employees will, subject to the terms of this agreement, accept the interim revision of rates of pay made effective on July 19th, 1922, subject to the conditions named in the notice to employees dated July 18th, 1922.

The Company agrees that the rates of pay in effect prior to July 19th, 1922, will be restored up to and including August 15th, 1922, provided, however, that when definite rates of pay are agreed upon they shall be retroactive to July 19th, 1922, and notwithstanding the fact that employees may have received pay at the old rates up to August 15th, 1922, any necessary adjustments when definite rates are agreed upon will, except as otherwise mutually agreed, be made effective as of July 19th, 1922.

This fact is affected, but not changed, by the decision that the questions before the two Boards differ.

As the Washington Award of 1918 set rates of pay on a strictly economic basis, with special consideration given to unorganized labour, the labour market has played no part in what has occurred since. The emphatic statement

that other classes receiving higher wages have not been reduced at all is made with full knowledge of the reductions in the shop crafts' rates of pay averaging twice as much as those proposed for the clerks and freight handlers; but without any examination at all of the rise and fall in wages paid to transportation employees, or of the world wide recognition of skill and special knowledge securing higher rates of pay than the lack of them, still, until these are reduced, this proposed reduction should not be made. So the question is not one of justice after all, but levelling.

In my opinion this Board could have justly accepted the Company's proposal, which included an offer to discuss with the employees the matter of adjustments of rates and which would have resulted in changes in the high and low rates, but even the latter are fair, as reduced, according to the United States Labour Board, than which at the present time there is no better qualified authority on this continent. The interests of the country are bound up in the cost of operating railways to an extent not suspected generally until the depth of the depression, which was crippling us and halting the endeavours to get in the way which would give prosperity a chance to return and promote the welfare of our citizens generally, revealed it; and this cost, principally one of wages, is the real issue in this case, as unless revisions of wages secure reductions the revival of prosperity throughout Canada will be jeopardized as the effect on freight rates will be material and unemployment increase instead of lessen, and, therefore, for their own good, and the general welfare, it would be better for the employees concerned in this case to again meet the Company and agree to the reduction, disagreeable as such a thing is, and reduce the effect by redistributing the rates.

I have the honour to be,

Your truly,

(Sgd.) J. ARUNDEL.

PROCEEDINGS OF CANADIAN RAILWAY BOARD OF ADJUSTMENT No. 1

TWENTY new decisions of the Canadian Railway Board of Adjustment No. 1, have been received by the Department. (Earlier decisions of the Board appeared in the *LABOUR GAZETTE* for July, 1922, on pages 669 and 670, and in previous issues).

Case No. 127 has reference to a claim of conductors and trainmen of the Canadian National Railways for arbitrary time between Fort William and Port Arthur. Case No. 128 has reference to the claim of a conductor and crew of the Canadian National Railways for terminal detention time at Edmonton. Case No. 129 relates to a claim of a conductor and train crew of the Canadian National Railways for pay for removing snow. Case No. 130 has reference to the dismissal of a conductor of the Canadian National Railways. Case No. 131 has reference to the dismissal of a switch foreman of the Canadian National Railways. Case No. 132 has reference to the dismissal of a yardman of the Canadian National Railways. Case No. 133 has reference to the dismissal of a brakeman of the Grand Trunk Pacific Railway. Case No. 134 refers to a dispute as to payment for switching performed by train crews of the Canadian National Railways and the Grand Trunk Pacific Railway. Case No. 135 has reference to a claim of a conductor of the Grand Trunk Pacific Railway for payment for switching. Case No. 136 has reference to the dismissal of a brakeman of the Grand Trunk Pacific Railway. Case No. 137 deals with a claim of two switchmen of the Canadian National Railways for payment for time when they were held out of service. Cases Nos. 138, 139 and 140 relate to claims of yardmen of the Canadian Pacific Railway with regard to the application of Article 18 of the yardmen's schedule and for payment for certain days when their crews were not required. Case No. 141 deals with

the dismissal of a brakeman of the Canadian Pacific Railway, and Case No. 142 with the dismissal of a conductor of the same railway. Case No. 143 has reference to the dismissal of a foreman by the Harbour Commissioners of Montreal. Case No. 144 deals with a controversy between the Toronto, Hamilton and Buffalo Railway and locomotive engineers and firemen with regard to the payment of yard engine crews. Case No. 145 has reference to a controversy between the Toronto, Hamilton and Buffalo Railway and locomotive engineers and firemen as to the coaling of engine at the Aberdeen coal dock, Hamilton. Case No. 146 has reference to a claim of engine and train crews of the Toronto, Hamilton and Buffalo Railway for payment for writing up new train rules.

Case No. 127—The Canadian National Railways, Western lines and the Order of Railway Conductors and the Brotherhood of Railroad Trainmen.

A controversy arose between the Canadian National Railways, Western lines, and its conductors and trainmen with reference to the interpretation of Article 5, rule 59 of the Conductors' schedule and article 5, rule 71 of the Trainmen's schedule which reads in part as follows:

The limits of Port Arthur yard will be the Port Arthur passenger station and the west switch Fort William "Loop". Switching performed between west switch Fort William "Loop" and west switch at Mount, will be paid for under terminal time rule.

It was contended by the Railways that the above only covered freight trains and had no reference to mixed or passenger trains. The contention of the conductors and trainmen was "that all time occupied between the limits of Port Arthur terminal, as defined in the schedule, should be paid for as terminal detention for all trains, the road trip beginning and ending at the last named point in schedule. Rule 59 of Article

5 covers all classes of trains unless otherwise specified, and there is no specification in this particular rule which excludes any class of train."

The decision of the Board was as follows:

The claim of the employees is sustained in so far as it applies to trains to which freight rates are paid. It is understood, however, that this decision does not authorize duplicate pay.

Case No. 128—The Canadian National Railways, western lines, and the Order of Railway Conductors and the Brotherhood of Railroad Trainmen.

A conductor of the Canadian National Railways in charge of an extra running east from Edson to Edmonton North yard, was detained about forty minutes to meet a westbound train after entering the yard limits at Edmonton. It was contended by the conductors and trainmen that under Article 5, Rule 9, and Article 5, Rule 14 of their respective schedules, the conductor and crew were entitled to all time delayed after entering the yard limits at North Edmonton, the block where they were detained being within the yard limits. On behalf of the Railways it was claimed that the conductor and crew were allowed actual mileage from Edson to Edmonton and that they were not entitled to allowance for terminal detention.

The decision of the Board was as follows:

The claim of the employees for terminal time in this case is sustained. Road time to cease when terminal time commences.

Case No. 129—The Canadian National Railways, western lines, and the Order of Railway Conductors and the Brotherhood of Railroad Trainmen.

A conductor and crew were called one day in winter to clear the yard at Atikokan of snow. The employees contended that under Rule 14 of the Trainmen's schedule "Trainmen required to perform yardmen's work in any one yard in excess of five hours in any one day will be paid at yardmen's rates

per hour for the actual time occupied." It was further claimed that the work performed in this case clearly came under the definition of yardmen's work as given in Clause "B" of the Yardmen's schedule. On behalf of the Railways it was contended that this was purely work train work and should only be paid at rates provided for such, that no regular switching crews were assigned to that point at the time in question, and that Rule 14, Clause "A" in the Trainmen's schedule did not apply.

The decision of the Board was as follows:

The Board is of the opinion that the service referred to, and the circumstances under which it was performed, do not support the claim, and it is therefore denied.

Case No. 130—The Canadian National Railways, western lines, and the Brotherhood of Railroad Trainmen.

This case had reference to the dismissal on the grounds of insubordination of a conductor of the Canadian National Railways for refusing to accept a call for service. The employees contended that in dismissing the conductor the officers of the company were meting out discipline too severe for the offence committed. At the hearing before the Board the parties to the controversy agreed between themselves as to its disposal and the case was therefore closed.

Case No. 131—The Canadian National Railways, western lines, and the Brotherhood of Railroad Trainmen.

A switch foreman of the Canadian National Railways was arrested on a warrant charging him with receiving stolen goods belonging to the railways. When called to the office of the superintendent he refused to answer an enquiry as to how he came into possession of these goods. When his case came up for trial the jury brought in a verdict of "not guilty." It was contended by the trainmen that when this employee was acquitted by the Court he should have been taken back into the service of the Railways, and should have been

given pay for time held out of the service under a rule in the Trainmen's schedule. On behalf of the Railways it was contended that this employee's refusal to answer questions asked him by a proper officer of the Company was sufficient cause for dismissal.

By decision of the Board the claim of the employees was denied.

Case No. 132—The Canadian National Railways, western lines, and the Brotherhood of Railroad Trainmen.

D— a yardman of the Canadian National Railways was dismissed for "insubordination and refusing duty," following his declining to take the foremanship of an extra crew which was being set up by the night yardmaster at Saskatoon. The representatives of the trainmen contended that this yardman had the right to make his preference to work, under Clause "B". Article 8 of the Yardmen's schedule. It was contended on behalf of the Railways that the night yardmaster at Saskatoon had a perfect right to order D— to take charge of the crew as foreman, and that D— in refusing to do so was guilty of insubordination.

The Board declared that in considering this case it was influenced in its decision by the fact that while, technically, the application of the rules in question might in his opinion support the action taken by D— yet the Board was not disposed to condone insubordination, and, further, there was no definite information to show that there was a junior qualified man available.

The decision of the Board was as follows:

The claim of the employees is sustained to the extent of reinstatement of Yardman D— without pay for time lost, such lost time to apply as discipline.

Case No. 133—The Grand Trunk Pacific Railway, and the Brotherhood of Railroad Trainmen.

A brakeman of the Grand Trunk Pacific Railway was dismissed from the service for refusing to obey the instruc-

tions of the superintendent to go in a baggage car at Prince Rupert. According to the Company, on account of mountain slides there was no passenger crew available at Prince Rupert for No. 2 train, and a freight crew had to be called. There being no baggage man on hand to receive the baggage from a boat that was being loaded on this train, this brakeman was called upon to act as baggageman on the car. On his refusal to do so he was instructed to report at the General Superintendent's office at Prince Rupert for investigation, but he refused. He also refused to comply with a further order to go to Smithers for investigation, but he finally did so. The employees contended that this brakeman was not guilty of refusing duty, but that the lax methods of handling and calling the crews at Prince Rupert on the particular date in question was the reason why he did not go out or respond to the first call for duty.

The Board declared that it developed during the hearing of the case that in addition to the offence for which the brakeman was dismissed, he did not attend his investigation as required by the officers of the Railway.

By decision of the Board the claim of the employees was denied.

Case No. 134—The Canadian National Railways, western lines, and the Order of Railway Conductors and the Brotherhood of Railroad Trainmen.

The conductors and trainmen of the Canadian National Railways, western lines, and the Grand Trunk Pacific Railway made a claim for all switching performed at Lucerne by Grand Trunk Pacific crews and at Jasper by Canadian National crews, Jasper being the terminal of Grand Trunk Pacific crews and Lucerne the terminal of Canadian National crews. In the operation of Grand Trunk Pacific trains between McBride, B.C., and Jasper, Alta., they have to pass through Lucerne, and in operating Canadian National trains between Lucerne and Edson they have to pass through Jasper.

On behalf of the railways it was contended that the co-ordination of the Canadian National (western lines) and the Grand Trunk Pacific Railways had taken place some time ago. Shortly afterwards the conductors of the two railway systems met together and decided to accept the Canadian National (western lines) schedule, which was agreed to by the Company. It was contended by the Company that so far as Grand Trunk Pacific men were concerned, Lucerne was simply a wayside station, and *vice-versa* Jasper was a wayside station for Canadian National men. So far as conductors were concerned the only clause in their schedule covering switching at these points was Article 5, Rule 7, reading as follows:

Conductors required to load or unload way freight or switch en route will be paid overtime at way freight rates for time so occupied, but not in excess of way freight rates for the full trip, such time to be deducted in computing overtime. Conductors will be paid way freight rates over the full trip if they load or unload way freight or switch at three or more points, or a combination of three, or both. This is not construed to apply to through trains setting out or picking up cars belonging to their trains unless a switch has to be made to spot cars which are set out; that is car set out of a train will be placed for loading or unloading, and this will not constitute switching unless the placing of same will necessitate the removal of car or cars from the track to which cars set out are destined. When picking up, any cars which are placed for loading must be re-spotted. The handling of water cars for other than train purposes will be by way freight trains; if by through freight trains, way freight rates will be paid provided water is distributed at three or more points.

For the trainmen there were two separate schedules in existence and under these schedules the Company claimed there was nothing to compel them to pay terminal switching at Lucerne and Jasper except an Article for Canadian National brakemen similar to that quoted above for the conductors. There was no such reference at all in the Grand Trunk Pacific Brakemen's schedule.

The representatives of conductors and trainmen contended that they were entitled to switching and delay time at Lucerne in the case of Grand Trunk Pa-

cific men, and at Jasper in the case of Canadian National men, under the Article of the Conductors' schedule quoted above, and under Article 5, Rule 14, of the Trainmen's schedule reading as follows:

Trainmen switching or delayed at terminals or turn-around points will be paid for actual time so occupied at through freight rates. Excepting that trainmen required to perform yardmen's work in any one yard in excess of five hours in any one day will be paid at yardmen's wages per hour for the actual time occupied. This time will be in addition to mileage or hours made on the trip.

Through freight rates on the basis of 12½ miles per hour will be paid trainmen in through freight service for all time occupied in switching at Canadian Northern Railway junction points, and this time will be paid in addition to pay for trip. Such time will be deducted in computing overtime for the trip and this switching will not be regarded as constituting switching at an intermediate point under Article 5, Rule 12.

The Board stated that the Conductors' schedule now in effect is the same on all parts of the Canadian National Railways, while the trainmen have retained the schedules in effect on the railways previous to co-ordination, the provisions of which differed considerably.

The decision of the Board was as follows:

The claim of the employees is sustained for conductors at points mentioned, and for trainmen at points covered by their schedule.

Case No. 135—The Grand Trunk Pacific Railway and the Order of Railway Conductors.

A conductor of the Grand Trunk Pacific Railway with headquarters at Transcona was called upon to pick up a train in the Fort Rouge yards of the Canadian Northern Railway. He claimed payment for switching and detention on the ground that Fort Rouge was a *bona fide* terminal under the schedule and that any crew passing through there were entitled to all switching and detention as in Article 5, Rule 9, reading as follows:

Conductors switching or delayed at terminals or turn-around points will be paid for actual

time so occupied at through freight rates. This time will be in addition to mileage hours made on the trip. Through freight rates on the basis of twelve and one-half (12½) miles per hour will be paid conductors in through freight service for all time occupied in switching at Canadian Northern Railway junction points, and this time will be paid in addition to pay for trip. Such time will be deducted in computing overtime for the trip, and this switching will not be regarded as constituting switching at an intermediate point under Article 5, Rule 7. Interrupted time of thirty (30) consecutive minutes or more preventing continuance of switching operations will be deducted in computing time for switching at Canadian Northern junction points.

It was claimed for the Railway that the conductor, whose run was from Transcona to Rivers was not entitled to time claimed, but would be entitled to twelve and one-half miles per hour for time on duty between the terminals Transcona and Rivers. It was further claimed that it had always been customary both before and since the co-ordination for Grand Trunk Pacific crews to pick up and set out cars at Fort Rouge or within Winnipeg terminals, and no compensation other than that above mentioned was ever asked or paid for.

By decision of the Board the claim of the employees was sustained.

Case No. 136—The Grand Trunk Pacific Railway Company and the Brotherhood of Railroad Trainmen.

A brakeman of the Grand Trunk Pacific Railway was dismissed for insubordination. It was claimed by the Company that a few days after he had been laid off duty alleging a sprained ankle he was seen participating in a dance. He had also been frequently observed playing pool, which gave rise to the belief that he was malingering. It was contended by the trainmen that Article 58 of the Grand Trunk Pacific schedule which was still in effect, had been ignored, inasmuch as the company's officials had constantly refused to hold an investigation. They further claimed that when the brakeman was called to go out on the road a week after the

accident he declined to go on the advice of a doctor.

The Board declared in its statement that it was of the opinion that the Railway was justified in its action, but considered that the discipline should be amended. The decision of the Board was as follows:

Employee's claim for reinstatement is sustained, without pay for time lost, provided he reports for duty at Division Headquarters within forty-five days.

Case No. 137—The Canadian National Railways, western lines, and the Brotherhood of Railroad Trainmen.

Two switchmen of the Canadian National Railways at Winnipeg made a claim for payment for a period of ninety-two days when they had been held out of service. It appears from the joint statement that these men had been arrested for the alleged theft of tobacco from a car in possession of the Canadian National Railways, and they were committed for trial. At the first trial the jury disagreed, and when the case was re-heard before another judge and jury they were found not guilty. On behalf of the Railways it was claimed that sufficient evidence was available to warrant the matter being turned over to the Crown, and in view of the fact that the Crown considered the evidence sufficient to allow the case to go to trial the Company claimed they were in no way responsible for the time lost by these men while they were under indictment. It was claimed by the employees that these men were arrested at the instigation of the Railway Company, and on being tried they were found not guilty and were acquitted. Subsequently they were taken back into the service of the Company. It was contended in view of the circumstances that these men were entitled to payment for the time they were held out of service, that is, the period between the date of their arrest and their return to duty.

By decision of the Board the claim of the employees was sustained.

Case No. 138—The Canadian Pacific Railway Company, western lines, and the Brotherhood of Railroad Trainmen.

A yard crew of the Canadian Pacific Railway Company, western lines, was cancelled on April 15, 1921, overtime made during the month being included in making up the month's guarantee, provided for in Article 18 of the Yardmen's schedule. This article reads as follows:

Regular yardmen who do not lay off of their own accord and are held for entire month to fill an assignment will be paid for not less than the calendar working days of the month or their proportion thereof when an assignment is created or discontinued.

This will not apply to irregular yard service unless men are held for such service.

The company claimed that ever since this article was inserted in the schedule the guaranteed payment included all time made during the month, and that in fact the intent of the article was to protect men held for duty so that their earnings each month would at least equal the pay for the number of calendar working days in the month. It was claimed that the company had applied the proper interpretation of the rule since its insertion in the schedule.

The employees contended that Article 18 of the present yard schedule referred only to the calendar working days of the month, and provided a guarantee for pay for each and every calendar working day, and did not contemplate that crews might be cancelled on certain days and the overtime earned on other days used to make up the guarantee as in this case.

By decision of the Board the claim of the employees was sustained.

Case No. 139—The Canadian Pacific Railway, western lines, and the Brotherhood of Railroad Trainmen.

A yard crew on regular assignment at Calgary, starting work at 11.30 p.m., was cancelled on Saturday, December 3, 1921, the crew not being required.

Payment for this day was claimed by a member of the crew, but was refused.

The Company claimed that this man was paid for 29 days during the month of December and was therefore paid for not less than the calendar working days of the month, as required by Article 18 of the yardmen's schedule. (The text of Article 18 is given in case No. 138 above).

The employees contended that Article 18 referred only to the calendar working days of the month and did not contemplate that the crew might be cancelled on certain days and the Sundays worked in the same month used to make up the guarantee. They claimed that Sundays were not included in the guarantee in Article 18, but must be paid for irrespective of and in addition to the guarantee of the calendar working days of either a six or seven day assignment.

The decision of the Board was as follows:

The claim of the employees is sustained to the extent that Sunday time cannot be used to apply against guarantee. The Company should, however, designate in the different yards, according to the requirements of the service, whether or not the assignment commencing late Saturday night and ending Sunday morning, or the assignment commencing late Sunday night and ending Monday morning, is the Sunday assignment.

Case No. 140—The Canadian Pacific Railway, western lines, and the Brotherhood of Railroad Trainmen.

A yardman of the Canadian Pacific Railway, western lines, holding a regular assignment, was not called on December 26, 1921, or on January 2, 1922. He claimed payment for these days, but was refused by the Company on the ground that they were legal holidays. The Company contended that Christmas and New Year's day falling on a Sunday, the following Mondays, December 26 and January 2, were generally observed as holidays. Therefore, under the agreement, both of the above days being recognized as holidays the yard crews were not called or required to work. The Company declined payment for these

days, owing to the fact that they were generally observed as legal holidays and the members of all organizations who were called upon to work on those days under the agreement were paid over-time for working on a legal holiday.

The employees contended that the order-in-council, which proclaimed December 26, 1921, and January 2, 1922, public holidays, only applied to the public service of Canada and did not apply to assigned yard crews, employees of the Canadian Pacific Railway Company. They claimed that this yardman should be paid in accordance with Article 18 of the yard schedule (see Case No. 138 above).

The Board declared that December 26, 1921, and January 2, 1922, were legal holidays observed as Christmas Day and New Year's Day respectively, and by its decision the claim of the employees was denied.

Case No. 141—The Canadian Pacific Railway, western lines, and the Brotherhood of Railroad Trainmen.

A controversy arose over the dismissal of a brakeman of the Canadian Pacific Railway for alleged violation of Rule "G", having been reported by a caller of the railway to have been under the influence of liquor. The employees contended that this brakeman should not have been dismissed, as they alleged no evidence was produced at the time which showed that he was under the influence of liquor. The only statement furnished in the case was supplied eleven months later when the general manager of the company informed the men's committee that he had the caller's original statement.

In its general statement the Board said:

There appears to have been some misunderstanding and considerable delay in dealing with the matter when originally taken up between the representatives of the Committee and of the Company.

The Board cannot, of course, countenance any violation of Rule "G", about the evidence of which there can be no question.

The decision of the Board was as follows:

Under all the circumstances the Board recommends to the Company a reconsideration of the discipline applied in the case.

Case No. 142—The Canadian Pacific Railway, western lines, and the Order of Railway Conductors.

A railway conductor of the Canadian Pacific Railway was dismissed for threatening violence to an officer of the Company, and for attempting to incite another employee to an open act of insubordination. The employees contended that the investigation in this case was irregular as it had been conducted by officers of the Alberta district while the occurrence took place in the British Columbia district. They also contended that the discipline was excessive.

By decision of the Board the claim of the employees was denied.

Case No. 143—The Harbour Commissioners of Montreal and the Brotherhood of Railroad Trainmen.

A foreman employed by the Harbour Commissioners of Montreal in switching operations was dismissed on the charge of interfering with a police officer in the execution of his duties and obtaining from him a bicycle belonging to another man, which was subsequently lost. The employees contended that the affair was merely a practical joke and requested that the foreman be reinstated and paid for his lost time. The Harbour Commissioners submitted that the acceptance of the "joke plea" would open the way to abuses that might lead to the appropriating by employees of more valuable property than in this instance belonging to the public or to the Commissioners. Both parties agreed to accept as final and binding the decision of the Board in the case.

The decision of the Board was as follows:

The Board sustains the Harbour Commissioners in its conclusion that the bicycle was lost through the interference by Foreman W— with the police officer in the performance of

his duties, but considers that the discipline should be modified to the extent of reinstatement without pay for time out of service; time lost to count as suspension.

Case No. 144—The Toronto, Hamilton and Buffalo Railway and the Brotherhood of Locomotive Engineers and the Brotherhood of Locomotive Firemen and Enginemen.

A controversy arose between the Toronto, Hamilton and Buffalo Railway and its locomotive engineers and trainmen with reference to payment for pushing trains out of Coyle yard. The rule governing this work is in Article 28 (b) (20 b of Supplement 24 to G. O. No. 27) of the schedule of the locomotive engineers and firemen, which reads in part as follows:

Where regularly assigned to perform service within switching limits yardmen shall not be used in road service when road crews are available, except in case of emergency. When yard crews are used in road service under conditions just referred to they shall be paid miles or hours with a minimum of one hour, whichever is the greater, for the class of service performed, in addition to the regular yard pay, and without any deduction therefrom for the time consumed in said service.

The points at issue are set forth in the joint statement submitted by both parties as follows:

Westbound tonnage trains are pushed out of Coyle yard (provided switch engine is not otherwise engaged), this being part of the regular duties of the switch engine. This practice has been in effect since switch engine was established in Coyle yard about twelve years ago.

This engine has been used more or less, depending upon conditions, to push trains beyond the west yard limit board. The enginemen have presented claims under the current schedule for a minimum of one hour (actual time about 30 minutes) at through freight rates for this service in addition to the regular yard pay and without deduction therefrom. The claims were declined by the Railway Company and the engine crew paid continuous time at yard rates.

The employees contended that since Article 28 (b) of the present schedule became effective, yard crews were not required to assist trains beyond the west yard limit board until recently. They

claimed that the yard engine crew, when pushing through freight trains beyond the yard limit board were engaged in road service and should therefore be paid in accordance with Article 28 (a) which reads as follows:

No 28 (a)—Yard engineers and firemen working between H. & D. Junction and Summit, between Bartonville and Vinemount, and between frontier yards and Coyle will be paid miles or hours at through freight rates for actual service only with a minimum of one hour.

The Company contended that the use of the Coyle yard engine to push freight trains out of that yard to a point beyond the west yard limit board did not constitute road service in accordance with the intent of Article 28 (b) of the schedule, as road rates had never been paid Coyle yard engine crews when they ran beyond the yard limit board, and that this practice was practically confined to winter operations. It was also pointed out that Article 28 (b) quoted in the joint statement of facts dealt with "switch limits" not with "yard limit" boards.

It was pointed out by the Board that in the joint statement of facts it was shown that the practice of switch engines assisting through freight trains beyond the Coyle yard limit board had been in effect since the switching engine was established in that yard about twelve years ago.

By decision of the Board the claim of the employees was denied.

Case No. 145—The Toronto, Hamilton and Buffalo Railway Company and the Brotherhood of Locomotive Engineers and the Brotherhood of Locomotive Firemen and Enginemen.

A controversy arose between the Toronto, Hamilton and Buffalo Railway and its locomotive engineers and firemen as to the coaling of engines at the Aberdeen coal dock at Hamilton. Since the dock was built in 1912, road engine crews had, until recently, coaled practically all their engines, being paid an arbitrary allowance of six miles, in accordance with Article 16 of the Rates of Pay

and Rules governing the service of locomotive engineers and firemen which reads as follows:

Engineers and firemen in through and local freight, passenger and work train service will be allowed an arbitrary of six miles for the time consumed in coaling and sanding their engines at Aberdeen Coal Dock.

Prior to January 12, 1922, the coaling was generally done after the completion of the trip or day, but since then the Company had, with few exceptions, used hostlers for coaling through and local freight, passenger and work train engines, and required yard engine crews to coal their engines during the 45 minutes preparatory time provided for under Article 36 (b) which reads as follows.

On single crewed switch engines, engineers and firemen are required to report 45 minutes before time train is timed to leave.

The enginemen contended that the Management should carry out the terms of Article 16, quoted above, and that the coaling of yard engines should be done according to the agreed past practice, that is, after the completion of their regular day's work, and that the 45 minutes preparatory time referred to in Article 36 (b) was never intended for the coaling of engines and had never been used as such until January, 1922. They claimed that the Company should not abrogate Article 16, but if their right to do so were conceded the Company should revert back to the practice in force prior to 1912, that is, the coaling and sanding of all engines should be done by the roundhouse force.

The Company contended that Article 36 (b) did not state what work should be required of enginemen during the 45 minutes preparatory time, and that it was entirely within its rights in having engines coaled in the preparatory time. The use of hostlers for coaling through and local freight, passenger work and train service engines, and the use of yard enginemen during their preparatory time for coaling yard engines resulted in a considerable saving and the Company contended they were justified

in taking advantage of this when there was no violation of their agreement with the employees. There was nothing in the present or any previous agreement which gave the enginemen the privilege of coaling and sanding all engines, or made it obligatory on the part of the Company to give them this work.

The Board stated that it appeared "that there was no disposition on the part of the Company to abrogate Article 16 of the schedule and that the Company was justified in calling upon engineers and firemen of through and local freight, passenger and work trains to coal and sand engines at Aberdeen coal dock, paying therefor an arbitrary of six miles for time consumed in such service, or having this work performed by roundhouse force, at its option." With respect to yard engines, the Board found "that it was not the practice under existing or previous schedules up to January, 1922, to require engineers and firemen on yard engines to coal and sand engines during preparatory time."

The decision of the Board was as follows:

The position of the Company is sustained in the matter of engines in through and local freight, passenger and work train service. The claim of the employees is sustained in respect to yard engines.

Case No. 146—The Toronto, Hamilton and Buffalo Railway Company and the Brotherhood of Locomotive Engineers, The Brotherhood of Locomotive Firemen and Enginemen, The Order of Railway Conductors, and The Brotherhood of Railroad Trainmen.

The Michigan Central Railroad and the Toronto, Hamilton and Buffalo Railway operate a joint service between Buffalo and Hamilton, en route to and from Toronto. On June 26, 1921, the Michigan Central Railroad adopted the Canadian Standard Code of train rules, under which the train service employees of the Toronto, Hamilton and Buffalo Railway had been operating for two years. On August 8, 1921, the superintendent of the Toronto, Hamilton and

Buffalo Railway issued the following notice:

The Michigan Central have advised that all T. H. & B. employees in joint service must write that Company's train rules examination book. All concerned will be governed accordingly. Examination books may be had on application to this office and may be written by the employees where and as desired within a reasonable time.

The chairmen of the four train service committees presented a claim for five days' pay for each man who had written the rules. This claim was denied by the Company.

The employees contended that they had always been paid in the past for writing Michigan Central Railroad rules, thus establishing the precedent and constituting an admission on the part of the Company that the service of writing rules for another road should be paid for; that certain enginemen who were not at that time actually working on joint runs were instructed by personal letter to write these rules, this constituting a definite order from the Company; that the Company was not within its rights in ordering the employees to perform a service of this nature without compensation, and that the compensation claimed was fair, as the Michigan Central Railroad had paid certain of its employees five days' pay for preparing, writing and passing Toronto, Hamilton and Buffalo Railway rules under identical circumstances to those prevailing in the present case of the Toronto, Hamilton and Buffalo Railway employees. They contended that although they did not actually lose time

from their runs, yet the time used in writing M.C.R.R. rules was time that rightfully belonged to themselves, and that they should be paid for the same; and that there was a difference between the Rule and Examination books of the two companies.

On behalf of the Company it was claimed that at no time were instructions issued requiring T. H. & B. employees to attend instruction classes in connection with the adoption of standard rules by the M.C.R.R. The M.C.R.R. made various allowances up to five days to engineers and conductors for learning and writing T. H. & B. standard rules in 1918, but made no allowance to trainmen or firemen. The only circumstances under which the T. H. & B. employees had ever been allowed time for writing M.C.R.R. train rules was when such employees were required to go to M.C.R.R. headquarters for the sole purpose of writing the rules or of learning the road; in such cases they were allowed a minimum day for each twenty-four hours lost. It was further contended that in accordance with past practice its employees were not entitled to compensation for writing the rule book of the M.C.R.R. in order to qualify for joint service, no time having been lost by them in doing so.

The Board pointed out that notwithstanding the claims as submitted were for five days' pay each, it was shown in the employees' statement that they did not lose any time writing the rules.

By decision of the Board the claim of the employees was denied.

STRIKES AND LOCKOUTS IN CANADA DURING OCTOBER, 1922

THE following table shows the number of strikes in existence in Canada at some time or another during October, 1922, together with the number of employees involved and the time loss in working days, as compared with the previous month and with October, 1921.

	Dis- putes	Employees involved	Time loss in working days
October, 1922.....	17	3,229	54,502
September, 1922.....	18	15,275	91,900
October, 1921.....	17	1,897	46,036

As in the previous month the greatest time loss during October was in the group including the printing and publishing trades, in which there were 10 strikes involving 1,826 workpeople and resulting in a time loss of 47,506 working days.

Two strikes commenced during the month, involving 193 employees and resulting in a time loss of 411 working days. Of the 18 strikes in existence in September, 15 were carried over into October, these causing a time loss of 54,091 working days during the month under review. Two of the strikes in existence in September, those of coal miners at Canmore and shipbuilders at Three Rivers, and the two new strikes commencing during October, terminated in October. At the end of the month there were, therefore, still on record 13 strikes, affecting 2,013 workpeople as follows: photo engravers, Montreal; three strikes of printing compositors at Montreal; printing compositors, Hamilton; printing compositors, Toronto; printing compositors, Winnipeg; printing compositors and pressmen, Halifax; printing compositors and pressmen, Ottawa; printing compositors and pressmen, Vancouver; norrow gauge enginemen of steel plant, Sydney; railway employees of steel and

coal companies, Sydney, and motormen and conductors at Niagara Falls.

Disputes by Industries

The following is a review of disputes by industries in the order in which they appear in the statistical table. A brief reference is made to the more important strikes.

MINING, NON-FERROUS SMELTING AND QUARRYING

On September 29, a strike of 323 coal miners at Canmore, Alta., occurred in a dispute regarding the district agreement. After being idle three days work was resumed October 3. At Drumheller, Alta., a strike occurred on October 17, affecting 168 coal miners. This strike was against the temporary laying off of an employee; and two days later, on his reinstatement, work was resumed.

MANUFACTURING

Printing and Publishing.—There was no change in the strikes in this group during October. Ten strikes were still in existence involving 1,826 workpeople and resulting in a time loss of 47,506 working days.

CONSTRUCTION

Shipbuilding.—A strike of 700 shipbuilders at Three Rivers which commenced during September was terminated during October. A demand had been made for an increase of 10 per cent in the rates of wages. When this was refused the strike occurred, but after negotiations were carried on between the parties, work was resumed on October 4, at the rates prevailing prior to the strike.

TRANSPORTATION

No change occurred in the strikes affecting railway employees of steel and

STRIKES AND LOCKOUTS DURING OCTOBER, 1922.

Industry, occupation and locality	Number of employees involved	Time loss in working days	Particulars
(a) Strikes commencing prior to October, 1922.			
MINING, NON-FERROUS SMELTING AND QUARRYING—			
Coal miners, Canmore, Alta.....	323	323	Commenced September 29. Dispute in regard to agreement. Work was resumed October 3.
MANUFACTURING—			
<i>Printing and publishing:</i>			
Photo engravers, Montreal, Que..	30	780	Commenced May 2, 1921. For shorter hours. Underminated.
Printing compositors, Hamilton, Ont.	49	1,274	Commenced May 2, 1921. Alleged violation by employers of 44-hour clause in agreement. Underminated.
Printing compositors, Montreal, Que.	10	260	Commenced June 14, 1921. Objection of men to perform work that came from shop where strike existed. Underminated.
Printing compositors, Montreal, Que.	410	10,660	Commenced July 1, 1921. For increased wages and 44-hour week. Underminated.
Printing compositors, Montreal, Que.	25	650	Commenced September 15. Employer refused to negotiate a new agreement with the Union. Underminated.
Printing compositors, Toronto, Ont.	876	22,776	Commenced June 1, 1921. For increased wages and 44-hour week. Underminated.
Printing compositors, Winnipeg, Man.	191	4,996	Commenced July 1, 1921. Alleged lockout following refusal of employers to renew agreement. Underminated.
Printing compositors and pressmen, Halifax, N.S.	51	1,326	Commenced May 2, 1921. For shorter hours with same weekly wages. Underminated.
Printing compositors and pressmen, Ottawa, Ont.	152	3,952	Commenced June 1, 1921. For increased wages and 44-hour week. Underminated.
Printing compositors and pressmen, Vancouver, B.C.	32	832	Commenced May 2, 1921. For increased wages and 44-hour week. Underminated.
<i>Iron, steel and products:</i>			
Narrow gauge enginemen of steel company, Sydney, N.S.	16	416	Commenced June 9, 1921. In sympathy with employees of steel and coal companies. Underminated.
CONSTRUCTION—			
<i>Buildings and structures:</i>			
Painters, Toronto, Ont.....			Commenced May 15, against a reduction in wages from 75 cents to 65 cents per hour. Information received indicates employment conditions no longer affected.
<i>Shipbuilding:</i>			
Shipbuilders, Three Rivers, Que...	700	1,400	Commenced September 26, for an increase of 10 per cent in the rate of wages. After negotiations had been carried on work was resumed October 4, on the same terms as prevailed previous to the strike.
TRANSPORTATION—			
<i>Steam Railways:</i>			
Railway employees of steel and coal companies, Sydney, N.S.	150	3,900	Commenced November 22, 1920. For increased wages and improved working conditions. Underminated.
<i>Street and electric railways:</i>			
Motormen and conductors, Niagara Falls, Ont.	21	546	Commenced July 1, for recognition of the union. Underminated.
SERVICE—			
<i>Personal:</i>			
Restaurant employees, Edmonton, Alta.			Commenced July 27, against a reduction of 25 per cent in wages. Information received indicates employment conditions no longer affected.

STRIKES AND LOCKOUTS DURING OCTOBER, 1922.—(Continued).

Industry, occupation and locality	Number of employees involved	Time loss in working days	Particulars
(b) Strikes commencing during October, 1922.			
MINING, NON-FERROUS SMELTING AND QUARRYING—			
Coal miners, Drumheller, Alta.....	168	336	Commenced October 17, in protest against an employee being temporarily laid off. After negotiations the employee was reinstated on October 19.
TRADE—			
<i>Animal products:</i>			
Fowl pluckers, Toronto, Ont.....	25	75	Commenced October 2, against a reduction of 1 cent per bird. After negotiations work was resumed on October 5, at the reduced rate.

coal companies of Sydney, and motor-men and conductors at Niagara Falls.

TRADE

On October 2, a strike of 25 feather pluckers in the plants of poultry produce houses, occurred at Toronto as the result of a reduction of one cent per bird being made. The prevailing rate

had been 5½ cents per bird; after a strike of three days' duration work was resumed on October 3 at the reduced rate.

SERVICE

In the case of the restaurant employees' strike at Edmonton, information received indicates employment conditions were no longer affected.

STRIKES AND LOCKOUTS IN GREAT BRITAIN DURING SEPTEMBER, 1922

THE British *Ministry of Labour Gazette* for October contains the following information respecting strikes and lockouts in Great Britain, during September, 1922, based upon returns from employers and workpeople.

NUMBER, MAGNITUDE AND DURATION.—

The number of trade disputes involving a stoppage of work, reported to the Department as beginning in September, was 31, as compared with 32 in the previous month, and 57 in September, 1921. In these new disputes nearly 10,000 workpeople were involved either directly or indirectly (i.e. thrown out of work at the establishments where the disputes occurred, though not themselves parties to the disputes). In addition, about 5,000 workpeople were involved in 30 disputes which began before September

and were still in progress at the beginning of that month. The number of new and old disputes in progress in September was thus 61, involving nearly 15,000 workpeople, and resulting in a loss during September of about 140,000 working days.

The principal dispute in progress in the month was one beginning on September 21, involving about 5,000 coal miners and coke-oven workers at Ebbw Vale. A considerable number of blast furnacemen and steel workers, etc., were rendered idle owing to this stoppage.

CAUSES.—Of the 31 disputes beginning in September, 15, directly involving over 6,000 workpeople, arose out of proposed reductions in wages; 3, directly involving about 2,000 workpeople, on

questions respecting the employment of particular classes or persons; and 13, directly involving about 1,000 workpeople, on other questions.

RESULTS.—Settlements were effected in the case of 19 new disputes, directly involving 3,300 workpeople, and 15 old disputes, directly involving 1,500 workpeople. Of these disputes, 10, directly involving 300 workpeople, were settled in favour of the workpeople; 9, directly involving 3,000 workpeople, in favour of the employers; and 15, directly involving 1,500 workpeople, were compromised. In the case of 3 disputes, directly involving 400 workpeople, work was resumed pending negotiations.

The following table classifies the dis-

putes in progress in September by groups of industries:—

Groups of industries	No. of disputes in progress in September			Number of workpeople involved in all disputes in progress in Sept.	Aggregate duration in working days of all disputes in progress in Sept.
	Started before Sept. 1.	Started in Sept.	Total		
Building	5	2	7	1,000	21,000
Mining and quarrying	7	4	11	9,000	81,000
Metal, engineering and shipbuilding	9	5	14	2,000	23,000
Other trades	9	20	29	3,000	17,000
Total, Sept., 1922	30	31	61	15,000	142,000
Total, Aug. 1922	35	32	67	31,000	312,000
Total, Sept., 1921	43	57	100	20,000	146,000

CONVENTION OF ONTARIO COUNCIL OF UNITED BROTHERHOOD OF CARPENTERS AND JOINERS OF AMERICA

THE eighth annual convention of the Ontario Provincial Council of the United Brotherhood of Carpenters and Joiners of America was held at London, Ont., on June 29 to July 1. There were present 24 delegates representing 73 local unions and a membership of 4,457, also fraternal delegates from the Quebec Provincial Council and the Boot and Shoe Workers, a member of the General Executive Board and organizers of the Brotherhood. The president, Mr. Thomas L. Clancy, occupied the chair.

The secretary-treasurer's report showed a loss in membership during the year of 2,273, or 32.8 per cent, which was attributed to the large amount of unemployment during the past two years. A special campaign which had been conducted during the last four months of the year, however, had resulted in between 150 to 200 new members being added. The cost of the campaign to the Council was \$436. The financial statement showed the organization with \$1,071 on hand. The receipts for the year ended June 24, 1922, amounted to \$3,926, and the expenses to \$2,855.

The convention by a resolution commended the action of the Dominion Government in issuing an order-in-council on June 7 respecting Fair Wage conditions in government contracts. By another resolution the convention decided to oppose the letting of contracts for public works in the Province of Ontario which do not contain a clause providing for the payment of the prevailing rate of wages, and the current hours in the district where the work is being done, and to request the Ontario Minister of Labour to see that the Fair Wage policy already approved by the Legislature, be carried out. It was also decided to ask the Provincial Government to bring in Fair Wage legislation along lines similar to those adopted by the Dominion Government. The convention also decided to urge the Dominion and Provincial Governments to take action against the installation of the bonus system in industries and trades, claiming that it not only demoralized the workers but that it had a tendency to lower their vitality. It was also decided to request the Dominion

and Provincial Governments "to implement Canada's obligations as a member of the League of Nations by passing legislation providing for a maximum work-day of eight hours."

Mr. Alfred Cheeseman of Toronto, was elected president and Mr. T. Jackson was re-elected secretary-treasury of the Council. Ottawa was chosen as the place of meeting of the next convention.

CONVENTION OF THE INTERNATIONAL PHOTO-ENGRAVERS' UNION

THE twenty-third annual convention of the International Photo Engravers' Union was held at Chicago, Ill., on August 21 to 26. There were 52 delegates present representing 31 local unions comprising 5,567 members, or approximately 90 per cent of the membership. The president, Matthew Woll, was in the chair. Addresses were delivered by John Fitzpatrick, president of the Chicago Federation of Labour; Victor Olander, secretary-treasurer of the Chicago Allied Printing Trades Council; Harry E. Scheck, representing the Chicago Trade Union Label League; Leonard Craig, representing the Tom Mooney Molders' Defense Committee; John Hayes, secretary-treasurer, International Typographical Union; Sam Marx, representing the International Printing Pressmen and Assistants' Union; and George W. Perkins, representing the American Federation of Labour.

The secretary's report showed the receipts for the fiscal year ended May 31, 1921, as \$308,835, an increase of 70 per cent over the previous year, and the expenditures as \$300,835, an increase of 100 per cent over the previous year. A sum of \$141,125 was received during the last five months due to the levying of a special assessment to provide financial support for members locked out or on strike or otherwise unemployed. Of the total receipts, approximately 80 per cent was returned to the membership in the form of direct benefits, there being \$193,507 expended for strike benefits, \$9,900 for funeral benefits, and \$27,914 for tuberculosis benefits. The per capita tax of maintaining the organization for the year, including the cost of organizing was approximately \$9.67. There

were 30 labels issued during the year as compared with 36 in the previous year.

The Canadian representative, Mr. William C. Golby, of Toronto, reported that general depression during the past year had affected the industry in Canada and "that each shop seems to look for some opportunity to accuse its competitor of price-cutting and under our co-operative agreements this tends to keep the feeling strained between the employers and the union."

The statistics obtained in an international wage survey conducted by the Union during the year had shown, according to the report of the Executive, "great achievement in this matter," and it was stated that information required by local unions for guidance in wage negotiations could be obtained from the secretary-treasurer. It was decided that a similar survey should be conducted during the coming year.

JOINT INDUSTRIAL COUNCIL.

Regret was expressed that the usefulness of the Joint Industrial Council had been, it was alleged, reduced because some of the employers had failed to observe the fundamental requirements upon which the Council was originally founded, it having no authority to deal with questions regarding the determination of wages and working hours and conditions which are considered as questions for collective bargaining between the local unions and employers. The convention expressed general approval of the Joint Council but stated that its activities should be limited to its proper sphere.

WAGES, HOURS AND SHOP RULES.

With respect to the matters of wages, hours and shop rules, it was decided that the best means to combat the "open shop" movement is for locals to discourage unfair practices by their members, to encourage shop production, elimination of waste, the performance of a fair day's work, and the development of cordial and co-operative relations with the employers, to amend their union rules to provide a safeguard against abuses where unemployment benefits are provided and to confine these benefits only to members who have shown by their conduct that they are worthy of support and that they are willing to work under fair conditions. An investigation by the union during the year had shown that unemployment benefits proved most satisfactory when supervised and controlled locally.

CO-OPERATIVE SHOPS AND STOCK-BUYING.

It was stated that within recent years there has been a gradual tendency for journeymen of the craft to enter the photo-engraving business as co-partners, each supplying a proportionate share of the capital, and that the acquiring of stock in the firm had been encouraged by some of the older engraving concerns who used as incentives for their proposals permanency of employment, preference in kindly treatment and the sharing of profits without entailing losses. These actions, it was thought, were not inspired by motives for the welfare of the workers, and, it was stated, that experience had demonstrated that the individual who had hoped to benefit by the purchase of stock had in most cases suffered ultimately. The following motion was adopted with respect to stock-acquiring and co-operative shops:

(a) Stock acquiring—

1. That the Executive Council shall institute a searching enquiry into all purchases made by members of stock in the firms where they have been, or are now employed and of what transpired under such ownership of stock; and that

this information be furnished to all members.

2. That before members shall interest themselves as shareholders or through other financial investments, in any of the photo-engraving concerns, they shall be required to first advise the International President of such intent and of the arrangements of investments under consideration so that proper and competent advice may be furnished such members.

3. To enable the International President to give proper and complete advice, he shall be authorized to consult such authorities as will aid him in properly performing this function.

(b) Co-operative shops—

1. That a careful survey be made of all existing co-operative shops and that this survey be made jointly with our employers if possible, or that it be made by our International Executive Council if our employers decline to join in this undertaking.

2. That our employers be requested to join with us in the formation of an authentic source for trade information, trade opportunities and trade guidance, as well as to council upon efficient management, and that if our employers decline to participate in this work, our Executive Council proceed in this undertaking without such co-operation.

3. That all co-operative shops shall be required to observe like conditions of employment as are enforced in all other establishments and that local unions pre-determine the number of journeymen workers required to organize and operate a union establishment of photo-engravers.

CO-OPERATION IN RESEARCH WORK.

The trade union movement was claimed to hold forth many opportunities for trade development and craft improvement which cannot be successfully undertaken other than through the collective authority and response of both employers and workers. A resolution

was adopted which, in particular, recommended:

1. That we co-operate with employers in the maintenance of cost records so long as they are properly administered and are made to serve the purpose for which they are intended.

2. That these records shall be available to officers and representatives of our respective local or international unions whenever requested.

3. That the employing photo-engravers be again approached by our international officers for the purpose of jointly undertaking research work for the industry and to devise such plans whereby all within the industry will profit alike in whatever improvement may enter our craft or calling.

OTHER MATTERS.

The convention authorized the President in co-operation with the Executive Council to further negotiate an arbitration agreement with the publishers, in accordance with recommendations contained in his report; to endeavour to obtain the co-operation of the employers in an investigation into trade diseases and sanitary shop conditions affecting the craft and if unsuccessful in obtaining their co-operation to join in this movement with the printing trade unions and to make such financial contribution as they deem justified; to endeavour to secure better tariff protection for the American printing and engraving industry; to have the excessive postage rates in second class mail matter reduced and the zoning system abolished; to co-operate with the Authors' League in amending the Copyright Law; and to endeavour to bring about a closer bond of unity with fellow craftsmen

abroad. The convention was opposed to the One Big Union for the printing trades.

With regard to photo-engraving schools, it was pointed out that harm follows where the effect of trade education is to overcrowd an industry, depress the workers and weaken their economic existence, and it was recommended that the International officers should consult with the officers of the employers' association in this matter. It was also recommended that the union co-operate with the employers in the preparation of a text-book upon photo-engraving, and failing the co-operation of the employers to proceed with the work independently.

The subject of convict engraving and printing was discussed and dangers which might result from the system outlined. As a result of a protest from the printing and engraving unions legislation was averted during the year which would, if adopted, have made it mandatory for state printing of every description to be done in the prisons, reformatories, and other institutions of New York state. The convention commended the action taken and authorized the International officers to keep informed of all counterfeiting being practised and with the aid of the members and local unions co-operate with the Government to prevent reproduction by the photo-engraving process detrimental to the public welfare.

Mr. Matthew Woll was re-elected president, and Mr. Henry F. Schmal re-elected secretary-treasurer.

The city of Milwaukee was chosen as the place of meeting for the 1923 convention.

PROCEEDINGS OF THE THIRD ASSEMBLY OF THE LEAGUE OF NATIONS

Resolution on the Unemployment Problem

THE Third Assembly of the League of Nations was held at Geneva, Switzerland, from September 4 to September 30. Representatives of 45 States were present at the beginning and in the course of the session one new member, Hungary, was admitted to the League. Six member States were not represented. The representatives of Canada were the Honourable W. S. Fielding, Minister of Finance, and the Honourable Ernest Lapointe, Minister of Marine and Fisheries. Mr. Augustin Edwards (Chili) was elected President of the Assembly. The work of the Assembly was distributed among six committees which dealt with the following subjects: (1) Legal and constitutional questions, such as the amendment of Article 10 and Article 18 of the Covenant, the report of the committee on the Procedure of Conciliation, the allocation of the expenses of the League, and the election of the non-permanent members of the council. (2) The work of the technical organization, including the Transit, the Health and the Economic and Financial Organizations, and the work of the Committee on Intellectual Co-operation. (3) The reduction of armaments. (4) The budget and other financial questions of the League. (5) Social and general questions such as the Traffic in Opium and in Women and Children, Russian Refugees, the Deportation of Women and Children in Turkey, etc. (6) Political questions, including the admission of new States. Honourable Mr. Fielding was elected chairman of the Committee dealing with social and general questions.

During the session a general survey over the whole field of activities of the League was taken and a number of

important decisions were reached, advancing practically every line of League work.

The Assembly approved the decision of the Council of the League of Nations to increase from four to six the number of non-permanent members of the Council elected by the Assembly. Brazil, Spain, Belgium and China were re-elected and Sweden and Uruguay were added.

The problem of the reduction of armaments had been considered during the past year by the Temporary Mixed Commission for the Reduction of Armaments set up by the First Assembly. The Commission presented a comprehensive report which was closely examined by the Third Committee of the Assembly and by the Assembly itself, and a precise programme was given to the Commission for its work until the next Assembly. Three main points were brought out in the resolutions adopted. The first was the necessity for an early settlement of the question of reparations and inter-Governmental debts; the second dealt with the means of providing by mutual guarantees the security which will enable Governments to accept reduction of armaments; and the third provided for an international conference for the extension of the principles of the Naval Treaty of Washington to all non-signatory States.

With regard to amendments to the Covenant of the League of Nations the decision was made that it would not be wise to make any change until further study and experience could be had.

A committee of jurists had been appointed by the Second Assembly to

consider proposals made by Norway and Sweden for the pacific settlement of international disputes by the action of commissions of arbitration and conciliation. The committee proposed that the Assembly recommend the Members of the League subject to the provisions of the Covenant to conclude conventions establishing commissions of conciliation for the amicable settlement of international disputes. The committee also drew up a number of articles suitable for inclusion in such conventions. The Assembly adopted the proposal of the jurists' committee with an added note that the development of the system of bilateral conventions may ultimately make a general convention desirable and possible.

The Assembly voted a budget of 25,-673,508 gold francs for 1923 as against 22,238,335 francs for 1922. Of this budget 15,593,046 francs is for the general secretariat, 8,200,462 francs for the International Labour Organization and 1,880,000 francs for the Permanent Court of International Justice.

The work of the Committee on Intellectual Co-operation, which held its first session at the beginning of August was approved by the Assembly, and financial provision was made for the accomplishment of its more urgent tasks. The Assembly approved the investigation undertaken by the committee regarding the material situation of intellectual workers in different countries and intellectual proprietary rights. It also approved the committee's recommendation regarding an international initiative in favour of rapid and complete distribution of scientific information and ensuring better co-operation in research work. The Assembly further suggested a form of intellectual co-operation consisting in the procuring of books and scientific documents for universities and schools in those countries which on account of depreciated currency could not afford to pay for them.

The Assembly approved the work of the Economic and Financial Commission of the League and expressed the hope that, while scrupulously respecting state sovereignty, it would continue to work for the application of the principles of sound finance that were recommended at the Brussels Conference. It further recommended that the financial and economic publications already started be continued and extended within prudent limits.

The Assembly approved the work of the Advisory Organization for Communications and Transit along the lines laid down by the Covenant and the First Assembly. This organization gathers all relevant information on questions of communications and transit, and serves as intermediary between different States for facilitating co-operation in questions of transport and communications. It watches over the way decisions of previous transit conferences are being carried out, studies methods for ensuring freedom of communications and transit as laid down in the Covenant, and applies the resolutions on transport and communications adopted by the Genoa Conference and accepted by the Council.

The Assembly dealt with various political questions such as the right of minorities, the system of mandates, and problems of the Near East. It also took up a number of social and humanitarian questions. Prompt measures were taken for the succour of Greek and Armenian refugees from Asia Minor. Work performed in reclaiming deported women and children in Asia Minor was approved, and a further sum of £1,500 was allocated to the Commission of Inquiry which was in charge of this work. Dr. Fridtjof Nansen, High Commissioner of the League, reported on the work carried out under his direction on behalf of Russian refugees and in the repatriation of prisoners of war. With regard to the latter, the repatriation was reported to have been completed, a total of 427,386 prisoners of war belonging to

26 different nationalities having been restored to their homes, at the cost of funds not exceeding £400,000.

The question of the recrudescence of slavery was raised by Sir Arthur Steel-Maitland, member of the New Zealand delegation, who said there was reason to believe there had been a revival of slavery recently, due to the continued existence of the traffic in arms and ammunition, especially in Abyssinia, whose ruler was unable to suppress it owing to difficulties for which he was not responsible. The Assembly decided that the question of slavery should be included in the agenda of the Fourth Assembly and requested the Council to obtain all practical information and present a report on the subject.

The Advisory Committee on the Traffic in Opium submitted a detailed report, which was examined and approved by the Fifth Committee. The Assembly decided to urge on all governments to adopt the import and export certificate system without delay and proposed that the Advisory Committee should examine whether it would be advisable to ask governments not to issue licenses for the import of opium and other dangerous drugs except from countries which had ratified the Opium Convention and adopted the system of import and export certificates. The Assembly made a further appeal to Governments for information as to the amount of opium and other drugs required by each country for internal consumption, and recommended that the enquiry now being made into the legitimate needs of the whole world should be pressed forward as much as possible. Finally, the Assembly, convinced of the urgent necessity of the fullest possible international co-operation in this work, and in view of the fact that the United States is one of the most important manufacturing and importing countries, recommended to the Council that it address a pressing invitation to the

United States to nominate a member to serve on the Advisory Committee.

Matters affecting International Labour Organization

The Assembly dealt with a number of questions affecting the International Labour Organization.

The admission of Hungary to the League of Nations made that country, ipso facto, a member of the International Labour Organization, bringing its membership up to fifty five countries.

In a discussion of the Unemployment problem it appeared desirable that the Economic and Financial Committee of the League should collaborate with the International Labour Office in the inquiry which it had been called upon to undertake by the International Labour Conference of 1921. The following resolution on this question was passed:

The Assembly, having taken note of the decisions of the General Labour Conference of 1921, calling for an enquiry into the national and international aspects of the unemployment crisis and the means of combating it, and requesting the International Labour Office to call into co-operation the Economic and Financial Sections of the League of Nations for the solution of the financial and economic questions raised by the enquiry.

Requests the Economic and Financial Organization to arrange the scope and method of such collaboration at an early date and to bring to the enquiry conducted by the International Labour Office any information which it has in its possession.

During the discussion of the budget of the International Labour Office Mr. Albert Thomas, Director, outlined the work which had been accomplished by the office during the last year. He stated that in different parliaments there had been introduced 219 bills for giving effect to decisions of the Third International Labour Conference and a number of these had become law. Mr. Thomas referred to the work of the Labour Office in the transfer of social insurance funds in the various territories ceded by Germany in Prussian

Poland and Alsace-Lorraine. Commissions had been appointed by the Governing Body of the International Labour Office to arrange the conditions of the transfer of such funds, and he stated that they had succeeded in obtaining complete agreement between the parties concerned in both cases. States, he said, were tending more and more to have recourse to the International Labour Office for solving such new and complicated questions as the treatment of the disabled. The Director read a list of some of the varied enquiries from Governments during the past year and said that Ministries of Labour increasingly realized that en-

quiries made in other countries were a great expense, and that by availing themselves of the services of the International Labour Office they could effect appreciable economies. Almost daily, he said, applications for information were being received from governments or industrial organizations. With regard to the presentation of information, the Chief of the Research Division of the office had travelled around Europe, visiting the labour ministries and discussing the possibility of arranging more uniform methods. Advice in this direction had been requested by the new states of Europe.

WORK OF THE INTERNATIONAL LABOUR OFFICE, (LEAGUE OF NATIONS)

Report of Director to International Labour Conference

AT the Fourth International Labour Conference (League of Nations) which was held at Geneva in October, the Secretary General of the Conference, Mr. Albert Thomas, introduced his yearly report as Director of the International Labour Office, and made a statement in regard to it. In speaking of the budget he recalled that the General Assembly of the League of Nations had left intact the estimates presented by the Governing Body in spite of a desire for economy on the part of the delegates. The Assembly had also voted a credit for the erection of a permanent home for the office. After referring to the excellent relations existing between the League of Nations and the International Labour Office and to the autonomous character of the International Labour Organization, he continued in part as follows:—

To-day there exists hardly a country able to establish a system of social legislation without being in possession of accurate information regarding the work accomplished in foreign countries. In certain Ministries of Labour it has been considered necessary even to create special sections for foreign

information. The Parliaments themselves have, besides, set up special services, not only for labour questions but for more general political and economic matters. The International Labour Office endeavours to make a satisfactory reply to the questions asked, and I need hardly indicate the value of such services to newly-developing countries, in particular to those which cannot provide the means themselves for securing satisfactory information.

Even the greater countries sometimes consider it necessary to effect economies and approach the Office which, in making such an inquiry for one country, endeavours to do it for all, and which has means at its disposal for the collection of information in different countries which cannot be available in any single country. In this way it has been able to reduce the expenses of various countries.

I take the liberty of saying that in the accomplishment of our task there is further matter of anxiety for the International Labour Office. It is agreed that, for the solution of present social problems, satisfactory information is essential. The more important employers' and workers' organizations need information services of their own, and is it not by means of the distribution of the most scientific information that a policy of conciliation is more easily reached, and that by means of such equitable

decisions social conflicts in the industrial world are frequently avoided?

This is the impartial, scientific effort which we endeavour to perform in the interests of all from day to day, but I venture to say that this effort should be also one of guidance. A short time ago, during the discussions of the International Association for the Legal Protection of Workers, one of the speakers declared that it was necessary to understand exactly what the present situation was from the social point of view, and whether it was possible to guide our efforts amid the tumult of conflicting ideas which arises on every side. To discern new ideas in the midst of social conflicts, to give guidance on them and sometime clarify them, to enable everyone to gain an exact impression of the value of methods suggested is surely one of the tasks which devolve upon the International Labour Office. . . .

I now come to the principal task of our Organization. I speak of the endeavour, whilst following the principles established in the Treaty of Peace, to improve conditions of labour in each country, to endeavour to secure, through the application of Conventions, that the most venturesome countries in the sphere of labour legislation are not affected by the competition of the more backward. This forms the two-fold work of our activities in the realm of international labour legislation.

At the present moment fifty-four nations are members of the International Labour Organization.

The Director then referred to the absence of Russia and the United States, the only two of the greater industrial countries that are missing from the International Labour Organization. With regard to Russia, no steps had been taken in the matter of regulating conditions of labour, except the collection of information and an exchange of publications. The absence of the United States he regarded as more serious. The office was continually endeavouring to establish relations with them by entering into negotiations regarding technical research, such as in connection with the Anthrax Commission. The American Federation of Labour maintains relations with the Office and the United States Chamber of Commerce, sent its president to Geneva to study the International La-

bour Organization. The Director mentioned a number of prejudices that exist against the office and misconceptions as to its activities.

The relations of the office with international organizations were described, and special mention was made of the International Institute of Agriculture in Italy.

With reference to the draft conventions he said the number of ratifications was increasing from day to day and now had reached fifty-three.

In conclusion, the Director expressed his views as to the scope and duties of the International Labour Organization.

A question must be faced by all the Members of the Organization: the problem of their obligations under Article 405 of the Treaty. This Treaty grants the States perfect freedom to ratify or not to ratify. They have fulfilled their obligations and their duties towards the Organization when they have duly submitted the texts of the draft conventions to the competent legislative authorities; they are then free to await the success or the non-success of this action. In a like manner it might be said that the International Labour Organization, that the annual Conference, that the International Labour Office itself, had fulfilled their duty by simply noting the fact that a certain number of States have ratified and that certain others have failed to do so.

This is no doubt one conception of the International Labour Organization, a conception of International life as a whole. A League of Nations may be imagined which would perform its work in the air, and likewise, one could picture an International Labour Organization whose members would meet regularly every year; whose Office, devoting itself exclusively to the task of scientific study and information, would contemplate the developments of international life with detachment and serenity; and which, we may add, would receive the contributions of the various States paid regularly by the latter. Thus an International Labour Office would be in existence with a complete International Labour Organization but the results might be null.

Would you be satisfied? Would it be possible, morally speaking, for the International Labour Office to remain in that condition of tranquility which I have just described?

No, I think, emphatically, that it would be impossible. However great the respect must be which the International Labour Organization must preserve towards national sovereignty, whatever are the limits to which the Conference is confined, it is quite certain that our essential duty is to seek, by all the means in our power, how the principles embodied in the Treaty of Peace can best be realized; how these principles can be translated into conventions and how the latter can become laws enforced by all the various States. That is the essential aim

of our Organization; that great duty which none of us here can evade.

A waiting policy is, nevertheless, a policy; it implies the closest attention and vigilance; it implies men capable of keeping their eyes open amidst all the various social changes which may arise and capable of seeking how the work we are attempting to do can best be adapted to changing circumstances from day to day. And this is the task we must endeavour to carry out by all the means in our power.

FOURTEENTH SESSION OF GOVERNING BODY, INTERNATIONAL LABOUR OFFICE

THE fourteenth session of the Governing Body of the International Labour Office was held at Geneva on October 12 and 13. The Government of Canada was represented by the Honourable James Murdock, M.P., Minister of Labour, and the workers of Canada by Mr. Tom Moore, president of the Trades and Labour Congress of Canada. The report of the Director on the work of the office for the last few months was received and discussed. The formal ratification by the Swiss Government of four of the Draft Conventions of the International Labour Conference at Washington was noted. These relate to unemployment, night work of women, the minimum age for the admission of children to industrial employment, and night work for children. The number of ratifications officially notified to the office was thereby increased to 51.

The Governing Body expressed satisfaction that the United States Government had accepted an invitation to participate in the work of the Anthrax Commission which the International Labour Office had convened for December 5.

At previous sessions the Governing Body had decided to create a Joint Agricultural Advisory Commission to collaborate with the International Institute of Agriculture at Rome, but the nomination of the Commission had

been postponed pending the decision of the Permanent Court of International Justice as to the competency of the Office in agricultural matters and also to enable the employers' group to consult the agricultural employers. As the Court had recognized the competency of the International Labour Organization to deal with agricultural labour matters, and as the chairman of the Employers' Group said he was authorized to state that the agricultural employers were in favour of creating this joint commission, the members of the commission were nominated, consisting of the Chairman of the Governing Body, Mr. Arthur Fontaine (France), representing the Governments; Mr. Carlier (Belgium) representing the employers; and Mr. Leipart (Germany) the workers.

A vote of thanks was passed to the Swiss Government for the offer of a site for the new premises of the Office, and it was decided that a sub-committee of the Budget Committee should deal with all questions connected with the building of the premises. The question of the adoption of German and Spanish as official languages of the International Labour Organization in addition to French and English was discussed, but for administrative and financial reasons it was considered inadvisable to make any change. It was, however, decided, that the public-

ations of the Office should be translated into German, Spanish and other languages so far as available funds would allow. The Governing Body

decided that its chairman should be appointed for one year instead of three and should be eligible for re-election.

SETTLING INDUSTRIAL DISPUTES

(Reprinted from "CANADA", October 14, 1922.)

LABOUR problems are a particularly common source of trouble in Australia, and there has been for some time dissatisfaction with the existing machinery for preventing them. The Premier of South Australia, who is now taking action that has aroused strong hostility on the part of the representatives of Labour, goes so far as to characterise Australia as "the home of strikes." The present system of compulsory industrial arbitration he denounces as "the chief cause of the industrial chaos into which Australia is drifting," and condemns as "cumbersome, uneconomic, slow, and costly," breeding strikes and the bitterest class hatred.

Sir Henry Barwell proposes to abolish

the compulsory Arbitration Committee and to substitute a system of voluntary conciliation. With this object in view, he has borrowed a leaf out of Canada's book, and brought forward legislation on the lines of what is known in Canada as the Lemieux Act. There can be no question of the success of this measure. Out of a total of 558 applications for Boards of Conciliation made during the 15 years it has been in force there were only 34 cases in which strikes were not averted. Whether this machinery will be equally successful under Australian Labour conditions remains to be seen. There seems to be a good deal of doubt about it in South Australia, and the fate of the Government measure is being watched with some anxiety.

LABOUR AND WAGES IN THE PRINTING INDUSTRY IN CANADA

THE Dominion Bureau of Statistics, in continuation of its series of industrial statistics, has issued an exhaustive report on the various branches of the printing industry in Canada for the year 1920, which in-

cludes also certain comparative figures for 1919.

The principal statistics of the industry for 1920, grouped in six sections, are given as follows:

Principal Statistics	Printing and publishing	Printing and book-binding	Litho-graphing and engraving	Stereo-typing and electro-typing	Map making	Blue prints	Total all industries
Establishments.....No.	1,007	670	91	11	3	14	1,795
Capital invested.....\$	40,446,679	27,725,590	7,901,861	333,885	50,615	152,331	76,610,961
Employees on salaries.....No.	5,674	1,902	522	54	8	23	8,183
Salaries paid.....\$	8,151,401	3,752,506	1,114,074	97,604	16,943	36,569	13,169,097
Employees on wages.....No.	9,635	8,021	2,407	129	5	56	21,153
Wages paid.....\$	10,985,839	9,907,413	3,332,530	183,580	3,481	39,249	24,952,099
Fuel costs.....\$	349,078	151,952	56,616	7,512	911	566,069
Miscellaneous expenses.....\$	12,259,175	4,986,912	1,855,109	158,137	22,935	45,829	19,358,147
Cost of materials.....\$	15,597,082	13,043,804	3,688,767	114,488	20,516	155,857	32,620,514
Value of products.....\$	53,841,603	37,326,979	11,168,702	683,362	66,574	324,271	103,411,491

Section I.—Printing and Publishing

This classification embraces only the newspaper publishing offices, of which the number reporting during 1920 was 1,007, located by provinces as follows: Ontario, 419; Saskatchewan, 149; Alberta, 96; Quebec, 95; Manitoba, 91; British Columbia, 76; Nova Scotia, 42; New Brunswick, 34; and Prince Edward Island, 7.

The report gives by provinces the number of persons employed in the newspaper sections according to sex and amounts paid in salaries and wages to each class of employees. The totals of these figures for the whole of Canada are as follows:

Classes of employees	Number of employees		Salary and wage payments
	Male	Female	
Officers, superintendents, managers	1,076	71	\$2,786,903
Clerks, stenographers and other salaried employees	2,825	1,773	5,364,498
Wage earners, average yearly number	7,669	1,533	10,917,693
Outside piece-workers	396	37	65,146
Totals	11,966	3,414	\$19,137,240

A further classification of employees as on December 15, 1920, according to weekly wage payments within specified groups is presented by age and sex in the subjoined table:—

Weekly wage groups	16 years and over		Under 16 years		Total em- ployees
	Male	Fe- male	Male	Fe- male	
	No.	No.	No.	No.	
Under \$5.....	183	132	390	5	710
\$ 5 but under \$10	489	499	186	38	1,212
\$10 but under \$15	581	540	46	27	1,194
\$15 but under \$20	776	356	4	5	1,141
\$20 but under \$24	727	96	1	824
\$24 but under \$28	815	59	874
\$28 but under \$30	271	7	278
\$30 and over.....	3,785	37	3,822
Totals	7,627	1,726	627	75	10,055

The average days in operation of the 1007 offices amounted to 256.13; the average hours per day, 7.45; and the average hours per week, 43.72.

Section II.—Printing and Bookbinding

This section includes those establishments which do printing of all kinds, bookbinding, ruling, etc., but do not publish any papers of periodicals. During 1920 reports were received from 670 individual plants located by provinces as follows: Ontario, 306; Quebec, 164; Manitoba, 55; British Columbia, 53; Alberta, 35; Nova Scotia, 22; New Brunswick, 15; Saskatchewan, 15; and Prince Edward Island, 5.

The report gives by provinces the number of persons, sex, and salaries and wages in this section. These figures for the whole of Canada are given below:

Classes of employees	Number of employees		Salary and wage payments
	Male	Female	
Officers, superintendents, managers	674	53	\$ 2,145,838
Clerks, stenographers and other salaried employees	697	487	1,635,106
Wage earners, average yearly number	6,163	3,095	10,343,163
Outside piece-workers	26	36	8,461
Totals	7,560	3,671	\$14,182,568

The subjoined table shows by classified wage groups the weekly earnings as at December 15, 1920:

Weekly wage groups	Over 16 years		Under 16 years		Total employees
	Male	Fe-male	Male	Fe-male	
	No.	No.	No.	No.	
Under \$5.....	36	19	37	92
\$ 5 but under \$10	440	485	164	46	1,135
\$10 but under \$15	539	1,344	48	49	1,980
\$15 but under \$20	536	956	15	13	1,520
\$20 but under \$24	518	106	1	625
\$24 but under \$28	685	23	1	709
\$28 but under \$30	292	4	296
\$30 and over	3,070	39	13	3,122
Totals	6,116	2,976	279	108	9,479

Section III.—Lithographing and Engraving

In this classification are included all those establishments in which the work carried on is wholly or principally of this nature. During 1920 reports were received from 91 establishments locat-

ed as follows: Ontario, 55; Quebec, 18; British Columbia, 6; Manitoba, 5; Alberta, 4; Saskatchewan, 2; and the Maritime provinces, 1.

The number of persons employed distinguished by sex and class of employment, together with the salaries and wages paid is shown for Canada in the following table:

Classes of employees	Number of employees		Salary and wage payments
	Male	Female	
Officers, superintendents managers	171	7	\$ 638,644
Clerks, stenographers and other salaried employees	211	133	475,430
Wage earners, average number	1,713	624	2,748,266
Outside piece-workers	35	37	14,273
Totals	2,130	801	\$3,876,613

A further classification of employees as on December 15, 1920, according to weekly wage payments is presented below by age and sex for the whole of Canada:

Weekly wage groups	Over 16 years		Under 16 years		Total employees
	Male	Female	Male	Female	
	No.	No.	No.	No.	
Under \$5	5	10	1	16
\$ 5 but under \$10	129	104	41	6	280
\$10 but under \$15	162	339	4	21	526
\$15 but under \$20	165	93	1	259
\$20 but under \$24	177	25	1	203
\$24 but under \$28	141	6	147
\$28 but under \$30	51	3	54
\$30 and over	848	11	859
Totals	1,673	591	47	28	2,344

The average days in operation of the 91 establishments amounted to 297.14; the average hours per day, 8.05; and the average hours per week, 46.45.

Section IV.—Stereotyping and Electrotyping

The number of establishments classified under this head during 1920 was 11, of which 7 were in Ontario and 4 in Quebec.

The number of persons employed is shown for Canada according to sex,

classes of employment and salaries and wages, as follows:

Classes of employees	Number of employees		Salary and wage payments
	Male	Female	
Officers, superintendents, managers	19	\$ 37,978
Clerks, stenographers and other salaried employees	22	13	39,626
Wage earners, average yearly number	129	183,580
Totals	170	13	281,184

Another classification of employees by age and sex according to weekly wages as on December 15, 1920, is given below for Canada.

Weekly wage groups	Over 16 years		Under 16 years		Total employees
	Male	Female	Male	Female	
	No.	No.	No.	No.	
Under \$5
\$ 5 but under \$10	2	3	5
\$10 but under \$15	4	1	5
\$15 but under \$20	15	15
\$20 but under \$24	23	23
\$24 but under \$28	12	12
\$28 but under \$30	2	2
\$30 and over	70	70
Totals	128	4	132

Section V.—Blue Prints

Returns were received from 14 establishments engaged in making blue prints, 5 of which were in British Columbia; 3 in Quebec; and 2 each in Ontario, Manitoba and Alberta.

The number of persons employed, according to sex, etc., is given for Canada in the following table:

Classes of employees	Number of employees		Salary and wage payments
	Male	Female	
Officers, superintendents, managers	8	1	\$20,218
Clerks, stenographers and other salaried employees	9	5	16,351
Wage earners, average yearly number	49	6	39,097
Outside piece-workers	1	150
Totals	67	12	\$75,816

The subjoined table classifies wage earners according to weekly wage groups as on December 15, 1920.

Weekly wage groups	Over 16 years		Under 16 years		Total employees
	Male	Female	Male	Female	
	No.	No.	No.	No.	
Under \$5.....					
\$ 5 but under \$10.....	8		8		16
\$10 but under \$15.....	11	2	2		15
\$15 but under \$20.....	6	4			10
\$20 but under \$24.....	6				6
\$24 but under \$28.....	3				3
\$28 but under \$30.....					
\$30 and over.....	6				6
Totals	40	6	10		56

The average days the plants were in operation were 304; the average hours per day, 7.43; and the average hours per week, 43.

Section VI.—Maps

Three firms reported in this section, two in Ontario and one in British Columbia.

The number of persons employed during the year was as follows:—officers, superintendents and managers numbered four males with salaries amounting to \$13,105; clerks, stenographers and other salaried employees numbered one male and three females with total salaries of \$3,838; the number of wage earners on the pay roll consisted of three males and two females, whose wages during the year amounted to \$3,481.

The number of days the plants operated during the year on full time was 814 and the number of days idle, 98. The average working time per day was 8 hours and per week 45 hours.

In a classification of weekly wage earnings, the three male employees received from \$20 to \$24 per week, and of the female employees, one received between \$5 and \$10 per week, one between \$10 and \$15 per week and one between \$15 and \$20 per week.

LEGAL DECISION RESPECTING FINDINGS OF INDUSTRIAL COURTS IN GREAT BRITAIN

AN important judgment bearing on the British Industrial Courts Act, 1919, was recently delivered at Newcastle, England, in connection with a strike of printers.

The dispute was between the Federation of Master Printers of the United Kingdom and the Newspaper Society on the one hand, and the Typographical Association on the other, and was due to the rejection by the members of the Typographical Association on a ballot vote of an award of the Industrial Court. The employers had posted notices of a reduction in wages which the employees would not accept, and a stoppage of work was threatened, when, on a suggestion of the Chief Labour Adviser of the Department of Labour, an agreement was reached to refer the dispute to the Industrial Court for settlement on the following

terms of reference: "Should there be a reduction in the wages of the members of the Typographical Association? If so, what amount, and how should any such reduction be divided, and at what dates?"

During the hearing before the Industrial Court and after the issue of the award the Typographical Association stated that they would not, and did not, regard the proceedings of the Court as a settlement of the dispute, and in any case they announced their intention to refer the decision of the Court to a ballot vote of their members. In consequence of the vote going against the decision, it was repudiated by the Association and a strike was declared.

On August 11, the proprietors of certain newspapers brought an action

in the Newcastle police court against 97 men concerned in the dispute, charging them with breach of contract "by neglecting or refusing without lawful excuse to follow their employment on the 21st July and subsequent dates."

It was claimed for the defence that the representatives of the Typographical Association had made it clear before the hearing of the case by the Industrial Court that they went before the Court on the understanding that the decision of the Court was not binding but that it would be recommended for acceptance by the members of the Association.

The Court found that the representatives of the Typographical Association acted within their authority in submitting the question of wages to the Industrial Court and that the findings of the Court were binding.

Judgment was accordingly given in favour of the plaintiffs for 25 shillings and costs in each case.

On July 26, a short time before the judgment of the Newcastle police court was delivered, the Minister of Labour, in reply to a question in the House of Commons, made a statement respecting the case, in part as follows:

Reference to the Industrial Court, or the alternative forms of arbitration provided under the Industrial Courts Act, 1919, can only be made by the joint consent of the parties, but if the purpose of the Act is not to be stultified the decision of the Court must be final. I do not think it necessary to make the arrangements suggested in the last part of the question, (Viz.—That in future proceedings before an Industrial Court both parties to the dispute should be asked to declare their willingness to accept the findings of the Court) because, unless willingness to abide by the decision of the Arbitration Court is a prior assumption in all cases, arbitration is useless as a method of settling industrial disputes.

NATIONAL INSTITUTE OF INDUSTRIAL PSYCHOLOGY OF GREAT BRITAIN

THE British National Institute of Industrial Psychology was incorporated on February 11, 1921, and in the following month the first investigations of the Institute were begun. The movement arose from a desire to initiate "some scheme whereby the results of research in physiology and psychology might be utilized for vocational selection and vocational guidance and for the improvement of human conditions generally in commercial and industrial life." An account of the origin and aims of the institute appeared in the opening pages of the first issue of the *Journal of the National Institute of Industrial Psychology*, for January, 1922.

The Institute is governed by a Director and a Council of 58 members all of whom are prominent in educational, industrial or scientific affairs. The Director of the Institute is Dr. C. S. Myers, Director of the Cambridge Psy-

chological Library. He is assisted by an executive council of fifteen members, and a scientific committee of twenty-four members. The assistant director and secretary is Mr. George H. Miles, D.Sc., 329 High Holborn, London, W.C.

The work of the Institute falls under the following six heads:

1. The study of the requirements of various industrial and commercial occupations, and commercial occupations, and the elaboration and application of suitable tests so as to secure (a) in co-operation with industry and commerce, more efficient and scientific selection of workers, and (b) in co-operation with the schools, more reliable guidance for children when choosing their life's work.

2. The investigation of the best methods for applying human energy in different factories, offices, etc., especially in regard to (a) the elimination of unnecessary movements, (b) the most advantageous distribution of rest periods (c) the reduction of monotony and increase of interest, etc.

3. The determination and realization of the conditions which tend (a) to the maximal

health, comfort and well-being of the worker, and (b) the best relations between management and labour, e.g., in regard to lighting, ventilation, methods of payment, labour representation, etc.

4. The study of factors influencing the sale of products, e.g., advertisements, designing, etc.

5. The provision (a) of lectures to employers and to workers, and (b) of training courses for managers, foremen, welfare workers, investigators, etc.

6. The encouragement and co-ordination of research work on industrial psychology and physiology throughout the Kingdom, and the publication of the facts established by such research in a form which will indicate their practical value.

While the Institute was in process of formation steps were taken to secure the sympathy and support of the workers in the movement. For this purpose several conferences were arranged which were attended by members of the organizing committee of the Institute and by representative labour leaders. As a result the aims of the Institute have become more widely known, and it is stated that the recognition is now growing, that it is to the worker's ultimate advantage to accept all the help that physiological and psychological science can give toward accomplishing his work more efficiently.

The Institute has already received applications for its services from a number of firms and has conducted investi-

gations into several industries. An account of two of these dealing with the tin box industry and the packing of chocolates appeared in the first two issues of the Journal of the National Institute. In the case of the tin box industry, it was claimed that although the investigation was essentially of the nature of a preliminary survey it was nevertheless possible to make recommendations which dispensed with a large amount of needlessly heavy labour, thus increasing the workers' output and lessening their fatigue. In the case of chocolate packing, it was claimed that under the new method of work devised by the Institute's investigators output increased by over 35 per cent, and the workers were unanimous in their appreciation of a considerable saving of fatigue at the end of the day, spontaneously expressing to the investigators their gratitude.

With regard to the activities of the Institute along the lines of vocational guidance it was stated that the Institute had already been approached by certain educational authorities who would welcome vocational guidance work in connection with their schools, but who could not at the present time ask for an increase in rates for this purpose.

Reference was made in a previous issue of the LABOUR GAZETTE to a similar institute which was lately established at Tokio, Japan.

EMPLOYMENT CONDITIONS IN CANADA DURING QUARTER JULY-SEPTEMBER, 1922, AS REPORTED BY EMPLOYERS

THE volume of employment as indicated by the firms making returns showed a steadily upward movement during the third quarter of this year, although the expansion was considerably less pronounced than during the preceding three months, when many of the seasonal industries had increased their staffs very largely. The most extensive increase recorded during the period being reviewed occurred in iron and steel, railway transportation,

edible plant products, logging, coal mining and construction.

The accompanying chart shows graphically the gradual rise that employment exhibited during the quarter, the curve having gained over three points. In this improvement, the line follows the general movement indicated during the corresponding three months in 1921, although its course at that time was interrupted by minor fluctuations

and the net gain was somewhat smaller than for the quarter under review. The level of employment continued to be higher than at any period in 1921.

Reports were tabulated by the Dominion Headquarters of the Employment Service of Canada from over 6,200 employers, who registered the following net changes during the quarter:

Month Ending	Increase in staff.	Percentage of change.
July 31.....	13,138	1.8
August 31.....	5,109	.7
September 30.....	5,482	.7

There was, therefore, an aggregate increase of 23,729 persons in the pay roll employed by these concerns. The tendency in Quebec and Ontario was consistently favourable, while in each of the remaining districts a decline was recorded during one of the months under review. There were, however, net increases in staff in the Prairie Provinces and British Columbia, but in the Maritime Provinces the general movement was downward. In this section of the country, moreover, the level of employment was not quite as high as during the corresponding period of last year. In all other districts a better situation was indicated in that comparison although the improvement was in no case particularly pronounced.

The most decided increases in working force during the quarter were those in the iron and steel group, which absorbed practically 9,500 additional workers. The gains, however, were largely in the nature of recovery from one of the frequent month-end shutdowns in the railway car shops that occurred at the close of June. Considerable fluctuation was indicated within the group, especially in automobile factories and rolling mills. The production of heating appliances increased on a moderate scale during the quarter, but steel shipyards and agricultural implement works were decidedly slacker. The operation department of the railways enlarged their working forces by approximately 4,400 men, mainly in the Prairie Provinces, where the transportation of the harvest caused greatly increased activity. The commencement of seasonal operations in logging camps, principally in Quebec and Ontario, caused substantial increases in employment in that industry during August and September. A general upward movement, gaining in force towards the end of the quarter, was very noticeable in coal mining, the expansion occurring in both eastern and western coal fields. The volume of employment afforded in highway and building construction continued to be large, there being steady increases in payroll in the latter during the quarter, while in the

former there were increases on the whole. These additions were reported very largely in Ontario and Quebec. Seasonal activity in fruit and vegetable canneries during July and August and in chocolate and confectionery establishments in August and September caused substantial increases in personnel in the edible plant products industry during the quarter. The gains were registered chiefly in Quebec and Ontario, although the canneries in British Columbia were busier early in the quarter and confectionery concerns in the Maritime Provinces reported improvement towards the end of the period. Additions to staffs on a somewhat smaller scale than in the divisions mentioned above took place also in musical instrument, tobacco, electric current, tin can, and electrical apparatus manufacturing, in the mining of metallic ores and asbestos, in quarries, on telephones and telegraphs, in shipping and stevedoring, and in retail and wholesale trade. Seasonal dullness was registered by textile manufacturers, particularly in garment and knitting factories, at the beginning of the quarter, but revival reported later on caused employment to show a favourable balance for the three months.

The declines, unlike the increases enumerated above, were considerably more extensive than those recorded during the three months ending June 30. Sawmills registered the largest reductions, having released almost 2,600 workers from their staffs. The contractions were, of course, seasonal in character and occurred to some extent in all provinces, although the

losses in Quebec and Ontario were the most marked. Railway construction and maintenance declined very noticeably during August and September, but in July marked improvement had been indicated. The conclusion of seasonal operations in fish canneries on the Eastern and Pacific coasts resulted in fairly large declines in employment which increases in abattoirs and packing houses were not sufficient to counterbalance. Reductions in staff were reported in glass, brick and tile factories, chiefly in Quebec and Ontario. Petroleum, gas and cyanamid plants were slacker and the production of kodaks and buttons declined to some extent. Street railways, on the whole, were not as busy, although some improvement in the situation was evidenced towards the end of the quarter. The closing of summer hotels released over 500 workers from employment, mainly in Alberta, but to some extent also in the other provinces.

Employment in the bulk of the manufacturing industries was on a higher level than during the corresponding quarter of last year. Increased activity in particular was indicated in the manufacturing industries as a whole, notably in the lumber, pulp, paper, rubber, textile, electric current, non-ferrous metal product, and mineral products divisions. Improvement was also registered by employers in transportation and construction industries. On the other hand, contractions were evidenced in logging, coal mining, communication and trade, although in all cases the index numbers were only slightly lower.

UNEMPLOYMENT IN TRADE UNIONS DURING QUARTER ENDING SEPTEMBER 30, 1922, AS REPORTED BY UNIONS MAKING RETURNS

THE present article on unemployment among the members of local trade unions deals with the situation reported during the quarter ending September 30, 1922. At the end of July the percentage of idleness stood at 4.1, or slightly over 1 per cent lower than in June; moderate improvement continued to be registered during the following two months and at the end of September only 2.8 per cent of the members reported were out of work. The percentage of unemployment in the first month of the same quarter in 1921 was practically 5 per cent higher than in July of this year and it continued on about the same level throughout the quarter. (Unemployment as used here has reference to involuntary idleness due to econ-

omic causes. Persons occupied in work other than their own trades, or who are idle because of sickness or as a direct result of strikes or lockouts, are not considered as unemployed. As the number of unions making returns varies from month to month with consequent variation in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the unions reporting.)

Improvement over the preceding three months was reported during the quarter under review by miners, fishermen and workers in the transportation division. The situation as reported by unions in the manufacturing industries and the building trades was also more favourable.

The accompanying chart shows the curve of unemployment as reported by

(Continued on page 1206)

TABLE II.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY GROUPS OF INDUSTRIES.

Month	Fishing	Lumbering and logging	Mining	Manufacturing industries	Vegetable products	Pulp and paper products	Pulp and paper mill workers	Printing, publishing and lithographing	Wood products	Fibres, textiles and textile products	Textile and carpet workers	Garment workers	Hat, cap and glove workers	Animal products	Iron and its products	Non-ferrous metals	Clay, glass and stone products	Mineral products	Miscellaneous manufacturing industries	Building and construction	Transportation	Shipping and stevedoring	Steam railway operation	Local transportation	Communication	Telegraph operation	Trade (retail shop clerks)	Services	Governmental	Miscellaneous	All occupations

trade unions by quarters for 1916-17 and by months for 1919-20-21 and to September of this year. The curve continued to pursue its downward course during the period under review. In the corresponding three months of last year unemployment was in considerably greater volume and the curve was therefore on a much higher level than in the period now under consideration.

All provinces recorded improvement during the quarter as compared with the previous three months, but the increases in the four western provinces were the most pronounced. In comparison with the corresponding quarter of last year less unemployment was registered in all districts, more favourable conditions being shown especially in Nova Scotia and British Columbia.

Table I on page 1207 summarizes the returns by provinces, and Table II on page 1203 shows the percentage of unemployment reported in the different groups of industries.

During July considerably less unemployment than in the same month of 1921 was registered among practically all tradesmen in the building division. Miners and lumber workers also reported more employment, and improvement in lesser degree was shown in the manufacturing and transportation divisions.

The situation in the building and manufacturing industries was more favourable during August than in the corresponding month of last year. Workers in all trades in the building division were busier, while in the manufacturing industry the iron, steel

and glass groups reported a great deal more employment.

A noteworthy decrease in unemployment was reported in the manufacturing industries during September as compared with the same month in 1921, due to greater activity among pressmen and assistants, garment, glass, iron and steel workers, and among metal polishers. The building and construction trades also reported improvement, while increases in employment on a smaller scale were registered by transportation workers.

The accompanying tabulations (Table III) show in some detail the returns for the month ending September 30, for which month reports were received from 1,477 labour organizations with an aggregate membership of 161,182 persons, 4,568 of whom were out of work, a percentage of 2.8. The table also gives the general percentages of unemployment in the various trades and industries for July and August.

EMPLOYMENT IN THE BUILDING TRADES AS INDICATED BY BUILDING PERMITS ISSUED DURING JULY-SEPTEMBER, 1922

EMPLOYMENT in the building trades as indicated by the value of the building permits issued in 56 cities decreased during the quarter ending September 30, 1922 as compared with the preceding quarter. An increase of considerable magnitude however was reported in comparison with the corresponding quarter of last year. The July figures showed a contraction of practically 10 per cent as compared with June, while the total in August was about 19 per cent higher than in July. In September, a decline of about 38 per cent was reported as compared with August. The total value of the building authorized during the quarter was \$41,818,314 as compared with \$47,647,176 for the second quarter of 1922 and with \$30,087,317 for July, August and September of last year. There was therefore a decline of \$5,828,862, or 12.2 per cent, in the former comparison and an increase of \$11,730,997, or 39.0 per cent, in the latter.

During July all provinces, with the exception of Manitoba and Saskatchewan, reported increases over the corresponding month of last year. In Ontario an advance of \$2,462,591, nearly 51 per cent, was registered, while Quebec showed an expansion of slightly over 41 per cent. The gain in Ontario was largely accounted for by the increase in the building authorized in the city of Toronto. In Manitoba a decrease of over \$57,000 was registered, the city of Brandon showing a considerable reduction in the value of

the permits issued which was, however, partly counterbalanced by gains in Winnipeg.

In August, Nova Scotia, New Brunswick and Manitoba reported declines aggregating slightly over \$500,000 in comparison with August of last year, which, however, were more than offset by increases in the other provinces. Ontario registered a gain of \$1,372,139, or over 31 per cent. In Toronto alone there was an increase of \$1,080,817. Considerable activity in building operations was recorded in Montreal and the total in the province of Quebec for the month was over 32 per cent higher than in August 1921. In the city of Vancouver very pronounced increases in the value of the permits issued were indicated, the value rising from \$272,870 in August, 1921, to \$5,367,745 in August of this year, a gain of 1867.1 percent. Minor reductions however were reported in several other British Columbia cities.

Expansion in building work was registered in Prince Edward Island, Nova Scotia, New Brunswick, Quebec, Manitoba and British Columbia during September as compared with the same month of last year, the gain of \$450,901 in Manitoba being the most pronounced. The increase in that province was largely accounted for by activity in the city of Winnipeg although increases on a smaller scale were also registered in Brandon and St. Boniface. In Ontario, the city of Hamilton showed a contraction of over \$400,000 in

the building authorized and Windsor also recorded a fairly large reduction. In Saskatchewan, Moose Jaw and Saskatoon reported decreases, and in Alberta less building was authorized in Edmonton and Medicine Hat than in September, 1921.

The accompanying table shows in detail the value of the building permits issued in 56 cities by months, during the third quarter of this year. The 35 cities for which a continuous monthly record has been kept since 1910 are marked by asterisks.

REPORT OF THE EMPLOYMENT SERVICE OF CANADA DURING THE PERIOD JULY-SEPTEMBER, 1922

THE present article on the work of the offices of the Employment Service deals with the business transacted during the third quarter of 1922 (July-September). During this period the volume of business was on the whole considerably less than during the same period of 1921, the number of applications for work showing the most marked reduction while vacancies and placements more nearly approached the number recorded last year. The accompanying chart, which presents the returns from the offices on the basis of daily averages over

half-month periods, shows that during July the curves of applications, vacancies and placements, increased slightly, followed by an abrupt rise during August due to the large numbers of farm labourers and harvesters required in the Prairie Provinces. While the demand for workers was very heavy during the latter part of August 1922, the curves of vacancies and placements did not attain the high levels of 1920 and 1921. During September there was a marked decline in all three curves, vacancies showing a constant reduction, while applications and placements

as compared with 134,695 during the same quarter of 1921. Placements in regular employment during the period under review numbered 109,856 (100,358 of men and 9,498 of women) and those in casual work numbered 21,747.

The number of vacancies notified by employers to the Service during the period was 169,548, (141,839 were for men and 27,709 for women) as compared with a total of 170,586 during the corresponding period of last year. Applications for employment registered at the offices numbered 160,350 (133,181 men and 27,169 women) as compared with 170,644 during the same period of 1921.

The accompanying table gives the vacancies and placements by industries of the offices of the Employment Service of Canada in the various provinces during the period July-September 1922. On page 1155 of this issue there will be found a statement in some detail of the work of the offices for the month of September, 1922.

FAIR WAGE CONTRACTS, OCTOBER, 1922.

DURING October the Department of Labour received for insertion in the LABOUR GAZETTE the following information relative to nineteen fair wage contracts, fifteen of which were awarded by the Department of Public Works and four by the Department of Railways and Canals. These contracts contain the usual fair wage clause which provides for the prompt payment of such wages as are current in the district in which the work is to be performed, and for observance on the various works under contract of the prevailing hours of labour, and which otherwise prevents abuses and secures

the legitimate rights of the labour employed.

A statement was also received as to supplies ordered by the Post Office Department, subject to the Regulations for the Suppression of the Sweating System and the securing of fair wages, etc.

DEPARTMENT OF PUBLIC WORKS.

Grading, etc., next to Riding School, Royal Military College, Kingston, Ont. Name of contractor, Peter J. McCoy, Kingston, Ont. Date of contract, October 3, 1922. Amount of contract,

\$1,988.35 and unit price of \$1.75 per cubic yard to be made for additions or deductions in connection with contract.

Repairs to south section of temporary pile protection breakwater at Port Arthur, Ont. Name of contractor, Thunder Bay Harbour Improvement Company, Limited, Port Arthur, Ont. Date of contract, October 2, 1922. Amount of contract, unit prices.

Repairs to the wharf at Pointe-aux-Trembles, Que. Name of contractors, Onésime and Jos. Poliquin, Portneuf, Que. Date of contract, October 3, 1922. Amount of contract, unit prices.

Construction of wharf at Grondines, Que. Name of contractors, Doran Construction Co. Limited, Ottawa, Ont. Date of contract, September 21, 1922. Amount of contract, unit prices.

Repairs to eastern and western breakwaters at Port Colborne, Ont. Name of contractors, Port Arthur Construction Company, Limited, Toronto, Ont. Date of contract, October 9, 1922. Amount of contract, unit prices.

Reconstruction of retaining wall at Rivière du Lièvre lock and dam at Poupore, Que. Name of contractors, Doran Construction Company, Limited, Ottawa, Ont. Date of contract, September 21, 1922. Amount of contract, unit prices.

Supply and installation of new heating system in Ordnance Stores Building, at Westmount, Que. (Old Grant's Garage). Name of contractors, Conroy Brothers, Montreal, Que. Date of contract, October 12, 1922. Amount of contract, \$6,500.

Repairs and improvements to the wharf at L'Original, Ont. Name of contractors, J. H. Murphy and J. Lowrey, Ottawa, Ont. Date of contract, October 14, 1922. Amount of contract, unit prices.

Supply and installation of new freight elevator and alterations to present elevator enclosure in Ordnance Stores Building, (Old Grant's Garage), Westmount, Que. Name of contractor, J. E. D. Brazeau, Montreal, Que. Date of contract, October 17, 1922. Amount of contract, \$7,000 and unit prices for additions or deductions in connection with contract; excavation, \$2.50 per cubic yard, concrete including forms, \$15 per cubic yard; and reinforcing steel, 5 cents per pound.

Alterations, etc., to Post Office fittings, Edmonton, Alta. Name of contractor, John Dunlop, Edmonton, Alta. Date of contract, October 15, 1922. Amount of contract, \$5,306.

Construction of piers, Whitby, Ont. Name of contractor, Thomas P. Charleson, Ottawa, Ont. Date of contract, October 23, 1922. Amount of contract, unit prices.

Dredging the entrance channel and basin, Cobourg, Ont. Name of contractor, Frontenac Dredging Company, Limited, Toronto, Ont. Date of contract, September 30, 1922. Amount of contract, Class "B" 58 cents per cubic yard (scow measure).

Dredging the channel in Magnetawan River, Byng Inlet, Ont. Name of contractor, William Birmingham, Kingston, Ont. Date of contract, October 14, 1922. Amount of contract, Class "B" 60 cents per cubic yard (in situ).

Dredging the channel at mouth of McIntyre River, Port Arthur, Ont. Name of contractors, O'Brien and Martin, Ottawa, Ont. Date of contract, October 18, 1922. Amount of contract, Class "A" \$4.12 per cubic yard, Class "B" 31½ cents per cubic yard (place measure).

Dredging the channel, Wolfville, N. S. Name of contractors, W. C. B. Harris and W. H. McKinley, Wolfville, N. S. Date of contract, October 23, 1922.

Amount of contract, Class "B" \$1.20 per cubic yard (in situ).

DEPARTMENT OF RAILWAYS AND CANALS.

Paving a portion of St. Patrick Street, Montreal, in the vicinity of the Lachine Canal. Name of contractors, The Sicily Asphaltum Paving Company, Limited. Date of contract, October 16, 1922. Amount of contract, schedule rates.

Repair of the lower section of the roadway located along the north bank of the Soulanges Canal, covering the use of asphalt binder. Name of contractors, Simpson Bros., Company, Limited. Date of contract, October 3, 1922. Amount of contract, schedule rates.

Repair of the upper section of the roadway located along the north bank of the Soulanges Canal, covering the use of asphalt binder. Name of contractors, Newton-Dakin Construction Company, Limited. Date of contract, October 23, 1922. Amount of contract, schedule rates.

Manufacture, erection and completion of the steel superstructure for a

single track railway bridge over and across the Coffee River at or near Goulet, in the County of Bellechasse, Que., and the removal of the existing trestle and falsework at the same place. Name of contractors, The Canadian Bridge Company, Limited. Date of contract, October 25, 1922. Amount of contract, schedule rates.

Making up and supplying letter carriers' uniforms, etc.....	15,313.66
Repairing letter boxes, etc.....	66.25
Repairing scales.....	68.60
Supplying mail bag fittings.....	5,589.10
Supplying ink.....	44.70

RECENT INDUSTRIAL AGREEMENTS AND SCHEDULES OF WAGES

A SUMMARY is given below of the more important industrial agreements and schedules of wages and working conditions that have recently been received by the Department. Such agreements are summarized each month in the LABOUR GAZETTE. In the majority of cases the agreements are signed by both employers and employees, but verbal agreements are also included in the records, the latter being schedules of rates of wages, hours of labour and other conditions of employment agreed upon between the parties concerned, and in effect though not signed. In addition to these, other important schedules of wages are summarized, including civic schedules. In the case of each agree-

ment or schedule the rates of wages for the principal classes of labour are given, with other information of general interest.

Mining—Coal

NANAIMO, B.C.—THE WESTERN FUEL CORPORATION OF CANADA, LIMITED, AND ITS EMPLOYEES. Agreement to be in effect from October 1, 1922, until September 30, 1924.

The Company to pay all employees a bonus of \$1 per day worked, being in addition to all rates and wages specified in the agreement, any increase or decrease in the bonus to be governed by competitive conditions.

System of Dockage Inspection as practised to be continued, with penalties for refuse matter as follows: *Number One Mine*—up to and including 50 lbs. of refuse matter, per car: double dockage. Over 50 lbs. and including 100 lbs. of refuse matter per car: confiscation of car. Over 100 lbs. of refuse matter, per car: dismissal after investigation. *Reserve and Wakesiah Mines*: Up to and including 65 lbs. of refuse matter per car, double dockage. Over 65 lbs. and including 125 lbs., confiscation of car. The above is subject to the provision that any person dismissed will have the right of appeal to the Superintendent of Mines, whose decision shall be final, and further that the value of all penalties imposed under this section shall be paid over to the employees' gas committee fund.

Wages—minimum rate; \$4.25 per shift for miners in all mines covered by this agreement, Superintendent of Mines to be judge as to the ability of the party to earn such minimum. Company agrees that when a miner is taken from the face to perform day work he shall receive the miner's day rate.

Schedule for loading coal after machines: upper seam, $47\frac{1}{4}$ cents per ton; lower seam, same rate. For using buggies and laying roads: first 50 feet from dump to face line, $6\frac{3}{4}$ cents per ton additional; second 50 feet from dump to face line, $13\frac{1}{2}$ cents per ton additional.

Schedule for rock in coal of upper seam: when rock is over 3 inches thick and up to 1 foot thick, \$1.35 per yard; over 15 inches and up to 2 feet thick, \$3.24 per yard. Over 2 feet 3 inches and up to 3 feet thick, \$5.40 per yard. Above schedule applies only to solid work in stalls, skipping pillars take $\frac{2}{3}$ of these rates.

Schedule for timbers: stringers, $67\frac{1}{2}$ cents each when 8 feet long and under; \$1.35 each when over 8 feet long. Sets, \$2.02 $\frac{1}{2}$ each for 9 ft. collars; \$2.70 each for 11 ft. 4 inch collars; logs, \$2.00 each for 4 feet; \$2.70 each over 4 feet and

up to 7 feet, and 30 cents additional for each foot over 7 feet.

Mining, Wakesiah and Reserve Mine and Number One—Upper seam, $91\frac{3}{4}$ cents per ton; upper seam coal under four feet in thickness, \$1.08 per ton; lower seam, \$1.08 per ton.

Yardage—upper seam—levels, \$3.37 per yard and coal; crosscuts, \$2.70 per yard and coal; levels, where less than $\frac{1}{2}$ of height is in white rock, \$10.12 $\frac{1}{2}$ per yard, coal to company; levels when more than one-half of height is in white rock, \$10.80 per yard, coal to company. Turning stalls—5 yards long by 12 feet wide, \$13.50 and coal. Brushing rock—One foot thick, \$1.35 per linear yard.

Day rates—fire boss, 1st class machine runners and 1st class drillers, \$4.92 $\frac{3}{4}$; machine foreman, \$4.99 $\frac{1}{2}$; shotlighters, \$4.59; boss driver, 2nd class machine runners, 2nd class drillers, \$4.38 $\frac{3}{4}$; facemen, \$4.32; bratticemen, \$3.84 $\frac{3}{4}$ —\$4.25 $\frac{1}{4}$; timber men, tracklayers, engineers (diagonal slope No. 1), rope inspectors, cagers (head), miners, \$4.25 $\frac{1}{4}$; linemen, \$4.18 $\frac{1}{2}$; pipemen, \$3.71 $\frac{1}{4}$ —\$4.18 $\frac{1}{2}$; drivers (double), 3rd class machine runners, 3rd class drillers, \$4.05; drivers (single), \$4.00; motormen, \$3.88; stablemen, \$3.84 $\frac{3}{4}$; pumpmen, \$3.71 $\frac{1}{4}$ —\$3.84 $\frac{3}{4}$; brushers, \$3.78; timbermen helpers, tracklayer's helpers, roadmen, pushers, cagers (assistant), loaders, machine runners (helpers), muckers, cogmen, labourers, \$3.71 $\frac{1}{4}$; winch drivers, \$1.48 $\frac{1}{2}$ —\$3.71 $\frac{1}{4}$; rope-riders, \$3.24—\$3.71 $\frac{1}{4}$; drivers (boys), \$3.24; motormen's assistant, \$2.16—\$3.24; door boys, \$1.48 $\frac{1}{2}$.

The agreement committee composed of employees shall consist of three members representing Number One Mine, one for Reserve Mine, one for Wakesiah Mine, and one for any new mine operated by the Company and placed on an operating basis.

Company to meet the agreement committee or a sub-committee thereof on matters relating to this agreement, or to adjust disputes; no stoppage of work

to take place pending adjustment during term of agreement.

Any vacancy on the agreement committee to be filled at a pithead ballot of the underground employees at the mine from which vacancy exists. Monthly meetings to be held of management of the Company and the agreement committee. Special meetings may also be called. Agreement committee to have handling of checkweighman's and gas committee funds.

In event of a fatal accident occurring in any of the mines, or in the event of a death from injuries received in mine, operation of mines not to be suspended on day of funeral, but any employee may be absent from work to attend the funeral.

Employees who work on the morning, afternoon or night shifts of the day of the funeral agree to contribute 50 cents per man and 25 cents per boy to the joint fund, company to duplicate the fund which shall be paid out to heirs of deceased as specified in the agreement; if there are no heirs, fund to be paid to the medical relief and accident fund.

Price of coal to employees at No. One Mine coal chute to be \$3.00 per ton.

Manufacturing—Printing and Publishing

VANCOUVER AND VICTORIA, B.C.—THE NORTHWEST PHOTO ENGRAVERS' ASSOCIATION AND LOCALS OF THE INTERNATIONAL PHOTO ENGRAVERS' UNION OF NORTH AMERICA AT VANCOUVER AND VICTORIA (AND CERTAIN CITIES IN THE UNITED STATES). Agreement in effect for the years 1921 and 1922 and thereafter on 60 days' notice of termination.

Only good standing union members or applicants for membership with permits from the union to be employed in the making and finishing of photo-engravings. Members may refuse to execute struck work from shops considered unfair, or work from shops concerned in a strike or lockout.

Wages per week: journeymen, not less than \$47. Foremen, not less than \$55.

Night shift wage scale \$5 per week in addition.

Hours per week, day work, forty-four hours, night work, forty hours.

Overtime, first four hours, time and one-half; thereafter and Saturday afternoons, Sundays and holidays, double time.

Employers, or employees who have worked four consecutive weeks must give one week's notice of discharge or leaving position.

Apprentices, one to five journeymen, two to ten, etc. Apprentices to serve a term in one shop of not less than five years, beginning at the age of 16 or over. Apprentice to be indentured to both parties.

Minimum wages for apprentices, per week, first year, \$8; second year, \$12; third year, \$20; fourth year, \$20; fifth year, \$35.

For each local union, a joint industrial council to be created, to consist of six members, three from each party, of which four (two from each party) shall form a quorum. Council to settle differences arising from the agreement and questions which cannot be adjusted by conciliation. Council to meet each month. In case of failure of council to reach a decision, matter to be referred to the Northwest Joint Industrial Council, or later to the Photo Engravers' Joint Industrial Council.

All applications for men must be made to the office of the local secretary.

Construction

WINDSOR, ONT.—THE BUILDERS' AND CONTRACTORS' ASSOCIATION (GENERAL CONTRACTORS' SECTION, AND ENGINEERS' SECTION) AND STEAM AND OPERATING ENGINEERS, No. 324 A. Agreement to be in effect from April 1, 1922, until February 28, 1924; and from year to year thereafter unless terminated on or before February 1.

Hours per day, on building construction, nine, with five on Saturdays. On

all excavating, street and sewer work, nine per day for six days.

Overtime, time and one-half. Saturdays, time and one-half on building construction; and double time for work done on Sundays and certain holidays.

Wages per hour, 90 cents on all kinds of derricks operated by more than two drums or locomotive cranes, large size concrete mixers and pile drivers; 85 cents per hour on steam rollers, tractors and two-drummed machines; \$1.00 per hour for steam shovels and trench machine engineers, or \$50 per week, if working by the week; 80 cents per hour for all other hoisting and portable work.

Engineers to be paid full time for all time held on the job, whether running or not.

When overtime is required, the engineer who has been running the machine involved shall be allowed to work the overtime, up to six hours: for six hours or more, another engineer to be employed, if one is found unemployed at the time.

Transportation and Public Utilities

WINNIPEG, MAN. — WINNIPEG ELECTRIC RAILWAY COMPANY, AND EMPLOYEES OF THE SAID COMPANY, MEMBERS OF THE GAS WORKERS' UNION OF WINNIPEG. Agreement to be in effect from May 1, 1922, until May 1, 1923, and from year to year thereafter until changed on 30 days' notice.

No discrimination by the company, the employees, or the union against any employee for being or not being a member of the union (foremen shall not be union members).

Wages per hour—machine men, 62 cents; front door men, back door men, pipe jumpers, hand stokers and scurfers, fire cleaners, 60 cents; handy man, 59 cents; trimmers, scurfers' helpers, boiler cleaner, 52½ cents; yard men, coke wheelers and labour employed in coal cars and purifying house or any part of the gas works, 45 cents.

Overtime, time and one-half. Employees working on Sundays, legal holidays, etc., when such time comes in their regular shift, shall not be paid at overtime rates.

Hours of labour, 8 per day (48 per week) for men in the gallery; 9 per day (54 per week) for yard men, labourers and others similarly employed.

In case of break down or emergency employees must unite to meet same, as directed, although work is not in their ordinary line.

Employees to be granted reasonable leave of absence upon application to respective foreman. Employees taking other employment during leave, or not reporting for work at termination of leave, to be considered to have terminated connection with employers. Union officers to be granted leave of absence for union business, in so far as regular operation of the works will permit such applications to be given preference.

Employees on relay shifts must change shifts in proper rotation, as arranged by the company and the union.

In case of grievances requiring immediate adjustment, the foreman in charge may confer with the representatives of the union and arrange the point, and if arrangement is not satisfactory, employees may appeal to the superintendent, pending which, they must carry out orders of the foreman.

Company's representatives to confer with employees' representatives on all questions arising between parties.

Service—Recreational

ST. JOHN, N.B.—CERTAIN EMPLOYERS AND THEATRICAL STAGE EMPLOYEES AND MOVING PICTURE OPERATORS No. 440. Agreement to be in effect from September 1, 1922, to August 31, 1923.

Extra help.....	—	2

Overtime, 75 cents per hour; Sunday, double time. Day work, of not more than 8 hours per day, \$5. Operator to receive \$20 for a week of six nights and Saturday matinee.

Two weeks' notice discharge to be given or two weeks' salary (except in cases of intoxication, dishonesty or incompetency). Weekly employees to give two weeks' notice of intention to leave. Employers may make rules and regulations necessary for management of the performances. Shield of union to be displayed in box office, and a union slide to be exhibited at each performance.

Disputes to be adjusted by an arbitration board.

PRICES, RETAIL AND WHOLESALE, IN CANADA, OCTOBER, 1922

THE prices movement during October was slightly downward, both the index number of wholesale prices and the family budget in terms of retail food prices being somewhat lower than in September. The retail prices of fuel averaged slightly higher.

In retail prices the average cost of a weekly family budget of twenty-nine staple foods in some sixty cities was \$10.23 at the beginning of October as compared with \$10.28 at the beginning of September; \$11.48 for October, 1921; \$15.83 for October, 1920; \$14.21 for October, 1919; \$13.54 for October, 1918; \$11.81 for October, 1917; and \$7.99 for October, 1914. The total for food, fuel, and rent was \$20.86 for October as compared with \$20.90 for September; \$22.00 for October, 1921; \$26.46 for October, 1920; \$22.93 for October, 1919; \$21.48 for October, 1918; \$18.82 for October, 1917; and \$14.47 for October, 1914. The chief changes for the month were slight decreases in beef, mutton, fresh pork, bacon, bread, flour, sugar, and potatoes. There was a substantial increase in eggs with smaller increases in milk, butter, veal, and rice. Fuel increased slightly. Rentals were steady.

In wholesale prices the departmental index number stood at 219.8 for

October as compared with 220.5 for September; 229.2 for October, 1921; 317.6 for October 1920; 299.6 for October, 1919; 289.6 for October, 1918; 244.7 for October, 1917; and 138.7 for October, 1914. Many of the changes were seasonal such as increases in dairy products and decreases in grains and fodder, and in flour, livestock and meats. The most important declines were in western barley, western oats, hay, bran and shorts, cattle, live hogs, dressed hogs, flour, Connellsville coke, and cement, and less important declines in hams, beans, some fruits, jutes and hessians, and in silver. The chief increases were in Ontario grains and flaxseed, butter, eggs, cheese, potatoes, sugar, raw and manufactured cottons, metals, linseed oil, turpentine and raw rubber. As compared with a year ago all groups were lower except fuel, hides, and woollens.

The index number of wholesale prices is based on the quotations for 271 commodities and is the simple average of the percentages of current prices for the several commodities in relation to the average prices for the base period, 1890-1899, these being, therefore, made equal to 100. The quotations for most farm products are obtained weekly and averaged for the

month; the quotations for other commodities are taken for the middle of the month. The table of index numbers shows the changes by groups and sub-groups for the previous month and for the corresponding months back to 1913.

A special index number (comprising fifty of the more important commodities selected from the 271 in the departmental list) including 20 foods, 15 raw materials, and 15 manufactured goods based upon price levels in 1913 as 100 showed an advance to 147.3 for October as compared with 145.3 in September; 147.7 in October, 1921; 221.5 in October, 1920; and 102.6 in October, 1914. The advance was due chiefly to increases in dairy products, potatoes, cotton, linseed oil, and turpentine.

The index number of wholesale prices in Canada published by the United States Federal Reserve Board, which includes 33 raw materials, 28 semi-manufactured or producers' goods, and 38 finished or consumers' goods and based upon price levels in 1913 as 100, showed a decline in August to 148 as compared with 154 in July, 153 in June, and 166 in August, 1921. Goods produced, goods exported, raw materials, and consumers' goods were lower while goods imported and producers' goods were higher.

The Canadian Bank of Commerce index number of exports declined to 144.71 in mid-October as compared with 148.76 in mid-September. The index of imports rose from 165.52 in September to 166.46 in October. The combined number of imports and exports fell from 157.14 to 155.58.

The table of retail prices and rentals shows the prices at the beginning of October of over one hundred staple foodstuffs, groceries, coal, wood and coal oil, and the rent for six-roomed houses in some sixty cities throughout Canada. All prices are for delivered goods. The exact quality, for which the

quotation is given, is set forth in the case of each commodity and every effort has been made to ensure that the quotations in each case refer to the same class of commodity, in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except milk and bread, are the averages of quotations reported to the Department and to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. The prices of fuel and the rates for rent are reported by the correspondents of the LABOUR GAZETTE.

Statistics similar to these were published each month from 1910 to 1920, the figures during this period being secured at the middle of each month by the correspondents of the LABOUR GAZETTE resident in each locality from dealers who did a considerable business with workmen's households. From 1910 to 1915 the table contained a list of only the twenty-nine foods included in the family budget, with laundry starch, coal, wood, coal oil and rent. In 1915, when monthly publication of the budget in the LABOUR GAZETTE was begun, it was decided to extend the list of foods to 40, and in 1920 the list of foods and groceries was still further extended to include over 100 items.

Beginning with October 1922, a number of commodities were dropped from the list and in the case of a number of articles the average prices of the grades most sold have been given owing to the impossibility of securing prices for uniform grades for the various cities from month to month.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workmen. The first class is of houses in good condition, favourably located in such districts, with good modern conveniences. The second class is of houses in fair condition less

desirably located, but still fairly central, without modern conveniences.

The weekly budget of a family of five, calculated in terms of the average prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil, and rent, these being the items for which statistics have been obtained each month and published in the LABOUR GAZETTE since January, 1910. The quantities of each commodity included are modifications of those employed in similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes, and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportion of expenditure on the various classes of foods tends to be maintained. At times when the price of an article heavily weighted for this purpose rises (or falls) abnormally the increase (or decrease) in food prices so indicated is exaggerated, and this should be taken into account in using the budget as an indicator of changes in the cost of living. In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. It was estimated, when the budget was first published in 1912, that these calculations represented from sixty to eighty per cent of the expenditure of an ordinary family, according to the total income. For the average family of five the expenditure on these items of food, fuel, light and rent would be perhaps two-thirds or about sixty-five per cent of the total income. While the

budget serves to show the increase or decrease from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province. The quantities of meats, dairy products, cereals, etc., included were adopted as affording a liberal supply for the healthy family of a man at hard physical work. On the other hand an average family with an income sufficient to do so would buy less meat, etc., but more fruits, fresh and canned vegetables, etc., so that comparative expenditure would be little changed.

Retail Prices.

Meats, except veal, again averaged slightly lower. Sirloin steak was down in the average from 30.2c per pound in September to 29.1c in October, the decline being general in all provinces. Round steak averaged 24c per pound and showed the same general decline as sirloin. Shoulder roast averaged 15.9c per pound in October as compared with 16.2c in September. Advances occurred in Nova Scotia and Saskatchewan but all the other provinces averaged lower. Veal was slightly higher at 18.7c, being up in Nova Scotia, Quebec, Ontario, and Manitoba. Pork, roast, declined from 31.1c per pound to 30c. Mess pork was unchanged. Bacon was slightly lower at 41.6c per pound. Boiled ham was down from 67.5c per pound in the average to 65.2c. In fresh fish there were advances in cod, halibut, and whitefish. Salt herring averaged slightly lower. Lard was steady.

Eggs, fresh, advanced from an average of 35.8c in September to 41.7c in October. Cooking eggs also were higher about 5c per dozen at 37.4c. Milk averaged slightly higher at 11.6c per quart. Advances occurred in St. John, N.B., Sorel, St. John's, Que., Belleville, Toronto, Hamilton and Nelson. Butter advanced slightly, dairy

being up from 36.7c per pound in September to 38.4c in October and creamery from 42.8c per pound in September to 43c in October.

Bread fell from 6.9c per pound to 6.8c showing declines in Brantford, Woodstock, Fort William, Regina, Moose Jaw, Medicine Hat, Edmonton, Lethbridge, and Trial. Flour also was down $\frac{1}{2}$ c per pound in the average to 4.5c. Rolled oats showed no change. Canned tomatoes declined slightly while canned peas and corn were unchanged. Beans were down from 8.9c per pound to 8.7c and onions from 6.8c per pound to 5c. Potatoes were lower at \$1.21 per ninety pound bag in October as compared with \$1.45 in September and \$1.75 in August. Evaporated apples declined from 25c per pound to 23.9c. Prunes, raisins, and currants also averaged slightly lower. Raspberry jam and canned peaches were steady. Orange marmalade was up 1c per four pound tin to 84.3c. Granulated sugar averaged 8.7c per pound as compared with 9c in September, and yellow 8.2c per pound as compared with 8.5c in September. Cream of tartar was down from 74.3c per pound to 73.3c. Laundry starch advanced from 11.9c to 12.1c per pound.

Quotations on anthracite coal were more generally available than in September and prices averaged slightly lower. Advances, however, occurred in Ottawa, Orillia, Niagara Falls, Brantford, Kitchener, Stratford, and Windsor. Bituminous coal was up in the average from \$12.00 per ton to \$12.32. Hardwood, four feet long, also averaged higher at \$12.84 as compared with \$12.58 in September, increases occurring in Charlottetown, Hull, Belleville, Orillia, Kitchener, and London. Soft wood was unchanged in the average, increases in some localities being offset by declines in others.

Rentals were steady.

Wholesale Prices.

GRAINS AND FODDER.—Wheat No. 1 Manitoba Northern, at Winnipeg, rose from 97c per bushel at the end of September to \$1.06 by the end of October and Ontario winter wheat at Toronto rose from 95c per bushel to \$1.10. Barley at Winnipeg fell from 54c per bushel to 52c while Ontario barley rose from 58c to 62c. Ontario oats advanced from 35c per bushel to 43c. American corn was about 8c per bushel higher at 87c. Flax-seed at Winnipeg rose from \$2.06 per bushel toward the end of September to \$2.45 per bushel toward the end of October. Hay at both Montreal and Toronto was down, the former \$2 per ton to \$17 and the latter \$1 per ton to \$15. Baled straw was also lower at \$9 per ton. Bran declined from \$21.25 per ton to \$20.00 and shorts from \$23.25 per ton to \$22.00.

ANIMALS AND MEATS.—Western cattle at Winnipeg declined 50c per hundred pounds to \$5. Butcher steers at Toronto were also 50c per hundred pounds lower at \$6.50. Dressed beef was unchanged. Live hogs declined from \$11.50 per hundred pounds to \$9.65 and dressed from \$19 per hundred pounds to \$18. Smoked hams were 3c per pound lower at 23c. Lard rose from 15c per pound to 17c. Dressed fowl was quoted at Montreal at the beginning of October at 26c-30c per pound but later declined to 24c-28c.

DAIRY PRODUCTS.—Butter, finest creamery, advanced from 35c per pound to 36c and dairy prints from 31c per pound to 33c. Cheese, western, coloured, rose from 17 $\frac{1}{2}$ c per pound the last week in September to 21c by the end of October. Fresh eggs at Montreal were 16c per dozen higher at 58c while at Toronto there was an advance of 15c per dozen to 60c. Milk per eight gallon can at Toronto rose from \$1.85 to \$1.95.

FISH.—The demand for codfish was reported to have slackened and the market was reported to be very weak, owing to bad conditions in Europe where some of the best customers there were not buying while the demand from Porto

*Preliminary figures. †Four commodities off the market, fruits, vegetables, etc. One line of spelter was dropped in 1915. §Number of commodities varies from month to month. ‡Revised.

Rico had also fallen off, with a resultant depression in prices. Business in pickled fish was also reported to be dull. The supply of spring mackerel was reported to be not yet exhausted with the price at \$7.50 per barrel ex vessel. Herrings were reported to be nominal at \$5.50 per barrel with no business. No improvement was reported in canned lobsters and the demand from England had not yet revived. Fresh halibut was down 1c per pound to 10c. Fresh salmon trout and whitefish were also slightly lower.

FRUITS AND VEGETABLES. — Peaches, which were quoted at 30c-65c per eleven quart basket the last week in September, advanced to 75c-85c in October. Pears were lower about 25c per eleven quart basket at 50c. Fall apples were quoted at \$3.00-\$5.50 per barrel. Lemons advanced from \$5.00 per box to \$6.50. Oranges were steady. Evaporated apples were down 2c per pound to 17c, while currants advanced from 17c per pound to 19c. Potatoes at Toronto rose from 75c per ninety pound bag to 90c while Green Mountains at Montreal were also up 20c per ninety pound bag to \$1. Beans fell from \$4.40 per bushel to \$3.25. Turnips were quoted at 75c per seventy-five pound bag. Canned corn was down from \$1.50 per dozen tins to \$1.25 and tomatoes from \$1.65 per dozen to \$1.48.

MISCELLANEOUS FOODS.—Oatmeal was up 25c per 98 pound bag to \$4. Flour, Manitoba patents at Toronto, declined 30c per barrel to \$6.60. Granulated sugar was up from \$7.39 per hundred pounds to \$7.89.

TEXTILES.—No changes were reported in woollens. Raw cotton was up from 21.6c per pound to 22.45c. Woven coloured fabrics advanced from 77.1c per pound to 77.69c. Some other lines of manufactured cottons also showed small advances. Raw silk advanced 35c per pound to \$8.15. Jute and hessians were lower, the former declining from 10.41c per pound to 10.09c and the latter from 12.83c per pound to 12.34c. Oil cloth was steady.

HIDES, LEATHERS, BOOTS, AND SHOES.—Calf skins at Toronto were down 2c per pound to 14c.

METALS AND IMPLEMENTS.—Pig iron and steel billets were reported unchanged. Black sheets declined from \$5.30 per hundred pounds to \$5.05. Aluminum, antimony, lead, spelter, and tin were slightly higher. Copper was unchanged. Quicksilver advanced \$6 per seventy-five pound flask to \$73. Silver bar declined from 69c per ounce to 67½c. Zinc sheets were up 2c per pound to 12c.

FUEL AND LIGHTING.—Anthracite coal from the United States was quoted at Montreal at \$14.25 per ton. Connellsville coke declined from \$11.50 per ton at the ovens to \$9.00. Gasoline at Toronto was down 2c per gallon to 32c. Coal oil was steady.

BUILDING MATERIALS.—Red oak was up \$5 per M. to \$130 at Toronto. Rough lumber at Victoria declined from \$17 per M to \$16. Shingles at Victoria were also down from \$4.25 per M to \$3.75. Cement continued to decline, being down 5c per barrel to \$3.63 at Toronto. Wire nails were slightly lower at \$3.65 per keg. Linseed oil and turpentine were higher, the former advancing from 98c per gallon to \$1.02 and the latter from \$1.80 to \$2.20. Benzine was 2c per gallon lower at 32c. Shellac declined from \$4.60 per gallon to \$4.10. Window glass was steady.

HOUSE FURNISHINGS.—Furniture was steady at the lower levels reached in August.

DRUGS AND CHEMICALS.—Carbolic acid crystals were slightly higher at 50c per pound. Copperas declined from \$1.75 per pound to \$1.50. Other lines were reported to be steady.

MISCELLANEOUS.—Raw furs were unchanged. Malt declined from \$1.18 per bushel to \$1.05. Ground wood pulp advanced from \$40 per ton to \$45. Bleached sulphite was up from \$95 per ton to \$105. Raw rubber was up 2c per pound to 19c.

PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes and the accompanying tables give the latest information available as to the movement of prices in other countries as compared with Canada.

The index numbers of retail prices which are listed are from official sources unless otherwise stated. The authorities for the wholesale price index numbers are named in all cases.

Great Britain.

WHOLESALE PRICES.—The Board of Trade index number of wholesale prices, calculated on the base prices in 1919=100, was 157.1 for September, a decline of two points or 1.3 per cent below the August level, which was 2.5 per cent below that for July. It will be recalled that from March to July there was practically no change in the general level. Foods decreased 2.8 per cent in the month under review, a rise in meat and fish being more than balanced by reductions in cereals, vegetables, and fruit. Industrial materials decreased by 0.4 per cent, the metals, minerals and cotton groups showing decreases and those relating to textiles other than cotton and miscellaneous articles showing increases in price.

The *Statist* index number, in continuation of Sauerbeck's figures, stood at 127.9 at September 30, a decrease of 1.8 points or 1.3 per cent on the previous month. This is the lowest figure since February, 1916. During the month under review foodstuffs fell by 3.7 per cent, all groups contributing to the movement. For materials there was an increase of .5 per cent, minerals showing an increase of 1.7 per cent, due to higher prices for iron, copper, tin, lead and coal; textiles showed no change, and sundries decreased .3 per cent.

Austria

COST OF LIVING.—The index number compiled by the Paritätische Kommis-

sion showing the rise in the cost of living of one person at Vienna is calculated on the base July, 1914=1. Included are food, clothing, rent, heat and light, and a total index number. The general trend can be seen from the following figures:

1922	Food	Clothing	Rent	Heating & Lighting	All
January.	748	1354	7	733	664
April....	1043	872
July.....	3282	4517	21	2373	2645
August..	7224	10762	33	5382	5932

As will be seen from the table all groups have increased from 5 to 10 times from January to August. From July to August the increase in the total index number was 129 per cent, and this increase was shared by all groups, the rent index alone being beneath this figure. This rise is chiefly due to the rise of 100 per cent in foreign tender, and the corresponding drop of the Austrian krone to one-half of its July value.

Belgium.

WHOLESALE PRICES.—The official index number of wholesale prices in Belgium compiled by the Ministry of Industry and Labour, on the base prices in April, 1914=100, stood at 360, showing no change for August. Nevertheless several groups showed considerable changes during the month. Resin products and fats decreased 3 per cent and rubber decreased 7 per cent, whilst tar and its products increased 9 per cent, fertilizer 4 per cent, fuel 2 per cent, and both textiles and construction materials, 1 per cent.

COST OF LIVING.—The Ministry of Industry and Labour is publishing index numbers—unweighted for cost of living and weighted for foods—all of which showed a tendency to fall during the months of July and August, and to rise again during the month from August 15 to September 15. The unweighted index

*For France, South Africa, Australia and New Zealand base is taken as 1000 instead of 100. (a) Cost of food budget. (b) 15th of month up to end of 1920; beginning of month thereafter. (c) Beginning of month. (d) Calculated from annual index number. (e) Quarter beginning in specified month. (f) 15th of month. (g) Foods, fuel and lighting, and rent. (h) Average of prices returned at two dates in the month. (i) Issued by Union of Swiss Co-operative stores. (j) Beginning of previous month. (k) Municipal Labour Office, Rome. (l) Food, clothing, rent, heating, lighting and sundries. (m) End of previous month. (n) Average for April-September. (o) Average for October-March. (p) Average for year. (q) Base is average for 6 capital towns. (r) Four chief cities. (s) U.S. Bureau of Labour Statistics. From January, 1913, up to and including December, 1920, only 22 articles of food included. (t) Massachusetts Special Commission on Necessaries of Life. (u) In 1920, 50 articles in 49 towns.

number for the Kingdom showed for the month under review an increase from 366 to 371 points (base, April, 1914=100) or 1.4 per cent, and that for Brussels alone, an increase of 1.8 per cent.

The weighted index number of 30 foods also on the base April, 1914=100, has been compiled from January, 1921, only and shows the following levels during the intervening period.

	1921	1922
January.	493	418
April.	413	368
July.	404	372
August.	424	369
September.	422	384
October.	439	

It thus shows an increase of 15 points or 4 per cent for the month under review.

Bulgaria

COST OF LIVING.—The office of the Director General of Bulgarian Statistics publishes a monthly index number of retail prices of 47 articles—foods, fuel, soap and tobacco (1901-10=100). It is based on the average annual consumption of a household of 5 to 6 members, the weights being calculated from figures of quantities consumed during the period 1908-12. From 1918 to 1919 only state regulated prices are considered for articles of prime necessity. The number of localities varies from 58 in 1914 to four chief cities for the past three years.

	1920	1921	1922
January... .	2438	2260	3156
July.....	2367	2253	3324 (June)

Up to date the peak was reached in May, 1922, the figure being 3677, thus the latest available figure, that for June, shows a decrease of 9.4 per cent.

Czecho-Slovakia

COST OF LIVING.—The Bulletin of the Statistical Office publishes an index number of retail prices (July, 1914=100) of important articles (foodstuffs, fuel, petroleum and soap) and one for clothing (including textiles, shoes and men's hats). The index numbers run as follows:

	Foods, etc.	Clothing
January, 1921	1830	3145
December, 1921	1556	2200
January, 1922	1467	2053
July, 1922	1430	1666

It will be seen from these figures that clothing prices rose much higher than foods, but have fallen very quickly and are now well down toward the level of prices of foodstuffs. In the foodstuffs index number the prices quoted for flour are taken from the free market.

Finland

COST OF LIVING.—The official index number of cost of living, on the base prices in July, 1914=100, rose 17.8 points or 1.5 per cent in August. The index number took an upward trend in June and has kept on rising. The rise in June was due chiefly to the increase in rents of 25 per cent, following the removal of state control of house rents. During July and August rents continued to increase faster than any other item in the budget. During August foods increased 1.9 per cent, house rent increased 4.1 per cent and clothing showed a slight increase; lighting and fuel, and tobacco showed slight decreases, while newspapers and taxes remained unchanged.

France.

WHOLESALE PRICES.—The index number of wholesale prices published by the Statistique Générale stood at 380.7 for

September, a drop of 6 per cent from the August level; all food groups declined, the whole falling 2.8 per cent, while materials rose 1.1 per cent, minerals and metals, and the miscellaneous groups showing increases, while textiles showed a slight drop.

Italy

WHOLESALE PRICES.—The index number compiled by the Chamber of Commerce and Industry at Milan (average prices, May-December, 1921=100) was as follows for July, August and September.

1922	Foods	Industrial Materials.	General Index.
July.	99.01	101.70	100.90
August.	98.75	103.93	102.37
September. .	100.62	105.61	101.11

In the general index there was a slight increase in August followed by a decrease in September. This is true also of industrial materials, but in the case of food prices there is a decrease in August which is followed by a more than compensating increase in September.

Poland

WHOLESALE PRICES.—The index number of wholesale prices published by the Central Office of Statistics at Warsaw (January, 1914=100), for which figures were published in the LABOUR GAZETTE for August, has continued to rise very rapidly. In May, the price level reached 75,634, in June, 87,820, and in July, 103,342. The group figures for the two latter months are not yet available. In the month of May, however, the principal increases were in wheat and vegetable products (7.2 per cent); hides and leather (9 per cent); raw material and finished textiles (15 per cent).

COST OF LIVING.—The index number of cost of living of a workingman's

family of four at Warsaw published by the Central Office of Statistics, includes food, clothing, heating and lighting, rent and water rates, and sundries. On the base 1914=1, the budget reached 639 in May, 684 in June, and 788 in July. The increases by groups for these three months were as follows:

1922	Food	Clothing	Fuel & Light	Rent & Water Rates	Sundries
May	1015	1128	460	79	272
June	1081	1178	521	84	301
July	1298	1227	542	97	356

India

COST OF LIVING.—The official index number of cost of living in Bombay, compiled by the Bombay Labour Office (prices in July, 1914=100) was 165 for September, a rise of 1 point on the August level. Foods rose 2 points, to 161, due to increases in sugar and potatoes, although jowari dropped 7 points and rice one point. Fuel and lighting and house rent were unchanged, but clothing dropped 11 points, or 4.3 per cent.

United States

WHOLESALE PRICES.—The index number compiled by the Federal Reserve Board showed that prices decreased one point, to 164 (1913=100) during september. Raw materials decreased slightly for the first time during the year, owing to the drop in coal and coke prices. Producers' goods continued to rise, and consumers' goods to fall.

Gibson's average index number of wholesale prices of 22 articles of food for October increased 3.7 per cent on prices in September, standing at 69.8 for October. This is the highest figure since July.

Bradstreet's index number of commodity prices as of November 1 stood

at \$13.3482, a gain of 6.7 per cent over the previous month, and of 17.5 per cent on the corresponding date a year ago. Twelve of the thirteen groups advanced in October, coal and coke being the group to show a slight decrease. The index number is now 53.2 per cent above that for August 1, 1914.

Dun's index number stood at \$182.291 at November 1, an increase of nearly 4 per cent on the previous month's level. The increase is shared by all groups with the exception of metals and minerals. The greatest increases were 11.4 per cent in dairy and garden products, and 8.7

per cent in breadstuffs. The total increase in foodstuffs was 6.4 per cent. There was an advance of 5.4 per cent in clothing.

COST OF LIVING.—The index number of cost of living published by the Bureau of Labour Statistics for September, 1922, showed by groups the following percentages of increase in cost over 1913: Food, 39.8; clothing, 71.3; housing, 61.1; fuel and light, 83.8; furniture, 102.9; miscellaneous, 101.1; total, 66.3. There is a decrease of about 0.2 per cent on the total for June last.

FATAL INDUSTRIAL ACCIDENTS REPORTED DURING THE THIRD QUARTER OF 1922

INFORMATION received by the Department for the third quarter of 1922 shows 314 fatalities in the industries and trades of Canada, as compared with 268 in the previous quarter and 320 in the corresponding quarter of last year. Of these fatalities 108 occurred in July, 107 in August and 99 in September as against 102 in July, 111 in August and 107 in September of the previous year. Eighty-three fatalities were reported in the transportation and public utilities group, 53 occurred in both the mining and construction groups, 39 in agriculture, 38 in manufacturing, and 28 in logging operations. Fatalities due to electricity numbered 38, one accident alone, a mine explosion due to an electric "arc," resulting in the loss of 19 lives.

Deaths from explosions due to other causes numbered 14. Twenty-one lives were lost through being struck by trains, 18 through falls of rock and coal in mines, 10 through being caught in belts, saws, etc., 9 through falling beams and collapse of structures, 7 through falls from ladders, 5 from infection, and 4 deaths occurred among farmers through being gored by bulls.

There were also 18 fatalities reported during this quarter which occurred earlier in the year.

The following table, while it does not necessarily include all the fatal industrial accidents that may have occurred, has been prepared from information received from all sources available.

FATAL INDUSTRIAL ACCIDENTS DURING THE THIRD QUARTER OF 1922.

Trade or Industry	Locality	Date	Age	Cause of Fatality
AGRICULTURE—				
Farmer	Minnie Lake, Sask.	July 4	4	Struck by lightning.
Farm hand	Seymour township, Ont.	" 2	59	Team ran away.
Farmer	Melita, Man.	" 22	79	Kicked by a horse.
Farmer's wife	St. Henri de Lauzon, Que.	" 22	78	Fell from a wagon.
Farmer	Wilkie, Sask.	" 22	28	Struck by lightning while in barn.
Farmer	Melrose, Ont.	" 31	31	Jumped on pitchfork left standing upright.
Farmer	Inverness, Que.	Aug. 5	5	Struck by lightning while haying.
Farmer	Lotbinière Co., Que.	" 6	6	Stung by bees in apiary.
Farmer	Near Edmonton, Alta.	" 8	8	Gored by a bull.
Farmer	Perth, Ont.	" 9	81	Struck by train when returning from pasture.
Farmer	St. Jerome, Que.	" 10	52	Gored by a bull.
Farmer	Harwich, Ont.	" 13	70	Gored by a bull.
Farm hand	Charlesbourg, Que.	" 15	18	Horses stung by wasps kicked driver.
Farmer	Harvey Station, N.B.	" 12	55	Fell from mow.
Farmer	Lancaster township, Ont.	" 16	44	Struck by lightning while stooking.
Farmer	Amaranth township, Ont.	" 17	51	Excessive heat while hauling grain.
Farmer	Huntley township, Ont.	" 17	42	Fell from wagon.
Farm hand	North Fredericksburg, Ont.	" 18	16	Jumped on hay fork.
Farmer	St. Come, Que.	" 19	19	Gored by a bull.
Farmer	Waskada, Man.	" 21	21	Struck by lightning.
Farm hand	Arnaud, Man.	" 22	22	Fell on driving belt of tractor.
Farmer	St. Raphael d'Aston, Que.	" 30	54	Premature explosion while blasting stumps.
Farmer	Near Baddeck, N.S.	" 30	30	Fell from load to barn floor.
Farmer	Belmore, Ont.	Sept. 2	2	Partial collapse of barn when placing threshing machine.
Farmer	Prince Albert, Sask.	" 4	4	Kicked by a horse.
Farm woman	Cheltenham, Ont.	" 5	5	Thrown from wagon when team ran away.
Harvest hands (2)	Semans, Sask.	" 10	18-20	Struck by lightning.
Farmer	Parkbeg, Sask.	" 12	12	Fell from wagon when team ran away.
Farmer	Near Weyburn, Sask.	" 9	36	Crushed beneath granary being unloaded from truck.
Farm hand	North Bay, Ont.	" 19	19	Tetanus; injured when horses on binder ran away.
Farmer's son	Greenbank, Ont.	" 21	15	Fell from horse which stumbled over misplaced wire.
Farmer	Near Itune, Sask.	" 23	23	Drowned when rescuing steer from lake.
Farmer	Morewood, Ont.	" 26	22	Strained back when binding.
Farmer	Glengarry, Ont.	" 29	48	Thrown from wagon when horses ran away.
Farmer	Acton, Ont.	" 22	47	Fell from beam in barn.
Blaster	Near Jeffries Corners, N.B.	" 25	18	Explosion of dynamite.
Farmer	Beldeck, Sask.	" 29	81	Thrown from wagon when crossing ditch.
Farmer	Swift Current, Sask.	" 30	64	Burned when barn caught fire during threshing.
LOGGING—				
Logger	Centre Bay, B.C.	July 4	41	Struck by log when moving donkey engine.
Logger	Salmo, B.C.	" 15	35	Struck by log which swung up when tree fell on it.
Logger	Stave Falls, B.C.	" 18	45	Crushed by falling tree.
Logger	Chee Kye, B.C.	" 22	22	Struck by log which swung up when another log fell on it.
Labourer	Blunden Harbour, B.C.	" 5	23	Crushed by rolling log.
River driver	Bolger Bridge, Ont.	" 6	6	Drowned.
Engineer	Lion's Head, Ont.	" 12	12	(No particulars).
Stable boss	Bellwood Siding, Ont.	" 12	12	Kicked by a horse.
Workman	Chapleau, Ont.	" 16	16	Drowned.
Lumberman	Temagami River, Ont.	" 17	22	Drowned.
Labourer	Pakesley, Ont.	" 17	17	Crushed under boards.
Foreman	Pickered, Ont.	" 19	49	Thrown from wagon.
Labourer	Revelstoke, B.C.	" 22	40	Struck by falling snag.
Faller	Craicraft Island, B.C.	" 25	30	Struck by a falling limb.
Logger	Surf Inlet, B.C.	Aug. 1	25	Fell from log—drowned.
Labourer	Pembroke, Ont.	" 7	72	Thrown from wagon.
Logger	Surf Inlet, B.C.	" 5	5	Drowned.
Labourer	Kenabeck, Ont.	" 18	18	Struck by falling log.
Axeman	Bouchette, Que.	" 18	22	Hemorrhage from over exertion.
Boorman	Rock Bay, B.C.	" 25	27	Slipped from log—drowned.
Labourer	Dean Lake, Ont.	" 26	53	Crushed by log.
Teamster	Gladstone township, Ont.	" 28	28	Struck by log.
Labourer	Salmon Arm, B.C.	Sept. 4	41	Struck by falling tree.
Logger	Stillwater, B.C.	" 7	21	Crushed by rolling log.
Labourer at camp	Alert Bay, B.C.	" 17	35	Fell from footboard of locomotive.
Chokerman	Topaz Harbour, B.C.	" 20	35	Struck by cable which became unfasterer during hoisting.
Forestry student	Flanders, Ont.	" 20	26	Struck by falling tree.

FATAL INDUSTRIAL ACCIDENTS DURING THE THIRD QUARTER OF 1922.—(Continued).

Trade or Industry	Locality	Date	Age	Cause of Fatality
FISHING AND TRAPPING—				
Fisherman	Hecate Straits, (B.C.)....	Aug. 8	Drowned; boat capsized.
MINING, NON-FERROUS SMELTING AND QUARRYING—				
<i>Metaliferous mining:</i>				
Labourer	Dane, Ont.....	July 25	22	Drowned.
Labourer	Levack, Ont.....	Aug. 12	35	Chest crushed.
Loader	Timmins, Ont.....	" 25	23	Fractured jaw (no particulars).
Miner	Near Madoc, Ont.....	Sept. 14	23	Explosion.
<i>Coal mining:</i>				
Trip rider.....	New Waterford, N.S.....	July 8	Crushed between pit boxes—(died Oct. 13, 1922)
Miner	Cassidy, B.C.....	" 6	27	Blow-out in mine.
Miner	New Waterford, N.S.....	" 6	Fall of stone.
Miner	Luscan, Alta.....	" 12	Cave-in of roof.
Miner	Glace Bay, N.S.....	Aug. 3	22	Fall of roof coal.
Shiftman	Springhill, N.S.....	" 4	63	Caught between pump and timber while lowering pump.
Miner	Saunders, Alta.....	" 19	Over 21	Fall of coal while clearing rock off coal.
Miner	Blairmore, Alta.....	" 30	21	Fall of roof coal.
Miners (19)*.....	Comox, B.C.....	" 30	Explosion due to open sparking caused by an arc in electric trailing cable at socket.*
Fireboss and miner (2).....	Middlesboro, B.C.....	Sept. 13	40-45	Fall of roof coal.
Miner	Coleman, Alta.....	" 5	Over 21	Fall of roof coal.
Miner	Coal Creek, B.C.....	" 6	24	Buried under coal; cave-in at face.
Miner	Nanaimo, B.C.....	" 8	Fall of coal.
Miner	Glace Bay, N.S.....	" 8	Fall of coal.
Miner	Cassidy, B.C.....	" 18	52	Fall of roof coal.
Miner	Drumheller, Alta.....	" 21	43	Fall of coal.
Miner	Sydney Mines, N.S.....	" 21	40	Crushed by falling machine.
Miner	Bridgeport, N.S.....	" 22	Fall of coal.
Miner	Taylorlton, Sask.....	" 28	38	Fall of wall following explosion.
Loader	Sydney Mines, N.S.....	" 29	Fall of stone.
Cager helper.....	Lethbridge, Alta.....	" 15	Over 21	Crushed beneath a descending cage.
Miner	New Aberdeen, N.S.....	" 23	45	Fall of stone.
Manager	Three Hills, Alta.....	" 27	42	Fell from top of blazing tippie when fighting fire.
Fire boss.....	Mountain Park, Alta.....	" 29	28	Fall of rock.
<i>Non-metallic mineral mining and quarrying:</i>				
Foreman at sand pit.....	Kentville, N.S.....	July 22	65	Struck by train when leaving pit.
Teamster at gravel pit.....	Beverly, Alta.....	Aug. 2	Over 21	Bank caved in.
Quarryman	St. John, N.B.....	" 3	55	Struck by rolling stone.
Workmen at clay pit (2)....	Rocanville, Man.....	" 3	Dynamite explosion.
<i>Clay products and structural materials, N.E.S.:</i>				
Employee at cement plant....	Montreal, Que.....	July 29	36	Burned—clothing took fire while guarding coal.
MANUFACTURING—				
<i>Vegetable foods, drink and tobacco:</i>				
Watchman at cannery.....	Winona, Ont.....	" 21	Shot by burglars.
Workman at cannery.....	St. Catharines, Ont.....	Sept. 28	57	Fell off car.
<i>Animal foods:</i>				
Foreman at packing plant....	Hamilton, Ont.....	July 6	67	Injured foot—infection.
Refiner at packing plant....	Hamilton, Ont.....	" 8	37	Broken back and feet.
Labourer at packing plant....	Toronto, Ont.....	Aug. 28	66	Cut finger—infection.
Employee at creamery.....	Hamilton, Ont.....	" 31	Fell from ladder.
<i>Textiles:</i>				
Employee at flax mill.....	Clinton, Ont.....	Sept. 6	28	Caught in belt on machine.
<i>Leather:</i>				
Apprentice	Montreal, Que.....	July 28	15	Fell down elevator shaft.
<i>Rubber goods:</i>				
Labourer at rubber plant....	Bowmanville, Ont.....	" 17	55	Fractured foot (no particulars).
Helper at rubber plant.....	Toronto, Ont.....	" 17	23	Struck by hose nozzle.
<i>Pulp, paper and paper goods:</i>				
Employee at paper mill.....	Thorold, Ont.....	" 25	24	Arm caught between rolls on machine.
Water boy at paper mill....	Fort William, Ont.....	Aug. 16	20	Drowned.
Sub-foreman at pulp mill....	Milton, N.S.....	Sept. 25	70	Caught in ropes when holsting logs.

*A summary of the official report of this disaster appeared in the LABOUR GAZETTE, October, 1922, page 1113.

FATAL INDUSTRIAL ACCIDENTS DURING THE THIRD QUARTER OF 1922.—(Continued).

Trade or Industry	Locality	Date	Age	Cause of Fatality
<i>Saw and planing mills:</i>				
Labourer at sawmill.....	Arnprior, Ont.....	July 2	53	Fell—struck head.—
Labourer	Vancouver, B.C.....	" 3	44	Edger broke, struck by flying piece of pulley.—
Employee at sawmill.....	Latchford, Ont.....	" 29	18	Struck by piece of edger flying from edger machine.—
Foreman at sawmill.....	Nellie Lake, Ont.....	Aug. 14	48	Caught in shaft.—
Employee at sawmill.....	Matane, Que.....	" 21	17	Caught in saw.—
Filer	Avola, B.C.....	Sept. 5	54	Hip injured while unloading shingle machine.—
Employee at lath mill.....	Newcastle, N.B.....	" 19	60	Struck runaway when passing under with team.
Employee at sawmill.....	Makamick, Que.....	" 30	Caught by saw.—
<i>Wood products:</i>				
Employee at basket factory..	Rodney, Ont.....	July 13	64	Caught in shafting while oiling pulley.
<i>Iron, steel and products:</i>				
Foreman at foundry.....	Fort William, Ont.....	" 2	54	Fractured skull (no particulars).
Railway mechanic.....	Bridgewater, N.S.....	" 6	59	Run over by engine.
Car repairer.....	Campbellton, N.B.....	" 18	45	Crushed between cars.
Helper at safe works.....	Toronto, Ont.....	" 14	71	Crushed under freight elevator.
Employee at foundry.....	Longue Point, Que.....	" 31	44	Struck by fragment when emery wheel burst.
Employee at tool factory....	Toronto, Ont.....	Aug. 8	78	Heavy lathe fell while being hoisted.
Auto repairman at glass company	Toronto, Ont.....	" 10	Blood poisoning.
Car repairer.....	West Toronto, Ont.....	" 21	38	Struck by lever while under snow plow.
Plate assistant at chain factory	Niagara Falls, Ont.....	" 31	14	Fractured arm, died under anaesthetic.
Japanner at foundry.....	Brantford, Ont.....	Sept. 5	Burned when gas furnace exploded.
Car repairer.....	Niagara, Ont.....	" 11	Electrocuted.
Foreman at railway shop....	Parent, Que.....	" 15	Explosion of a calcimine tank.
<i>Non-ferrous metal products:</i>				
Employee at aluminum factory	Massena, Ont.....	July 28	30	Electrocuted.
<i>Non-metallic mineral products:</i>				
Employee at oil refinery.....	Toronto, Ont.....	Aug. 2	36	Explosion—believed due to accumulation of flue gas.
Labourer at oil refinery.....	Sarnia, Ont.....	Sept. 1	43	Fell from scaffold.
<i>Miscellaneous industries:</i>				
Mechanic	Hamilton, Ont.....	Aug. 15	30	Paralysis (no particulars).
Handyman	Toronto, Ont.....	Sept. 5	Struck by street car.
<i>CONSTRUCTION—</i>				
<i>Buildings and structures:</i>				
Tester with plumber.....	London, Ont.....	July 6	55	(No particulars).
Employees at Marconi tower (4)	Glace Bay, N.S.....	" 8	23—25 26—51	Mast collapsed causing fall.
Roofer	Montreal, Que.....	" 10	27	Fell from ladder.
Workman	Montreal, Que.....	" 19	37	Fell down shaft.
Carpenter	Edmonton, Alta.....	" 28	21	Struck by hammer when board gave way.
Labourer at smoke stack....	New Salem, N.S.....	" 29	Struck by falling beam.
Calciminer	Kitchener, Ont.....	" 31	50	Ladder slipped causing fall.
Labourer	Toronto, Ont.....	Aug. 11	Struck by falling girder.
Mason	Bagotville, Que.....	" 15	68	Fell from scaffold.
Workman	Unionville, Ont.....	" 17	Windstorm blew over stable under construction.
Painter	Quebec, Que.....	" 25	47	Fell from scaffold.
Workman	Chatham, Ont.....	" 25	Lightning.
Stonemason	Montreal, Que.....	Sept. 13	58	Over balanced and fell with heavy stone he was placing on wall.
Workman	Morrisburg, Ont.....	" 24	17	Struck by timber when raising barn.
Workman	Rosemount, Que.....	" 25	Over balanced by long board when removing framework from structure.
Roofer	Quebec, Que.....	" 26	Over 21	Fell from church steeple.
<i>Railway construction:</i>				
Labourer	Bidell, Ont.....	July 2	55	Struck by train.
Carpenter	Tilbury, Ont.....	" 6	61	Cut hand—infection.
Carpenter	Meville, Sask.....	" 10	26	Fell from scaffold.
Labourer	Tilsonburg, Ont.....	" 19	35	Struck by train.
Workman at tunnel.....	Buda, Ont.....	" 28	Fall of rock.
Workman	Cardinal, Ont.....	Sept. 8	Scaffold broke—fell to ground.
Superintendent	Heisler, Alta.....	" 6	Struck by train.

FATAL INDUSTRIAL ACCIDENTS DURING THE THIRD QUARTER OF 1922.—(Continued).

Trade or Industry	Locality	Date	Age	Cause of Fatality
<i>Miscellaneous construction:</i>				
Bridgeman	Gatineau Point, Que.....	July 10	10	Fractured skull (no particulars).
Sewer digger	Hamilton, Ont.....	" 15	15	Suffocated when walls collapsed.
Sewer pipe layer.....	Kitchener, Ont.....	" 18	65	Overcome by gas in manhole.
Labourer	Great Falls, Man.....	" 20	26	Electrocuted—Derreck chain charged due to destruction of insulation during electric storm.
Labourer	Great Falls, Man.....	" 21	26	Fell off scow into river—drowned.
Workman at road work.....	Revelstoke, B.C.....	" 22	22	Struck by falling tree.
Foreman at road work.....	Annapolis, N.S.....	" 22	22	Struck by train.
Employee with power commission	Stratford, Ont.....	" 23	21	Fell from tree.
Employee with power commission	Chippewa, Ont.....	" 25	37	Explosion when blasting.
Bridgeman	Port Arthur, Ont.....	" 29	37	Deraiment of gasoline speeder.
Well borers (2).....	Killarney, Man.....	Aug. 5	5	Overcome by gas.
Labourer	Toronto, Ont.....	" 5	63	Struck by derrick.
Fireman at dredging.....	Montrose, Ont.....	" 10	27	Sealed—Water tubes blew out while firing.
Labourer at road work.....	York, Co., Ont.....	" 14	14	Fractured skull (no particulars).
Labourer	Unionville, Ont.....	" 16	18	Fractured skull (no particulars).
Labourer	Toronto, Ont.....	" 23	35	Fractured foot (no particulars).
Inspector for Harbour Commission	Pointe à Carey, Que.....	" 16	45	Drowned.
Workman	Buffalo, Ont.....	" 28	28	Chest crushed.
Workman on canal.....	St. Catharines, Ont.....	Sept. 6	23	Buried in sand hopper.
Labourer	Port Dalhousie, Ont.....	" 6	45	Cave-in of trench.
Labourer at pier.....	Vancouver, B.C.....	" 11	42	Fell from false work—drowned.
Workman at sewer.....	Port Dalhousie, Ont.....	" 16	40	Cave-in.
Bridge painter.....	Beavermouth, B.C.....	" 19	19	Fell from scaffold—drowned.
Carpenter with power commission	Queenston, Ont.....	" 23	24	Fell from scaffold.
Road contractor.....	Perth, Ont.....	" 25	45	Automobile struck by train.
Fireman	Toronto, Ont.....	" 27	27	Electrocuted.
<i>TRANSPORTATION AND PUBLIC UTILITIES—</i>				
<i>Steam railways:</i>				
Brakeman	Lansdowne, Ont.....	July 1	40	Fell between cars.
Brakeman	Amherst, N.S.....	" 1	1	Fell from engine.
Carman	Restigouche Co., N.B.....	" 15	44	Run over by train.
Yardman	Hochelaga, Que.....	" 4	30	Killed while working hand brake (no particulars).
Mail clerk.....	St. Moise, Que.....	" 5	5	Train wreck.
Labourer	Toronto, Ont.....	" 7	27	Riding on truck (no particulars).
Engineer	Quebec, Que.....	" 11	59	Deraiment.
Sweeper	Port Colborne, Ont.....	" 28	49	Struck on head by pulley.
Fireman	Near Oba Sd., Ont.....	" 20	25	Deraiment—train struck a moose.
Trucker	Depot Harbour, Ont.....	" 22	19	Drowned.
Engineer	St. Clet, Que.....	" 31	40	Collision.
Labourer	Toronto, Ont.....	Aug. 2	2	Crushed by cars.
Conductor	Anyox, B.C.....	" 4	31	Crushed between motor and car while on footboard staking cars ahead.
Trackman	St. Moise, Que.....	" 5	33	Struck by lightning.
Yardman	Pt. St. Charles, Que.....	" 6	22	Run over by train.
Fire patrolman	Martel, B.C.....	" 9	39	Struck by train while removing speeder.
Sectionman	Ignace Sd., Ont.....	" 18	19	Hand car struck by train.
Trackman	Burlington, Ont.....	" 26	26	Struck by train.
Brakeman	New Carlisle, Que.....	" 28	42	Crushed while uncoupling cars.
Sectionman	Near Pine, Ont.....	" 29	29	Struck by train.
Pitman	Near Irma, Alta.....	Sept. 3	22	Struck by train.
Labourer	Hawk Lake, Ont.....	" 9	55	Struck by train.
Section foreman	Colonsay, Sask.....	" 14	46	Collision of track cars.
Yardman	Guelph, Ont.....	" 15	23	Deraiment.
Yardman	Montreal, Que.....	" 15	15	Crushed between cars.
Sectionman	Cobalt, Ont.....	" 16	16	Over excitement while fighting bush fire.
Brakeman	Menzie's Bay, B.C.....	" 16	23	Struck by log which fell from loaded car.
Fireman	Culrose, Man.....	" 19	24	Deraiment—crushed between lever and seat box.
Brakeman	Dublin, Ont.....	" 20	34	Run over while uncoupling cars.
Yardman	Parkdale, Ont.....	" 23	42	Fell from train; foot caught in trap door.
Conductor	Brandon, Man.....	" 25	31	Fell between cars.
<i>Street and electric railways:</i>				
Brakeman	St. Anne de Beaupré, Que.	July 17	17	Electrocuted while repairing trolley.
Workman	Kitchener, Ont.....	" 18	18	Fell from ladder while working on overhead wire.
Lineman	Niagara, St. Catharines Railway, Ont.....	Sept. 11	11	Electrocuted.

FATAL INDUSTRIAL ACCIDENTS DURING THE THIRD QUARTER OF 1922.—(Continued).

Trade or Industry	Locality	Date	Age	Cause of Fatality
<i>Water transportation:</i>				
Employees on tug (6).....	Near Sorel, Que.....	July 1	Collision.
Deckhand	Snug Cove, B.C.....	" 6	52	Drowned—fell off boat.
Scowman	Port Burwell, Ont.....	" 8	23	Drowned.
Fireman	Point Edward, Ont.....	" 18	Drowned.
Ship painter.....	Midland, Ont.....	" 25	Drowned—while lowering scaffold, chain broke.
Captain on fish carrier.....	Portland Inlet, B.C.....	" 31	Drowned—boat sank in heavy sea.
Ship's steward.....	Lachine Rapids.....	" 31	Drowned; small boat capsized.
Ship's carpenter	Quebec, Que.....	Aug. 9	23	Fell into hold of steamer.
Purser	Near Honey Harbour, Ont.....	" 17	Drowned.
Member of schooner crew.....	Hopewell Cape, N.B.....	" 31	19	Slipped when boarding vessel.
Pilot on seaplane.....	Point Grey, B.C.....	Sept. 13	Wreck of seaplane.
Barge man	Winnipegosis, Man.....	" 18	48	Fell off barge.
			Over	
Longshoreman	Levis, Que.....	" 30	30	Fell overboard off gang plank.
Sailor	Quebec, Que.....	" 24	21	Fell from ladder into hold of steamer.
<i>Storage and local transportation:</i>				
Labourer	New Canaan, Ont.....	July 9	Drowned.
Truck driver.....	Cap St. Martin, Que.....	" 26	40	Struck by train.
Checker	Toronto, Ont.....	" 31	35	Foes crushed.
Electrician	Toronto, Ont.....	Aug. 2	41	Kicked by horse.
Teamster	Galloway, B.C.....	" 3	18	Arm caught in belt.
Weighman at elevator.....	Port Arthur, Ont.....	" 11	Smothered in screenings hopper.
			Over	
Guide	Lake Edwards, Que.....	" 22	21	Kicked by a horse.
Driver	Merrickville, Ont.....	Sept. 3	70	Horses frightened by train bolted.
Teamster	Swansca, Ont.....	" 5	64	Heart failure.
Grain trimmer at elevator.....	Montreal, Que.....	" 7	19	Fell from ladder in hold of steamer.
Workman	Oshawa, Ont.....	" 9	32	Crushed between truck and loading machine.
Driver of motor truck.....	Montreal, Que.....	" 13	22	Crushed against wall. Truck started while being cranked.
Chauffeur with contractor.....	Davisville, Ont.....	" 16	35	Electric shock when removing live wire from road.
Messenger for express company	Hunter, Ont.....	" 19	Attempted to board moving train—run over.
			Over	
Teamster	Edmonton, Alta.....	" 25	21	Part of load slid forward on to horses causing them to run away.
Driver of truck.....	Brandon, Man.....	" 18	26	Struck by train.
<i>Telegraph and telephone:</i>				
Lineman with telegraph company	Hamilton, Ont.....	Aug. 1	23	Electrocuted while stringing wires.
Lineman with telephone company	Arthur township, Ont.....	" 1	Fell from pole.
Lineman with telephone company	Dutton, Ont.....	Sept. 20	30	Wire fell across hydro power wire.
<i>Public utilities, n.e.s.:</i>				
Painter	Toronto, Ont.....	July 14	21	Electrocuted while printing pole.
Helper with light commission	Kitchener, Ont.....	" 18	Struck by swaying cable which caused fall from repair car.
Lineman	Ancaster, Ont.....	" 22	37	Electrocuted.
Lineman	Stratford, Ont.....	" 22	21	Branch of tree gave way causing fall.
Lineman	Nanaimo, B.C.....	" 28	26	Electrocuted. Line came in contact with primary wire.
Workman with power commission	Kakabeka Falls, Ont.....	" 28	Electrocuted.
Linemen with power commission (2).....	Montreal, Que.....	Aug. 5	37—39	Electrocuted. While splicing wire at top of pole it broke loose.
Employee of power commission	Montreal, Que.....	" 18	Burned by flame from electric apparatus which had been struck by lightning.
Lineman	Ayr, Ont.....	Sept. 2	56	Electrocuted.
Employee of power company	Shawinigan Falls, Ont.....	" 7	35	Electrocuted.
<i>TRADE—</i>				
<i>Warehousing:</i>				
Coal trimmer at warehouse	St. John, N.B.....	July 21	60	Caught in elevator shaft.
Storeman	Montreal, Que.....	Aug. 11	16	Caught between platform of hoist and trap door.
<i>Retail:</i>				
Coal dealer	London, Ont.....	Sept. 1	Electrocuted when oiling a motor.
Labourer with coal dealers.....	Toronto, Ont.....	" 15	30	Tripped over a spike at dock—drowned.
Clerk in furniture department	Moncton, N.B.....	" 30	43	Fell down elevator shaft.

FATAL INDUSTRIAL ACCIDENTS DURING THE THIRD QUARTER OF 1922.— (Concluded).

Trade or Industry	Locality	Date	Age	Cause of Fatality
SERVICE—				
<i>Public and Municipal:</i>				
Foreman	Lindsay, Ont.....	July 10	57	Thrown against wheel.
Labourer	Kitchener, Ont.....	" 18	70	Asphyxiated.
Fire ranger.....	Missanable River near	" 26	25	Drowned.
	Peterbell, Ont.....		Over	
Fire ranger.....	Edson, Alta.....	" 28	21	Collision of motor and track car.
Fire ranger.....	Clear Lake, Ont.....	Sept. 2	34	Drowned.
Fire ranger.....	Edson, Alta.....	" 5	21	Engine ran into hand speeder.
Constable	Coleman, Alta.....	" 20		Shot.
<i>Recreational:</i>				
Circus workman	Calgary, Alta.....	" 12		Fell between cars.
<i>Personal:</i>				
Cleaner	Montreal, Que.....	July 4	18	Fell from ladder.
Window cleaner.....	Montreal, Que.....	Aug. 1	19	Fell from window.
			Over	
Bell boy	Banff, Alta.....	" 14	21	Jumped off moving truck.
MISCELLANEOUS—				
			Over	
Labourer	Rimby, Alta.....	" 1	21	Exposure; chilled while working in water.
Fireman	Carter Bay, B.C.....	" 28	23	Caught in drum while steadying straw line.
Caretaker	Winnipeg, Man.....	Sept. 11		Fire following explosion in confectionery store.

SUPPLEMENTARY LIST OF ACCIDENTS OCCURRING IN 1922 PREVIOUS TO THE THIRD QUARTER.

Trade or Industry	Locality	Date	Age	Cause of Fatality
Farmer hand	York Roads, Ont.....	March 22	61	Struck by falling tree.
Teamster (Logging).....	South Slocan, B.C.....	" 29	30	Kicked by horse.
Painter with manufacturer.....	Ottawa, Ont.....	" 15	53	Lead poisoning.
Constable (R.C.M.P.).....	Herschell Island.....	" —		Shot by prisoner.
Sawyer	Amherst Head, N.S.....	April 14		Struck knee on carriage (died May 3).
River driver	North Co., N.B.....	May 4	35	Blow on stomach by peevie.
Labourer	Victoria, B.C.....	" 25		Fell from scow—drowned.
Lobster packer.....	Ecum Secum, N.S.....	" 31		Poisoned—drank soldering fluid by mistake.
Chauffeur	Cobourg, Ont.....	June 16	20	Struck by train.
Yardman	Vancouver, B.C.....	" 16	35	Slipped while getting on car.
Fire ranger.....	Mississauga River, Ont.....	" 19	42	Drowned.
Bridgeman	Revelstoke, B.C.....	" 21	18	Collapse of swing staging.
Foreman with lumber company.....	Fauquier, Ont.....	" 22	58	Struck on head.
Brakeman	Anjou, B.C.....	" 24	31	Collision.
Railway labourer.....	Verner, Ont.....	" 28	45	Deraiment.
Teamster	Bull River, B.C.....	" 29	42	Thrown into chute when logs crossed.
Station agent.....	Moorfield, Ont.....	" 30	41	Cut hand—infection.
Linemane	Victoria, B.C.....	" 30	41	Struck by falling pole.

IMMIGRATION TO CANADA DURING THIRD QUARTER OF 1922

THE following table compiled from information furnished by the Department of Immigration and Colonization gives some details respecting the total number of immigrants into Canada during the third quarter of 1922. For purposes of comparison the figures for the previous quarter and for the corresponding quarter of 1921 are also given.

The table on page 1243 gives the nationality, sex, occupation and destination of all immigrants who entered

Canada during the quarter under review.

IMMIGRATION TO CANADA DURING THE THIRD QUARTER OF 1922.

Period	Great Britain and Ireland	U.S.A.	Other Countries	Totals
July	4,305	2,024	1,428	7,757
August	2,833	2,559	1,256	6,628
September	3,508	2,032	1,314	6,854

RECENT LEGAL DECISIONS AFFECTING LABOUR

THE two legal decisions which are summarized below have reference respectively to Workmen's Compensation in Quebec and Mechanics' liens in Alberta.

Quebec workman not receiving a "fixed wage" cannot deduct overtime in calculating yearly earnings for purposes of Compensation under Act.

A workman had both legs broken and received internal injuries when unloading a quantity of steel plates. He sued his employer under the Quebec Workmen's Compensation Act for \$2,500 compensation for the period of total disability. Prior to these proceedings the plaintiff workman had accepted \$949.40 in settlement of any claim he might have against his employer, but he claimed that he did not understand the English language and that his condition was such as would justify the reopening of the case and the granting of additional damages.

The action was submitted to the Court on the following questions: (1) Did the plaintiff come within the provisions of the Workmen's Compensation Act? (2) If so was there any ground for revising the settlement which was arrived at between the parties on December 13, 1919? It was established that the plaintiff's wages for the twelve months preceding the date of the accident amounted to \$1,437.11, this sum being made up in part of hourly wages, in part of wages for piece work and in part of wages for overtime. The plaintiff contended that in virtue of an amendment to the Workmen's Compensation Act passed on March 17, 1919, he was not bound in calculating his year's

On another page of this issue an account is given of a legal decision recently delivered in connection with a printers' strike in England respecting findings of the Industrial Courts.

wages, to take into account any remuneration he may have received for overtime work and that deducting all overtime payments his year's wages amounted to less than \$1,200,* bringing him therefore within the scope of the Workmen's Compensation law.

The amendment referred to in the plaintiff's claim reads as follows: "In case where the workman receives a fixed wage, he shall not be bound, in calculating the year's wages to take into account any remuneration he may have received for overtime work."

The Court declared that in the interpretation of this amendment a distinction must be drawn between a "fixed wage," and a "fixed rate of wages." In every case the workman receives a fixed "rate of wages"; but the legislature evidently intended to make a distinction between the workman who receives a fixed rate of wages and the one who receives a "fixed wage," otherwise the amendment would mean not what it says, namely, "in the case of a workman," but that it would mean that in every case a workman shall not be bound, in calculating his year's wages, to take into account anything he may receive for overtime.

*An amendment to the Act in 1920 raised this maximum to \$1,500.

Therefore, a workman who works by the hour at, say, 40 to 47½ cents an hour, is bound to take into account his overtime work in ascertaining whether his claim comes under the provisions of the Workmen's Compensation Act. The plaintiff did not receive a fixed wage, and the Court held that his claim did not therefore come under the provisions of the Act, as his yearly earnings including overtime amounted to more than \$1,200.

As to the other pleas of the plaintiff, the Court declared that with this view of the case it was unnecessary to adjudicate on them, but found that there

was no proof of any aggravation of the plaintiff's disability since the date of the settlement, that his earning capacity was not diminished to any appreciable extent, and that he had been fairly well compensated having received \$949.40 plus \$250 for doctor's fees and hospital charges, and having been given a light job by the defendant, where he earned as much as before the accident, and which he gave up of his own accord.

The action of the plaintiff was therefore dismissed with costs.

(Quebec. — *McCarthy vs. Canadian Vickers*).

All mechanics' liens in Alberta must be filed within certain time after completion of work in respect of which lien is claimed.

While a wage earner was engaged in working on a certain property in Alberta, the owner of the property posted a notice under Section 11 of the Mechanics' Lien Act of Alberta, disclaiming responsibility for the works or improvements being made thereon. Notwithstanding this notice the workman continued to work on the property as before. After he had ceased work he filed a claim of lien for wages earned prior to the posting of the notice. The law provides that a lien ceases to exist after the expiration of thirty-five days after the claimant "has ceased from any cause to work thereon," unless in the meantime he has filed his lien in the proper office. In this case the lien was not filed until more than thirty-five days after the work was done in respect of which the lien was claimed, that is, after the time of the posting of the notice by the owner, although it was filed within thirty-five days of the time he did the last work on the property. The parties applied to the Supreme Court of Alberta

to determine the question of law as to whether the lien was filed within the prescribed time or whether it had ceased to exist. The workman contended that the work performed by him after the posting of the notice availed him to keep alive his lien for the work done before the posting of the notice and that his affidavit in support of it was filed within the prescribed time because it was filed within thirty-five days after the time when he ceased to work on this land.

It was held by the Court that the ceasing to work, mentioned in Section 12 of the Act, referred to the work in respect of which the lien was claimed. The object of the section was to place a time limit upon the filing of a lien so that the owner might know whether or not the claimant intended to enforce it against the property, and so protect himself, if necessary, against the contractor. This object would be quite defeated if the claimant could add to the period of the work for which a lien was claimed a further period covering his

employment on the same construction, but in respect of which he could not claim a lien. The judgment of the Court therefore was that the period of time covered by the plaintiff's work subse-

quent to the posting of the defendant's notice could not be taken into account in determining the date within which the plaintiff's lien should have been filed.

(*Alberta.—Sutherland vs. Davison*).

THE LABOUR GAZETTE

Prepared and edited in the Department of Labour, Ottawa

MINISTER—THE HONOURABLE JAMES MURDOCK.

DEPUTY MINISTER—F. A. ACLAND.

Volume 22

DECEMBER, 1922

Number 12.

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

This issue in brief

In addition to the usual general review of the industrial situation that has been appearing monthly in the LABOUR GAZETTE, two new monthly articles have been added in this issue, one dealing in considerable detail with the employment situation during October as reported by employers, the other with the work of the offices of the Employment Service in the same month. Among the numerous items in this issue of general interest might be mentioned a report on the Fourth Conference of the International Labour Organization, various articles on the training of apprentices, and a summary of a report on Unemployment, issued by the International Labour Office.

At the beginning of November the percentage of unemployment as reported by trade unions stood at 4.0 as compared with 2.8 per cent at the beginning of October and with 7.4 per cent at the beginning of November, 1921. The volume of employment at the close of October as indicated by returns tabulated from over 6,600 firms showed a further moderate increase in employment generally, in continuation of the favourable movement manifested uninterruptedly during the previous six months. The apparent variation in these reports may be accounted for partly by a slight difference in the time of reporting and partly by a large increase during October in the number of bushworkers, who

are, in general, not members of labour organizations. The offices of the Employment Service of Canada reported a considerable expansion in the number of applications, vacancies and placements made during October. This increased activity of the offices was largely due to a heavy demand for, and placements made of, farm workers in Saskatchewan.

The average cost of the weekly family budget of 29 staple foods was \$10.29 at the beginning of November as compared with \$10.23 for October; \$11.08 for November, 1921; \$16.92 for June, 1920 (the highest point reached); and \$7.96 for November, 1914. The cost of the weekly food, fuel and rent budget was \$20.88 for November, as compared with \$20.86 for October; \$21.60 for November, 1921; \$26.92 for July, 1920 (the highest point reached); and \$14.36 for November, 1914. In wholesale prices the index number stood at 221.7 for November, as compared with 219.8 for October; 227.3 for November, 1921; 356.6 for May, 1920 (the highest point reached); and 137.5 for November, 1914.

The time loss due to industrial disputes was less during November than during either October, 1922, or November, 1921. There were in existence during the month 14 strikes involving about 2,190 workpeople with an estimated time loss of 52,046 working days. The time loss in the previous month amounted to

about 54,502 working days. One of the strikes was reported as having commenced during November. Two of the strikes commencing prior to November terminated during the month leaving 12 strikes, involving about 2,024 work-people, on record at the beginning of December.

**Proceedings
under the
Industrial
Disputes
Investigation
Act, 1907**

During November the Department received a minority report with reference to a dispute between the Canadian National Railways and certain of their employees being clerks, freight handlers, etc. During the month one application was received with respect to the establishment of a Board.

Jottings

**The Ontario Minimum
Wage Board opened**

at the end of November a public hearing in connection with the fixing of minimum wages and maximum hours for female workers employed in factories for drugs and toilet articles, in the manufacture of cereals, and in the sorting and packing of teas.

A delegation of garage men recently appeared before the motor vehicle committee of the Ontario Legislature to ask for legislation requiring that in future all automobile mechanics be required to pass an examination similar to that in connection with certificates for stationary engineers, and that every first class garage be required to employ 20 per cent first class men, 40 per cent second class, and 40 per cent unskilled workers.

Under the Ontario Mothers' Allowances Act the sum of \$1,382,138 was expended during the fiscal year ending October 31. Administration expenses amounted to \$73,924. During October 3,559 mothers received allowances, an increase of 724 over the number at the commencement of the fiscal year, and \$126,000 was distributed in relief.

According to a statement recently made before a special committee of the British Columbia legislature, 114 mothers and 280 children, or about 15 per cent of all the cases receiving allowances under the Provincial Mothers' Pensions Act are dependants of men who served overseas.

The Provincial Government of Quebec, replying to the labour delegation whose requests were noted in the last issue of the LABOUR GAZETTE, announced its intention to appoint two commissions, one to study workmen's compensation with a view to the amendment of the present act, and the other to consider the establishment of a system of minimum wages for women. It was stated that both commissions would consist of representatives of employers, employees and the government.

Regulations published on November 16 under the British Columbia Railway Act provide that operators of gas-propelled passenger cars, locomotives and motors, used in industrial railway service under the jurisdiction of the Provincial Department of Railways, must pass an examination on their operation and furnish medical certificates as to sight and hearing.

At a conference of the Canadian Council of Child Welfare, held in Toronto during the week of September 25, a resolution was adopted requesting the Dominion Government to place before the next meeting of the Provincial Prime Ministers the matter of the unification of child labour laws for the purpose of unifying and co-ordinating such laws.

Arrangements for a series of courses of instruction for employees looking after road construction, maintenance and repairs in Quebec have been made by the Quebec government. The course will be given at the Montreal and Quebec technical schools, and will be open to employees directing work in the different capacities, and others

who, though not qualified engineers, are responsible for the work done. In addition, the engineers of the Department of Roads are to be given a series of lectures during the winter.

A Needle Trades Association, an organization of employers in the various branches of the clothing industry, has recently been formed for Montreal and district, under the auspices of the Canadian Manufacturers' Association.

The Executive Committee of the National Council of Women of Canada, meeting at Montreal in November, decided to petition the Dominion Government to provide payment for the work of state prisoners, their earnings to go toward the support of their families, or where there are no dependants to be given to the prisoners on their release.

In a recent wage award, Lord Burton, chairman of the South Wales Coal Board allowed a supplementary wage of six pence a day more to the married than to the single men. As noted in the LABOUR GAZETTE for March last, the principle of the supplementary or "super wage" has for some time been applied to a limited extent in France and Holland, where supplementary wages are paid proportionate to the number of a wage-earner's children.

The New South Wales parliament has confirmed an agreement with the British Government and the governments of the Australian Commonwealth and New South Wales by which 6,000 British settlers will be placed on land in that state at a cost of £6,000,000. Each of the three governments will bear one-third of the cost.

The total expenditure on the public employment exchanges in France amounted in the year 1919 to 2,461,000 francs, of which 929,000 francs fell to the charge of the State. The total number of persons for whom employment was found was 882,000. In 1920,

the total expenditure was 3,492,000 francs, of which 1,287,000 francs was payable by the State. The total number of persons placed was 1,042,000. The average cost per person placed increased from 2.92 francs in 1919 to 3.34 francs in 1920.

Work of International Labour Office

An important part of the work of the International Labour Office (League of Nations) is the supplying of information in response to requests from public bodies and individuals in all parts of the world. The following list contains, according to the Office, some of the subjects on which information has been supplied during the past year: Profit-sharing and co-partnership in various countries. Swiss bill concerning apprenticeship. Collective labour contracts in various countries. Eight-hour day in Germany, Belgium, the United States of America and Great Britain. Regulation of hours of work in commercial undertakings in different countries. Collective labour contracts in commercial undertakings in different countries. Technical education in Germany. Classification of unhealthy occupations in various countries. Continuation schools for miners in various countries. Holidays in industry and commerce in various countries. Application of the eight-hour day in Serbia. Percentage of sailors and fishermen on board British merchant vessels and fishing boats. Legislation in force in various countries for the regulation of working hours in hospitals. Price-fixing by law of articles of necessity in various countries. Difference existing in various industries and in various countries between wages paid to permanent workers and those paid to temporary workers. Legislation existing in various countries with regard to Sunday rest for Jews. Swiss bill concerning compulsory labour for young persons. Organization and activity of British civil servants' associations. Amend-

ment of the Swiss factory law. New system of unemployment insurance in Great Britain. Legislation concerning the working conditions of caretakers and watchmen in various countries. State assistance to certain organizations. Legislation in various countries concerning night work in bakeries. Enquiry into the application of the forty-eight hour week in Great Britain.

U. S. and Announcement has
international been made of another
comm'ttee on appointment in an ad-
Traffic in visory capacity of a
Women and United States official to
Children to a committee of the
International Labour

Organization (League of Nations). Miss Grace Abbott, chief of the United States Children's Bureau, has been appointed to co-operate with the Advisory Committee on Traffic in Women and Children. Miss Abbott will serve in an unofficial and consultative capacity, under reservation of any binding effect upon the United States of any recommendation which may be made by the committee. This committee, which was organized by the International Labour Organization, is composed of experts appointed to watch developments and consider ways in which the traffic may be prevented. It is composed of representatives of nine governments, and in addition, representatives of five international voluntary associations devoted to the suppression of the traffic have been appointed as assessors to assist in its work. The first meeting of the committee was held from June 28 to July 1, 1922, in Geneva.

Uniformity of The Association of
Provincial Workmen's Compensation
Workmen's Boards of Canada,
Compensation at their fourth annual
Laws meeting held at Edmonton,
Alberta, during

September made the following recommendations: (1) that in all provinces where there is a Workmen's Compensation Board it is

advisable that all accident prevention measures should be centralized and enforced by such Board; (2) that there should be no "clerical exclusions" under Workmen's Compensation Acts and that no separate rate should be applied to clerical workers; (3) that every Provincial act should make provision for the rehabilitation of crippled workmen; (4) that it should not be necessary for Boards to give notice before entering judgment with respect to an overdue assessment under a Workmen's Compensation Act, and that Boards should have authority to enter judgment for an overdue assessment by filing a certificate in the manner provided in the Acts of Ontario, Nova Scotia, British Columbia and Manitoba.

The Association meets annually to discuss the operation of the various acts, and to suggest amendments tending toward uniformity in their provisions. The recent conference was attended by compensation officials from all the Provinces which have Workmen's Compensation Boards namely—Nova Scotia, New Brunswick, Ontario, Manitoba, Alberta and British Columbia. The department of labour of Saskatchewan was also represented although the Workmen's Compensation law of the province does not provide for the establishment of a Board. The Province of Quebec also follows a different plan in the operation of its Workmen's Compensation Act.

The officers of the Association for the ensuing year are as follows: President, J. T. Stirling, Alberta; vice-president, V. J. Patton, Nova Scotia; secretary-treasurer, W. R. Rose, Alberta; additional executive member, J. A. Sinclair, New Brunswick.

New Brunswick The New Brunswick
employers and Lumbermen's Association
Workmen's and coal mine operators recently suggested
Compensation to the Provincial Government the following amendments to the Workmen's Compensation Act: that the Board shall be judicial, or failing

this, that employers shall have the right to nominate one member of the Board, the employees another member, and that the Government appoint the Chairman. (The Board now consists of three members appointed by the Lieutenant Governor in Council). If these suggestions are not adopted it is proposed that appeal be allowed from the decision of the Board on questions of law and fact, but that in all appeals on questions of fact the appellant be required to give reasonable security, and if necessary be penalized to prevent vexatious appeal; that the Board publish all their findings in the *Royal Gazette*; that a minimum charge of \$50 a year be imposed on each employer; that a contribution be made by employees on the basis of a percentage of payroll, to cover first aid and medical and hospital expenses; that doctors be compelled to file monthly accounts with the Board for service performed under the act, otherwise claims to be barred.

Proposed Ontario law to restrict price agreements An "anti-combine" bill which was referred to the legislative committee of the Ontario Legislature at its last session, has been under consideration of the committee since the adjournment. The measure as originally drafted has been dropped, but a re-drafted bill having the same objects in view will it is understood be introduced as a government measure at the next session of the Legislature. It is stated that the proposed measure will give the Attorney-General the power to investigate price agreements between manufacturers on the one hand, and retailers and wholesalers on the other, and subsequently to take civil action if his investigation should suggest the necessity for so doing. Previous to taking action in Court, the Attorney-General would thus be able to examine any firm regarding whose price agreement any citizen may have lodged complaint, and to demand production of books and papers. Under existing law,

court action must be entered before the affairs of commercial establishments are investigated. The design of the bill will be, it is said, to make effective the provisions of the trade conspiracy sections of the Criminal Code of Canada. The intention of the original bill was to prevent a manufacturer fixing upon his product a price at which the wholesaler or retailer must sell it.

Exclusion of Orientals The British Columbia Legislature, on November 20, passed the following resolution respecting Asiatic immigration:

Whereas the "Immigration Act" of Canada and regulations thereunder have failed to stem the tide of Asiatic immigration into Canada;

And whereas the industrial and economic life of Canada, and particularly of the Province of British Columbia, is threatened by competition forced by a growing foreign population with a lower standard of living than that necessary for the well-being of Anglo-Saxon civilization;

And whereas there is a strong and compelling sentiment developing in Canada, especially marked in the Province of British Columbia, at present most affected, that effective protective measures must be adopted;

Therefore be it Resolved, That this Legislative Assembly places itself on record as being in favour of the enactment of such amendment to the "Immigration Act" of Canada as is necessary to completely prohibit Asiatic immigration into Canada.

Another resolution on the problem presented by the settlement of Asiatics in British Columbia was passed unanimously by the Provincial Legislature on December 6 to the effect that the Dominion Government be requested to assist in securing the amendment of the British North America Act so as to exclude Asiatics from acquiring farm, timber and mineral lands, from owning fishing rights and from securing employment in agricultural, forest, mining and fishing industries.

Legislative proposals of B. C. railwaymen Changes in the Workmen's Compensation Act and other measures affecting labour were urged upon the government of British Columbia during November by a delegation from the Brotherhoods of locomotive Engineers, Conductors, Firemen, Enginemen and Trainmen. It was proposed that the burial allowance under the act be increased from \$75 to \$150, and that other benefits be increased by about 15 per cent; that a lump sum of \$100 be paid to the widow or person acting as foster mother in addition to other allowances, that in the event of the death of an unmarried workman or widower without dependants a sum of \$1,000 be collected from the employers and devoted to the purposes of a rehabilitation fund for the education of disabled workmen who would not otherwise receive compensation; and that the age of children in respect to whom compensation is allowed be raised from 16 to 18 years.

The delegation also asked that the government should provide school supplies free of cost to children, or alternatively, that text books be made uniform and supplied to the public at cost price; and that the school age of children be raised from 15 to 16 years. Stricter inspection of sanitary conditions in railway camps was also advocated.

Alberta Civil Service Joint Council The Government of Alberta has made an agreement with the Civil Service Association of

Alberta providing for the establishment of a civil service joint council. The council is to consist of six members, three appointed by the Lieutenant-Governor in Council and three by the Civil Service Association of Alberta. The objects of the Council shall be to secure a greater measure of co-operation between the government in its capacity of employer and the members of the Civil Service in matters affecting the service with a view to increased efficiency combined with the well-being of those employed, to con-

sider all matters affecting the conditions of the service; to suggest means for dealing with grievances, and generally to bring together the experience and opinions of representatives of the administrative clerical and manipulative services. It is provided that the conclusions of the council shall be submitted to the lieutenant-governor-in-council for approval.

University Extension Courses in Export Trade Extension Courses in Export Trade are to be given at the University of Toronto from January 15 to 27 and at

McGill University from January 29 to February 10. These courses are offered at the request of, and in co-operation with, the Department of Trade and Commerce and the Canadian Manufacturers' Association. They are primarily for export managers, prospective export managers, and all persons engaged in export trade. At the University of Toronto lectures and discussions will be held on the following subjects: "Principles of International Trade," by Professor E. M. MacIver; "Economic Geography," by Dr. H. A. Innes; "Transportation," by Professor W. T. Jackman; "Trade Currents and Cycles," by Professor Gilbert E. Jackson. At McGill University lectures on the following subjects will be given: "The Theory of Money," by Professor Leacock; "International Trade," by Professor J. C. Hemmeon; "The Theory of Transportation," by Professor J. C. Hemmeon; and "Economic and Commercial Geography," by Professor B. K. Sandwell. At both courses discussions and demonstrations will be conducted by Lt.-Col. L. M. Cosgrave, D.S.O., and R. S. O'Meara, B. Com., of the Commercial Intelligence Service, Department of Trade and Commerce, on the following special trade topics: Government Services and their Relation to Foreign Trade; Documentation; Packing for Export; Foreign Correspondence; and Representation and Salesmanship Abroad. Lectures on the following trade topics will also be given at McGill

University: Marine Insurance, by Mr. J. L. McCulloch; Financing Foreign Trade, by Mr. H. M. Cameron; and Costing for Exporting, by Professor R. R. Thompson.

**Women's
Canadian Club
and Minimum
Wages**

The Women's Canadian Club, at Victoria, recently passed a resolution condemning the amendments to the Minimum Wage Act of British Columbia which had been proposed to the Provincial Government by a delegation from the Canadian Manufacturers' Association. These proposals were outlined in the last issue of the LABOUR GAZETTE, at page 1144. The resolution claims that the delegation failed to recognize the "vital principle" of minimum wage legislation, namely, that wages must be adjusted to cost of living; it was also claimed that the proposal to allow an increase in the proportion of young girls, apprentices, and inexperienced workers employed at a plant, would tend to the exploitation of cheap labour. The further suggestion of the Canadian Manufacturers' Association that the Board should be reconstituted so as to consist of an equal number of employers and workers, appeared, it was claimed, "to disguise the fundamental lack of inequality in bargaining power between master and worker under a seeming equality in numbers, thus throwing the balance of power definitely on the side of the strong." Finally, the proposal to give the Board so constituted the power to reconsider any order on the motion of two of its members would have the effect, the resolution claimed, "of allowing employers to make their own regulations, thus practically neutralizing the effect of the Minimum Wage Act."

**Women's
Conference
on Industrial
Problems**

A Women's Conference on Industrial Problems is to be held in Washington under the auspices of the United States Department of Labour on January 11, 12 and 13. The conference is

to be nation-wide in scope and to bring together representative women from all walks in life. The call which is issued through the Women's Bureau of the Department of Labour is accompanied by a letter from the Secretary of Labour directing attention to the problems before the conference. The letter is in part as follows: "It appears from census figures, that approximately one-fourth of the wage earners of America are women, and apparently the proportion is increasing rather than diminishing. Every thinking American must realize that this situation creates a number of special problems and calls for careful consideration of ways and means for safeguarding the mothers and potential mothers of the nation who must so be employed. It is impossible to separate entirely the problems of our motherhood from the problems of our childhood, and there is nothing more important in our civilization than the protection of both of those in their strength and purity. The future of the nation depends on this more than on any other single factor."

**Transfer of
settlers in
Western
provinces**

Regulations were issued by the Dominion Government on October 21, 1922 [P. C. 2181], on the recommendation of the Minister of the Interior, in connection with proposals for the relief of settlers in Alberta and Saskatchewan who have suffered repeated crop failures owing to drought or other causes. After investigation of the conditions of these settlers, the Better Farming Commission of Saskatchewan and the Survey Board of Alberta had among other suggestions recommended that facilities be granted to the settlers affected to remove to districts further north "where the prospects for an adequate return for their labour seem more assured." The Dominion Government agreed to co-operate with the Provinces in giving effect to the proposals of the Provin-

cial bodies. The Minister of Agriculture took up the matter of the expenses connected with the transfer, and negotiations were opened with the railway companies and the Provincial authorities as to the basis on which such expenses should be met. The regulations of the Minister of the Interior, issued under the Dominion Lands Act of 1908, grants the settlers the right to exchange their former holdings of land for land elsewhere, performance of the usual settlement duties being required.

**Apprenticeship
rules in
building
industry**

In the October issue of the **LABOUR GAZETTE** on page 1043, a brief account was given of a new plan for the training of apprentices in the building trades in New York, which is being put into operation, by which it is proposed to place the supervision of apprentices under joint trade boards for each craft. The committee of the New York Building congress which originated the plan suggested that the joint boards draw up rules to cover the following subjects: Enrolment of apprentices; identification of apprentices in the trade or at work; maximum and minimum age for apprenticeship; term of apprenticeship; divisions of apprenticeship into periods for advancement; periodic examination of apprentices; granting of advanced credit to apprentices for previous experience in the trade; transfer system for interchange of employment; apprentice wage by periods, while at work, or in school; overtime limits; hours per week, while at work, or in school; determination of time for school attendance; enforcement of school attendance, by employers, and by unions; apprentice fees; statement of trade processes to be taught apprentices in each such classification, at work, and in school; approve courses of study to be taught apprentices in school instruction, including technical studies related to the trade in which

they are employed, and training for citizenship; supervision of apprentices, at work, and in school; periodic reports on apprentices to Joint Trade Board, from work, and from school; regulation of adjustments, for employer, and for apprentice; minimum ratio of apprentices to journeymen; approval of employer, indicating (1) that his work is sufficiently varied and equipment sufficiently complete to give the apprentice the required diversity of trade experience to cover the trade classification, and (2) his ability to provide continuous employment to the apprentice during his apprenticeship period subject to conditions not under control; granting of diploma upon termination of apprenticeship, and the definite provision of classes in school for the instruction of apprentices.

**Railway
apprentices
in New South
Wales**

Information with respect to the railway apprenticeship system of New South Wales, Australia, was recently supplied by the United States National Industrial Conference Board of New York. An instructional workshop has been maintained since 1920 by the Railway Department of the New South Wales Government Railway and Tramway Institute, with accommodation for fifty apprentices. Instruction is given in hand and machine tool operations, oxy-acetylene, electric and autogenous welding and the chemistry of paint and heat, treatment of metals, bookkeeping, shorthand and type-writing, arithmetic and higher mathematics, English, electricity and magnetism, locomotive engine driving, station management, telegraphy, applied mechanics, elementary chemistry, mechanical drawing, and platelaying. Trade classes are held in mechanical and electrical engineering and railway carriage construction. Apprentices are brought from country centres for periods of from two to three weeks of instruction in the workshop. While

taking the course, the apprentice works from 8 a. m. to 4.30 p. m. and is paid as for full time at his regular work. Each year twenty students selected by competitive examination are given one year's intensive training in traffic and administration work. In addition to courses in traffic and safety work and station management they are taught economics and business administration. Students attend classes from 9 a. m. to 4.30 p. m. five days a week for eight months, and at the end of a course a competitive examination determines preference of appointment to vacant administrative positions in the traffic branch of the service.

Library of Industrial Relations

Provision was recently made for the establishment at Princeton University in the

United States of a library to be known as the Library of Industrial Relations. Mr. John D. Rockefeller, Jr., will provide the funds immediately necessary, namely \$12,000 a year for five years. Dr. Robert F. Foerster, Professor of Economics at Princeton will be in direct charge and will be assisted by a skilled librarian. The library will include pamphlets, documents, reports and books dealing with the interpretation and discussion of industrial relations and will seek to bring together all available data on the actual establishment and working out of industrial relationship plans. Digests will be issued from time to time concerning developments in the handling of in-

dustrial relations problems. It is intended that it shall be made equally practical and useful not only to students but to those who desire to avail themselves of the experience of others in dealing with industrial relationship problems. The suggestion for the establishment of the library grew out of Princeton's experience with the Pliny Fisk Library which has been a source of information for students and professors as well as business men and industries throughout the country.

Child Labour regulations adopted at Hong Kong

The British administration at Hong Kong, recently undertook to enforce the child labour principles adopted at the International Labour Conference at Washington in 1919. The new regulations provide that no children may be employed in the dangerous occupations of boiler chipping, fireworks or glass manufacturing. Children under 10 years of age are barred from factories of all kinds, and children under 12 are not permitted to carry coal, building material or debris. Employers are required to keep a record of all the child labour engaged in their establishments. One holiday every seven days is made compulsory under the new law and children may not be put to work between 7 p. m. and 7 a. m. It is stated that because of the poverty of many of the natives the new regulations will have to be applied gradually or long established social and economic conditions may be upset.

GENERAL REVIEW OF THE INDUSTRIAL SITUATION.

The Labour Market, Strikes, Prices.

The Labour Market.

THE volume of employment during October as reported by the concerns making returns showed another increase on a moderate scale, sustaining the upward trend indicated since April. The situation continued to compare favourably with that reported during the corresponding period of last year. The percentage of unemployment as reported by trade unions at the beginning of November showed an upward tendency for the first time since the beginning of April, the percentage standing at 4.0 as compared with 2.8 at the beginning of October. The situation at the beginning of November was practically the same as at the beginning of August when the percentage of unemployment stood at 4.1, but was decidedly more favourable than at the beginning of November 1921, when 7.4 per cent of unemployment was reported. The offices of the Employment Service of Canada reported a considerable expansion in the number of applications, vacancies and placements made during October. This upward trend in business was largely due to a demand for, and placements made of, farm workers in Saskatchewan.

EMPLOYERS' REPORTS Employment statements tabulated by the Dominion Bureau of Statistics for the month ending October 31, shows improvement to have been general in all provinces except British Columbia, where contractions were indicated. Of the larger cities, Montreal registered practically no change in the situation, varying conditions in different industries resulting in a nominal increase only. In this city garment, woolen, boot, shoe electrical appliance, chocolate and biscuit factories were busier, but tobacco and electric current plants were not as fully engaged. The employ-

ment afforded on the street railways declined. In Toronto considerable improvement was reported, there being a net increase in the payrolls of the concerns making returns of over 1,400 persons. Printing shops, garment, leather, copper, glass and musical instrument factories were busier. The production of electrical appliances and kodaks also increased. On the other hand, rubber factories were slacker. Employment on street railways declined to some extent and there was also a falling off in activity on the construction and maintenance of streets and roads. Building contractors reported larger payrolls, in an effort to complete the season's work before the cold weather commenced. In Ottawa the tendency was favourable, although the increases were on a much smaller scale than those registered in Toronto. Pulp, paper and textile factories were busier, while contractions were indicated in sawmilling operations and in the employment afforded on telephones. In the city of Hamilton employment was in somewhat greater volume than in September. The improvement was especially marked in rubber, tobacco, textile and confectionery factories. The construction industries on the other hand reported less activity. Winnipeg firms on the whole registered very little change. Retail establishments were decidedly more fully engaged, and confectionery, cereal, and flour factories recorded some extension of operations. Printing shops, sawmills and electric current plants were slacker, and building contractors reported smaller payrolls. In Vancouver marked contractions in employment were indicated, very largely in the shipping and stevedoring trades. The employment afforded in electric current concerns also declined. In the logging industry, large additions to payrolls were reported at Wapke,

N.B., New Richmond, St. Jovite Station, St. Gabriel de Brandon, Three Rivers, Louiseville, Price, and Eagle Depot, Que., at Pembroke, Nesterville, Tionago, Pickerel, Fort Frances, Thessalon, Midland, Gravenhurst, Kenora, Pakesley, Blind River, Pine and Chapleau, Ont. at The Pas and Bowsman, Man., and at Headquarters, Wattsburg and Yahk, B.C. Pulp and paper mills at Chandler and Timiskaming Station, Que., were decidedly busier. In the iron and steel group the most pronounced increase in activity occurred at Ford, Ont., where automobile factories, which had been temporarily closed down, re-opened with consequent reinstatement of large staffs. At Walkerville the automobile industry also absorbed a considerably larger number of workers than in September. In coal mining the most pronounced gains occurred at Joggins Mines, Springhill and Glace Bay, N.S. at Blairmore, Nordegg, Wayne and Hillcrest, Alta, and at Fernie, B.C.

Especially large reductions in staff were reported in sawmills at Campbellton, Carlow Station, Loggerville and Chatham, N.B., at Hull and Rimouski, Que., at Arnprior, Pembroke, Rockland, Byng Inlet and Field, Ont., at The Pas, Man., and at New Westminster and Port Hammond, B.C. Rubber factories at Merritton, Ont., oil refineries at Dartmouth, N.S. and asbestos mines at Black Lake, Que. were not as fully employed at in the preceding month.

An article appears elsewhere in this issue which gives in considerable detail the employment situation during October as reported by employers.

TRADE UNION REPORTS

A slight decrease in the volume of employment, as indicated by returns tabulated from 1,468 labour organizations with an aggregate membership of 153,642 persons, was reported during October, the percentage of unemployment standing at 4.0 as compared with 2.8 at the end of September and

with 7.4 on October 31, 1921. (Unemployment as used here has reference to involuntary idleness due to economic causes. Persons engaged in work other than their own trades, or who are idle because of illness, or as a direct result of strikes or lockouts, are not considered as unemployed. As the number of unions making returns varies from month to month with consequent variation in membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.) Unions in New Brunswick, Quebec, Manitoba, Saskatchewan, Alberta and British Columbia all registered less employment than in September, while the situation in Ontario remained unchanged and unions in Nova Scotia and Prince Edward Island reported slight increases in employment. The largest percentage increase in unemployment was reported in Manitoba owing to seasonal dullness in the building and construction trades and reductions in the manufacturing industries, particularly in the printing and publishing division. The situation in British Columbia also was less favourable than in September, employment among fishermen and workers in the manufacturing industries and in the building and construction trades being in somewhat lesser volume. In comparison with returns for October, 1921, improvement was registered in every province except Manitoba. The manufacturing industries reported more unemployment during October than in the previous month due to less activity in the printing and publishing division and among garment and leather workers and metal polishers. Reductions were reported in the iron and steel division as a whole but within the group employment for moulders and sheet metal workers was in greater volume. Cigar and tobacco, sugar refinery workers and bookbinders were also more fully engaged. Coal miners in Nova Scotia were not quite so busy during October as in the previous month but in Alberta slight improvement was indicated. In British

Columbia no change in the situation was shown. Quarry workers in Nova Scotia and asbestos miners in Quebec reported no members out of work during the month. A larger percentage of idleness than in September was reported by unions in the building and construction trades. Bricklayers, masons and plasterers, carpenters and joiners, electrical workers, granite and stonecutters, painters, decorators and paperhangers, tile layers, lathers and roofers and hod carriers and building labourers were not so busy. Unions of bridge and structural iron workers showed more employment than in the previous month while the situation among plumbers and steam-fitters remained on the same level, and steam shovel and dredgemen reported no unemployment during the month. All groups of the building and construction division with the exception of hod carriers and building labourers were more fully engaged than in October of last year.

The percentage of idleness in the transportation group was slightly higher than in September, reductions being recorded in the steam railway, street and electric railway and shipping and stevedoring divisions. Retail clerks, civic employees, barbers, hotel and restaurant employees, and stationary engineers and firemen were not so fully engaged, but theatre and stage employees were somewhat busier.

EMPLOYMENT OFFICE REPORTS

During the month of October, 1922, the offices of the Employment Service made 54,953

references to positions and effected a total of 53,013 placements. Of these, the placements in regular employment were 43,010 (39,960 men and 3,050 women) and those in casual work numbered 10,003. Vacancies notified by employers to the Service numbered 56,797 (46,877 for men and 9,920 for women.) Applications for employment registered at the offices numbered 64,699, of which 54,230 were from men and 10,469 from

women. When a comparison is made with the preceding period, a considerable increase in the volume of business is shown, due to the abnormal expansion in the agricultural industry in Saskatchewan.

The following table gives the average number of applications, vacancies and placements, made daily by the offices of the Employment Service during October, 1922, as compared with the preceding month and with the corresponding month of 1921:—

	September, 1922	October, 1922	October, 1921
Applications	4,315	4,906	3,166

A detailed report of the work of the employment offices during the month is given elsewhere in this issue.

PRODUCTION REPORTS

According to the Dominion Bureau of Statistics the production of pig iron in October showed an increase of 11,914 gross tons, or 47.7 per cent over the September output, and amounted to 36,888 tons as compared with 24,974 tons in the previous month. The increased tonnage was almost wholly basic pig iron manufactured for use by the firms reporting. Although the October production showed an encouraging increase and was the greatest since March of this year when an output of 41,733 tons was reached, it was still below the monthly average for 1921. The number of active furnaces at the end of October was unchanged at four, namely, one at Sault Ste. Marie, one at Hamilton and two at Sydney. The production of ferro alloys remained practically the same as in September at 1,823 tons.

The output of steel ingots and castings during October amounted to 52,735 gross tons, an increase of 47.3 per cent over the September production of 35,787 tons, but a decrease of nearly 5 per cent

from the average monthly production of 1921.

A report received from the Department from the Cobalt district states that 58 cars containing approximately 4,688,600 pounds of silver ore were shipped out during the month, as compared with 65 cars containing 5,023,200 pounds of ore in the previous month. The October tonnage, however, was made up mostly of residue which contained a large percentage of frozen moisture. The bullion shipments of the Nipissing Mine amounted to 308 bars containing 353,391 ounces of silver, and the shipments of the Mining Corporation of Canada amounted to 423 bars containing 427,157 ounces, making a total of 731 bars containing 638,381 ounces of silver for the month. This compares with 596 bars containing 638,381 ounces in the previous month.

The gross earnings of the Canadian National Railways (including electric lines), according to a preliminary statement issued, amounted in October to \$14,637,449 as compared with \$12,925,201 in October, 1921. The gross earnings of the Canadian Pacific Railway Company for October were given in a preliminary statement as \$23,061,547 as compared with \$22,089,624 in October, 1921.

BUILDING PERMITS AND CONTRACTS AWARDED

Employment in the building trades as indicated by the value of the building permits issued in 56 cities showed a decrease during October as compared with September, the value of permits issued falling from \$10,573,163 in the latter month to \$9,337,253 in October, a reduction of \$1,235,910, or nearly 12 per cent. In comparison with the returns for October 1921 there was a decline of \$5,580, or .1 per cent, the value of the permits issued in that month having totalled \$9,342,833. Ontario with a gain of \$629,954, or almost 14 per cent, was the only province to record an increase over September. Of the reductions re-

ported in the other provinces that of \$632,578, or over 21 per cent, in Quebec was the most pronounced. As compared with the figures for the corresponding month of last year Nova Scotia, Ontario, Manitoba and Alberta recorded increases in the value of the permits issued, the gain of \$628,373 or nearly 14 per cent in Ontario being the largest, while in the other provinces more than counterbalancing declines were registered. Of the larger cities Montreal and Vancouver reported less activity in building operations both as compared with the preceding month and with October, 1921, while the opposite was the case in Toronto, increases being recorded in both comparisons. In Winnipeg there was a loss in the former and a gain in the latter comparison. Of the smaller centres Halifax, Three Rivers, Chatham, Hamilton, Oshawa, St. Catharines, Brandon and Lethbridge indicated expansion both as compared with the previous month and with the corresponding month of 1921.

According to the *Canadian Building Review*, issued by the MacLean's Building Reports, Limited, the value of the contracts awarded during October amounted to \$24,270,300 as compared with \$29,313,500 in September and with \$18,997,200 in October 1921. There was, therefore, a decline of 17.2 per cent in the former and 27.8 per cent in the latter comparison. Of the total for the month under review \$17,509,700 or 72.1 per cent was to be spent in Quebec and Ontario; \$520,400 or 2.1 per cent in the Maritime Provinces; and \$6,240,200 or 25.7 per cent in the Western Provinces. A further analysis shows that \$8,794,600 was to be used for residential purposes, \$6,065,000 on business establishments, \$3,221,500 on industrial contracts, and \$6,189,200 on engineering contracts.

Strikes.

The time loss due to industrial disputes was less during November than during either October, 1922, or November, 1921. There were in existence at some time or other during the month 14 strikes involving about 2,190 workpeople with

an estimated time loss of 52,046 working days, as compared with 17 strikes involving 3,229 workpeople and resulting in a time loss of 54,502 working days in October, 1922; and 18 strikes, 3,354 workpeople and 73,149 working days in November, 1921. On November 1, there were on record 13 strikes affecting 1,940 workpeople. One new strike was reported as having commenced during November as compared with two during October. Two of the strikes commencing prior to November terminated during the month, leaving 12 strikes involving about 2,024 workpeople on record at the beginning of December.

Prices.

In prices both the index number of wholesale prices and the family budget in terms of retail prices were slightly higher due to seasonal increases in certain farm products partly offset by decreases in other lines.

In wholesale prices the index number was up to 221.7 for November as compared with 219.8 for October; 227.3 for November, 1921; 356.6 for May, 1920 (the highest point reached); and 137.5 for November, 1914. The chief increases for the month were in grains and fodder and in dairy products with

slight increases in sheep, halibut, flour, sugar, fruits, textiles, hides, metals, and building materials. There were decreases in cattle, hogs, poultry, white-fish, vegetables, coke, gasoline, and raw furs. As compared with November last year all groups were lower except grains and fodder, animals and meats, textiles, hides, metals, and fuel.

In retail prices the average cost of a weekly family budget of 29 staple foods in terms of the average prices in sixty cities was slightly higher at \$10.29 for November, as compared with \$10.23 for October; \$11.08 for November, 1921; \$16.92 for June, 1920 (the highest point reached); and \$7.96 for November, 1914. The increase of six cents for the month was due to a substantial increase in eggs, with slight increases in milk, butter, cheese, sugar, which increases, however, were counteracted to some extent by slight decreases in meats, bread, flour, rolled oats, beans, evaporated apples, and potatoes. Coal and wood averaged slightly lower. Rent was also down slightly in the average. The weekly budget including fuel and rent as well as foods averaged \$20.88 for November, as compared with \$20.86 for October; \$21.60 for November, 1921; \$26.92 for July, 1920 (the highest point reached); and \$14.36 for November, 1914.

SUMMARY OF IMPORTS AND EXPORTS DURING OCTOBER, 1922

THE figures shown below are derived from a statement prepared by the Department of Customs and Excise showing the imports of various classes of commodities, free and dutiable, for the months of October 1921 and 1922, and for the seven months ending in October of those years, and

the exports domestic and foreign of similar classes of goods for the same periods.

The following table shows the imports free and dutiable and the exports, domestic and foreign, of the various classes of products, for the month of October, 1922:

Classes of goods	Imports		Exports	
	Free	Dutiable	Domestic	Foreign
Agricultural and vegetable products, mainly foods	\$ 14,905,873	\$ 49,763,126	\$185,770,294	\$ 461,432
Agricultural and vegetable products, other than foods	9,498,610	17,469,886	11,759,854	1,322,346
Animals and animal products.....	9,882,308	14,296,100	84,314,042	1,237,752
Fibres, textiles and textile products.....	27,561,547	61,007,017	4,765,199	668,310
Wood, wood products and paper.....	7,618,062	12,739,369	128,775,064	224,148
Iron and its products.....	9,167,635	70,334,562	23,619,753	2,158,340
Non-ferrous metals and their products.....	6,561,373	14,194,518	21,504,555	356,260
Non-metallic minerals and products.....	31,648,868	32,147,835	14,748,883	327,386
Chemicals and allied products.....	6,324,213	8,374,955	7,230,047	123,191
Miscellaneous commodities.....	12,581,573	14,663,507	8,420,952	1,576,389
Totals	\$135,750,062	\$295,040,875	\$490,908,643	\$8,455,554

In October, 1922, the duty collected amounted to \$11,347,737 as compared with \$9,270,498 in October, 1921.

The following comparative table shows the values of merchandise en-

tered for consumption and the merchandise, domestic and foreign, exported in the months of October 1922 and 1921, and in the seven months period ending October of these years, respectively.

	Month of October		Seven months ending October	
	1921	1922	1921	1922
Merchandise entered for consumption.....	\$ 59,518,248	\$ 66,875,201	\$438,333,498	\$430,790,937
Merchandise, domestic, exported.....	79,941,682	102,675,347	415,618,813	490,908,643
Total	\$139,459,930	\$169,550,548	\$853,952,311	\$921,699,580
Merchandise, foreign, exported.....	1,314,471	1,229,706	8,532,814	8,455,554
Grand total, Canadian trade.....	\$140,774,401	\$170,780,254	\$862,485,125	\$930,155,134

PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907, DURING THE MONTH OF NOVEMBER, 1922

DURING the month of November the Department received a minority report with reference to a dispute between the Canadian National Railways and certain of their employees being clerks, freight handlers, roundhouse, shop and store labourers, etc., members of the Canadian Brotherhood of Railroad Employees. The report was signed by Mr. George D. Kelley, Ottawa, nominee of the railways on the Board of Conciliation and Investigation established to deal with this dispute. The report of the Board signed by the

other two members, Messrs. F. T. Costello, Alexandria, chairman, and Howard S. Ross, K.C., Montreal, nominee of the employees, had been received in October.

Application received

An application from employees of Bramson's Auto Service, Limited, Montreal, being auto and taxi drivers, members of the International Brotherhood of Teamsters, Chauffeurs, Stablemen and Helpers of America, was under consideration at the close of the month.

Minority Report of Mr. George D. Kelley in Dispute between the Canadian National Railways and certain of their employees, being clerks, freight handlers, etc.

With reference to a dispute between the Canadian National Railways and certain of their employees being clerks, freight handlers, roundhouse shop and store labourers, etc., a minority report was received from Mr. George D. Kelley, Ottawa, nominee of the Railways on a Board to deal with this case. The report of the Board signed by Mr. F. T. Costello, Alexandria, Ont., chairman, and Mr. Howard S. Ross, K.C., nominee of the employees, appeared in the November issue of the LABOUR GAZETTE on pages 1160 to 1164.

The text of Mr. Kelley's report is as follows:

Minority Report

Re Industrial Disputes Investigation Act, 1907, and *re* differences between the Canadian National Railways and certain of their employees being clerks, freight handlers, roundhouse, shop and store labourers, etc., members of the Canadian Brotherhood of Railroad Employees.

To the Hon. James Murdock, M.P.,
Minister of Labour for Canada.

Sir,

I regret that I cannot agree with the findings of the other members of the Board of Conciliation and Investigation appointed herein. After careful consideration I am of opinion that the course followed by the Canadian National Railways in dealing with its employees who were before this Board was the correct one. At the opening of our hearings and throughout them, it was repeatedly stressed by the representatives of the company that the reductions now made were more or less of a tentative nature and assistance was sought from the employees in arriving at what would be the permanent rates. The position of the employees before the Board was that they would refuse to

accept any reductions under any circumstances and that instead they would be justified in demanding an increase.

I do not consider that this Board is necessarily bound by the findings of any other Boards, but I believe that such findings should be given very careful consideration. Bearing this in mind and appreciating that the United States Labour Board is the Board that for several years past has been dealing with similar questions to those now under consideration, it would be well to glance at the Transportation Act passed in the United States in the year 1920. Section 307 of this Act sets out that:

In determining the justness and reasonableness of such wages and salaries or working conditions the Board shall, so far as applicable, take into consideration among other relevant circumstances:—

- (1) The scales of wages paid for similar kinds of work in other industries;
- (2) The relation between wages and the cost of living;
- (3) The hazards of the employment;
- (4) The training and skill required;
- (5) The degree of responsibility;
- (6) The character and regularity of the employment; and
- (7) Inequalities of increases in wages or of treatment, the result of previous wage orders or adjustments.

Besides the specific elements or factors above mentioned, the Act provides that the Board in determining wages shall consider "other relevant circumstances." Referring to this language, "other relevant circumstances," the Board in Decision No. 2 said:

This, it understands, comprehends, among other things, the effect the action of this Board may have on other wages and industries, on production generally, the relation of railroad wages to the aggregate of transportation costs and requirements for betterments, together with the burden on the entire people of railroad transportation charges.

Generally speaking the increases granted from year to year to railway employees in the United States have also been applied to employees on Canadian lines, though it was felt by different of the railway companies that such increases were not fully justified. Now that adjustments, some in the nature of decreases, are the order of the day, employees object to following the decisions of the United States Labour Board. The adjustment now under consideration follows a recent decision

of the said Board. To appreciate how the present class of employees have been treated in the past it is of interest to note that since September 1st, 1918, the monthly rated employees received increases amounting to \$51.50 per month against which is the reduction of \$12.24 per month in July, 1921, and the reduction of \$6.12 per month in July, 1922, or a total of \$18.36, leaving them a net increase of \$33.24 per month over August, 1918. The following table will assist:

	Increases p.r hour			Decreases per hour			Net increases per hour over August, 1918	Net increases per month over August, 1918
	Sept. 1918	May 1920	Total	July 1921	July 1922	Total		
	cents	cents	cents	cents	cents	cents	cents	
Freight house porters and checkers.....	12	12	24	6	4	10	14	\$29.12
Baggage room staff.....	12	10	22	10	3	13	9	18.72
Janitors, elevator men.....	12	10	22	10	4	14	8	16.64
Stationary enginemen, firemen and oilers..	12	13	25	8	2	10	15	31.20
Engine house, classified labourers, such as engine cleaner, ashpit men.....	12	10	22	10	5	15	7	14.56
Common labourers in and around shops and engine house.....	12	8½	20½	8½	5	13½	7	14.56
Common labourers in and around stations, stores, warehouses and baggage rooms..	12	8½	20½	8½	4	12½	8	16.64

Considerable time was occupied before our Board in dealing with figures relating to the so-called cost of living. Different budgets based on suppositious families were laid before us. The tables published in the *Labour Gazette* (Canada) and in various United States publications were discussed. From these it was quite clear that, taking into consideration the period since decreases had first been put into force, wages have not dropped as fast as had the cost of living.

A witness from the Department of Labour stated that from his knowledge in regard to the cost of living (knowledge based upon many years' experience) that there was very little difference between the cost of living in Canada and the cost of living in the different states forming part of the

United States and located along, or close to, the border dividing the two countries. It is important to bear this in mind, since the cost of living was very thoroughly discussed by different railroad organizations and different railroad companies before the United States Labour Board prior to it announcing its decision, which involved a decrease of wages similar to that now being put in force tentatively by the Canadian National Railways.

The following table shows a comparison between the increase in the cost of living over July, 1914. The figures for Canada are taken from the *Labour Gazette* and the figures for the United States are taken from reports of the National Industrial Conference Board.

	Per cent increase in cost of living over July, 1914		Clerks	Freight Shed	Checkers	Freight truckers and porters		Engine house labourers						
								Classified	Common					
	U. S.	Canada												
July, 1917.....	31	30	73.04	67.50	72.50	.20	.24	.20	.25	.20				
Nov., 1918.....	65	52	98.00	95.00	100.00	.40	.43	.40	.45	.40				
July, 1920.....	105	90	124.54	127.50	141.50	.53	.55	.50	.53	.48½				
July, 1921.....	63	52	112.30	115.26	129.26	.47	.49	.40	.43	.40				
May, 1922.....	55	45												
July, 1922.....			106.18	109.14	123.14	.43	.45	.35	.38	.35				
Increase 1922 over July, 1917			33.14	41.64	50.64	.23	.21	.15	.13	.15				
Per cent increase 1922 over 1917.....	24	15	45	62	70	115	88	75	52	75				

For the first time during my experience as a member of Boards under the Industrial Disputes Investigation Act, oral evidence was adduced dealing with the cost of living, and which evidence was given by wives of certain employees. Conditions existing in each family are so widely variable that I felt this evidence could be of but little use. My opinion was confirmed by the fact that one lady giving evidence in Montreal stated that her husband had left a position in which he was in receipt of a higher rate of pay to accept his present position with the Canadian National Railway lines. Out of his salary, and he was not one of the higher paid employees, she was educating her children and had two of them at a boarding school. Two Toronto ladies in their evidence established to their own satisfaction that they could not support their children in comfort, health and decency on their husbands' earnings, though, in one case at least, the earnings were higher than that of the husband of the Montreal lady. In both cases the families were smaller than the family of the Montreal lady.

Evidence on behalf of the Canadian National Railways showed that wages paid to the employees who were before this Board were higher in many cases than wages paid to employees performing work of a similar nature for other employers. No attempt was made by the company to suggest that human labour is a commodity. At the same time it was stressed that the company could not disregard all economic laws and agree

to pay wages out of the ordinary for unskilled labour or clerks whose positions called for but little, if any, training. It was noted that one of the largest employers of ordinary labour in the United States recently increased its rate of wages by twenty per cent, but even with this twenty per cent increase such labour is still receiving a lower hourly rate than are similar employees now before this Board.

With all due deference, my fellow members on this Board appear to have gone astray in considering the employees represented before us were those who represented the lowest paid class. To appreciate the error, one need only refer to schedule of rates being paid, where it is shown that many positions pay upward of eighteen hundred dollars per year. True, junior clerks receive smaller amounts, but they have before them the opportunity of promotion, and a visit to the offices of the Canadian National Railways at Toronto and Montreal will show that those junior clerks are many of them of comparatively immature years. Section labourers, who constitute a very large group, are paid by all railroad companies much below the rate of pay which the majority of the employees now before us are in receipt of. My fellow members on this Board appear to have been impressed by the argument that the wages of locomotive engineers, firemen, conductors and brakemen should have been reduced before the present class had their wages altered. It is quite true that many

(but not all) of the engineers, firemen, conductors and brakemen earn more than the men before our Board, but they are men whose duties cannot be compared to the employees whose earnings are now in question. All of these men serve long apprenticeships and their work is arduous and is filled with continual risk of life. They are absent from their homes and the pleasures thereof for various and often irregular periods during each month, thus entailing considerable expense to themselves. They have responsibilities of the highest nature and their calling is one that of necessity requires men of special character and ability. Both before the United States Labour Board and before different Boards in Canada, the organizations representing the aforesaid engineers, firemen, conductors and brakemen have repeatedly submitted material to show that increases granted to them have not been at all commensurate with the increases granted to the class of employees with whom we are now dealing.

In this contention such organizations are supported by a statement recently issued by the Chairman of the United States Labour Board.

Comparing the actual (but not theoretical) earnings of the general body of the locomotive engineers, firemen, conductors and brakemen, with the actual earnings of the class of employees now before us, and appreciating the difference between the qualifications required in each case, one is forced to the decision that the class of employees with whom we are now dealing is not one that is properly described as being paid less in proportion than other employees of the Canadian National Railways.

Criticism always finds easy expression and at the present time different labour unions are strongly attacking the United

States Labour Board. Representatives of the employees before this Board also voiced such criticism. In this connection it is of interest to note that, during the two and one-half years that have elapsed since the United States Labour Board came into existence, it has disposed of eight thousand four hundred and seventeen questions brought to it by carriers and by employees. Of these, seven thousand seven hundred and twenty-seven have been disputes formally docketed, heard and decided. Among them were the disputes comprised in three general readjustments of wages and the revision of rules applicable to all the railroads and to their various classes of employees.

As to whether or not the above decisions of the Board gave satisfaction, one can judge from the fact that only two strike situations so far have confronted it.

I am therefore of opinion that the company has followed the proper course in deciding upon the tentative reductions. The company through its representatives reiterated at the close of its case the hope that the representatives of the employees would meet it in an attempt to arrive at a satisfactory settlement, and I trust that such meeting will take place. Failing it, the company would be justified in putting the tentative reductions in force as permanent reductions and making the same retroactive. This would not preclude the making from time to time of any adjustments that time or conditions might show to be considered advisable.

Respectfully submitted,

(Sgd.) GEO. D. KELLEY,
Member of Board.

Dated this 9th day of November, A.D.,
1922.

PERE MARQUETTE SHOP EMPLOYEES' DISPUTE

THE *Père Marquette Magazine*, published in Detroit, Michigan, in the interests of *Père Marquette Railway* employees, in its issue for the month of October, 1922, contains a summary of the report of the Board of Conciliation and Investigation which dealt with the dispute between the railway in question and certain of its employees in the shops at St. Thomas, Ontario. The article containing the report includes comments throwing an interesting light on the operations of the Industrial Disputes Investigation Act in this case, on the whole complimentary to all parties concerned in the dispute. The following extracts are taken from the article in question:

That intangible bond of good-will and mutual understanding between employer and employees, which has always existed on the Canadian Lines of the *Père Marquette Railway*, seems to have been strengthened rather than weakened by the Board of Conciliation which studied the differences under the "Industrial Disputes Investigation Act, 1907," in St. Thomas and Windsor, recently. A telegram from Hon. James Murdock, Minister of Labour, was received September 18th, releasing the report, which had been forwarded to Ottawa the week before by Chairman W. T. R. Preston. The report, which comprises nine pages of typewritten legal cap paper, single spaced, is perhaps one of the most comprehensive that has been addressed to the Minister of Labour, and it is characterized by the same moderation and good temper which were manifested throughout the proceedings. Associated with Chairman Preston were Mr. W. D. Robbins, of Toronto, representing the men, and Mr. A. Leslie, of Kingsville, representing the railway. The dispute had its origin because the *Père Marquette Railway* put into effect on the Canadian division of its railway the scale of wages adopted by the United States Labour Board, known as Decision 1074, the same to become effective July 1st, 1922. The

general question of the rates of pay of certain of the employees being members of the Brotherhood of Machinists, Boilermakers, Carmen and Electricians, had previously been referred to the United States Labour Board by mutual consent of the great labour organizations of the United States and the railway systems of that country.

Perhaps no Board of Conciliation in the history of industrial disputes in Canada has functioned so conscientiously, has been guided with such sound economies or motivated with such just morality as this Board which was presided over by Chairman Preston. Throughout the proceedings, which were lengthy and exhaustive, there never was even the suggestion of a "flare up". Chairman Preston, who has been much of a globe trotter in his day, having represented the Canadian Government in Europe and the Orient, and who is himself a farmer, brought to the Board an invaluable wealth of industrial information and a sympathy for the working classes, as well as a sound knowledge of the economies of industry. Mr. Robbins, who has represented the labour interests in many controversies, a veteran who has seldom lost a battle, is possessed of considerable iron in his veins and has cheek-mated many a professional arbitrator in such disputes. Mr. Leslie, who is one of the outstanding business men of Western Ontario, skilled in actuarial work and the meticulous problems of modern big business, proved a reasonable and sympathetic foil to Mr. Robbins. He at all times showed a breadth of sympathy for the cause of the worker. He met Mr. Robbins more than half way down the road with a smile. Throughout the proceedings Mr. Preston was hardly called upon to make a ruling. There never was the suggestion of a heated retort, or a caustic remark. The spirit of compromise prevailed throughout, which is rather exceptional in these days of violent clashes between employer and worker. Indeed, the most violent word in this meeting seems to have been in the title of Mr. Preston's brief, which was handed to him a "Dispute between The *Père Marquette Railway* and certain of the Employees".

COST OF LIVING ADJUSTMENT OF WAGES OF VANCOUVER ISLAND COAL MINERS

THE Cost of Living Commission appointed on January 21, 1919, to determine every three months the changes in the cost of living for coal miners on Vancouver Island, and to report the amount by which wage rates should correspondingly be increased or decreased, has forwarded its report to the Department of Labour for the quarter ending September 30, 1922.* The Commission consisted of Mr. Matthew Gunness, representative of the miners; Mr. Tulley Boyce, representing the operators; and Mr. D. T. Bulger, Fair Wages Officer of the Department of Labour, Chairman.

As in previous investigations, forms were sent out to the merchants and dealers with whom the majority of miners were accustomed to trade in the various localities. The forms contained the same list of groceries, provisions, meats, etc., that was used on previous occasions. The method of computing the changes for the period under review was the same as used for previous adjustments, namely, to determine the percentage of increase or decrease, as the case may be, of prices of September 30 over June 30, for groceries, provisions, meats, etc., and to add a further two-fifths of this increase (or decrease) as

*For previous orders see LABOUR GAZETTE, September, 1922, and various preceding issues.

an equivalent to cover similar increases (or decreases) in clothing, etc., a decrease of 5.1 per cent was ascertained, which amounted to a decrease in wages of 15½ cents per day where the base rate was \$3 per day, and 16 cents per day where the base rate was \$3.15, the increase in wages to become effective November 1, 1922, and to apply to all underground service, clerical and office employees.

Retail price lists were received from general merchants and retail dealers in meats in the various mining centres.

Sharp increases were noted in sugar, jam, canned salmon, oatmeal, sodas, cookies, ham, tea and bacon. Slight increases were noted in small white beans, barley, rice, lard, molasses, split peas, sago, vinegar, pickles, butter, evaporated figs, prunes, peaches and apricots, and veal. Sharp decreases were noted in cornmeal, cream tartar, corned beef, all flours, fresh beef and pork. Slight decreases were noted in canned corn, canned tomatoes, rolled oats, cheese, flavouring extracts, lima beans, canned beans, lunch tongue, brooms, soaps, milk, coffee, currants, matches and mutton. No changes were noted in syrup, beans, tapioca, canned peas, roast beef and raisins.

STRIKES AND LOCKOUTS IN CANADA DURING NOVEMBER, 1922

THE following table shows the number of strikes in existence in Canada at some time or another during November, 1922, together with the number of employees involved and the time loss in working days, as compared with the previous month and with November 1921.

	Disputes	No. of employees involved	Time loss in working days
November, 1922.....	14	2,190	52,046
October, 1922.....	17	3,229	54,502
November, 1921.....	18	3,354	73,149

STRIKES AND LOCKOUTS DURING NOVEMBER, 1922.

Industry, occupation and locality.	Number of employees involved.	Time lost in working days.	Particulars
(a) Strikes commencing prior to November, 1922.			
MANUFACTURING—			
<i>Printing and Publishing:</i>			
Photo engravers, Montreal, Que..	28	728	Commenced May 2, 1921. For shorter hours. Un-terminated.
Printing compositors, Montreal, Que.	42	1,092	Commenced May 2, 1921. Alleged violation by employers of 44-hour clause in agreement. Un-terminated.
Printing compositors, Montreal, Que.	10	260	Commenced June 14, 1921. Objection of men to perform work that came from shop where strike existed. Un-terminated.
Printing compositors, Montreal, Que.	410	10,660	Commenced July 1, 1921. For increased wages and 44-hour week. Un-terminated.
Printing compositors, Montreal, Que.	25	650	Commenced September 15. Employer refused to negotiate a new agreement with the union. Un-terminated.
Printing compositors, Toronto, Ont.	813	21,138	Commenced June 1, 1921. For increased wages and 44-hour week. Un-terminated.
Printing compositors, Winnipeg, Man.	190	4,940	Commenced July 1, 1921. Alleged lockout following refusal of employers to renew agreement. Un-terminated.
Printing compositors and pressmen, Halifax, N.S.	51	1,326	Commenced May 2, 1921. For shorter hours with same weekly wages. Un-terminated.
Printing compositors and pressmen, Ottawa, Ont.	152	3,952	Commenced June 1, 1921. For increased wages and 44-hour week. Un-terminated.
Printing compositors and pressmen, Vancouver, B.C.	42	882	Commenced May 2, 1921. For increased wages and 44-hour week. Un-terminated.
<i>Iron, Steel and Products:</i>			
Narrow gauge enginemnen of steel Company, Sydney, N.S.	16	352	Commenced June 9, 1921. In sympathy with employees of steel and coal companies. Settled by negotiations November 25, 1922.
TRANSPORTATION—			
<i>Steam Railways:</i>			
Railway employees of steel and coal companies, Sydney, N.S.	150	3,300	Commenced November 22, 1920. For increased wages and improved working conditions. Settled by negotiations November 25, 1922.
<i>Street and Electric Railways:</i>			
Motormen and conductors, Niagara Falls, Ont.	21	566	Commenced July 1, for recognition of the union. Un-terminated.
(b) Strike commencing during November, 1922.			
MINING NON-FERROUS SMELTING AND QUARRYING—			
Coal miners, Cardiff coal field, Alta.	250	2,250	Commenced November 21, for recognition of the union and improved working conditions. Un-terminated.

As in several previous months the greatest time loss during November was in the group including the printing and publishing trades, which began in the spring and summer of 1921, which resulted in a time loss of 45,578 working days.

One strike commenced during the month involving approximately 250 coal miners in the Cardiff coal fields, Alberta, and resulting in a time loss of 2,250 working days. Thirteen strikes were carried over from October, these causing a time loss of 49,796 working days during the months under review. Two of the strikes which commenced prior to November terminated during the month. At the end of the month there were, therefore, still on record 12 strikes, affecting 2,024 workpeople as follows: coal miners, Cardiff coal fields; photo engravers, Montreal; printing compositors, Hamilton; three strikes of printing compositors at Montreal; printing compositors, Toronto; printing compositors, Winnipeg; printing compositors and pressmen, Halifax; printing compositors and pressmen, Ottawa; printing compositors and pressmen, Vancouver, and motormen and conductors at Niagara Falls.

Disputes by Industries.

The following is a review of disputes by the groups of industries in which strikes or lockouts occurred during the month, in the order in which they appear in the statistical table.

MINING, NON-FERROUS SMELTING AND QUARRYING.

On November 21, a strike of 250 coal miners occurred in the Cardiff Coal Fields, Alberta, for recognition of the union and improved working conditions. This strike remained unterminated at the end of the month.

MANUFACTURING.

Printing and Publishing.—There was no change in the strikes in this group during November. Ten strikes were still in existence involving 1,753 workpeople and resulting in a time loss of 45,578 working days.

Iron and Steel.—The strike of narrow gauge enginemen which began at Sydney in June, 1921, in sympathy with the railway employees of a steel and coal company, terminated November 25.

TRANSPORTATION.

Steam Railways.—The strike of railway employees in the employ of two steel and coal companies at Sydney which began on November 22, 1920, was terminated November 25, and work was resumed at the end of the month.

Street and Electric Railways.—There was no change reported in the strike of motormen and conductors at Niagara Falls during the month of November.

STRIKES AND LOCKOUTS IN GREAT BRITAIN AND NORTHERN IRELAND DURING OCTOBER, 1922

THE British Ministry of Labour Gazette for November contains the following information respecting strikes and lockouts in Great Britain and Northern Ireland, during October, 1922, based upon returns from employers and workpeople.

NUMBER, MAGNITUDE AND DURATION.—The number of trade disputes involv-

ing a stoppage of work, reported to the Department as beginning in October in Great Britain and Northern Ireland, was 32, as compared with 31 in the previous month, and 63 in October, 1921. In these new disputes nearly 5,000 workpeople were involved, either directly or indirectly (i.e., thrown out of work at the establishments where

the disputes occurred, though not themselves parties to the disputes). In addition, about 9,000 workpeople were involved in 25 disputes which began before October and were still in progress at the beginning of that month. The number of new and old disputes in progress in October was thus 57, involving nearly 14,000 workpeople, and resulting in a loss during October of 186,000 working days. The principal dispute in progress during the month was that which began on September 21, involving about 5,000 coal miners and coke oven workers at Ebbw Vale; this dispute terminated on October 25.

The number of workpeople involved in disputes in October was lower than that recorded for any previous month during the present year.

CAUSES.—Of the 32 disputes beginning in October, 16, directly involving about 2,000 workpeople, arose out of proposed reductions in wages; 8, directly involving about 1,000 workpeople, on other wage questions; and 8, directly involving about 1,000 workpeople on other questions.

RESULTS.—Settlements were effected in the case of 21 new disputes directly involving about 3,000 workpeople, and 11 old disputes, directly involving

about 7,000 workpeople. Of these disputes, 8, directly involving about 1,000 workpeople, were settled in favour of the workpeople, 10, directly involving about 1,000 workpeople in favour of the employers, and 14, directly involving about 8,000 workpeople, were compromised. In the case of two disputes directly involving about 1,000 workpeople, work was resumed pending negotiations.

The following table classifies the disputes in progress in October, in Great Britain and Northern Ireland, by groups of industries:—

Groups of industries	No. of disputes in progress in October			Number of workpeople involved in all disputes in progress in October.	Aggregate duration in working days of all disputes in progress in October.
	Started before October 1.	Started in October.	Total		
Building	3	2	5	1,000	5,000
Mining and quarrying	7	4	11	8,000	128,000
Metal, engineering and shipbuilding	7	8	15	2,000	28,000
Transport	2	8	10	2,000	16,000
Other trades	6	10	16	1,000	9,000
Total, Oct., 1922	25	32	57	14,000	186,000
Total, Sept., 1922	30	31	61	15,000	142,000
Total, Oct., 1921	38	63	101	23,000	156,000

LEAGUE OF NATIONS INTERNATIONAL LABOUR ORGANIZATION

Fourth Session of the International Labour Conference

THE Fourth Session of the International Labour Organization of the League of Nations constituted under the provisions of the Treaties of Peace, was held in Geneva, Switzerland, from October 18 to November 3, 1922, twenty-one sittings in all being held. The following 37 countries were represented at the Conference:—

Albania
Austria
Belgium

Brazil
Bulgaria
Canada

Chile
China
Colombia
Cuba
Czechoslovakia
Denmark
Esthonia
Finland
France
Germany
Great Britain
Greece

Hungary
India
Italy
Japan
Latvia
Netherlands
Norway
Paraguay
Poland
Portugal
Roumania
Kingdom of Serbs,
Croats & Slovenes

Siam	Switzerland
South Africa	Uruguay
Spain	Venezuela
Sweden	

Of the delegates to the Conference, 61 were appointed on behalf of governments, 21 on behalf of employers, and 22 on behalf of workers. There were besides 91 technical advisers in attendance, of whom 44 were attached to government delegates, 24 to employers' delegates, and 23 to workers' delegates.

The International Labour Organization comprises a periodical Conference and a permanent office controlled by a Governing Body. Part XIII of the Treaties of Peace sets forth the objects for which this Organization was formed, being briefly to secure social justice as a basis for universal peace; to remove the causes of industrial unrest which imperil world peace and harmony; to improve labour conditions by international regulation; to foster the adoption of humane conditions of labour by setting up international standards; and to promote the physical, moral and intellectual well-being of industrial wage earners. No change has occurred since the last session in the membership of the International Labour Organization except the admission of Hungary. This state in consequence of its admission to the League of Nations by vote of the Assembly on September 18, 1922, has become, in virtue of the fundamental principle of Article 315 of the Treaty of Trianon, a member of the International Labour Organization.

Under the terms of the Peace Treaty the International Labour Conference, composed of delegates from states being Members of the Organization, meets at least once a year. Previous sessions of the Conference were held in Washington, D.C., in 1919; Genoa, Italy, in 1920; and Geneva, Switzerland, in 1921.

A resume of the proceedings of the first International Labour Conference, together with the text of the Conventions and Recommendations, was published in the December, 1919, issue of the LABOUR GAZETTE, see pages 1425-1440.

A resume of the proceedings of the second International Labour Conference, together with the text of the Conventions and Recommendations, was published in the October, 1920, issue of the LABOUR GAZETTE, see pages 1316-1323.

A resume of the proceedings of the third International Labour Conference, together with the text of the Conventions and Recommendations, was published in the January, 1922, issue of the LABOUR GAZETTE, see pages 40-59.

A report on the mission of the Deputy Minister of Labour as Government representative on the Governing Body of the International Labour Organization at its meetings in January and March 1920 was published in the July, 1920, issue of the LABOUR GAZETTE, see pages 844-865.

A bulletin of general information in reference to the International Labour Organization was published as a supplement to the February, 1922, issue of the LABOUR GAZETTE.

The States which were parties to the Treaties of Peace are each entitled to four delegates to the Conference, two representing the government, and two representing the employers and workpeople respectively of the country, these last being chosen in agreement with the industrial organizations most representative of employers or workpeople as the case may be. The delegates are entitled to be accompanied by two advisers for each item on the agenda of the Conference, one of whom, it is specified, shall be a woman when questions especially affecting women are to be considered. The conclusions of the Conference may be cast

in the form of draft conventions or of recommendations to the national governments, a two-thirds majority in the Conference being required for the adoption of either a draft convention or a recommendation. The Treaty of Peace provides that members of the International Labour Organization will, within the period of one year at most from the conclusion of the session of the Conference, or if it is impossible, owing to exceptional circumstances, to do so within the period of one year, then at the earliest practicable moment, and in no case later than 18 months from the closing of the session of the Conference, bring the recommendation or draft convention before the authority or authorities within whose competence the matter lies for the enactment of legislation or other action. The Treaty recognizes the limited power of federal governments and provides that in the case of federal states, which would, of course, include Canada, the authority of which to enter into conventions on labour matters is limited, the federal government may treat a draft convention as a recommendation only.

Mr. Arthur Fontaine, President of the Governing Body of the International Labour Office, in declaring the Fourth Session of the Conference open, said that the Governing Body was aware that the parliaments of the various member governments could not keep pace with the decisions which the conference reached, and it was for this reason that it was thought the 1922 session might devote its attention to putting their constitution in order in the light of the experience which had been gained during the previous three years. Mr. Fontaine moved the election as president of the Conference of Lord Burnham, who presided at the Third Session of the Conference at Geneva, 1921. The nomination was supported by the employers' delegate from Belgium, and the workers' delegate from Belgium, and in the name of the delegation of Latin America, by the government delegate

from Cuba, and was carried unanimously. Dr. Aristide de Agueró y Bethancourt (Cuba) was elected vice-president of the Conference, Mr. Albert Thomas, Director of the International Labour Office, acted as Secretary-General, and Mr. H. B. Butler, Deputy Director of the International Labour Office, as Deputy Secretary-General.

President's Opening Remarks

The President, Lord Burnham, said in the course of his introductory remarks that the growing tendency to treat grave problems of trade and industry from an international standpoint, could not be ignored and that the balance of modern trade depending as it does upon international agreements, the place of the International Labour Organization in the order of the universe had become assured, and although that place may be somewhat indeterminate, it will never be declared vacant. The President referred to the fact that many of the acts of the last session had so far not been ratified by the members of the League of Nations in and through their respective parliaments, but added that after all such was to be expected, the paths of legislation in all the parliaments of the world being still blocked by the wreckage of war.

Agenda of the Conference

The following was the agenda of the Conference.

- I. Revision of Part XIII of the Treaty of Versailles and the corresponding parts of the other treaties of peace;
 - (a) With a view to the reform of the constitution of the Governing Body;
 - (b) With a view to modification as regards the periodicity of the Conference.
- II. Communication to the International Labour Office of statistical and other information regarding emigration and immigration and the repatriation and transport of emigrants.

The Governing Body, in connection with the above Agenda, directed the attention of the various governments to the following observations:—

The decision to include Item II in the Agenda was made in order to give effect to a resolution adopted by the International Emigration Commission during its meeting at Geneva in August, 1921.

Regarding Item I of the Agenda (Revision of Part XIII of the Treaty), the reform of the constitution of the Governing Body referred to in paragraph (a) of this item was included in the Agenda of the Third Session of the Conference held at Geneva, August to September, 1921, and in conformity with the desire expressed by the Conference itself, this question was included in the Agenda of the Fourth Session. The Governing Body, in directing attention to paragraph (b) of the first item on the Agenda, pointed out that a revision of the Treaty of Peace as regards the question of the periodicity of the sessions of the Conference may not be considered indispensable. At a session of the Governing Body held in November, 1921, the general opinion was that it was desirable not to overload the agenda of the sessions of the Conference, and that an adequate interval should be allowed between conferences. Certain members of the Governing Body suggested that this object might be attained if it were possible to divide the sessions of the Conference into two classes, alternating from year to year; on the one hand, those sessions at which the Conference might be called upon to adopt draft conventions and recommendations, and on the other hand, those which it would only have to take note of results already obtained and difficulties encountered in the application of its decisions, and to settle any general question regarding the working of the International Labour Organization.

The Canadian Delegation

The Government delegates were the Honourable James Murdock, Minister of Labour, and the Honourable Ernest Lapointe, Minister of Marine and Fisheries. The employers' delegate, ap-

pointed on the nomination of the Canadian Manufacturers' Association, was Mr. W. C. Coulter of the Booth-Coulter Copper & Brass Co., Ltd., Toronto, with Mr. H. W. Macdonnell of the Canadian Manufacturers' Association, Toronto, as technical adviser. The workers' delegate was Mr. Tom Moore, Ottawa, president of the Trades and Labour Congress of Canada, with Mr. John W. Bruce of Toronto, Canadian Representative of the United Association of Plumbers and Steamfitters, as technical adviser.

Although the items on the Agenda were not such as would fall within the scope of provincial legislation, the provincial governments were invited to be represented at the Conference under conditions similar to those in which they had attended previous conferences, namely as advisers to the Dominion Government delegates; advantage, however, was not taken of the invitation on this occasion.

Committees Established

Committees were established for the consideration of the different items of the Conference Agenda as follows: Migration Statistics, Reform of the Governing Body, and Procedure of Amendments to Conventions; the Honourable Mr. Murdock, Minister of Labour for Canada, being Chairman of the last mentioned committee dealing with Amendments to Conventions, while Mr. Tom Moore, President of the Trades and Labour Congress of Canada, was appointed vice-chairman of the Committee on Migration Statistics. Committees were also set up to deal with the Report on Unemployment, and the standing orders of the Conference.

Questionnaires from the International Labour Office had been in advance of the Conference distributed to all governments entitled to representation therein, these questionnaires being in the form of discussions of the different items on the Conference Agenda. The information contained in the governmental replies to the questionnaires was

subsequently published in pamphlet form for the information of the delegates to the Conference. The separate items of the Agenda were all referred by the Conference to the respective committees for examination and report.

Director's Report

At an early sitting of the Conference the Secretary-General introduced his yearly report as Director of the International Labour Office. The report dealt first with problems of internal organization with special reference to the budget of the International Labour Organization, and the construction of a permanent home in Geneva for the International Labour Office on the site generously offered by the Swiss Government, and with the work of international information carried out by the International Labour Office, which the Secretary-General described as two-fold—collection and distribution—referring particularly to the value of such services to newly developed countries. In connection with international labour legislation, the Secretary-General spoke of the endeavour, whilst following the principles established in the Treaty of Peace, to improve conditions of labour in each country and to secure through the application of conventions that the most advanced countries in the sphere of labour legislation are not affected by the competition of the more backward. This endeavour was described as the principal task of the Organization. Speaking of the ratification of conventions, the Secretary-General said:

It is our duty to adopt draft Conventions and to ascertain to what extent these are ratified and enforced. What is the present position? Recently I was able to inform the Fourth Committee of the Assembly that forty-six ratifications had been effected up to date. Since the close of the Assembly of the League seven fresh ratifications have been registered or communicated by States, and the number increases daily.

I may add that this very day we have received an official communication in a letter from the Japanese Government announcing that the Japanese Privy Council has

decided to adopt the Draft Conventions concerning Unemployment adopted by the Washington Conference and the Draft Convention concerning Employment of Seamen adopted at Genoa in 1920. The formal measures for ratifying these Conventions will be taken immediately by the Japanese Government.* As regards the Draft Convention fixing the minimum age for the admission of young persons into industry, adopted at Washington, and the Draft Convention fixing the minimum age for the admission of young persons on board ship, the Privy Council has decided that several provisions in existing legislation must be amended in order to bring them into conformity with the texts of the two Draft Conventions. But as soon as this has been done the two Draft Conventions will be ratified.

The number of ratifications is thus increasing from day to day and the figure has now reached 53. Those who participate in the daily political and administrative life of States know what an immense amount of effort this figure represents. Ratifications, alas, do not take place automatically. I say alas, but perhaps this is also a guarantee, for if ratification took place without any previous discussion, the possibilities of enforcement would clearly be much less. Still, fifty-three ratifications for all the Draft Conventions which have been passed is a small figure, much too small.

A report on the Unemployment Enquiry undertaken by the International Labour Office was laid before the Conference as a supplement to the Director's report. Further sittings of the Conference were devoted to the examination of the Director's report and a discussion by the full Conference of action taken by the various governments on the Draft Conventions and Recommendations of previous conferences.

The Committee on the Standing Orders of the Conference brought in a report which modified the existing Standing Orders only as to form, and the Standing Orders as drafted by the Committee were unanimously adopted.

Consideration by the committees and subsequently by the General Conference resulted in the adoption of a

*Advice has since been received that the two Draft Conventions referred to have been duly ratified by Japan.

proposed amendment to Article 393 of the Treaty of Peace, a recommendation as to emigration statistics and information, a resolution regarding unemployment, a resolution regarding the amendment of conventions, and a resolution regarding the periodicity of the sessions of the Conference.

Reform of the Governing Body

The Committee on Constitutional Reform, having examined the report presented by the Governing Body with a view to the amendment of Article 393 of the Peace Treaty, drafted a new article which was the subject of an extended discussion by the General Conference, resulting in the proposal to amend Article 393 of the Treaty of Peace as set forth hereafter. Article 393 as included in Part XIII of the Treaty of Peace states that the International Labour Office should be under the control of the Governing Body, consisting of 24 persons,—12 persons representing the governments, 6 members representing the employers, and 6 persons representing the workers. The proposed amendment adopted by the Conference increases the Governing Body to 32 persons, distributed in the same proportions as before.

Both the original Article and the proposed amendment set forth that of the persons representing governments, eight shall be chosen by the Member States of chief industrial importance, and the other persons representing the governments, numbering four under the original Article and eight under the proposed Amendment, shall be appointed by the Members selected for that purpose by the government delegates to the Conference, excluding the delegates of the eight Members mentioned above. The proposed Amendment further requires that of the sixteen Members represented, six shall be non-European states. The question as to which are the Members of chief industrial importance was left to the Council of the League of Nations,

which, having adopted a classification placing Canada amongst the first eight Member States of chief industrial importance, assures the Dominion Government of representation on the Governing Body, similar to that which it has had since the inception of the International Labour Organization. Under the terms of Article 422 of the Treaty of Peace, the proposed Amendment of Article 393, before going into force, will require to be ratified by the States represented on the Council of the League of Nations and by three-fourths of the Members of the League of Nations.

Periodicity of the Conference

A resolution was introduced recommending that the Conference should hold alternate sessions of preparation and of decision, and after discussion by the General Conference it was decided to refer the resolution, together with the observations made by the Committee to the Governing Body for consideration. It will be recalled that Article 389 of the Treaty of Peace specifies that the meetings of the General Conference shall be held at least once in every year. During the Session dealt with in this report, a vote was taken on the proposal by the Governing Body, which recommended biennial sessions, the proposal, however, being rejected by the General Conference. The Minister of Labour of Canada was among those who spoke in favour of biennial sessions.

Procedure of Amendment of Conventions

The question submitted to the Committee for its consideration arose out of the proposal made by the International Labour Office at the 1921 Conference for the insertion in future conventions of a clause which should permit amendments without resort to the procedure laid down by Article 405 of the Treaty. This question was referred by the 1921 Conference to the Governing Body for examination, but the Governing Body reported that

they had not reached any conclusion in the matter and had recommended that a special sub-committee of the Conference should be appointed to consider it. The commission appointed to examine the question was composed of eighteen members, six from each group, the Honourable James Mordock, Minister of Labour of Canada, being elected Chairman. This committee held several meetings and also appointed from its members a committee of legal experts to consider the proposal to arrange some plan whereby in future conventions a clause could be inserted to provide for desired amendments. The sub-committee of legal experts reported back that a further exhaustive inquiry should be made and the committee therefore unanimously recommended to the Conference that the International Labour Office should be directed to undertake a thorough study of the problems involved in the proposal to arrange for amendments to future conventions and to prepare a report to be submitted to member governments at least four months in advance of the next conference. The proposal and recommendation of the committee were adopted unanimously by the Conference.

**Communication of Statistical Information
referring to Emigration and Immigration**

Mr. Tom Moore, President of the Trades and Labour Congress of Canada, who was Vice-Chairman of the Committee on Emigration Statistics, presented the report of the Committee, including a draft for a Recommendation. The report was unanimously adopted by the Conference. The Recommendation, as will be seen by reference to the text at the end of the present report, recommends that each Member of the International Labour Organization shall communicate to the International Labour Office available information regarding emigration, immigration, repatriation, transit of emigrants on outward and return journeys, and measures taken or contemplated in connection with these questions. It is also recommended that the Members make every effort to com-

municate to the International Labour Office specified statistics as to sex, age, occupation, nationality, country of last residence, and country of proposed residence. Finally, the Recommendation suggests the adoption of a uniform definition of the term "Emigrant" and the determination of uniform particulars to be entered on identity papers issued to emigrants and immigrants by the competent authorities, and the use of a uniform method of recording statistical information regarding emigration and immigration.

**Resolution of Conference regarding
Unemployment**

The committee appointed for the examination of the special report presented by the Director in connection with the Enquiry into Unemployment which was confided to the International Labour Office by the Conference at its 1921 session, comprised 21 members in the proportion of 7 from each of the Conference groups. The enquiry, with which the report deals, was carried out by a special section of the International Labour Office in accordance with the instructions of the Governing Body. After indicating the extent of the unemployment crisis, the report makes a comparative study of remedies adopted in various countries, and analyses the causes of unemployment, drawing a distinction between unemployment as caused by normal economic conditions, and as connected with post-war conditions. These two sets of causes are classified as follows:—

Causes corresponding to the normal economic system:

Lack of vocational skill and the unsatisfactory distribution of workers among various industries; lack of mobility of labour and unsatisfactory distribution of workers among various localities; slack seasons; *force majeure*; faulty organisation of industrial undertakings; sudden changes in industrial methods; social disturbances; customs policy; periodical crises of over-production.

Causes arising out of the post-war economic system:

The international political situation; under-production in the impoverished countries; in-

stability of the exchanges; instability of national currencies; the increased cost of living and the consequent under-consumption; changes in the purchasing power of the various classes of the community; certain cases of injudicious government interference with private enterprise.

After discussion in the Conference of the Committee's report, a resolution was adopted calling upon the International Labour Office to continue actively its work as regards the collection of information and international co-ordination in the matter of unemployment, and further resolving that the International Labour Office should ask the Economic and Financial Organization of the League of Nations for all pertinent information concerning the influence on the demand for labour of both sexes of monetary, financial and commercial policy in different countries.

President's Concluding Remarks

In his closing remarks Lord Burnham, the President of the Conference, said:

This has been, in its essence, a constitutional Conference. The International Labour Organisation is not meant to be a legislative machine for turning out Conventions and Recommendations like papers from a printing-press, although our deliberations ought to be directed to practical issues. It is not a court of registration existing to place on record the decisions taken by outside bodies, right or left of us, it matters not which. It exists, primarily, for the collection and diffusion of full and accurate information on all the great questions of industrial movement and importance to the world at large. It is the servant and, in some ways, it may well be the teacher of Governments and governors in undertaking the satisfactory and comparative treatment of industrial problems. I ask you what functions can be more important for general progress and contentment when a round dozen of new States have been called into being, or revived, after the passing of long years in this principal continent, if I may still call it so, of Europe, and when in other continents there are so many states of immense extent and inexhaustible resources, whose statesmen and officials are always calling out to us for the fullest intelligence or what is being done here, there and everywhere, to promote the welfare and efficiency of the workpeople of every category and all conditions. There is no question which, intrinsically and actually, is of more urgent public importance than emigration and immigration, or, as we prefer to call it within the

British Empire, of migration and overseas settlement. What it means in fact and tendency is the readjustment of population to the means of subsistence as created and exploited by industry. New laws are everywhere being passed to control and direct it, yet no subject has had less scientific investigation and on none are the data more insufficient. Surely in having begun its consideration by the Commission of last year, presided over by Lord Ullswater, formerly Speaker of the British House of Commons, and in our decisions of this year on the collation of statistics, we have indeed been well advised.

It is a remarkable fact that from no country are more enquiries addressed to this Office than from the United States of America, and we welcomed with all sincerity the party of American employers who paid us an official visit this Session.

This Session, we spent four or five sittings in the consideration of the Director's very able and comprehensive Report. I may perhaps take to my credit, that last year I suggested that this should be the first item on the official Agenda after the formal business was concluded. I believe it proved of general interest and allowed of a general debate which a great body such as this is quite justified in holding, because it allows the industrial conditions of the year to be considered as a whole from the varying standpoint of all the continents and countries of which the Conference is made up. It is no waste of time, because subjects are then and there dealt with which would otherwise crop up on the reports of committees and the ground is thereby cleared for substantive proposals, or is shown not to be sufficiently explored and to necessitate further enquiry by the Office. Real and substantial progress in international agreements can only be made in the full light of knowledge and reason. Attempts to hustle and prejudice the issues submitted only lead to failure and disappointment, as this Conference well knows even within the short term of its existence.

The mission of this great and representative Council of the nations is to study and promote the well-being of the vast majority of the people in all parts of the world which has come under the mind and hand of man, step by step, and measure upon measure. "Work," said our great writer Carlyle in an academic address, "is the grant cure of all the maladies and miseries that ever beset mankind." So be it, and it is for us to do our best to ensure that work, as healthy, as happy and as productive as the skill and energy of man can make it, shall be undertaken and perfected in the spirit of good understanding and goodwill among the nations."

Texts of proposed Amendment, Recommendation, Resolutions, etc.

The following is the text, as published in the Provisional Record of the Fourth Session of the International Labour Conference, held at Geneva, October 18 to November 3, 1922, of the several propositions of the Conference, viz: Proposed amendment of Article 393 of the Treaty

of Peace; Resolution on Periodicity of Conference; Proposal Regarding Procedure of Amendment to Conventions; Recommendation Regarding Communication of Emigration and Immigration Information; and Resolution Regarding Unemployment.

Proposed Amendment of Article 393 of the Treaty of Peace

"Article 393 shall read as follows:—

"The International Labour Office shall be under control of a Governing Body consisting of thirty-two persons:—

Sixteen representing Governments,
Eight representing the Employers,
and

Eight representing the Workers.

Of the sixteen persons representing Governments, eight shall be appointed by the Members of chief industrial importance, and eight shall be appointed by the Members selected for that purpose by the Government Delegates to the Conference excluding the Delegates of the eight Members mentioned above. Of the sixteen Members represented six shall be non-European States.

Any question as to which are the Members of chief industrial importance shall be decided by the Council of the League of Nations.

The persons representing the Employers and the persons representing the Workers shall be elected respectively by the Employers' delegates and the Workers' delegates to the Conference. Two Employers' representatives and two Workers' representatives shall belong to non-European States.

The period of office of the Governing Body shall be three years.

The method of filling vacancies and of appointing substitutes and other similar questions, may be decided by the Governing Body subject to the approval of the Conference.

The Governing Body shall, from time to time, elect one of its number to act as its Chairman, shall regulate its own procedure, and shall fix its own times of meeting. A special meeting shall be held if a written request to that effect is made by at least twelve of the representatives on the Governing Body."

Resolution on Periodicity of Conference

"The Commission, while proposing that the present text of paragraph 1 of Article 389 should remain unchanged, recommends that the Conference should hold alternative sessions of preparation and of decision. In the examination of items inscribed on the Agenda, the first Sessions should be devoted to the general

discussion of drafts for Conventions or drafts for Recommendations, demanding a vote by a simple majority only. The final vote upon these decisions in the conditions provided for by paragraph 2 of Article 405, that is to say, by a two-thirds majority, should be held at the opening of the following session."

Proposal Regarding Procedure of Amendment to Conventions

The Commission is of opinion that the problem submitted to it is a very difficult and delicate one, and can be decided only after all the information capable of contributing to its solution

has been collected, and that consequently the Conference is not in a position to take a decision on the question of amendment to Conventions. While emphasizing the importance of the question, the

Commission proposes to the Conference that it instruct the International Labour Office to undertake a thorough study of the problem, and to prepare a report to be submitted to Governments for their observations at least four months before the next Conference.

Recommendation Regarding Communication to the International Labour Office of Statistical or other Information on Emigration, Immigration, and the Transit of Emigrants and Immigrants

I. The General Conference recommends that each Member of the International Labour Organization should communicate to the International Labour Office all information available concerning emigration, immigration, repatriation, transit of emigrants on outward and return journeys, and the measures taken or contemplated in connection with these questions.

This information should be communicated so far as possible every three months and within three months of the end of the period to which it refers.

II. The General Conference recommends that each Member of the International Labour Organization should make every effort to communicate to the International Labour Office, within six months of the end of the year to which they refer, and so far as information is available, the total figures of emigrants and immigrants, showing separately nationals and aliens, and specifying particularly, for nationals, and, as far as possible for aliens :

- (1) Sex.
- (2) Age.
- (3) Occupation.
- (4) Nationality.
- (5) Country of last residence.
- (6) Country of proposed residence.

III. The General Conference recommends that each member of the International Labour Organization should, if possible, make agreements with other Members providing for:

- (a) The adoption of a uniform definition of the term "emigrant."
- (b) The determination of uniform particulars to be entered on the identity papers issued to emigrants and immigrants by the competent authorities of Members who are parties to such agreements.
- (c) The use of a uniform method of recording statistical information regarding emigration and immigration.

Resolution adopted by the Conference Regarding Unemployment

1. The Conference resolves that the work which has been begun with a view to making unemployment statistics more comparable internationally, and to improve them from the national point of view, shall be continued;

2. The Conference resolves that the International Labour Office shall actively continue its work as regards the collection of information and international co-ordination in the matter of unemployment in accordance with the previous decisions of the International Labour Conference; that, in particular, the permanent documentary enquiry carried out by the International Labour

Office shall be made to bear on the respective movements of production and consumption of the various classes of goods;

3. The Conference resolves that the Governing Body shall consider the periodical publication of the results of the above investigations in accordance with the resolutions adopted by the International Economic Conference of Genoa;

4. The Conference resolve that the International Labour Office shall specially investigate the causes and remedies of seasonal unemployment;

5. The Conference resolves, with a view to combatting unemployment crises, that the International Labour Office shall be instructed to make, in collaboration with the Economic and Financial Section of the League of Nations, a special study of the problem of the crises of unemployment, their recurrences and the fluctuations of economic activity, to collate and compare, in particular, the results of the investigations made in various countries, and to make known the measures taken with a view to sustaining economic activity, and thus stabilising the labour market;

6. As regards the present crisis, the Conference, having taken cognizance of the resolution of the Third Assembly of the League of Nations, expressed in the following terms:—

The Assembly, having taken note of the decisions of the General Labour Conference of 1921 calling for an enquiry into the national and international aspects of the unemployment crises and the means of combatting it, and

requesting the International Labour Office to call into co-operation the Economic and Financial Section of the League of Nations for the solution of the financial and economic questions by the enquiry.

Requests the Economic and Financial Organization to arrange the scope and method of such collaboration at an early date, and to bring to the enquiry conducted by the International Labour Office any information which it has in its possession.

Resolves that the International Labour Office, in conformity with the resolution already adopted by the Conference itself as its Third Session, whilst determining in agreement with the Economic and Financial Organization of the League of Nations the course to be pursued for the compilation of the necessary statistical data, shall ask the said Organization immediately for all pertinent information concerning the influence on the demand for the labour of both sexes of monetary, financial and commercial policy in different countries.

REMEDIES FOR UNEMPLOYMENT — REPORT OF INTERNATIONAL LABOUR OFFICE

THE International Labour Office (League of Nations) recently issued a report based on the results of an enquiry into measures adopted in various countries for relieving unemployment or its consequences. (International Labour Office, Geneva, Switzerland, 1922: "Remedies for Unemployment," price 60 cents). This enquiry was undertaken in accordance with a resolution of the International Labour Conference of 1921, instructing the Office to institute a special inquiry on the national and international aspects of the unemployment crisis and on the means of combating it. It is the intention of the International Labour Office to keep this report continually revised and to publish it from time to time, and a request is made that all States and employers' and workers' organizations furnish the data on this subject that they possess. The measures reviewed are classified under

three main heads: (1) relief of the unemployed; (2) distribution of available labour; (3) development of the possibilities of employment.

Relief of the Unemployed

Unemployment relief takes the form of either insurance or public assistance. The advantages of unemployment insurance are, according to the report, that it mitigates some of the most dire individual suffering and reveals, in part at least, the cost of unemployment to society thereby causing an impelling demand for the application of the necessary remedies. Frequently a combination of the two methods is adopted, unemployment insurance funds being supplemented by state grants. In some countries the insurance funds have been so greatly supplemented by public grants that the contributions of the insured represented only a small proportion

tion of the amount paid out to the unemployed. In Belgium out of 1,415,795 days lost in unemployment during February, 1922, the benefit societies paid out of their funds for 159,066 days, the remainder of the lost time being provided for by an emergency fund supported entirely by state grants. A similar scheme prevails in the Netherlands. In Switzerland the unemployment insurance funds, subsidized by the Federal Government, is supplemented by contributions from employers, and by part of the proceeds of a tax on war profits.

In Great Britain, Belgium and Italy there is a marked tendency towards administering unemployment insurance by industries rather than through a general fund for all industries.

Unemployment insurance may be either voluntary or compulsory, but the tendency has been towards compulsory insurance. Compulsory insurance now operates in Austria, Great Britain, Ireland, Italy and Luxembourg. Compulsory insurance is also provided for in Portugal by a decree of May 10, 1919, and bills on compulsory insurance are under examination in Belgium, Chile, Germany, the Netherlands, Poland, and Wisconsin, U.S.A. Voluntary insurance, subsidized by public authorities, exists in Czecho-Slovakia, Denmark, Finland, France and Norway, and Switzerland is establishing a definite scheme along these lines.

Where the principle of voluntary unemployment insurance through trade unions has been in force, there is a tendency to make it compulsory for their members by trade union rules. In all countries where unemployment insurance is of a voluntary character it is in the hands of private associations almost always trade unions, but subject to regulations approved by public authorities, but sometimes voluntary insurance is organized by official bodies as in the Canton of Besli-Ville, Switzerland, where in addition to trade union insurance funds aided by grants from the Canton, there is an official unemploy-

ment fund to which workers of the Canton, other than those insured in a trade union fund, may belong. On the other hand under existing compulsory schemes insurance is in principle administered directly by public authorities, but there is an increasing tendency to make provision for the co-operation of trade unions.

In cases where unemployment insurance is instituted by the workers themselves through their trade unions, insurance is specialized by industry according as the trade unions are themselves so specialized. In Italy special compulsory funds for specific trades may be approved by ministerial decree, as circumstances may require, and insurance funds organized by trade unions or by agreement between workers and employers may likewise be approved for the purpose of applying compulsory insurance within their jurisdiction. The law in Italy provides as well for the organization in each province of a compulsory joint industrial unemployment fund.

In Great Britain, contributions imposed by statute upon employers and workers are collected by means of stamps affixed to unemployment books and are paid into the unemployment fund. Payment of benefit is made either by the employment exchanges direct to claimants or indirectly through trade unions or other associations to their members. Under the latter plan the total provision made by the Association must be at least one-third greater than the unemployment benefit payable under the Act. The Ministry of Labour repays to the Association the amount its members would have received in the absence of such an arrangement and contributes toward the administrative expenses. In 1921 such arrangements had been made with 193 associations of which 171 were trade unions and the others mostly provident societies. About 2,110,000 members were insured in this way out of about 12,000,000 compulsorily insured workers. In July, 1922, the number of associations continuing these arrangements was re-

duced to 140 with a membership of 1,100,000, many being unable to keep up the payments owing to the prolonged unemployment.

In Great Britain by the original act of 1911 there was instituted one general unemployment fund, administered by the State for the benefit of certain trades to which alone the act applied. It also provided for applying the act to certain trades through trade unions. By the act of 1920, while these plans were continued, two new forms of insurance according to industry were added, called "special schemes" and "supplementary schemes." Under provisions relating to special schemes, an industry, on the approval of the Minister of Labour, may contract out of the general scheme, by setting up a scheme of its own which would ensure to the unemployed workers of that industry benefits not less favourable on the whole than those provided by the act. The supplementary schemes guarantee benefits not provided for by the act, such as payment in respect of the waiting period of partial unemployment due to bad weather and other causes.

Distribution of Labour

The chapter on the distribution of available employment deals with the regulation of engagement and dismissal, employment agencies, and the international distribution of labour.

In order to deal with the temporary disturbance of the labour market following the close of the war, laws were passed in Belgium, France, Great Britain and other countries to compel employers to take back their former employees after demobilization. In Austria employers, who had not less than 15 workers, were compelled to engage a number of unemployed persons equal to one-fifth of the staff already employed. Employers were also compelled to replace all workers who had been dismissed between April 26 and October 31, 1919. Austria, Germany and Italy have passed laws compelling employers to engage disabled ex-service men. The

German law includes also workers disabled through industrial accidents.

In recent years laws have been passed concerning collective agreements which include provisions dealing with the period of notice of dismissal and with bonuses on dismissal. In Austria and Belgium the length of notice to be given to commercial employees is laid down. Austrian decrees also compel employers to engage a new worker for every one dismissed, unless the dismissed worker has been given notice proportionate to his length of service and has received an adequate bonus on dismissal. In France, after the Armistice, bonuses equal to twenty working days' wages were allowed on dismissal to all workers employed in war industries who had worked at least a month before the Armistice. In Greece decrees were issued for the benefit of dismissed workers in the cigarette industry, and it was laid down that the maximum dismissal bonus should be one year's pay, but the recipient would not in future be allowed to find employment in the tobacco industry. This rule was made on account of the large amount of unemployment due partly to demobilization and partly to the sudden development in the use of machinery.

In some countries government regulations exist providing for compensation for partial unemployment, that is, in cases where the whole staff of an undertaking is kept on but at reduced hours. In Germany an order of November 5, 1921, provides that workers whose hours are less than normal are to receive a grant equal to the difference between half their weekly or fortnightly wages and the benefit paid to totally unemployed persons. One half of the expenditure is borne by the central government, one-third by the state and one-sixth by the municipality. In Denmark a circular of the Minister of the Interior dated March 21, 1922, declares that a benefit is to be paid to partially unemployed persons whose weekly working hours have been reduced by more than one-third, but the total wages plus the benefit may not exceed the wages the

worker would receive if his hours had been reduced by only one-third.

Employment Agencies

The earliest public employment agencies, according to the report, were municipal institutions which developed principally between 1900 and 1910 in Austria, Germany, the Netherlands, Norway, Sweden and Switzerland. In several of these countries the municipal agencies organized themselves in national federations. The first national system of public employment agencies was set up in Great Britain by the Labour Exchange Act of 1909. Many other countries have since adopted a similar plan, and there is at present an increasing tendency to make employment agencies state institutions or else subject to the direct control of the state. In a number of countries there are also many free private employment agencies, most of which were instituted by employers' or workers' organizations. In Germany, Finland, Great Britain, Italy, Roumania and Switzerland these agencies are co-ordinated with the public employment offices.

The opinion is expressed in the report that employment agencies which charge fees are doomed to disappear, and that their existence is in contradiction to Part XIII of the Treaty of Peace, which

declares that labour must not be regarded as a commodity. These agencies have been abolished in several of the provinces of Canada, Chile, Denmark, Finland, Italy, and Roumania. In Australia, agencies finding employment for sailors are forbidden to charge fees. In various other countries these agencies are licensed by the state or municipality.

Public employment agencies under the management of joint committees representing employers and workers exist in Belgium, Finland, France, Germany, Italy and some of the Swiss cantons. Recourse to public employment agencies is compulsory in Denmark, Germany and Switzerland, in the Argentine as respects manual and domestic workers, and in the Netherlands as respects the cigar industry.

Various other matters are dealt with in the report including vocational training of unemployed persons, vocational guidance for young persons, measures for the encouragement and regulation of emigration and immigration and international conventions respecting emigration and immigration. In the chapter dealing with the development of the possibilities of employment an account is given of relief works instituted in various countries, the means of recruiting labour for these works and the rates of wages paid on such works.

THE INDUSTRIAL IMPORTANCE OF CANADA

STRIKING recognition of the industrial importance of Canada is contained in a recent decision of the Council of the League of Nations. This decision was rendered under the authority of Article 393 of the Treaties of Peace which declared that eight out of the twelve Government seats on the Governing Body of the International Labour Office should be held by the countries of "chief industrial importance" and that any question arising as to which are the countries of "chief industrial importance" shall

be decided by the League of Nations Council.

A special commission was appointed to consider the criteria to be adopted in this matter and it was agreed that the seven characteristics following should be utilized, namely:—

- (1) Industrial population (including mines and transport).
- (2) Relation of industrial population to total population.

- (3) Length of railway track.
- (4) Relation of railway track to area.
- (5) Horse-power used in industry.
- (6) Relation of horse-power to total population.
- (7) Size of mercantile marine.

Statistical information on these points was obtained from the various countries comprising the League of Nations and calculations were made therefrom on two different bases. On one of these calculations Canada was ranked as the fourth state of "chief industrial importance" and on the other calculation as sixth.

On the first basis of calculation an index number was calculated for each of the seven characteristics, the maximum figure in each table being taken as 100. In order to arrange the states according to their industrial importance these index numbers were then totalled, double weight being given to characteristics 1, 5 and 7. On this basis the first eight countries were, in order of importance: Great Britain, Germany, France, Canada, Italy, Belgium, Japan and India.

Under the alternative method of the calculation each country was number-

ed from one to eighteen, according to its rank for each of the seven characteristics. These numbers were then totalled, double weight being given to characteristics 1, 5 and 7, and the countries arranged in the resulting order. The smallest total of this indicated the highest position. The eight states of "chief industrial importance" on this basis of calculation were shown to be Great Britain, France, Germany, Italy, Japan, Canada, Belgium and Sweden.

The report of the Commission of Enquiry was considered by the Council of the League of Nations and hearings were also accorded to representatives of certain countries which desired to submit special representations. The resolution adopted by the Council of the League of Nations was that the eight countries, members of the International Labour Organization which are of "chief industrial importance" are at present in the alphabetical order of the names in French as follows: Germany, Belgium, Canada, France, Great Britain, India, Italy and Japan. The United States, as is known, is not at present a member of the League of Nations or of the International Labour Organization which is connected therewith.

CANADIAN PULP INDUSTRY AND ALL-BRITISH TRADE

Sir Frederick Becker on Canada's pulp resources

FOLLOWING upon the promise of the Prime Minister (the Right Honourable A. Bonar Law) to call an economic conference of the British Empire for the development of Empire trade comes the news that the Provincial Government of Quebec have decided to spend 2,000,000 dollars on a dam which will increase by 30,000 tons a year the output of wood pulp from the Chicoutimi Mills, the largest not only in the Empire, but in the whole world. After the experiences of paper

users during the war the possibility that the British Empire may become self-supporting in this regard holds more than ordinary interest. It was discussed in an interview yesterday by Sir Frederick Becker who, with his associates, control the Chicoutimi concern.

"I have the greatest confidence," he said, "in the future of Canada as a producer of raw materials in the form of wood pulp for the world. At the

present moment Canada supplies only about one-fifth of the total consumption of wood pulp in the United Kingdom. I look forward to a time, and that not far distant, when the British Empire will produce at least fifty per cent of the wood pulp required within its boundaries.

"Since the termination of the war, the pulp and paper trades of the world have, in common with other trades, passed through many vicissitudes. We have had our booms and our slumps, but a study of the conditions governing these trades shows nothing in the future to prevent a steady and persistent rise in prices of both wood pulp and paper throughout the world until the point is reached when there is a fair business profit for everyone. I do not mean that I expect to see such a boom as there was in 1920; I mean a rise sufficient to make the pulp and paper industry one of the most economically sound in the world. The United States itself, perhaps the largest individual consumer of paper among the countries, has already, after passing through a severe depression in 1921, re-asserted itself, so that there is now an active market there in both wood pulp and paper. France and the continent also show signs of revival after a severe depression. There is evidence of recuperation in the countries to which paper is exported from Great Britain; and even Great Britain, usually the last to come round after a depression, is in a very much sounder position to-day than it was two months ago.

"An election, which usually spells slump to many trades, has always been a blessing to the paper trade. Apart, however, from that, there can be no doubt that the general trade in paper, which means added consumption of wood pulp, is making progress. As education spreads, so the demand for paper increases. Natural growth in demand is eight per cent per annum in Europe—more in America. Speak-

ing for our own mills, their entire production has been sold under contract at fair prices for the next ten years to paper makers and newspaper proprietors in Great Britain, France and the United States; and the capacity of our mechanical wood mills is 1,000 shipping tons of mechanical wood pulp a day, and of our sulphite mills two hundred tons of chemical or sulphite pulp a day.

"My future plans? They are still bound up with the ideal which I set myself when a boy after seeing trees grow in the forests and a ragged urchin selling newspapers in the street. I made up my mind that between these two a great inter-Empire organization could be founded. I have for some time been directing my attention to the more efficient working of two great entities—economic production of raw material and of the finished article. I have already a system of transport by which large ocean-going steamers owned by us pick up the wood pulp from the mill wharf in Canada, transport it across the Atlantic, and deposit it wherever practicable, at the paper mill's wharf in this country. In view of what I consider is to be a sure and increasing demand for wood pulp from Canada, I am making the necessary arrangements so as to be ready at short notice to increase the production of our mills, and in this respect we have been greatly assisted by the provincial Government of Quebec, to whose sound business sense and commercial foresight too great a tribute cannot be paid. They have not only offered to raise a large dam on Lake Kenogami for the Chicoutimi mills, which, with a constant and regular supply of water throughout the year, will thus be able to increase their production by 30,000 tons of woodpulp per annum, but are also supporting the industry by isolating certain forests adjoining our present limits and reserving us the option to take up these lands when we are ready for further development. The finest pulp wood lands in the

world are in Quebec—they replant themselves, and fire is their only, but a deadly foe.

“Without doubt” Sir Frederick concluded, “there is a great and growing tendency on the part of European manufacturers, particularly those in Great Britain, to follow the line so ably enunciated at the recent Empire Press Conference held in Canada, and to see that the Empire shall be able

more and more to get wood pulp from within and so become less dependent upon foreign supplies either of wood, pulp or paper, and this Conference and Lord Burnham’s patriotic support, caused these negotiations to be consummated and the newspaper world to be emancipated from the Scandinavian domination, and the principal Canadian mills to be economically developed and extended.”

IMMIGRATION POLICY OF THE DOMINION GOVERNMENT

AN announcement of the immigration policy of the Dominion Government was recently given to the press by the Honourable Charles Stewart, Acting Minister of Immigration. The announcement was in part as follows:

From the immigration point of view it must be recognized that one of the magnets which was most potent in attracting settlement to Canada in the early years of the century—the granting of public lands as free homesteads—is no longer a factor to the extent it previously was. There are still large areas of Crown lands in the hands of the Government, but they are for the most part too remote from railways to be an important factor in our immediate colonization undertakings. The Government is more disposed, for the present, to concern itself with the settlement of the available lands convenient to existing lines of railway which have not as yet been brought under production. Even with the lure of the free homestead largely removed Canada is in a pre-eminent position in its ability to offer fertile and productive lands at a lower price than any other country in the world. With cheap and fertile lands convenient to railways, and with an era of agricultural prosperity reasonably within view, Canada can confidently invite settlers from other lands to take advantage of the opportunities which she offers.

Our agents have made reports on the possibilities in the various countries from which we hope to draw suitable settlers. The principal obstacle mentioned in these reports is the greatly increased cost of transportation, which is at least fifty per cent higher than before the war. This is a serious difficulty, particularly to those who contemplate moving large families—and large families are popular with us—long distances. The Department has approached the transportation companies with a view to bringing about an amelioration of

these conditions, and hopes that materially lower rates of transportation will result.

Another difficulty, with respect to the settler from Great Britain, has been the discount on sterling exchange, which bears heavily upon the settler proposing to transfer capital to Canada. This condition is steadily righting itself and will probably not continue to be a barrier to British settlers with capital.

This is a very brief outline of conditions as they exist today. In spite of the difficulties which I have mentioned I feel that there are grounds for a sane and reasonable optimism, and it is in that spirit that we purpose to go forward. If conditions were more attractive in the countries from which we hope to secure settlers our task would be a hopeless one, but reports from Great Britain and those from European countries in which acceptable settlers are available, and also from the United States, indicate that notwithstanding our rather serious difficulties their conditions are very much worse. The inflation of prices during war had a tendency to inflate land values to a very much greater degree than in Canada, and thousands of people who would be desirable settlers are anxious to relinquish their contracts on very expensive land and come to Canada where they can buy land at very reasonable prices. We are, therefore, concentrating attention upon settlers of this type, but one of the practical difficulties is that many of these very desirable immigrants have not the necessary funds with which to buy land in Canada. In order to assist as much as possible we are bringing our immigration agents in the Western States to Canada to make a survey, and to list desirable farms which the owners will rent for a year or two in the hope that the renter may eventually purchase and become the owner. This is something that has not before been attempted in the way of immigration work by our agents. It is an attempt to render a real service to the incoming settler of the tenant class by placing him in

touch with available farms at a minimum of expense and delay to him, and so pave the way for his success. It is not paternalism, but it is an attempt to place departmental machinery at the command of the settler in the way in which it can give him the most practical help.

Some assistance can be looked for from various organizations interested in settlement, and—to mention one of these,—the Canada Colonization Association intends to enter the field vigorously to secure settlers who have sufficient means to purchase land on long term payments. The assistance given by the various colonization interests will enable the Government to concentrate its efforts on tenant farmers and agricultural workers who may be induced to come to Canada. As a commencement, it is our intention to greatly increase our publicity and advertising activities, concentrating our efforts on Great Britain, the Scandinavian countries, Holland, Belgium, France and the United States. As a result of conferences held with various organizations interested, it is anticipated that perfect co-ordination of effort will be effected as between the Government and the various interests mentioned. Educational work among boys and girls in the schools of Great Britain and the United States, which is already an important phase of our publicity activities, will be continued and greatly increased, and steps will be taken to make Canada more widely known, not only by advertising, but through news services in other countries.

An effective follow up by our agents in the United States of prospective settlers in their territories will be established, and special steps will be taken toward the repatriation of ex-Canadians. It is believed that many former Canadians who have been attracted to the industrial centres of New England would gladly return to their native land. Through co-operation with Provincial governments it is hoped to repatriate a large number of such settlers.

A vigorous advertising campaign will be immediately initiated, particularly in the agricultural and rural papers of Great Britain and the United States, and improved facilities will be provided for spreading abroad information about the opportunities which Canada has to offer to settlers. During the months of the coming winter all the available machinery of the Department in Great Britain will be employed in giving stereopticon and motion picture lectures and personal interviews on settlement conditions in Canada.

Increased efforts will be made to secure a much larger number of women household workers, the need for which is quite apparent both in rural and urban centres, and great care will be taken to see that suitable women

are selected and placed in the proper environment.

Some pressure has been brought to bear upon the Government to consider an assisted land settlement scheme, but there would appear to be many difficulties in the way of such a suggestion. It is the purpose of the Government, however, to introduce a nominated scheme in connection with the movement of people from Great Britain and other favoured countries. It is hoped that all organizations interested in immigration will take up this work enthusiastically and will hold out special inducements to desirable settlers who would come out with them and be received by them, and placed in employment and generally cared for. The Government feels little hesitation in asking the co-operation of the general public in a work of such national importance. The Department of Immigration and Colonization stands ready to act as intermediary, and to give all the assistance at the command of its organization, reserving, of course, the right to pass upon the physical and mental fitness of every person who makes application to come to Canada.

Our attention has also been directed to a very promising field for securing immigration to Canada, namely: that of the orphan children—many of them families of ex-soldiers—in Great Britain. A careful survey has been made of this field and there would appear to present very great possibilities. In looking into the question of placing them in Canada, the Department feels that five or six thousand of these children could be placed annually. Under the supervision of Mr. Smart careful plans have been worked out for the proper inspection of these children in Great Britain, who would largely be between the ages of 8 and 12 years, and the placing of them in foster homes.

In our investigation into the child immigration problem one of the first things we discovered was that the increased cost of transportation was a serious handicap to the various organizations engaged in this work. It has been decided to approach the British Empire Settlement Board for the purpose of ascertaining if they will join the Canadian Government in paying the passages of these five thousand odd children it is proposed to establish in Canada. I look with a great deal of confidence upon this particular branch of our immigration work. There is no question—the records kept through many years demonstrate it beyond all doubt—that those who come to our shores as children grow up virtually as Canadians. Where proper selection is applied at the source they become almost invariably good citizens.

These, then, are our proposals. We propose to initiate at once an active advertising and

publicity campaign in Great Britain and the United States, and to extend it into the favoured countries of Northern Europe as circumstances permit. We propose to make it known to the world that Canada wants settlers, but at the same time to select only such settlers as are worthy to share in our Canadian heritage. We shall particularly seek settlers with some capital in a position to buy and cultivate the vacant lands now adjacent to our railways, but we shall also provide departmental machinery to bring the tenant farmer into touch with rental opportunities which will give him a chance to make a start

in Canada. We hope, through the co-operation of the transportation companies, to see an era of lower transportation rates. We hope for the co-operation of public bodies who have the interest of Canada at heart. We realize that the development of Canada's resources by means of immigration is a big problem, and we are prepared to face it in a big way, but we feel that success can only be assured if the fullest degree of co-operation is forthcoming from the Canadian people. That the hands of the Department and the Government will be strengthened by such co-operation from the people of Canada I have the fullest confidence.

CANADIAN NATIONAL RAILWAY EMPLOYEES AND JURY SERVICE

SINCE the Dominion Government took over control of the Canadian Northern Railway the question has been raised to what extent the civil rights and standing of the employees are affected by their transfer to the class of government employees.

It may be noted with respect to workmen's compensation, that employees of the Dominion government were by a Dominion statute of 1918 placed under the general compensation law of the province in which they were employed, contributions in regard to such employees being paid out of the Consolidated Revenue Fund of Canada.

With respect to jury service the position of the employees of the Canadian National Railways is not affected by the transfer of the system from private ownership. No Dominion legislation is in existence (except as regards the North West Territories) which exempts railway employees from such service. Juries, however, are selected and summoned under provincial laws, and under the jury acts in force in all the provinces of Canada except New Brunswick railway employees are expressly exempted. In this connection the classes of workers who are exempted in the various provinces besides certain well recognized professional and official classes, may be noted as follows:

NOVA SCOTIA.—All persons actually employed in the operation of railway trains; labourers employed in the De-

partments of Customs, Inland Revenue, Post Office and Railways; teachers, lighthouse keepers, ferrymen, pilots, marines, and deep sea fishermen, mail carriers, firemen belonging to a regular company, etc.

NEW BRUNSWICK.—Officers of customs and revenue; professors and teachers; firemen, etc.

QUEBEC.—All persons employed in the running of railway trains; workers in grist mills; pilots (during open season); masters and crews of steamers and masters of schooners during navigation; persons in the employ of the Dominion or Provincial Governments; professors and teachers; firemen, etc.

ONTARIO.—Persons employed in the management or working of a railway or street railway; telegraph or telephone operators; millers, Dominion and Provincial civil servants; pilots and seamen while in pursuit of calling; teachers; editors, reporters and printers of a public newspaper.

MANITOBA.—Persons actually employed in the running of trains; telegraph operators in actual employment; millers; Dominion or Provincial civil servants; pilots, school masters, firemen; etc.

SASKATCHEWAN.—Persons actually employed in the running of railway trains; telegraph and telephone operators; millers in actual employment; all salaried officials and employees of the Governments of Canada and Sas-

katchewan; ferrymen; mail carriers, teachers; firemen, etc.

ALBERTA.—(Consol. Ordinances of N. W. T., 1898, Chap. 28). All persons employed in the running of railway trains; telegraph operators while so employed; all salaried employees of the Dominion or North-West Governments; ferrymen, teachers, etc.

BRITISH COLUMBIA.—Persons actually employed in the management or working of any railway; persons holding certificates as managers of coal mines and actually so engaged; Dominion and Provincial civil servants; pilots and seamen; certain municipal employees; teachers and other school employees; editors, reporters and printers of a public newspaper.

WORKMEN'S COMPENSATION IN MANITOBA AND ALBERTA DURING 1921

THE report of the Manitoba Workmen's Compensation Board for 1921 has a particular interest as being the first report to be issued under the new Workmen's Compensation Act of the province which became effective on January 1, 1921. The Act of 1916 established an accident fund made up of contributions from private insurance companies in which employers were compelled to insure their risk. The agency of private insurance companies was abolished by the Act of 1920, which established the plan of exclusive state insurance already followed in the compensation acts of Nova Scotia, New Brunswick, Ontario, Alberta and British Columbia. The present report contains a comparison of the expenditures incurred under both systems, the conclusion being reached that the handling of the insurance by the Board under the new act has effected a very large saving as shown by the remarkable reduction appearing in the amount charged against administration expenses in 1921 as compared with the previous years. Thus in 1921 the cost of administration amounted to 8.6 per cent of the assessments collected, whereas during the years 1917 to 1920 inclusive the insurance companies required 36 per cent to meet the charges for operation and profit. The Board concludes that a sum in excess of \$380,000 would have been saved to the employers of the province had the present system of insurance prevailed in the years 1917 to 1920. A considerable part of this saving went to injured work-

men and their dependants by virtue of the increased benefits provided under the new act. During the year the Board issued regulations requiring employers of ten or more workers to provide a first aid kit, and furnished financial assistance in connection with the classes in first aid instruction which were held during the year under the auspices of the Provincial Bureau of Labour. Another new departure was to have cases of minor injuries treated by the chief medical officer's staff. In connection with the movement referred to elsewhere in this issue to make provision under Workmen's Compensation for the rehabilitation of workmen who are unable through injuries to continue at their previous occupations, the Board, in the present report, expresses the opinion that definite provisions should be made to provide the funds and the necessary authority for undertaking this very important work. The business handled during 1921 showed a large increase over the preceding year on account, mainly, of the reduction under the new act in the length of the "waiting period," from six to three days and also because of the fact that the cost of medical aid is now paid to the worker whether or not any disability ensues. The actual number of accidents reported in the year under review was 6,688, as compared with 3,854 in 1920. The actual cash disbursements by the Board during the year amounted to \$421,945, exceeding those of 1920 by over \$120,000.

The following table shows the pay-rolls of the industries, with the premiums paid thereon by employers under the new and old acts:

	Payroll	Premium
1917 (March 1 to December 31).....	\$26,184,748	\$ 449,431
1918.	37,700,380	690,178
1919.	44,554,705	753,963
1920.	61,030,972	1,042,419
1921 (estimated).....	53,000,000	622,803

During the year 547 cases of permanent disability and 157 fatalities were recorded. The number of persons including dependants, in receipt of monthly payments from the Board at the close of the year was 249. Of these persons 78 were widows, 158 children under 16 years, 5 mothers, 6 fathers and 2 persons in other relationship to the deceased workman. The report contains full statistics of the operations of the year.

Report of Alberta Board

The fourth annual report of the Workmen's Compensation Board of Alberta reviews operations under the Act during 1921. Practically all classes of industrial labour are now protected, with the exception of retail store employees, casual, itinerant and outworker classes, and certain employees of railway companies. Important amendments to the act were made by the Legislature during the year. These amendments, which were outlined in the LABOUR GAZETTE for February, 1922 (page 193) included one amendment which substantially increased the rates paid to dependants in fatal cases.

In the administration of the act during the year special attention was given to accident prevention and first aid work. The Board held conferences with groups of employers and workmen in various industries, accident prevention regulations being subsequently issued which were based on conclusions thus reached. These discussions brought good results, the report states, both directly by preventing accidents, but also by producing a better understanding between employers, workmen, and the

Board. The regulations provided for the organizing of workmen's committees to inspect at least once each month the plant in which they are employed and to make the recommendations they may think necessary to ensure safety. These recommendations are forwarded to the Board and to the employing firm, and if judged practicable they are adopted. One hundred and seventy-three committees have already been organized in the province, and, in words of the report "it has been conceded by the employers generally that the work of these committees has resulted in bringing about much safer conditions of employment." The workers and employers work jointly in meeting the requirements of the Board in providing facilities for first aid treatment. Many have already been reported which would probably have proved fatal but for the efficient aid rendered by men on the spot who had received first aid training. The report contains full statistics, from which the following extracts will show the extent of the work accomplished during the year.

The total amount paid for compensation and for medical aid in 1921 amounted to \$367,102, as compared with \$243,936 in 1920, and \$104,739 in 1919.

The total number of accidents reported in 1921 was 7,069, as compared with 6,418 in 1920, and 3,466 in 1919. Of this number 55 were fatal, as compared with 81 in 1920 and 43 in 1919. The average amount of compensation and medical aid paid per accident during 1921 was \$102.93 (of which \$71.13 was for compensation and \$31.80 for medical aid, as compared with \$63.11 for compensation and \$26.15 for medical aid in 1920). The average rate of assessment paid by employers for all industries coming within the scope of the act was .93 on the gross payroll during 1921. The total assessments collected during the year amounted to \$685,961, while administration expenses totalled \$59,783, the expenses thus showing at 8.7 per cent of the assessments collected.

REPORT OF MINES BRANCH OF ALBERTA FOR 1921

THE annual report of the Mines Branch of the province of Alberta for the year ended December 31, 1921, shows that 2 shale mines, 1 copper ore mine, and 333 coal mines were in operation during the year. This number includes 90 new mines which were opened, 17 which were re-opened and 17 which were abandoned. In addition to the mines abandoned, during 1921, 33 that were closed during 1920 were abandoned, and 43 were temporarily closed. The value of the mineral production in 1921 totalled \$28,893,593, of which gold amounted to \$1,269; coal, \$25,928,945; natural gas, \$1,104,444; petroleum, \$48,925; and structural materials and clay products, \$1,810,010.

Coal Mining

There were 5,937,195 tons of coal produced during the year, of which 2,943,141 tons were produced in the domestic field, 2,897,380 in the bituminous field and 96,674 in the anthracite field. The output for 1921 was 971,728 tons less than for 1920. New mines opened during the year produced 59,861 tons. The largest monthly production was in November when 717,338 tons were produced, and the lowest was in May when 287,662 tons were produced. There were employed during November, the month of greatest production, 12,140 persons, of whom 7,585 were in the domestic field, 4,277 in the bituminous, and 298 in the anthracite field. In May the month of lowest production and employment there were 3,588 workers in the domestic, 3,370 in the bituminous and 278 in the anthracite field; the workers were employed only about half time. Of the total production during the year, 3,438,935 tons were sold for

consumption in Alberta (including coal sold to railway companies, a large portion of which is used outside the province), 1,915,816 tons for consumption in other provinces of Canada, and 133,823 tons for consumption in the United States. The report shows the per capita production of mines in the province for the years 1906 to 1921 inclusive to have been as follows:

Year	Gross tons of coal mined	Total average No. of men employed	Average No. of men employed under-ground	Tons of coal mined per man employed under-ground
1906.....	1,385,000	2,800	2,000	692
1907.....	1,834,745	3,600	2,700	679
1908.....	1,845,000	3,780	2,681	688
1909.....	2,174,329*	5,207	3,893	566
1910.....	3,036,757	5,818	4,030	742
1911.....	1,694,564*	6,689	4,517	375
1912.....	3,446,349	6,661	4,861	708
1913.....	4,306,346	8,068	5,837	737
1914.....	3,821,739	8,170	6,052	631
1915.....	3,434,891	6,445	4,493	764
1916.....	4,648,604	7,570	5,536	839
1917.....	4,863,414*	8,310	6,017	804
1918.....	6,148,620	8,818	6,141	1,001
1919.....	5,022,412*	7,573	5,150	958
1920.....	6,908,923	9,688	6,651	1,055
1921.....	5,937,195	10,018	7,203	824

*In 1906, 1911, 1917 and 1919 strikes of lengthy duration took place.

During the year under review, 21 persons lost their lives through accidents as compared with 29 during 1920. Of these fatalities, 2 occurred above ground and 19 below ground. There were 5 serious accidents above ground and 59 below ground. The greatest number of accidents in any one month occurred in February, there being six fatal and 10 serious reported, while the month of July showed the fewest accidents, 2 fatal and one serious being reported. The per capita production of coal per fatal accident was 282,723 tons. The following summary gives the tons of coal mined per accident during the years 1906 to 1921 inclusive:

Year	Accidents		Tons of coal mined per accident	
	Fatal	Serious	Fatal	Serious
1906.....	10	11	138,500	125,909
1907.....	19	18	96,565	101,930
1908.....	11	38	167,727	48,552
1909.....	9	42	241,952	51,760
1910.....	61*	41	49,782	71,067
1911.....	7	32	242,080	52,975
1912.....	21	338	164,111	90,698
1913.....	28	60	152,789	71,732
1914.....	209*	44	18,286	86,857
1915.....	18	33	190,827	104,087
1916.....	20	51	222,450	91,149
1917.....	24	62	202,642	78,442
1918.....	22	60	279,483	102,477
1919.....	21	56	239,162	89,685
1920.....	29	53	238,733	130,371
1921.....	21	64	282,723	92,769
Total.....	530	703	114,168	86,072

*There were 31 deaths due to an explosion in 1910 and 181 deaths due to an explosion in 1914.

Training in mine rescue work was carried on under the auspices of the

Workmen's Compensation Board, there being three mine rescue cars and six mine rescue stations in operation. There was a considerable increase in the use of electric portable lamps over previous years.

Copper and shale mining

In the copper mine there were six men employed and the days worked were 160. In the shale mines there was an average of 13 men employed and the days worked averaged 218.

During the year 28 persons were prosecuted for contraventions of The Mines Act, a convention being obtained in each case.

CONVENTION OF THE CANADIAN EDUCATIONAL ASSOCIATION

THE first convention of the Canadian Educational Association since 1918 was held in the Normal School, Ottawa, on November 1 to 3, immediately following the meeting of the Dominion Educational Council held in Toronto during the last two days of October. The dates were arranged so that the Ministers and Deputy Ministers of Education, who comprise the Council, could attend both gatherings.

The Canadian Educational Association, which, prior to 1918, was known as the Dominion Educational Association, is composed of representatives of the provincial departments of education, presidents of universities and teachers' associations, representatives from university departments, trustees' associations, secondary schools and auxiliary educational activities connected with provincial school systems. Provision is also made in the constitution for the membership of others interested in education. The delegates to the Ottawa convention represented all branches of educational work under public control, and there were a few

representatives from privately controlled schools and industrial corporations.

The programme consisted of morning and afternoon sessions with addresses and open discussions, a public meeting on the evening of November first and an informal dinner for the delegates on November second. The convention opened with an address by the President, Dr. F. W. Merchant, Director of Technical Education for Ontario. Dr. Merchant outlined some of the practical problems demanding the attention of educationalists in Canada and indicated how these were being met.

The convention gave considerable attention to papers and discussions on the preparation and distribution of maps, books and visual aids for the better teaching of geography, and the preparation of a national history for Canadian elementary schools. The discussions on aids for the study of geography brought forth valuable information regarding visual instruction

in Canadian schools and the need for better school maps, also for text books on industrial, commercial and human geography. Prof. Adam Shortt, of the Dominion Archives, outlined the form and contents of a proposed national text book on Canadian history which met with the hearty approval of the convention, though it was agreed that it would be very difficult to find a man with the ability and time to prepare the book. No definite action was taken in regard to either matter.

An effort was made to formulate plans for the issuing of elementary school teachers' certificates which would be valid in all parts of Canada. The objections to such a move appeared to be too difficult to surmount in the immediate future, although progress was made in this direction. A committee was appointed to prepare and publish a bulletin containing the legislation, regulations, etc., governing teacher-training and certification in all provinces. It was thought that this information would be of great assistance in determining "equivalents" or standing, when granting certificates to teachers who move from one province to another, and would enable each province to become more familiar with the training and classification of teachers in other provinces.

A session was devoted to discussions affecting the Dominion Agricultural Instruction Act which expires at the close of the present fiscal year. Under this Act the provinces have received ten million dollars during the past ten years for the promotion and development of agricultural education and instruction. A small proportion of the money has been expended on agricultural education in the elementary and secondary schools. The agricultural colleges have received substantial grants and the balance has been spent by the provincial departments of agriculture. The delegates were unanimous in their belief that the government assistance should be continued, al-

though it was felt that a larger proportion of the money should be used to assist the educational work of the schools. A resolution requesting the continuance of this financial aid was approved and copies sent to the Prime Minister and the Minister of Agriculture for the Dominion.

The third day of the convention was devoted entirely to papers and discussions on vocational education. The difficulties of introducing vocational education into small cities and towns were dealt with by Mr. Peacock, Director of Technical Education for New Brunswick, and Mr. J. Kyle, Organizer of Technical Education for British Columbia. The new type of composite high school, in which academic, commercial, homemaking and industrial courses are conducted on an equal footing, was fully described by Mr. D. A. Campbell, principal of the new school at Sarnia, Ont.

Dr. F. H. Sexton, Director of Technical Education for Nova Scotia, gave a very interesting and instructive address on the development of correspondence courses in the United States and Canada, and told of the work being done in Nova Scotia by the new correspondence department and the short intensive courses in the provincial technical institute at Halifax.

Mr. R. B. Vaughan, Director of Technical Education for Manitoba, outlined the various types of courses being developed in the technical schools of Manitoba, and pointed out the necessity for close co-operation between academic and vocational work.

A special feature of the convention was introduced in the round table conference, when Mr. A. H. Williams, supervisor of apprenticeship for the western lines of the C. N. R., gave a very interesting paper on the training of apprentices. The paper was thoroughly appreciated by the delegates, and a full discussion on the methods of co-operation between the schools

and industry followed. Mr. Williams' paper is reproduced in greater part elsewhere in this issue of the LABOUR GAZETTE.

At a public meeting on the third evening the delegates and citizens of Ottawa had the privilege of listening to two addresses, one by Sir Arthur Currie, Principal of McGill University, and the other by Dr. H. M. Tory, President of the University of Alberta. Sir Arthur Currie dwelt on the importance of a good general education as a foundation for technical training and emphasized the importance of training for life rather than for living. Dr. Tory laid particular emphasis on the need for close co-operation between the

representatives of all branches and grades of education. The singing of the Elgin Street Public School Choir and the demonstrations by groups from the first, second and third years' classes in violin playing, taught by Mr. Heins in the Ottawa public schools, were highly appreciated by everyone present.

The report of the nominating committee was accepted without change, Dr. G. W. Parmelee, English Secretary, Department of Public Instruction of Quebec, being elected president, and Dr. J. H. Putman, Inspector of Public Schools, Ottawa, being re-elected secretary-treasurer.

APPRENTICE TRAINING ON WESTERN LINES OF THE CANADIAN NATIONAL RAILWAYS

Paper read by Mr. A. H. Williams, Supervisor of Apprentices, Canadian National Western Lines, before the Canadian Educational Association, Ottawa, Nov. 3, 1922.

IN presenting this paper for your consideration, we wish to say, at the outset, that the many ramifications we have met with in the eight years' experience in aiming to train boys to become skilled mechanics in the various crafts operating in railway shops will, if justice is to be done to the subject, necessitate our occasionally diverting from the main issue. We also desire to emphasize the fact that whatever appears in this paper is the outcome of a gradual development which circumstances have forced upon us.

Several centres, both in Canada and the United States, have been visited, where vocational training is being carried on, but we have been unable to discover a plan that would fit in with our requirement better than the one it has been our privilege to develop.

Some eight years ago, in the Canadian Northern shops at Fort Rouge,

Winnipeg, it was felt by the management and workers alike that not a few of the apprentices, at the completion of their apprenticeship, were unqualified to do the work of skilled mechanics, and still fewer possessed the experience and ability to hold positions of responsibility in the Company's service. This fact was patent, so much so, that one often heard the shopmen ask, "What is the good of a boy serving five years' apprenticeship when at the end of it he cannot qualify for a position of a skilled mechanic"? At the same time the management was becoming perplexed about the inability of their apprentices. Something was wrong! Bue wherein lay the fault? In the system of training. The system, if system it can be termed, embraced no regular scheme of following the apprentice through the different branches of his trade; it contained no periodical inspection of the work executed by the boy, it could boast of no

well thought out and helpful programme to keep the boy at his work; it offered no advice or encouragement to the boy to put into his work the best he possessed; it outlined no helpful studies for him to follow, nor did it offer him any educational facilities. And, perhaps, saddest of all, it exercised no jurisdiction over the boys' morals. In fact, it would appear to the careful observer, that the apprenticeship days lack discipline and interest, and were for the boy merely a matter of time. His apprenticeship was fraught with retrogression rather than progression, in some cases boys' ambitions were thwarted. Who will dare to gainsay the criminality of five years spent in such an apprenticeship?

When it became evident to the management and the workers that something was wrong with the system of apprentice training, both were awakened to their responsibility. Representatives of the former met delegates of the latter, and a conference was arranged, with the result that an instructor was appointed who would devote three hours of each working day to the instructing of apprentices and the arrangement of their practical shop work. It needed only a short time to demonstrate that this step was a profitable one both to employer and employee. Later the instructor was asked to give the whole of his shop time to the overseeing of the apprentices. At this time there were something like fifty apprentices working in the Fort Rouge shops. One or more engaged in each of the following trades:—Machinists, Electrical, Patternmaking, Boiler-making, Blacksmithing, Pipefitting, Moulding, Tinsmithing, Carpentry, Painting, and Upholstering.

A syllabus for each trade was drawn up embracing all branches of the different crafts. So much time was allotted to each branch of the trades, every apprentice being afforded the same privilege offered by all branches

of his trade. All apprentices being promoted alike in their respective turns.

Of course, some boys are brighter than others; for them it is comparatively easy to learn. Such boys derive added value from the privileges a progressive system affords. Other boys are dull, but even these, with certain additional care on the part of the instructor, often develop into very fair mechanics. So that, in spite of the varying types of boys, experience has proved that a well arranged curriculum of work and a regular plan of promotion through the different branches of the trades is the one which will give successful and gratifying results.

Today in Transecona and Fort Rouge shops there are apprentices in their third and fourth years whom we term general machine boys. These boys are fully capable of going on to any machine and taking up the work where the mechanic left off. These boys are a valuable asset to the shop management, since the machine of a mechanic, away sick or absent from his work, can be taken over by standby apprentices, obviating any delay or inconvenience in the shop operations or the progress of the shop work.

Apprentices are being trained to become skilled mechanics. A fair foundation has been laid, a fair superstructure is being raised. So far so good. Should we lean on our oars and declare all is being done for the apprentice that might be done? We believe that much of the trouble and unrest that is rampant among the workmen today is the outcome of ignorance due to lack of education. It is no uncommon saying among some people today, "My boy is not getting along very well at school. He is in only the fifth grade. I'm going to take him away from school and put him to learn a trade." A dire insult to the trades. Such an attitude towards the trades will exist until that day

when all classes of society awaken to the fact that the trades are just as honourable as the professions and every bit as necessary for the complete operation of daily life.

Many a sad story can be told about first class practical men who have had to be content with the position of working mechanics all because they were unable to utilize the knowledge they possessed to qualify for foremen, general foremen, master mechanics, and so on, perhaps to the top of the ladder. Many a man can tell what gears are required on the lathe to cut a certain thread, but how to calculate those gears, and why it is possible for him to use them and none other, he has but a faint idea, if any. Another mechanic may be able to set valves providing everything is in regular order, but let some irregularity enter into his work, and he is at once beyond his depth.

Why do such conditions exist? In my opinion the trouble goes farther back than the apprentice days. The evil seed was sown when he was allowed to do a problem without understanding why he did it. His father did it that way; his grandfather did it that way; why can he not do it that way. If thinking mechanics are necessary then the youth must be trained to think for himself. He must be trained to absorb knowledge in such a way that when he executes a piece of work, he knows why he does so, and what results he can justly expect when the work is completed.

What remedy shall we offer for the eradication of this everyday self-evident defect? Side by side with practical mechanical training we must provide scientific technical training. Time will not permit me to tell of cases we meet with daily, in our shop experience, in which the lack of knowledge of the simple rudiments of education is appalling and often disastrous. All because some one has blun-

dered, someone misinterpreted his responsibility.

Pleased with the results of a systematic plan of practical work, but not wholly satisfied with the apprenticeship training, the instructor suggested to the management of the Canadian Northern Railway that an arrangement be made with the Winnipeg school board whereby night classes might be organized for the study of mathematics, physics, machine drawing, etc. The suggestion was cordially received by both the management and the school board, the necessary arrangements were made and the classes commenced. After four years of experience it was evident that the venture was profitable but not altogether satisfactory. The reasons are as follows:—First, the boys were called upon to attend classes at the fag end of the day, when their bodies were tired and their minds lacked concentration. Secondly, it was difficult to get teachers sufficiently familiar with shop experience to make this work practical and interesting for the boys. They could not see the boys' point of view; they taught over their heads, and though their scholarship was of the highest, they did not possess the faculty of imparting their knowledge in a manner intelligible to the shop boy. Thirdly, the evening school term was so short that no sooner had the boy settled down to his study than holidays came along, and the settling down process had to be gone through again. For these and other reasons, we were of the opinion that the night school plan for the shop could be improved upon for our requirements.

The night school plan having failed to meet our needs, another method of technical education had to be sought.

After much thought, lengthy enquiries and the perusal of many schemes, it was decided to try the International Correspondence Schools, and find out what could be done with

their courses to make them meet our needs.

An Apprentice Class instructor was appointed in charge of this branch of work. In the twenty months the classes have been in existence at Transecona and Fort Rouge shops, a marked change in the attitude of the boy to his work has been noticed. In fact, in many cases the general demeanour of the boy has changed. He knows something of the why-and-wherefore of certain operations. In one or two cases, his personal appearance has changed. An unkempt, careless attitude of person and dress has given way to a thoughtful expression and neat appearance.

It has been no easy task to win the boys to the present scheme of study. Many pitfalls have been met, many obstacles surmounted.

A boy wishing to enter the Canadian National service as an apprentice at Transecona or Fort Rouge makes an appointment with the Supervisor of Apprentices (who originally was the first Apprentice Instructor). During the interview the boy is questioned. He is asked what reason he has for choosing the trade in which he is applying for apprenticeship. The supervisor makes certain notes, and if the applicant is considered by him a suitable boy, he is sent to the class instructor who questions him regarding his general education. Suitable candidates are required to write examinations in arithmetic, grammar, spelling, composition and Canadian geography. The papers are equivalent to seventh grade entrance examinations and candidates must obtain 65 per cent in each subject for a pass mark. The examination successfully passed and birth certificate produced, the applicant's name is placed on the waiting list. When his turn comes to enter the service he is given an order to present himself to the company doctor for a physical examination.

If he passes the examination he is given a certificate to take to the Supervisor of Apprentices. Arrangements are then made for him to enter the service as apprentice. The technical training of the new apprentice is arranged by the class instructor. The boy attends the shop classes two and one half hours each week, for which time he is paid at his regular rate of pay.

The course he studies in one relative to his trade. And since all trades require mathematics, he begins with that subject. Time is allowed for him to review arithmetic, beginning with the first principles. This to ensure a thorough knowledge of the subject before he goes on to more advanced branches of mathematics.

The boy is required to do at least one half hour study each working day in his own time. This is insisted upon.

The discipline in the school is strict, no unnecessary talking is allowed, no needless interruptions are permitted. Any infringement of the school rule is punishable by suspension and pay deducted for the duration of suspension.

Monthly and quarterly examinations are written on sight, the pass mark being 45%. In case of failure to obtain the required percentage the apprentice must review his work until he can merit the stated percentage.

This plan is working very satisfactorily, meeting with the approval of and receiving the highest commendation from the management.

Apprentice work during the past eight years has made many strides. When the first instructor took over the work, he devoted only three hours each working day to this work, and he had only 50 apprentices to oversee. Today, besides himself, there are two shop instructors, one at Transecona, one of Fort Rouge, who give all their time to the work, and one class instructor who gives his mornings to Fort Rouge and afternoons to Transecona. At some of

the large shop centres throughout the West, there are men giving part time to shop and parttime to class instruction. The number of apprentices has increased to 300.

It goes without saying that the results of our system must warrant the time and expense, otherwise its expansion could never have reached its present proportions under the keen eyes of such men as our Vice-president S. J. Hungerford, and Mr. A. E. Warren, General Manager Western Lines, and the alert mind of A. H. Eager, General Superintendent of Rolling Stock for Western Lines.

The practical and technical side of the work having been outlined, permit us a word or two concerning the moral side of the work. Plans have been inaugurated and plans have failed, not because the shop scheme was out and out inferior, not because the technical end was wholly unsound, but sometimes because the moral atmosphere was not pure, the moral fibre not developed. No scheme was introduced whereby the boy's mind and body might be trained to engage in healthy, manly pursuits.

We make the boast that not a man engaged in the work of training boys of the Canadian National shops, Western Lines,—from the General Superintendent of Rolling Stock to the shop instructors—is other than one whose heart is in the work. Their thoughts

are occupied by the three outstanding phases of the work—practical, technical and moral.

We cannot conclude this paper without emphasizing and emphasizing with all our being, the importance of the choice of men for instructors. They must be men of sterling character, capable of sympathy, unlimited patience, willing sacrifice, defenders of principle, men who have learned by the hard knocks of life to appreciate the value of a thorough practical training, the helpfulness of a sound technical education, the pleasure and contentment of a moral life.

We cannot speak in terms too highly of the encouragement and support we have always received from Mr. A. H. Eager, Superintendent of Rolling Stock. He has ever shown a keen and unflagging interest in the work, never too busy to be able to spare us a moment of his crowded day to hear a suggestion or offer advice. We value his support most highly. We know that the work could never have reached the proportions it has without his aid.

To him the future mechanics of our road will owe much. To him in days to come the Canadian West and the Canadian National Railways will say, "Thank you Sir, for the splendid men you helped to train, for the type of citizenship you fostered in our boys of yesterday, the officials of today."

APPRENTICESHIP SCHEMES IN NEW SOUTH WALES AND SOUTH AFRICA

IN the LABOUR GAZETTE for June, 1921, an outline was given of an interesting report on apprenticeship, which was issued in 1920 by the New South Wales Board of Trade. In addition to an outline of the history and theory of apprenticeship, this report contained a statement of principles which should govern the State in the

exercise of its powers of general control of apprenticeship in industry. The practical application of these principles has lately begun, and a set of regulations has been adopted for the building trades.

The general scheme represents an effort to deal more methodically with

the training of boys (and to a more limited extent of girls) on attaining the age of 14 years. The Board proposes, in conjunction with the Department of Public Instruction, and later on, it is hoped, with the assistance of voluntary trade boards, to secure "that community control of juveniles which makes for better citizenship." The Education Department will be asked to cooperate by establishing a series of "vocational bureaux", which would secure from schoolmasters information as to the tastes and capacities of every boy leaving school. Parents will be canvassed, and supplied with information as to trades requiring apprentices, and advice as to the most suitable vocation for their sons. The boy who will not enter one of the skilled trades will be directed and influenced, and as a condition of his entry into any occupation will be required to continue his education for a stated period each week until he reaches the age of 16 or 17 years.

Many of the old established conditions of apprenticeship are now to be abandoned. Thus, the old method of limiting the number of apprentices which can be taken by one employer gives way to a general limitation based on the requirements of the industry. The old limitations respecting the age of boys entering apprenticeship disappear, and the skilled trades are thrown open to candidates of any age over 14 years, with reductions of the term of apprenticeship according to the maturity of the candidate. Liberal provisions are made for transfer from one employer to another. Apprentices under 16 years of age are compelled to attend a continuation or trade school for a prescribed period in the employer's time and after the age of 16 are encouraged to continue such attendance in their own time. The new regulations as a whole are framed with the intention of vesting apprentice administration in councils representing the different interests in each

industry. For the present it is held advisable to clothe such councils with only advisory and educational powers, but it is believed that when the whole of the Board's scheme has been applied, actual administration will be more efficiently carried on by councils for the several industries than by one centralized authority.

REGULATIONS FOR BUILDING TRADES.

The chief regulations defining the conditions of employment of apprentices in the callings of carpenters, stonemasons, plumbers, plasterers, painters, bricklayers, builders' labourers, etc., are as follows:—

No minor to be employed except as an indentured apprentice or probationer.

No minor under 14 years to be admitted.

Apprenticeship may be to any employer or group of employers.

Articles of Apprenticeship shall be in prescribed form.

The members of any association of employers shall be jointly, but not severally, liable for the performance of contracts.

Apprentices to such association shall from time to time work for any employer member as may be directed by its authorized officer.

The number of apprentices to each occupation shall not be more than sufficient to keep up the supply of mechanics needed to maintain and provide for the expansion of the industry concerned.

Any employer may employ an apprentice for 3 months on probation, but no second probationary period shall be served for more than four weeks. The time spent on probation shall be part of apprenticeship term with the same employer.

The term of apprenticeship shall not exceed five years, but shall vary according to the age of the apprentice as follows:— for apprentices under 16, term five years; between 16 and 17, four years; between 17 and 18, three years; over 18, term as ordered by the prescribed authority.

For bricklayers the term of apprenticeship shall not exceed three years.

For builders' labourers the term shall not exceed two years; on completion of such ap-

prenticeship the apprentice shall be eligible for apprenticeship in any of the other occupations covered by these regulations for such term as may be appropriate at his age.

Any workman of over 21 years may, with the consent of the prescribed authority, enter into a special contract of employment on a prescribed form for the purpose of learning a trade, for such time as such authority may decide.

Where facilities exist, apprentices for the first 3 years of their term shall attend a continuation or trade school, technical college, or other approved institution, for not less than 6 hours each week. Apprentices under 16 shall attend such schools in their employers' time.

For apprentices who have attended such schools in their own time and obtained certificates of proficiency, the term of their school courses shall be counted as part of their term.

No overtime shall be worked by any apprentice under 17 years of age.

If overtime is worked, the apprenticeship shall be paid additional wages proportionate to journeymen's rates.

The hours of a normal working week shall be those fixed for the industry.

The wages payable during apprenticeship are set out in a schedule.

A register of apprentices shall be kept, recording all details of indenture, and shall be submitted by the registrar for review to the Board at the end of each half year.

Every employer shall report transfers of apprentices to other employers, and in the event of an apprentice failing to complete contract, or absenting himself from work, except for sickness, the registrar of apprentices shall be immediately notified.

A copy of every indenture of apprentices shall be filed with the registrar of apprentices.

Disputes between apprentices and employers shall be referred to the Board.

BUILDING TRADES APPRENTICESHIP COUNCIL.

There shall be established a Building Trades Apprenticeship Council, composed of representatives appointed by the associations of employers, by trade unions whose members are engaged in the industry, and by the Department

of Public Instruction. The functions of the Council shall be as follows:

(1) To stimulate interest in craftsmanship by arranging for addresses and distribution of literature to boys in school upon the possibilities of the trades within the industry.

(2) To interview boys and the parents of boys desiring to enter a trade within the industry, the council having at their disposal the boys' school records.

(3) To recommend suitable boys to employers.

(4) To prepare lists of employers having the necessary facilities for training in a given trade.

(5) To insure by means of visits, regular reports, and occasional interviews, that apprentices are receiving the right kind of training, both in the workshop and in the technical institution during the period of apprenticeship.

(6) To consult with the Department of Public Instruction in regard to the equipment, selection of instructors, curriculum, etc., in the technical institutions, with particular reference to the courses to be provided in the continuation schools.

Apprenticeship in South Africa

In South Africa a bill designed to establish apprentice training as a part of the state system of industrial education was recently submitted to Parliament. The bill was prepared on lines suggested by an Apprentice Committee appointed by a National Conference of Employers and Employees which was held in 1919. This committee declared in its report that the existing system of apprenticeship is not successful, and that an entirely new system is required to provide for self-government in each industry, for enforcement by the State of conditions of approved contracts of apprenticeship, and for the treatment of appren-

ticsmanship as an integral part of the system of national education. Self-government will be effected by means of Apprenticeship Committees in the several trades, invested with the necessary powers for the general supervision of apprentices. These committees will be composed jointly of employers and employees. Knowing the circumstances of each trade they will be able to estimate the number of apprentices required and thus relax the restrictions hitherto laid by the trades unions on the proportion allowed in respect to journeymen. The scheme is to be applied to special trades employing skilled workers, and for these trades it will be compulsory. Among other features involved are the registration of apprentices, and prohibition of premiums.

Writing in the *South African Journal of Industries* on the recent move-

ment in South Africa in the direction of a regulated system of apprenticeship, Mr. H. Warington Smith, secretary for Mines and Industries, says: "[It] has come from employers of labour, from trade unions, and from educationists, who are all impressed with the necessity of making proper provision for the improvement of the standard of workmanship in the rising generation, especially among the whites. In this country, where the colour problem is so prominent, it is more than anywhere else necessary for the white race to excel in knowledge, efficiency, and capacity, and the danger of the growth of the 'poor white' problem has impelled consideration of the best methods of insuring that in the skilled trades the leading part shall be taken by thoroughly educated craftsmen."

TRAINING OF APPRENTICES IN PAINTING AND DECORATING

AS a result of a report of the Advisory Board on Industrial Education, the Board of Education of New York City adopted a plan in October for training apprentices in the painting and decorating industry. The report stated that after a recent survey in New York City it became clear that apprentices in the painting and decorating industry were not receiving an all-round training. Both the employers and workmen appreciated the necessity for teaching apprentices all branches of the trade, and the intensive training, vestibule schools, etc., which had been fitting men for particular jobs were not satisfactory.

A summary of the plan, taken from a letter of Mr. F. F. Moran, executive secretary of the Advisory Board on Industrial Education is given below:

The union agrees to allow the boy one year off his regular apprenticeship period for the two years spent in the day vocational school. Of course, you know that one-half of this time will be devoted to the shopwork in the school and the other half of the time devoted to

high school subjects. The employers guarantee to take all of the graduates of this class into the industry as second-year apprentices, which means, at the present time, these boys graduate possibly at the age of 16, 17 or 18, and will be given a position as advanced apprentices at \$4.00 a day.

When these boys become apprentices, the employers' associations and the union will compel them to attend the evening classes for the training of apprentices of the painting and decorating industry for two nights a week, two hours a night. The employers further agree to pay the boys who attend the evening classes, one-half the regular hourly wage scale for the number of hours in attendance in these evening classes. If a boy will not attend he will be discharged by the employer and his apprenticeship card will be taken from him by the union, thereby driving him out of the industry.

If this day vocational class does not supply the regular number of apprentices taken on by the trade each year, the employers agree to apply to the continuation schools to secure selected boys for this industry. These boys will be required to serve four years' apprentice training instead of the three years permitted to the graduates of the day vocational schools.

The work that the boys do in the shop and in the school will be checked up by the advisory committee from the trade, which consists of representatives of the employers' associations and the unions. A boy will not be permitted to leave one employer to go to another unless he passes through this joint apprenticeship committee. The joint apprenticeship committee will have the power to adjust all differences that may arise relative to the training, placement, etc., of apprentices. If a boy receives a passing mark at work in both the school and the shop, he will receive an increase at stated periods.

The results that I hope will be accomplished by this agreement are that there will be an incentive for boys who might ordinarily leave school at the completion of the 8-B grade to enter the day vocational school and to stay in the day vocational school for the full two-year course. There is every reason for a boy

to do this, as there is a guarantee of a position, good wages, and at the expiration of the three years he is guaranteed a journeyman's card at a living wage of \$9.00 a day, and as much more as he may possibly be able to get for his ability. Real decorators at the present time are receiving as high as twenty and twenty-five dollars a day for their work. Another result will be, and it has already shown itself, that there will be a better understanding between the representatives of the unions and the representatives of the employers' associations. When they get together to agree on education, they get to know each other much better, with the result that, when the wage scale or working condition agreement is to be written up, they get together in a much finer spirit than in the past, due to the fact that they are better acquainted, that they realize there is a great deal of good in each of the representatives of both sides.

"IDLE DAY" COSTS IN COAL MINING INDUSTRY IN UNITED STATES

AN estimate of the annual losses incurred by coal mine operators and miners in the United States owing to the number of days on which the mines are idle was given by Mr. Francis S. Peabody at the last annual convention of the International Railway Fuel Association which met at Chicago. The speaker, who has under his own management 36 mines, placed the total yearly producing capacity of the bituminous mines at 1,000,000,000 tons and the invested capital at \$2,000,000,000, which includes the value of improvements and developments and an estimated life for each mine of twenty-five years. The consumption for a normal year was estimated at from 450,000,000 to 500,000,000 tons. During the past five years the average working time of the mines was 200 days per year leaving an average of 100 idle days.

On the basis of these figures, and from his own experience as mine operator Mr. Peabody estimated the total annual loss to capital from this cause to be about \$123,912,000 made up as follows:

Interest at 6 per cent for 100 idle days	\$40,000,000
Labour and supply costs on idle days \$0.128 per ton, based on actual production, 1921.....	51,968,000
Depreciation on 25 years life of mine	26,666,000
Taxes and insurance \$0.013 per ton on actual production, 1921	5,278,000

The loss in wages to the bituminous miners of whom there are about 700,000, reckoning an average wage of \$4 per day, was placed at \$280,000,000 for the 100 idle days. The combined loss to capital and labour for the hundred idle days was therefore over \$400,000,000 yearly.

While the above figures were only estimates, the speaker gave some additional figures showing the idle day costs of the 36 mines under his management. With a total capital investment of \$40,000,000 and a capacity of 21,000,000 tons per annum, the actual production was 12,000,000 tons, and the actual loss to the company on account of the idle days was over \$3,500,000 a year.

The loss, according to the speaker, was due entirely to the over development of the bituminous coal industry. He mentioned three possible solutions of the

difficulty: (1) Bankruptcy and consequent retirement from operation of one-third of the mines now worked; (2) Government ownership; (3) a revision of the Sherman Anti-trust law to allow agreements among the mine operators in regard to running time. He was of the opinion, however, that a revision of the Sherman law could not be expected to improve the situation since the mines were too scattered and conditions too varied to permit of any workable agreement being reached, and that if it were possible to reach such an agreement it could only lead to a restriction in out-

put which would result in the charging of higher prices to compensate operators and men in part for the lost time. He believed that Government control had believed that Government control had been made thoroughly unpopular through war time control of the railroads and the coal industry. The only solution in his opinion lay in the elimination of the excess mines through bankruptcy brought about by unrestricted competition, and he estimated that it would take about ten years to bring about a fairly even balance between supply and demand.

THE THREE-SHIFT SYSTEM IN THE IRON AND STEEL INDUSTRY

THE International Labour Office (League of Nations) has published an account of an investigation on the application of the three-shift system to the iron and steel industry. (Studies and Reports, Series D—Wages and Hours—No. 3). The enquiry was conducted upon the request of the Research Committee of the Taylor Society of the United States, an association of production managers, engineers and others. The results of a somewhat similar investigation in the United States conducted by the Federated American Engineering Societies were given in the October issue of the LABOUR GAZETTE on pages 1,115-6.

The enquiry of the International Labour Office was limited to blast furnaces (including coke works) open hearth furnaces, Besserer converters and rolling mills (including plate mills, tube works and wire works). It did not cover foundry work, forging, fabricating or any of the more refined manufacturing processes in iron and steel. A questionnaire was sent, in December, 1920, to the Governments of the States members of the International Labour Organization and to representative associations of employers and workers with the object of eliciting the following information:

(1) The extent to which the three-shift system had displaced the two-shift system; the circumstances and date of the change; and the opinion of employers and workers on the effect of the system.

(2) The change in the number of men, output per man per day, quality of product, consumption of materials, labour cost, and total cost, consequent upon the substitution of the three-shift for the two-shift system.

(3) The effect of the three-shift system on the health, accident frequency rates, energy, and interest of the worker; the use made by the workers of their greater leisure.

(4) The arrangement of shifts adopted in order to give each worker one day's rest each week; any improvements in the technique for carrying through the change of shift-system which have been suggested by recent experience.

The replies received, however, are said to be inconclusive, the eight-hour day having been in operation in the iron and steel industry for only a very short time under conditions utterly unlike those prevailing before the change was made from the twelve-hour day. No statistical testing of the results was therefore possible, only opinions being available, which were by no means consistent or based on scientific study.

In this industry, according to the report, the three-shift system is in operation in almost every country in

Europe with only a few exceptions where the industry is unimportant. Outside of Europe it has been introduced in isolated cases in Canada, India, Japan and South Africa. In Canada, information secured by the Department of Labour showed that out of 15 firms operating blast furnaces, electric furnaces and rolling mills three were partly on a three-shift basis, one adopted the three-shift system in 1917, but replaced it again by the two-shift system, and the remainder operated under the two-shift system and were not contemplating any change. The system was generally introduced in European countries in the years 1918, 1919 and 1920, but one firm in Great Britain reported the introduction of the eight-hour shift in 1897, and in Sweden its adoption in blast furnaces and converters dates from 1916. In nine countries the three-shift system was brought about by laws or government decrees and orders in three countries by industrial agreements between employers and their employees. In Austria, Belgium, Czechoslovakia, Finland, France, Germany, Lithuania, Poland, the Serbo-Croat-Slovene Kingdom, and Switzerland, the 8-hour laws limit the hours of work in continuous industries to 56 per week or 168 over a period of three weeks. In Denmark no more than 160 hours may be worked over three weeks. An average of 48 hours per week may be worked in Norway, while in Portugal hours of work must never exceed 48 in any

week. In Spain, by agreement between employers and workers, work in excess of 48 hours per week may be permitted up to a maximum of 60 hours. In Austria, Belgium, Czechoslovakia, Poland, the Serbo-Croat-Slovene Kingdom, and Spain all work in excess of 48 hours per week must be paid for at overtime rates, which are from 20 to 100 per cent higher than rates for normal hours.

The reduction of wages by reason of any shortening of the hours of work is forbidden by the laws of Belgium, Czechoslovakia, France, Poland, Portugal, the Serbo-Croat-Slovene Kingdom and Spain; but in the collective agreements instituting the three-shift system in the British iron and steel industry, the principle is recognized that the cost of providing the third shift should be borne partly by the workers.

No conclusion was drawn in the report with respect to the effects on output and cost of the introduction of the three-shift system, owing to the brief time in which it had been in operation and to the abnormal conditions prevailing since the war. Similarly with regard to the effects on the workers no conclusions were drawn, as the replies of employers and workers were contradictory, and where the change was followed by a decrease in energy it may have been due to abnormal post-war conditions rather than to the eight-hour day.

DECISION OF UNITED STATES RAILROAD LABOUR BOARD INCREASING WAGES OF MAINTENANCE OF WAY EMPLOYEES AND SHOP LABOURERS

THE United States Railroad Labour Board issued a decision on October 25 increasing the wages of labourers and section foremen engaged on the maintenance of way work, and of railroad shop labourers employed by the principal railways in the United States by two cents per hour, the increase to be effective from October 16.

The decision was in connection with one of the disputes over reductions in wages of various classes of employees which had been dealt with by the Board earlier in the year, the representatives of the employees on a number of the railroads not having reached agreements with the railways as to the reductions proposed by the latter. Such decisions of the Board do not apply to railway employees who have reached agreements with the railway companies. In May and June the Board had issued decisions reducing wages approximately 10 per cent from July 1, upon which strike votes were taken by a number of organizations and a strike was called for July 1. At this juncture the Board undertook to reconsider the wage dispute of the maintenance of way employees, shop labourers, etc., and these classes did not go out with the Federated Shop Crafts on July 1, but accepted tentatively the reduced rates of wages. Hearings on the reconsideration of the wage reduction began towards the end of August, the representatives of the employees proposing a minimum wage of 48 cents per hour for the classes affected on the ground that this rate was required to provide a living wage. The rates for unskilled labourers in the maintenance of way departments including the sectionmen, track labourers, and shop labourers prior to July 1, 1922, ranged from 28 cents per hour to 40 cents, the low rate being paid only on some railroads in the south, while large numbers

of employees in these classes further north were receiving 35 cents and 40 cents per hour. The reduction of five cents per hour in effect from July 1, therefore, reduced rates for labourers from 28-40 cents per hour to 23-35 cents per hour, and the decision rendered in October raised the rates after October 16 to 26-37 cents per hour. Section foremen were also increased by two cents per hour, but the other classes of maintenance of way employees whose wages were reduced on July 1 were not affected by the recent decision.

As wages on railroads in Canada have in recent years been adjusted to a great extent in conformity with changes in the United States, negotiations for similar changes for various classes of employees in Canada have been proceeding since June and were still being carried on at the beginning of December.

Maintenance of way employees and railroad shop labourers in Canada agreed to a tentative reduction from July 16, but early in December an agreement was reached providing for an increase of two cents, thus raising the rate for labourers from 35 cents to 37 cents as compared with 40 cents per hour from July, 1921 to July, 1922, and 48½ cents per hour from May, 1920 to July, 1921.

United States Railroad Labour Board Decision No. 1267 (Docket 2500)

Issued October 21, 1922, effective October 16, 1922.

United Brotherhood of Maintenance of Way Employees and Railway Shop Laborers et al, vs. Alabama & Vicksburg Railway Company et al.

SUBJECT OF THE DISPUTE.

This decision is upon a series of controversies or disputes between the carriers and the classes of employees represented by the or-

gанизations, named below. The subject matter of this dispute is what shall constitute just and reasonable wages.

PARTIES TO THE DISPUTE.

(1) The carriers parties hereto, each of which has a dispute with one or more of the organizations hereinafter named, are:

Alabama & Vicksburg Railway Company, etc.

(2) The organizations parties hereto, each of which has a dispute with one or more of the above-named carriers, are:

United Brotherhood of Maintenance of Way Employees and Railway Shop Laborers, Brotherhood of Railroad Station Employees.

NATURE OF THE PROCEEDINGS.

In conformity with the provisions of the Transportation Act, 1920, the carriers or employees named herein have held or attempted to hold conferences on the subject matter of this dispute, and all controversies not having been decided in such conferences were referred to the United States Railroad Labor Board for decision.

Both parties made a full presentation to the Labor Board of their respective contentions by testimony and argument, oral and written.

HISTORY OF THE CONTROVERSY.

In the month of March, 1922, there was presented to the Labor Board the evidence upon which was subsequently based Decision No. 1028, establishing the wages of the classes of employees represented by the United Brotherhood of Maintenance of Way Employees and Railway Shop Laborers. Decision No. 1028 was protested by the employees and they have petitioned the Board for an increase in wages, based, first, upon a reconsideration of the evidence presented in said decision and secondly, upon the contention that changes in industrial conditions since March justify an increase.

In so far as the petition of the employees seeks a revision of Decision No. 1028, it is denied—a majority of the Board being of the opinion that said decision was just and reasonable.

That portion of the petition which asks for a wage increase on the ground that industrial conditions have undergone changes since the evidence was submitted, upon which Decision No. 1028 was predicated, is granted to the extent herein below set out. It has not heretofore occurred that the

Board has handed down a decision either increasing or decreasing wages after the lapse of such a short period as three and one-half months since the effective date of a former decision, but the evidence in this case is so clear and satisfactory as to justify promptness of action.

Perhaps, the sudden and unexpected fluctuations to which industry has been subjected since the war have not been more strikingly exemplified than by the sharp upturn of wages which began in April of this year in various industries affecting particularly common labor. When the evidence was submitted in March, upon which Decision No. 1028 was based, this upward wage-trend had not set in and could not with any certainty be anticipated.

The employees, in their Exhibit No. 2, herein, quote from the monthly wage bulletins of the National Industrial Conference Board the wage increases and decreases for certain months. Supplementing the figures there quoted by the corresponding figures taken from the bulletins of the same authority for other months, we have the following record of the number of wage increases and reductions reported for the respective months:

Monthly Period	Increases	Reductions
Feb. 15th to March 5th....	0	35
Mar. 5th to April 15th....	0	81
Apr. 15th to May 15th....	9	54
May 15th to June 15th....	26	23
June 15th to July 15th....	21	25
July 15th to Aug. 15th....	8	7
Aug. 15th to Sept. 15th....	119	4

While the foregoing is not all the evidence before the Labor Board on this point, it is typical.

Employees' Exhibit No. 2 also quotes from the June report of the Federal Reserve Bank of New York City in support of the proposition that there is a marked upward trend in wages. An excerpt from said quoted report reads as follows:

The continued increase in the volume of business activity has been reflected in a marked change in the employment situation. Evidences of this change are found in a number of instances of wage increases, which have resulted from shortages of workers, and in reports from employment agencies.

Wages increases have been taking place, particularly in the case of common labor, which has been difficult to secure at the low wage rates which many firms adopted in the last months.

Following this upward wage movement, United States Steel Corporation increased its wages for unskilled labor on August 22 to thirty-six cents (36c) an hour. For more than a year previously it had been paying only thirty cents (30c) an hour. Many other

steel companies followed with increases for common labor to rates of thirty-five cents (35c) and thirty-six cents (36c) an hour. Under this decision the minimum for common labor on a few roads will be twenty-five cents (25c) an hour, and the minimum on others will be thirty-seven cents (37c) an hour. The minimum of twenty-five cents (25c) will prevail in a very restricted territory and apply comparatively to a very small number of men. As a matter of fact, this 25-cent minimum is a higher wage than the 37-cent minimum when considered in relation to the living conditions of the respective territories. This is evidenced in part by the fact that certain carriers in the territory where the high minimum prevails have been paying to common labor a wage slightly in excess—and a few have been paying a rate considerably in excess—of said minimum; for example, the New York, New Haven & Hartford Railroad Company is paying forty cents (40c) an hour to trackmen. On the other hand, certain roads in the southeastern territory had been paying for some months prior to the issuance of Decision No. 1028 and are still paying a rate to common labor considerably lower than the lowest minimum fixed by the Labor Board for other carriers in the same territory, but this has been by agreement with the employees. Examples of this are the contracts on the following roads at the rates indicated for section men and other common labor:

Charleston & Western Carolina Ry...	\$0.175
Central of Georgia Railway Company	.18
Atlantic Coast Line Railroad Co....	{ .188
	{ .20
	{ .20
Mobile & Ohio Railroad Company..	{ .21
	{ .22

The territorial differentials established in 1918 have not yet been disturbed by any of the decisions of the Labor Board and are not changed by the present decision.

The Labor Board in its present decision considers all the seven elements or factors set out in the Transportation Act, 1920, for its guidance in fixing just and reasonable wages, but lays special stress upon the first, which reads as follows: "The scales of wages paid for similar kinds of work in other industries.

As to the cost of living, the reports of the Bureau of Labor Statistics show that there has been no pronounced change since March 1922. The June report shows a slight decrease in the cost of living for the previous quarter—namely, two-tenths of one per cent. The September quarterly report again shows a decrease of two-tenths of one per cent.

In view of these facts and circumstances and all the evidence adduced in this case, the Labor Board is of the opinion that a conservative increase of wages is clearly due to the three groups of unskilled labor and to the section foremen.

Certain carriers have raised the question in this case that a portion of the employees embraced in the class herein involved are on strike on their respective properties and are therefore not entitled to be heard before the Board at this time. The fact that some of these employees are on strike does not preclude the organization from presenting a dispute in behalf of those employees who are actually in the service of the carrier. The employees in the service cannot equitably be deprived of their right to appear before the Labor Board because others are out on strike.

In the case of certain carriers there are submissions before the Board from two rival organizations, in which both ask for wage increases. In such cases, it is not now necessary to pass upon the jurisdictional question involved.

DECISION.

The Railroad Labor Board therefore decides:

1. That each of the carriers party to this dispute shall make increases in the rates of wages heretofore established by the authority of the United States Railroad Labor Board in Decision No. 1028 for the specific classes of its employees named or referred to in Article II in amounts hereinafter specified for the classes named in the schedule of increases.

2. That the scope of this decision is limited to the carriers named under Article II, to such carriers as may be included hereafter by addenda, and to the specific classes of employees named or referred to under each particular carrier.

3. That the increases in wages hereby authorized shall be effective as of October 16, 1922, and shall be made in accordance with the following articles which establish the schedule of increases, designate the carriers and employees affected, and prescribe the method of general application.

ARTICLE I—SCHEDULE OF INCREASES.

For the specific classes of employees listed herein and named or referred to in connection with a carrier affected by this decision, use the following schedule of increases per hour:

Note—For the specific classes of employees listed herein, for which no increases have been provided, reference to section numbers has been omitted.

Maintenance of Way and Structures, and Unskilled Forces Specified.

Sec. 1.—Bridge, building, painter, construction, mason and concrete, water-supply, and plumber foremen (except water-supply and plumber foremen coming under the provisions of section 1 of Article IV, Decision No. 147).....No Increase

Sec. 2.—Assistant bridge, building, painter, construction, mason and concrete, water-supply, and plumber foremen, and for coal-wharf, coal-chute, and fence-gang foremen, piledriver, ditching and hoisting engineers and bridge inspectors (except assistant water-supply and plumber foremen coming under the provisions of section 1 of Article IV, Decision No. 147).....No Increase

Sec. 3.—Section, track and maintenance foremen, and assistant section, track and maintenance foremen.....2 cents

Sec. 4.—Mechanics in the maintenance of way and bridge and building departments (except those that come within the scope of agreements with the Federated Ship Crafts).....No Increase

Sec. 5.—Mechanics' helpers in the maintenance of way and bridge and building departments (except those that come within the scope of agreements with the Federated Ship Crafts)....No Increase

Sec. 6.—Track laborers, and all common laborers in the maintenance of way department and in and around shops and roundhouses not otherwise provided for herein.....2 cents

Sec. 7.—Drawbridge tenders and assistants, pile-driver, ditching and hoisting firemen, pumper engineers and pumpers, crossing watchmen or flagmen, and lamp lighters and tenders.....2 cents

Sec. 8.—Laborers employed in and around shops and roundhouses, such as engine watchmen and wipers, fire builders, ash-pit men, flue borers, coal passers (except those coming under the provisions of section 3 of Article VIII, Decision No. 147) coal-chute men, et cetera.....2 cents

Sec. 9.—For miscellaneous classes of foremen and other employees named in connection with a carrier affected by this decision, but not specifically listed under any section in the classified schedules of increases, add an amount equal to the increases specified for the respective classes to which the miscellaneous classes herein referred to are analogous.

ARTICLE II—CARRIERS AND EMPLOYEES AFFECTED.

Each of the following carriers shall make increases in the rates of wages heretofore established by the authority of the United States Railroad Labor Board in Decision No. 1028, for the specific groups of its employees named or referred to in this article, in amounts hereinbefore specified for such groups in the schedule of increases.

[List omitted.]

ARTICLE III—GENERAL APPLICATION.

The general regulations governing the application of this decision are as follows:

Sec. 1.—The provisions of this decision will not apply in cases where amounts less than thirty (\$30) dollars per month are paid to individuals for special service which takes only a part of their time from outside employment or business.

Sec. 2.—Increases specified in this decision are to be increased on the following basis:

(a) For employees paid by the hour, add the hourly increase to the hourly rate.

(b) For employees paid by the day, add eight times the hourly increase to the daily rate.

(c) For employees paid by the month, add two hundred and four (204) times the hourly increase to the monthly rate.

Sec. 3.—The increases in wages and the rates hereby established shall be incorporated in and become a part of existing agreements or schedules, or future negotiated agreements or schedules, and shall remain in effect until or unless changed in the manner provided by the Transportation Act, 1920.

Sec. 4.—It is not intended in this decision to include or make increases in wages for any officials of the carriers affected except that class designated in the Transportation Act, 1920, as 'subordinate officials,' and who are included in the Act as within the jurisdiction of the Labor Board. The Act provides that the term "subordinate officials" includes officials of carriers of such class or rank as the Interstate Commerce Commission shall designate by regulation duly formulated and issued. Hence, whenever in this decision words are used, such as "foremen," et cetera, which may apply to officials, such words are intended to apply to only such classes of subordinate officials as are now or may hereafter be defined and classified by the Interstate Commerce Commission as "subordinate officials" within the meaning of the Transportation Act, 1920.

ARTICLE IV—INTERPRETATION OF THIS DECISION.

Should a dispute arise between the management and the employees of any of the carriers as to the meaning or intent of this decision which cannot be decided in conference between the parties directly interested, such dispute shall be referred to the United States Railroad Labor Board in the manner provided by the Transportation Act, 1920.

Sec. 1.—All such disputes shall be presented in a complete and joint-signed statement setting forth:

- (a) The specific question involved;
- (b) The facts in the case;
- (c) The position of the employees; and,
- (d) The position of the management thereon.

Where supporting documentary evidence is used it shall be attached to the application for decision in the form of exhibits.

Sec. 2.—Such presentations shall be transmitted to the Secretary of the United States Railroad Labor Board, who shall place same before the Labor Board for final disposition.

By order of

UNITED STATES RAILROAD
LABOR BOARD,

BEN W. HOOPER,
Chairman.

Dissenting Opinion

In dissenting from the decision of the majority, the undersigned refers to the dissenting opinions of the minority in Decisions Nos. 1028, 1036, and 1074, all of which are re-affirmed and to be considered as if reproduced herein.

The submissions filed by the employees in this dispute quite uniformly requested the restoration of the rates of pay established by Decision No. 2, and on August 28, 1922, this request was supplemented by the representative of the employees by the filing of a formal motion reading:

We wish formally to request that the living-wage principle be accepted by the Board and made the basis of its action in the present case. We make this request as a formal motion and ask the Board to take it under consideration and give us a formal ruling before we proceed further with the case:

1. That the Board recognize the living wage as the basis of its decision in this case.

2. That in applying this principle, a minimum rate of not less than forty-eight cents (48c) an hour be awarded to all of our members, who, under your last wage Decision No. 1028 (Docket 1300) are receiving twenty-eight cents (28c) an hour or less.

3. That for those who are now receiving more than twenty-eight cents (28c) an hour, their differential in cents above twenty-eight cents (28c) be added to the new minimum rate of forty-eight cents (48c) an hour. This will mean a minimum rate for our people of forty-eight cents (48c) an hour.

In deciding this request, two resolutions were offered—the first by the chairman, and the second by Mr. Wharton—reading as follows:

(1) By the chairman:

It is superfluous for the Board to announce in advance the principle or theory upon which it will fix wages in the pending dispute. It may be assumed by the parties in this case that the Board will give full consideration to every circumstance set out in the statute for its guidance but it will not go beyond that. The Transportation Act, 1920, requires the Board to establish wages that are "just and reasonable." It is within the province of the parties herein to make such contentions as they may respectively see fit as to what will constitute a "just and reasonable" wage. If the wage which the motion defines as the "living wage" should be demonstrated to be a "just and reasonable" wage, the Board would adopt it; otherwise, it would not. The Board will neither limit nor enlarge the right of either party to present to the Board his conception of what constitutes a just and reasonable wage within the meaning of the law.

(2) By Mr. Wharton:

The right of all workers including common laborers, to a living wage is hereby affirmed.

In fixing wages, minimum rates of pay shall be established which will insure the subsistence of the worker and his family in health and reasonable comfort.

The resolution offered by the chairman was adopted by a vote of five to two, seven members present.

The decision of the majority in this case is fundamentally unsound and unacceptable on the same grounds which were set forth in the dissenting opinion of the minority in Decision No. 1028. At that time the views of the minority were developed in great detail, and are applicable to the case under discussion. They may be briefly summarized by the fol-

lowing excerpt from the dissenting opinion to Decision No. 1028:

(1) The rates of pay established under this decision as the basic minimum rates of the transportation industry will merely perpetuate the low level of purchasing power possessed by this large class of workers in pre-war years * * *

(2) The rates of pay established under this decision will mean annual earnings far below any minimum standard of subsistence which has been formulated, even below those of most conservative employer groups.

(3) The rates of pay established under this decision are not based upon the human needs of the hundreds of thousands of families involved. They are insufficient to provide these families with the absolute essentials. The earnings of this large group of railroad employees will not provide the father of a family with as much food as is allowed convicts in the Cook County, Illinois, jail.

(4) The pre-war standard perpetuated by this decision was the product of inequitable wage bargains. It is considerably below the level recognized at that time as necessary for the maintenance of health and energy.

AN INADEQUATE WAGE IS UNJUST AND UNREASONABLE.

The fundamental error of the majority rests upon their refusal to inquire into the adequacy of the rates of pay established for section men and unskilled laborers. Although these rates may be placed on a higher level than those paid by private industries, this does not meet the requirements imposed on the Labor Board by the Transportation Act, 1920. The specific and fundamental mandate of the law is that wages shall be just and reasonable. The relation of rates of pay to those established in private industry, or the relation of rates of pay to the cost of living, is a *secondary* consideration which does not come into play until the *primary* requirement of a "just and reasonable" or an adequate or living wage has been satisfied. Under these duties of the Board it is manifest that the rates of pay of unskilled workers, or those at the bottom of the wage structure, must first be established on an adequate basis—a basis sufficient to maintain and perpetuate in a reasonably comfortable and decent way the unskilled worker and his family—and after this has been done just and reasonable differentials above this basic wage for unskilled labor must be established in accordance with skill, experience, productiveness, hazard, training, et cetera, or, in other words, in accordance with the seven relevant circumstances specifically mentioned in section 307, as well as others unenumerated but covered by section 301 of the Transportation Act, 1920.

THE LIVING WAGE IS LEGALLY SOUND.

Under any proper interpretation of the Transportation Act, therefore, I hold that an adequate or living wage to unskilled railroad employees is a legal right of such employees, and that the Labor Board is not meeting the mandates imposed upon it by the law in its failure to accept the living-wage principle. The principle should, of course, be applied with discretion and with due caution; nevertheless it

is the duty of the Board to accept and apply it. No better proof of the propriety of such action can be had than the statements of Senator Albert B. Cummins, Chairman of the Senate Committee on Interstate Commerce and one of the authors of the Transportation Act, 1920. On April 17, 1922, when a hearing was in progress before his committee relative to whether the Transportation Act, 1920, contemplated the sanction of the living-wage principle to unskilled railway employees, Senator Cummins publicly said:

The Chairman: My view of it is that here are two men, and one man may agree to work for the other at any wage that he would be willing to accept, whether it is just and reasonable or not, but when organized society comes to fixing the wage, it is no more right to fix a wage below the point of living and comfortable living than it is to fix a return on capital below a reasonable point.

Witness: That is our contention exactly, Mr. Chairman.

The Chairman: I think you are right about it.

Senator Cummins' attitude was further elaborated in a statement submitted by the representatives of the employees during the hearings in the present case. In presenting their motion for a ruling on the living-wage principle, in this connection, they said: (Transcript of Proceedings, pp. 127 and 128.)

Recently, after the shopmen's strike had been in progress about three weeks, or about July 19 last, Senator Cummins was quoted in a newspaper interview as declaring it to be his early intention to sponsor legislation which would empower the Railroad Labor Board to pay a living wage.

"Some way must be found," he said, "to enable the Government to determine what is a 'living wage' just as the Government is enabled to determine what is a fair return on capital invested. I believe if the Railroad Labor Board had at least attempted to fix a 'living wage' in seeking to reduce the earnings of railroad workers, most of the present difficulty could have been avoided."

THE LAW HAS SET ASIDE THE FORCES OF SUPPLY AND DEMAND.

The Board must accept some fundamental principle as the basis of wage-fixing; otherwise, it can follow no guide but the relentless, inhuman, fluctuating forces of supply and demand. It cannot be denied that in private industries the wages of unorganized and unskilled workers are very largely fixed by these forces. As industrial development progresses, however, supply and demand enters less and less into the wage question, until a condition of affairs is oftentimes reached where employees and employers are organized and are of about equal economic strength, and where both parties agree to meet together and bargain collectively, referring such matters as cannot be settled in conference to an impartial tribunal for final adjudication. When this is done, as is the case in many private industries, there can be no place for the invocation of the law of supply and demand. An arbitration board selected must ignore these factors, and in its deliberations and decisions attempt to establish rates of pay which are adequate and equitable, or, in other words, just and reasonable.

Likewise, the Transportation Act, 1920, under which the Labor Board functions, by establishing a tribunal for determining wages, to which all wage controversies must be referred, sets aside the law of supply and demand. It also prohibited the acceptance, as a basis of action by the Labor Board, of the rates in private industries determined by the law of supply and demand. The duty of the Board in this respect cannot be better expressed than by quoting in part from the decision of the neutral arbitrator in the arbitration case in 1920 of the Eastern Massachusetts Street Railway Company and its employees. On this point, he said:

So far as my examination of the authorities goes, no employer has before a board of arbitration ever disputed the proposition that the workingman in America is entitled to a minimum fair living wage.

* * *

Nor does the company dispute this proposition now. It says that the men are receiving a fair living wage, as is proved by the law of supply and demand. I do not believe that the law of supply and demand, however applicable to the purchase and sale of merchandise or to industry in general, should have much, if any, weight in fixing the wage scale in public utilities. The only way in which the applicability of the law can be tested in any case is by the men going on strike and fighting it out to the bitter end. If they are to test it by fighting, then a fair fight requires that they be allowed to strike all at once and use every means legally possible to win their fight. Such a struggle, with its inevitable concomitants of public inconvenience and distress, interruption of business, dislocation of all transportation facilities, and possible disorder, is emphatically not to the public interest, and therefore the whole economic progress of the last 50 years has been away from the strike as a means of testing whether under the law of supply and demand any wage scale in force is adequate.

The conclusion is irresistible, from the pronouncements of other arbitration tribunals as well as from the statements of Senator Cummins, that "wages in outside industries," or in other words, the supply of and demand for labor, cannot be used as a guide for the Labor Board in fixing adequate basic rates for unskilled railroad employees.

The law establishing the Kansas Court of Industrial Relations is framed in similar terms to the Transportation Act, 1920. The Kansas Court is required (sections 8 and 9 of the law) to establish wages which shall be "reasonable" and "fair." The Court of Industrial Relations has not hesitated to interpret these requirements of the law to mean a living wage to unskilled workers with higher differentials to the more skilled and experienced wage earners. In the case of State of Kansas vs. Topeka Edison Company, it said:

A living wage may be defined as a wage which enables the worker to supply himself and those absolutely dependent upon him with sufficient food to maintain life and health; with a shelter from the inclemencies of the weather; and with sufficient clothing to preserve the body from cold and to enable persons to mingle among their fellows in such ways as may be necessary in the preservation of life. But it is not a living wage only which this court is commanded by the people of this State to assure workers engaged in these essential industries. The statute uses the word "fair" and commands us to assure to these workers a "fair" wage. What is a "fair" wage? Upon this subject, of course there may be a great variety of opinions expressed. It seems safe to say, however, that the circumstances above enumerated should be considered in arriving at a conclusion as to what

constitutes a fair wage. The skilled worker, in fairness, should have a higher wage than the unskilled worker. The worker who has spent years of time and effort in preparing himself for a peculiarly technical line of work is entitled to greater consideration from the public than the more unskilled worker. The hazards of the employment should also be noted, and the worker engaged in such an employment as that under consideration should receive a higher wage than his fellow worker who may be engaged in a safe occupation. The degree of responsibility placed upon the worker is a matter of importance. The continuity and regularity of employment should be considered, for it is apparent that an employment which is seasonal in its nature must have a higher wage than one in which regular, steady work is offered, because, after all, it is the annual earnings that are to govern rather than the daily wage in many instances.

THE LIVING-WAGE PRINCIPLE.

The Labor Board should give expression to its acceptance of the living-wage principle and then give it a practical application. This principle has been nowhere better expressed than in the code or series of principles which made up the constitution, so to speak, of the former National War Labor Board. It was as follows:

1. The right of all workers, including common laborers to a living wage is hereby declared.
2. In fixing wages, minimum rates of pay shall be established which will insure the subsistence of the worker and his family in health and reasonable comfort.

During the period of the war emergency, labor gave up the right to strike. In order that its status might be protected, a national conference of representatives of employers and employees agreed to accept the above principle and a series of others as a guide for the purpose of adjusting wage disputes during the war period. The principles were proclaimed by the President and made mandatory upon industrial relations and conditions. The present chief justice of the United States Supreme Court was a member of the conference which agreed upon the principles to be established, and later, as one of the chairmen of the National War Labor Board, interpreted and practically applied these principles.

THE BUDGETARY METHOD IS NECESSARY AND PRACTICABLE.

The use of a family budget is essential to any attempt at ascertaining practically what a "living wage" should be. Our basic industries do not offer rates of pay which, under normal working conditions, enable an unskilled worker to earn an amount sufficient to support himself and his family in health and modest comfort. His wages must be supplemented by the earnings of his wife and children, or by the taking of boarders and lodgers into the home. Otherwise, the family income is inadequate. The prevailing wage in American industry, in other words, is a family wage. The energies of all the members of the family capable of working are required in order to secure an income sufficient for average needs. That this condition of affairs is also true of the families of maintenance of way employees of the railroads has been demonstrated by the

personal testimony of section men and their wives who have appeared before the Labor Board.

Existing rates of pay in private industries cannot, therefore, be used as precedents in determining what a living wage should be. A tribunal such as the Railroad Labor Board in attempting to give practical application to the living-wage principle, cannot rely on *what is*, but must find out *what should be*. A budget must be constructed to cover the quantities of foodstuffs and clothing which an average family requires in order to be properly nourished and decently clothed, necessary housing facilities and fuel, and sundries or miscellaneous articles essential to modest and frugal comfort. When the quantities of the different classes of articles necessary to the healthful consumption of an average family have been determined, the different articles can then be priced, and the sum of these prices indicates what annual income should be had. If the aggregate cost of the articles required to maintain a conservative standard of healthful and decent living is then divided for a given period by the normal working time, the average rate per hour or day may be ascertained which should be paid to the average unskilled worker in order that he may support his family in reasonable health and comfort. It is not claimed, of course, that a living wage rate can thus be determined with mathematical precision, but the approximate amount which is necessary to support an average workingman's family in health and decency can be found out, and on this basis the Board could proceed conservatively and with due discretion to fix a rate of pay which would be reasonably adequate.

The practicability of the budgetary method has already been demonstrated by experience. It has been used in many states by wage boards and commissions to establish minimum rates of pay for women in mercantile and manufacturing establishment. It has also been adopted by the former National War Labor Board, the Kansas Court of Industrial Relations, and by the Commonwealth and other arbitration boards in Australia.

Many objections, both from the standpoint of equity and of a practical statistical character, have been submitted against the budgetary method by the representatives of the railroads. Some of these objections are merely technical; others involve more serious considerations. None are insurmountable, and all can be overcome by the exercise of sound judgment and discretion by the Board.

It has also been claimed that the practical application of the living-wage principle by the budgetary method would be financially impossible, or would involve such a financial outlay as would constitute a grievous burden to the shipper and to the consumer. If established on

the railroads, it is also declared that it would have to be met by private industries, and the resultant cost would mean a general increase in prices or an industrial breakdown.

Similar arguments and prophecies have been developed in the past against the establishment of the eight-hour work day and other measures of industrial equity or amelioration. The dire results which have been predicted have never materialized. Likewise, a conservative, practical application of the living-wage principle would undoubtedly be attended by better and more advantageous conditions of railway operation. Added labor costs would be absorbed completely or to a large extent by increased labor efficiency and by managerial ability. The practical experience in Australia where this same argument was used against the adoption of the living-wage principle as the basis for wage-fixing is of much value, and shows the unsoundness of the position of those who have taken an attitude of extreme opposition. That this experience in that country has been most favorable is indicated by the following quotations from opinions of the president of the Industrial Court of South Australia:

The president is bound by law to award not less than a living wage. If that wage is higher than has been previously fixed, the excess may come out of the profits of the employer. But if it should so happen that the excess cannot be paid out of profits, there are other sources to be drawn on. There is the possibility of increased economy or increased efficiency in the conduct of the business concerned. There is the possibility that an increased output on the part of employees may enable the employers to avoid shutting down. A great deal of evidence might be adduced to show that in Australia the sources to which I have referred as available for paying higher wages—increased economy or efficiency of business organizations and an increased output on the part of the worker—are sources from which, under the stimulus of necessity, much more might be drawn than at present. I do not speak of all industries, but my remark is fairly applicable to a large number. * * * I dwell upon these things because I wish to show that if this Court, in declaring a living wage, declares a wage which apparently cannot be paid by the industry concerned, the Court is not necessarily shutting down the industry. In a number of cases which have come before Australian industrial tribunals, the argument has been brought forward that a particular business of industry would have to be closed down if the wages were raised, and yet the industry or business has continued despite increased wages, and is today paying reasonable dividends. Whether the result be due to the potential economy of high wages, or to the fact that employers have discovered that necessity is the mother of invention, or to other circumstances I need not pause to consider. The fact is indisputable.

Nor is it sound business to underpay the worker. It is true that particular employers may make profits by the award of a wage lower than the true living wage. But the interests of the employers as a whole are not to be promoted by sweating wages, or even by a bare subsistence wage. * * * I cannot too strongly emphasize the fact that it is for the interests of the employers themselves, as well as for the employees, that the living wage awarded by this Court should be such as to insure to every workman a wage sufficient to maintain him in a high state of industrial efficiency, and to provide his family with the necessities for health and well being. When economists speak of the potential economy of high wages, they are not talking in the air. They are talking of something which has been demonstrated in the industrial development of modern communities.

The mistake that is often made by private employers is the mistake so commonly, and I fear justly, attributed to Governments—the mistake of seeking efficiency through economies rather than economy through efficiency.

Sound national economy embraces the recognition of the need for securing such a return for work, whether mental or physical, as will maintain the worker in health and efficiency and stimulate his or her ambition. The realization of the fact, in its bearing upon maximum production at lowest cost of production, leads to the conclusion that lowest cost of production should be sought for less in low rates of wages than in increased skill in the management, and in increased efficiency of the worker.

It may be conceded that an increase in the price of a commodity produced has sometimes been inevitable where wages have been increased. But I do not hesitate to express the opinion that, in a majority of cases, the increase of prices, aside from fluctuations in the world's markets and omitting for the moment the possibility of some diversion of profits to wages, might have been avoided by a greater efficiency on the part of employers and employees by eliminating, as far as possible, the waste of disorganized industry by the installation of up-to-date plants, and the adoption of the most effective methods of business organization. (South Australia Industrial Reports, Vol. 2, 1918-19, pp. 3-4, 45-46, 80-81, and 235.)

The experience of Australia in establishing adequate basic wages without industrial dislocation is also further corroborated by the experience of Great Britain under the Trade Boards Act of 1909, and of the various states in this country which have established minimum wages for women engaged in trade and industry.

As a matter of fact, there is no sound reason why the budgetary method cannot be employed to determine what the minimum income essential to the reasonable living requirements of an unskilled laborer, wife, and three dependent children should be; furthermore, there is no sound reason why such a standard cannot be ascertained and applied to the transportation industry without impairment of its economical and efficient operation. Under a proper application, it would undoubtedly reduce, rather than increase, labor costs. The only criticism indeed which has been made has not been against the budgetary method but against its application. It has been twofold: (1) The standard of living which should be allowed as the basis of a living wage; and (2) the size of the family unit. But the request of the employees in this case for a recognition of the living-wage principle, and its application to the extent only of an opportunity for laborers and section men to earn a maximum of \$1,175 a year, has been so reasonable, conservative, and so financially practicable that it has seemed to me that it should have been granted by the Labor Board pending a more exhaustive inquiry as to what a living wage should actually be. The requests of the employees, in other words, have impressed me not only as being reasonable and conservative, but clearly within the range of practical application.

NEGRO AND MEXICAN LABOR AWARDED FAVORABLE WAGES.

Reference is made by the majority to rates of pay established for section men and common labor by certain carriers in the Southeast and that these rates are below the minimum of

twenty-five cents (25c) per hour established by this decision, but nothing is said to indicate how these rates were put into effect. It is my information that a committee composed of section foremen conducted these negotiations, and that the Negro laborers whom they assumed to represent and for whom they agreed to accept these reductions had no proper opportunity of expressing their wishes. It is significant that the section foremen on the same roads quite generally received increases in their rates of pay. The Labor Board had information as to the rates of pay established by certain of the southeastern roads prior to the issuance of its Decision No. 1028, and none of these roads were, so far as this class of employees are concerned, parties to the dispute resulting in the issuance of Decision No. 1028.

In the case of the New York, New Haven & Hartford Railroad Company which has since the issuance of Decision No. 1028, established a minimum rate of forty cents (40c) an hour for trackmen, this carrier, named in Decision No. 1028, after receiving the Board's decision granting their request to the extent of reducing the rates of pay of trackmen five cents (5c) an hour, arranged to negotiate with a committee, other than the duly authorized committee members of the organization party to this dispute, and granted trackmen an increase establishing a minimum of forty cents (40c) an hour.

In this case the carrier dealt with the organizations parties to this dispute regarding a reduction in wages, but for obvious reasons it did not do so when it proposed to increase wages. The carrier is now contending that the United Brotherhood of Maintenance of Way Employees and Railway Shop Laborers does not now represent a majority of this class of employees and is, therefore, protesting the right of this organization to represent these employees in the present dispute arising from the request for a wage increase, and because of this protest the New Haven has not been included in the present decision.

The minimum rate of twenty-five cents (25c) an hour established by this decision represents an annual full-time wage of \$612 or \$51 per month. This is the definition of a just and reasonable wage as decided by the majority of the Board. The majority state:

"As a matter of fact, this 25-cent minimum is a higher wage than the 37-cent minimum, when considered in relation to the living conditions of the respective territories."

As this rate applies in the territory where Negro and Mexican labor predominate, then it is a fair assumption to say that the majority has established a more favorable standard of living for these nationalities than for others.

We ask that you visualize a typical family and habitation of a Negro laborer in any of the southeastern or southern states, and judge whether or not a decision that establishes a standard of living on that basis is justifiable in the eyes of God or man.

EFFECT OF WAGE REDUCTIONS ON COUNTRY.

Mr. William Randolph Hearst recently published an article which I herewith reproduce:

The great injury inflicted upon the business of the country by the coal and railroad complications and upon the people of the country and upon the nation itself, is due primarily to the fundamental economic error that wages should be reduced and that any benefit can come to a country by reduction of wages.

If the late great war has anything at all to its credit, anything at all that we can look to as a general advantage to humanity, it is the fact that the war and the conditions which it created tended to raise the wage scale.

The effort of all intelligent people, as well as humanitarian people, the effort of all people familiar with social and economic principles and objectives should have been to maintain this wage scale and the standard of living made possible by a high wage scale, even though the cost of living should be somewhat reduced.

We know perfectly well that the supremacy of American products is not due and never has been due and never will be due to the cheapness of American labor.

It is due to the skill of American labor, the intelligence and education of American labor, the contentment, energy and enthusiasm of American labor, and, of course, in addition to this superiority of American labor, the superiority of American machinery.

The superior skill, education, contentment, energy, enthusiasm of American labor are due primarily to the superior American standard of living and the opportunities, ambitions and interest which that high standard of living creates.

To strike at that standard of living of the American laborer is to strike at the very base of all his superiority, to kill his superior skill and intelligence, his contentment, enthusiasm and interest at the very root.

It is the extreme of false economy; it is the utmost of bad management—to say nothing of the social and ethical questions involved.

It may be taken as an elemental proposition that no saving from wage reduction compensates for the loss of production from dis-

contented labor, or labor rendered less efficient through a reduction of the standard of living and a consequent limitation of those opportunities for education and individual improvement which make American labor the most efficient in the world.

In addition to the injury which a reduction of wages inflicts upon labor and through labor upon production, there is the general injury upon all business which a reduction in purchasing power of the mass of the community inevitably involves.

It is possible that we business men do not realize that a great part of the general prosperity of the war period and the immediate post-war period was due to high wages and the general distribution of those wages in purchases—for the working man generally spends nearly all that he earns.

When wages were high the working man and his family bought freely, the shops prospered, store stocks were exhausted, the factories were overwhelmed with orders, and the fullest market prevailed for raw material furnished by the farm and the mine.

Do you, fellow business man, who owns a store, fail to realize that the hand which reduces wages dips into your till to deprive you of a proportionate part of your patronage and your profits?

Do you, fellow business man, who runs a factory, fail to realize that your orders come from those shops, and are dependent in turn upon the patronage and prosperity of those shops?

Do you, fellow farmers and fellow miners, fail to realize that the demand for your products depends upon the demands from the factories, and that these factories depend upon the orders from the shops, and the orders from the shops depend upon the prosperity and the patronage of those shops, which are in turn dependent upon the prosperity of the wage earners, the greatest individual element in the whole nation?

The conditions of prosperity are a very economic "house that Jack built," and the foundation of the house is the welfare of the worker, based on good wages and consequent high purchasing power.

Therefore, when the mine owners and railroad owners demanded a reduction of wages without absolute necessity they committed a fundamental economic error. When the Railroad Labor Board authorized a reduction, they sanctioned a blow not only at the welfare of the workers, but at the general welfare of all business and at the prosperity of the country.

Of course, the workers would not tolerate this reduction in wages wholly unnecessary and unjustifiable at this time; and, whether moved by selfish considerations or not, they were performing a patriotic service in not tolerating it.

The plain truth of the matter is that any management of any business which cannot succeed, and still pay good wages is not only inefficient, but un-American, because good wages for good work not only is but is recognized to be a fundamental American proposition.

Most of our American business men are able to conduct their business successfully and pay high wages; and they conduct their businesses successfully not in spite of the high wages, but on account of the high wages, because success is a combination of efficient management and efficient labor.

The proof that reduction in wages was in no way necessary at this time in the coal mines and on the railroads is shown in the fact that great industries like the steel trust, under the skillful management of Elbert H. Gary, were raising their wages 20 per cent at the time these mining and railroad industries were attempting to reduce wages, and is further shown in the fact that the coal operators have finally put their men back to work at the old wage, and can, and will, not only conduct their business successfully with wages at that standard, but profiteer very handsomely in addition.

The railroads must not only eventually pay the previously established wage, which they attempted to reduce, but will probably soon have to pay an added wage.

The demand for labor is increasing throughout the nation. Wages will increase in proportion, and the opportunity to take advantage of the necessities of the working man will not exist, even for those who shortsightedly desire to take such advantage.

The fundamental mistake, therefore, which has precipitated all the injury of these strikes and these interruptions of the business of the country, and these burdens upon business and upon individual citizens, which will endure as long as the limitations on fuel and transportation endure, was made by the coal operators and the railroad managers when they unjustifiably demanded lower wages, and by the Railroad Labor Board which sanctioned these unjustifiable demands.

Perhaps these mistakes may not be made so often when it is thoroughly realized how important high wages and a high standard of living and a high purchasing power are not only to the general prosperity of the nation, but to the prosperity of every in-

dividual business, to my business and to your business and to every business and profession and occupation throughout the whole country.

A. O. WHARTON.

Statement

For the reasons set out in the decision, I believe that an increase for employees in maintenance of way service is justified, but I do not feel that the increase contemplated by this decision is sufficient. However, I felt obliged to vote for the proposition when it appeared that the long delay in reaching a decision was working to the detriment of the men affected. The Labor Board took up the question of establishing just and reasonable wages for this class of employees on October 2, 1922, and after a period of nineteen days, no decision had been reached.

The increase of two cents (2c) per hour is equivalent to nearly \$23,000,000 per annum, or approximately \$70,000 a day. This delay in the Board's action therefore meant a loss to the employees of about one million dollars in earnings, and failure to reach a decision would not only have further augmented this loss in earnings, but might have resulted in this class of employees receiving no increase.

W. L. McMENIMEN.

Supporting Opinion

The fundamental difference between the decision herein and the dissenting opinion is that the former is based upon the Transportation Act, 1920, and the latter upon a fantastic theory, the very essence of which its own proponents expressly characterized in the hearing before the Labor Board as a "guess and a makeshift."

The theory of the dissenting opinion, if carried to its legitimate conclusion, would wreck every railroad in the United States and, if extended to other industries, would carry them into communistic ruin.

The law directs the Labor Board to establish "just and reasonable" wages for this class of railway employees and it sets out seven factors or elements which the Board shall consider, among other relevant circumstances, in reaching a conclusion as to what is a just and reasonable wage.

The factors so named in the statute are as follows:

- (1) The scales of wages paid for similar kinds of work in other industries;
- (2) The relation between wages and the cost of living;
- (3) The hazards of the employment;
- (4) The training and skill required;
- (5) The degree of responsibility;
- (6) The character and regularity of the employment; and
- (7) Inequalities of increases in wages or of treatment, the result of previous wage orders or adjustments.

The Board is impressed with the idea that Congress has thus enumerated the considerations which any intelligent business man of just social conceptions would naturally adopt in fixing a just and reasonable wage.

It is the view of the majority that it is its duty to give due weight to all seven of these factors, but the dissenting opinion summarily excludes the first and argues that it should receive no consideration.

The contention of the expert economists in their presentation of this case for the employees was that the Board should fix for common labor "the living wage." This is likewise the basis of the dissenting opinion.

If the contentions were that the Board should establish "a living wage," the majority would readily accede to the proposition, and, as a matter of fact, the Board in this instance, as in all others, has granted a living wage.

But the abstract, elusive thing called "the living wage," confessedly based upon a makeshift and a guess, can not receive the sanction of the Board, because it would be utterly impractical and would not be "just and reasonable," as the law commands. The living wage is defined by its proponents before this Board as follows:

A wage which will support a family of five in health and reasonable comfort, such family being assumed to consist of a husband and wife and three dependent children under sixteen years of age.

This constitutes a bit of mellifluous phraseology, well calculated to deceive the unthinking. It has frequently been demonstrated that a melodious slogan contains more possibilities of danger and destruction than a dynamite bomb.

To ascertain what is reasonable comfort, it is proposed that experts shall prescribe a standard of living for a family of five, setting out in minute detail what the experts think such a family should have in food, clothing, furniture, housing and all the other necessities of life. The fallacy of this proposal is inherent and fundamental. That it would be wise and practical to undertake to establish an arbitrary standard of living for several millions of people is not apparent. That the desires and requirements of all men are equal and alike is not correct, and that any committee of experts could set up an average living standard upon which a wage scale could be practically based has not been demonstrated anywhere. If theorists should evolve such a standard of living, it would not be possible to obtain any general conformance to it by those for whom it was designed. Standards of living have never been theorized into men. A man cannot be picked up by the scruff of the neck and hoisted into a new standard of living. Such a change in the individual man is a matter

of growth and development. When brought about by natural processes, it is socially and economically beneficial, but, if attempted by legislation, it is a wasteful absurdity. To provide a somewhat expensive standard of living for a man who by habits, training and ambition is not prepared for it, wastes money and confers no real benefit on the individual.

It may be observed that this theory of standardization necessarily fails to take into account many of the economies that are practiced by thrifty people who desire to get ahead in the game of life.

That standards of living are gradually improving in this country is undoubtedly true, and this is as it should be. There is no member of the Labor Board who does not profoundly desire improved living conditions for common labor, but it is our belief that this movement must be continued along the lines indicated by human experience and that it cannot be consummated in the twinkling of an eye by artificial expedients.

As a matter of fact, the expert representative of the employees in this case, admitted that the immediate establishment of "the living wage" would, to adopt his language, "throw a monkey wrench into the industrial machinery." He therefore suggested that the Board only make a start in that direction at this time. Such a proposition is entirely illogical. If the living wage is the just and reasonable wage authorized by the statute, it is the duty of the Labor Board to establish it now. If it is not the just and reasonable wage commanded by the law, then it is not the duty of the Board to adopt it now or hereafter, unless the law be changed.

If it would now be equivalent to a monkey wrench thrown into the machinery, as its advocate says, it might amount to the same thing later on, and the Railroad Labor Board made no mistake in declining to commit itself to this theory.

The adoption of the family of five as the typical family is arbitrary and questionable. According to the United States census of 1920 there were 24,351,676 families in a population of 105,710,620, an average of 4.4 persons to a family, and not five. This includes all members, regardless of age. The census also shows that there were about 35,000,000 dependent children under 16 years of age, an average of 1.4 dependent children to a family, and not 3 as assumed in the living wage theory.

Furthermore, the 1920 census also shows that for each family there are 1.36 male workers. According to the living-wage theory, each family of five would be supported by one worker, while as a matter of fact each family would have the support of 1.36 workers.

It is interesting and instructive to take note of the undoubted results that would follow the adoption of the theory of "the living wage." The representative of the employees states that according to the lowest living budget now available the living wage for common labor should be seventy-two cents (.72c) to seventy-five cents (.75c) an hour.

To bring the rates of common labor on the railroads to seventy-two (.72c) an hour would necessitate an increase of 125.7 per cent. To maintain existing differentials between the rates of common labor and skilled labor—and the representatives of the employees insist that proper differentials must be maintained—would necessitate an increase by the same percentage of the rates of all classes of railroad workers.

This would add approximately \$3,112,952,387 to the annual pay roll, bringing it up to \$5,589,445,993. Total expenses would then be approximately \$7,804,871,733, and total revenues (1921) \$5,563,232,215, and the carriers would face an annual deficit of \$2,241,639,518.

But, the representatives of the employees say, it would be impracticable to establish the living wage all at once, but that as a starter forty-eight cents (.48c) an hour should be made the minimum wage for common labor for the present. Assuming the retention of the existing differentials for common labor on the railways, and for all other classes of labor, this would mean an increase of 50.45 per cent, which would add to the annual wage bill \$1,249,390,994, bringing it up to \$3,725,884,540.

The total annual expenses of the railways would be \$5,941,310,340 and total revenues (1921) \$5,563,232,215, and the carriers would be up against an annual deficit of \$378,078,125.

In either instance, there would not be a cent returns for stockholders. Of course, for those who desire government ownership this would be a quick method of getting it, for it is a sure thing that the public would not stand for the imposition of higher rates to pay such a deficit.

It must be remembered, in the last analysis of the matter, that the public would have to pay this wage bill, and when we say the public, everybody, rich and poor, is included. A vast percentage of the burden would be passed on to laboring men and women in other lines of industry in the form of increased living expenses. From the effort to meet such increased expenses there would necessarily result a wide extension of the struggle to raise wages in all other lines of industry, and the disturbance and organization of business in general.

It is our belief that the people of this country are perfectly willing that railway labor, with its hazard, skill and responsibility, should be well compensated, even to the point

of liberality. In view of this friendly public sentiment, it is not wise for labor organizations to seek to impose upon the farmers and producers of the country a crushing burden at a time when the losses of readjustment are so keenly remembered.

The argument that this theory of the living wage has been successfully tried out in Australia is not sustained by the record in this case nor by the general information accessible to the Labor Board. Most of the evidence on this point is out of date. It is admitted by the representative of the employees that Premier Hughes of Australia rejected the living-wage recommendation of the commission, reporting it as an impossible burden to industry.

Neither is it believed that the Australian countries can be pointed to as examples of industrial prosperity and happiness. Men are prone to believe that ideal conditions exist in distant lands, and we have even heard Soviet Russia extolled as the land of superlative prosperity for labor. Those who have been privileged to view conditions in such countries at short range have usually returned to the United States quite convinced that it is better to strive for the improvement of what we have than to supplant it by the visionary experiments of wild-eyed agitators.

The lengthy newspaper article of Wm. R. Hearst incorporated in the dissenting opinion is not evidence in this case. Mr. Hearst was not sworn nor cross-examined, nor is it shown that he is an expert on questions of the sort here involved. In so far as the article in question is adopted as the views of the signer of the dissenting opinion, it is pertinent and important, but a discussion of its many fallacies and misstatements need not now be entered upon in detail.

It is worthy of note, however, that this article thus approvingly quoted contains the statement that the unjustifiable lowering of the shopmen's wages caused the strike. Such a statement adopted and endorsed in an official document by a member of this Board deserves, at least, brief comment.

In the judgment of a majority of the Labor Board, and, we believe, of a great majority of the people, the shopmen's strike was an

egregious blunder without any real justification, and this is said with the kindest feeling for the employees who have suffered most from its effects. It has wrought harm to all and good to none. It has burdened the railways with an unjust expense, has inflicted great losses upon the public, especially the food producers, and has resulted in approximately \$177,535,524 loss to the strikers. For all this, the men on strike have won nothing. They have gained no concession as to any matter upon which they struck. For months the strike has been merely a struggle upon the part of the men to regain their positions.

In vivid contrast stands the course of the maintenance of way employees, whose officials wisely prevented a strike. Since July 1 this class of employees has received wages approximating \$147,656,866, which would have been lost on strike, and now, by orderly and legal processes, they are receiving under the present decision an increase in wages approximating \$20,000,000 per year.

Perhaps, there is no better time and place to emphasize the belief of a majority of the Labor Board that railway strikes are utterly useless and wasteful, and that the employees will always gain better results at the hands of any tribunals fairly constituted and representative of the people than they will by making war on the carriers and the public.

The most disturbing influence prevalent in railway operation today is the continuous preaching that the laboring man cannot trust the courts and tribunals of his country, and must therefore resort to force for the attainment of justice.

Nothing here said should be construed as an effort to discourage the legitimate activities of organized labor. It serves an essential purpose in the body politic. The conduct of the maintenance of way organization in connection with this wage controversy exemplifies the exalted service that may be rendered to labor and to our Republic by statesmanlike leadership of the railway employees.

Attest:

L. M. PARKER,
Secretary.

EMPLOYMENT OFFICE REPORTS FOR OCTOBER, 1922

The Movement of Labour

THE business of the offices of the Employment Service of Canada for the month of October, 1922, was somewhat greater in volume than during the preceding month and during the corresponding period of 1921. The accompanying chart, which presents the returns from the offices on the basis of daily averages over half-month periods, shows a continued falling-off in applications, vacancies and placements, during the first half of October, followed by a sharp increase during the latter half of the month. This expansion in business is noticed chiefly in the Province of Saskatchewan where fall ploughing and the completion of threshing operations created a keen demand for workers. Placements of farm workers during October, 1922, numbered 22,989. The offices reported that the average number of applications for employment registered at the offices during October was 1,993 during the first half and 2,913 during the second half of the month. During

the preceding period applications averaged 2,210 daily, and during the corresponding period of last year the average number was 1,729 and 1,437 during the first and second half of the month, respectively. Vacancies notified by employers to the Service averaged 1,700 daily during the first half of the month, as compared with 2,100 during the preceding period and 1,522 during the corresponding period a year ago. During the latter half of the month vacancies averaged 2,600 daily, as compared with 1,072 during the same period of 1921. The offices of the Service effected an average of 1,565 placements daily during the first half of October, as compared with 1,846 during the latter half of September and with 1,278 during the corresponding period in 1921. The average number of placements effected during the latter half of the month was 2,445 daily, as compared with an average of 938 during the same period a year ago. The following table presents the placements

effected to date by the offices of the Employment Service:—

Year	Placements		
	Regular	Casual	Total
1919 (10 months)....	268,001	37,904	305,905
1920.....	366,547	79,264	445,811
1921.....	280,518	75,238	355,756
1922 (10 months)....	263,270	81,863	345,133

During the month of October, 1922, the number of vacancies reported by employers was 56,797, of which 46,877 were for men and 9,920 for women. Applications for employment registered at the offices numbered 64,699, of which 54,230 were from men and 10,469 from women. The offices made 54,953 references to positions during the month and effected a total of 53,013 placements, of which 43,010 were in regular employment and 10,003 in casual work. Of the placements in regular employment, 39,960 were of men and 3,050 of women.

Placements in regular employment by provinces during the period under review were as follows: Nova Scotia—404 men, 140 women; New Brunswick—431 men, 90 women; Quebec—1,520 men, 509 women; Ontario—8,944 men, 1,002 women; Manitoba—3,407 men, 407 women; Saskatchewan—20,326 men, 289 women; Alberta—2,629 men, 359 women; British Columbia, 2,299 men, 254 women.

MARITIME PROVINCES.

The majority of farmers in these provinces were supplied with the necessary workers for the winter and only a few orders for this class were registered at the offices. At Halifax a few apple pickers were in demand during the early part of the month. Activity in the construction groups continued brisk. A slight difficulty was experienced in securing carpenters, bricklayers and plumbers, to meet the demand at Moncton, Chatham, St. John and Amherst. There was a falling-off in the number of workers employed

on city streets, but road and highway improvements continued to provide work for many. At Moncton and Amherst a few labourers were required for railway maintenance work. In the logging group, a number of placements of experienced bushmen were made from Amherst, Chatham, Moncton and St. John. The two latter offices reported a few vacancies for coal miners. Work along shore was fairly brisk and at Chatham a number of stevedores were placed. The demand for women clerical workers was very small, but difficulty was experienced in securing sufficient trained domestic servants to meet the demand.

QUEBEC.

In this province requests for experienced bushmen were coming in more rapidly, and numbers of men were sent to the camps from Hull, Montreal and Quebec City. There was a further reduction reported in the demand for farm workers, although a few orders for this class were reported at Montreal and Three Rivers. The demand in the construction group remained approximately the same as reported during the preceding period with a slight scarcity of experienced carpenters.

ONTARIO.

A decline in the demand for farm labour was reported by the offices in Ontario, although many placements were effected in this group from Brantford, Ottawa, St. Thomas and Peterborough. Workers for the gathering of the sugar-beet crop were in demand at Chatham. There was active employment in the building trades and vacancies for carpenters, bricklayers and plasterers were registered at the offices at Kitchener, Brantford, Ottawa and Kingston. Street paving and highway construction continued to provide work for many. At St. Thomas and Timmins numbers of labourers were placed on railway extension and maintenance works. Experienced bush-

men were in great demand at Ottawa, Pembroke, Port Arthur, Timmins and Toronto and, in most cases, little difficulty was felt in securing the workers. Labourers for sawmills and pulp-mills were required in small numbers at Pembroke and Timmins. At Oshawa a few motor mechanics and assemblers were placed. At Kitchener there was reported a shortage of textile workers, while at Toronto several women were placed as power machine operators on canvas tops and side curtains for automobiles. The beet-sugar industry at Chatham also asked a number of workers, while at Kingston vacancies were reported for a bobber and polishers on soft metal. Work along shore was fairly brisk, especially at Sarnia, where several sailors and stevedores were in demand. In the women's section a number of non-resident kitchen workers and waitresses were available, with a shortage of experienced cooks and generals.

MANITOBA.

Requirements for farm labour declined considerably during the month, reaching the normal demand for general fall work. In the construction groups there were several vacancies for concrete-form carpenters, construction labourers and painters, and at Winnipeg casual work of a seasonal nature gave employment to many. At Brandon and Portage la Prairie many men were placed as section and extra gang hands on railway work. Numerous requests for labourers and tie makers were received, and from Brandon, Dauphin and Winnipeg, groups of bushmen were sent to the camps in the northern parts of Manitoba and Ontario.

SASKATCHEWAN.

A marked increase in the demand in the agricultural group was reported by the offices, the calls being mainly for thresher hands and for workers for the fall ploughing. The unusual demand at this season is due in part to the return to the East and to British Columbia of

large numbers of the harvesters. Placements in this group during the month totalled 19,156, the greater number of these being effected from the offices at Moose Jaw, Regina, Saskatoon, Swift Current and Estevan. Construction operations were fairly brisk and few building tradesmen were unemployed. At Regina a number of elevator carpenters were required, and at Saskatoon and Swift Current several building labourers and mechanics were placed. Workers for road construction and waterworks extensions were called for at Yorkton and North Battleford, while section men and extra gang hands were in demand at Regina and Saskatoon. From the offices at Yorkton, Regina, Swift Current and Saskatoon, many experienced bushmen were sent to the logging camps in Manitoba, Ontario and British Columbia. In the mining group there were several calls for workers, a number of whom were sent to the coal mines at Bienfait and Roche Percée. There was a slight decline in the number of vacancies reported for resident servants but casual workers were placed in considerable numbers.

ALBERTA.

A fairly brisk demand for farm help for fall ploughing was reported during the early part of the month, especially in the vicinity of Calgary, Edmonton and Lethbridge. At Medicine Hat a few potato pickers were required. Many teamsters, labourers and carpenters were required near Lethbridge, where several irrigation projects were under way, while a number of men were placed on road and highway work, undertaken by the Provincial Government as a measure towards the alleviation of the unemployment situation. Labourers and graders were required for railway maintenance work near Calgary, Drumheller and Edmonton. The demand for bushmen was very slight, a few men being placed from Calgary and Edmonton. From Lethbridge a few coal miners were placed.

BRITISH COLUMBIA.

During the early part of the month the offices at Kamloops, Kelowna, Vernon and New Westminster reported a demand for fruit pickers, but during the latter part of the month few vacancies were received in this group. There were no heavy demands for workers in the building and construction groups, although Cranbrook and Vancouver reported a few orders for carpenters, plasterers and building labourers. At Revelstoke and Kamloops road work continued very brisk and a few labourers were placed on repair work at the irrigation system at Kelowna. Railway maintenance workers and bridge carpenters were required at Kamloops and Vancouver. The demand in the logging industry continued very active, and tie makers and swampers were placed in large numbers from Cranbrook, Prince George, Prince Rupert, Revelstoke and Vancouver. Vacancies for pulpmill and sawmill labourers were received and filled at Cranbrook, Nanaimo and Vancouver. The offices at Prince Rupert and Vancouver reported a number of placements of longshore workers and casual labourers. In the women's section there was little change from the preceding period, the number of vacancies for trained domestic workers exceeding the supply.

Movement of Labour

The offices of the Employment Service made 43,010 placements in regular employment during the month of October, 1922, of which 33,201 were of persons for whom the employment found was outside the immediate locality of the offices at which they were registered. The Employment Service reduced transportation rate was granted to 4,470 of these persons, 2,100 of whom were going to points within the same province as the dispatching office and 2,370 to points in other provinces.

Quebec offices issued 518 special transportation certificates, 58 to bushmen and labourers going to camps at Greening, La Reine, and other points in the province, and 460 to persons, the majority of whom were bushmen going from Quebec, Hull and Montreal to camps near Sault Ste. Marie, Dean Lake, Radiant and Iroquois Falls, Ontario. Of the 1,327 workers despatched at the reduced rate by the Ontario offices, 29 were labourers going from Sudbury to Kippewa, Quebec. The majority of the provincial transfers were bushmen going from the vicinity of Toronto Hamilton and Ottawa, to the lumber camps in the northern part of the province; 17 were yard men and railway labourers going to points near Cochrane and Iroquois Falls; 1 was a chef going from Toronto to Kingston, and 2 were bricklayers going from Sault Ste. Marie and Kingston to Kitchener. Manitoba offices issued 142 certificates to persons travelling to stations within the province, a large number of whom were bushmen going from Winnipeg to Bowsman and Portage la Prairie, and a few were farm hands going to various points in the province. The offices granted also 1,153 certificates to persons going to other provinces, 10 of whom were destined to stations in Saskatchewan. Of the 1,143 persons going from Manitoba to Ontario, the majority were bushmen and tiemakers for camps near Fort William and Port Arthur. Workers in Saskatchewan, who benefited by the Employment Service reduced rate numbered 987, of whom 277 were farm hands, teamsters and coal miners, going to points within the province. One was a motion picture operator travelling from Weyburn to employment at Lanigan. To Manitoba, the offices sent 615 bushmen going to Bowsman, Birch River and Le Pas; to British Columbia, 1 bushman, 1 carpenter and 1 cook travelling to Lambertson and Vancouver, respectively; to Alberta 19 workers, chiefly coal miners, going to Redcliff and Medicine

Hat; and to Ontario 72 bushmen destined to Sudbury, Keewatin and Sault Ste. Marie. Alberta offices granted 185 certificates to persons travelling to points within the province, a number of whom were farm hands, a few coal miners, while several bushmen and cooks were sent to lumber camps. Also 17 workers were despatched to points outside the province, 11 labourers and farm hands going to stations in Saskatchewan and 2 miners and 4 bushmen to Vancouver and Kimberley, B.C. The number of workers travelling from British Columbia at the special rate was 141, 1 of whom was a violinist going from Vancouver to Edmonton, Alta. The majority of provincial

transfers were tiemakers and bushmen going to points near Priestly, Golden and Lamberton. A few were carpenters and building mechanics going to Trail and Kimberley and the remainder included housemaids and institutional workers going to various points in the province. No certificates were issued by the offices in Nova Scotia and New Brunswick.

Of the 4,470 workers who benefited by the Employment Service reduced rate, 1,645 were carried by the Canadian Pacific Railway, 2,595 by the Canadian National-Grand Trunk Railways, 229 by the Timiskaming and Northern Ontario Railway and 1 by the Pacific Great Eastern Railway.

THE EMPLOYMENT SITUATION DURING OCTOBER, 1922, AS REPORTED BY EMPLOYERS

FURTHER moderate improvement in employment conditions was indicated by the employers making returns to the Dominion Bureau of Statistics at the close of October, continuing the favourable movement manifested uninterruptedly for the last six months. The tendency had been slightly upward during October of last year, but the curve of employment as shown in the accompanying chart did not then reach as high a level as for the month under review, the index number having stood nearly 6 points lower.

Statements were compiled from 6,631 concerns with a combined payroll at the end of October, 1922, of 796,632 persons, of whom 785,451 were actually working as compared with 778,641 on September 30. The index number therefore rose from 94.6 on the latter date to 95.8 for the period under review. At the close of October 1921, it had stood at 90.2. The greatest increases over the preceding month were registered in logging, manufacturing (particularly in iron and steel, textiles, pulp and paper and leather)

in coal mining, railway transportation and trade. The gains in iron and steel which occurred mainly in the automobile division, represented recovery from earlier losses, while those in logging, mining, textiles and trade were largely seasonal in character. The volume of employment afforded in sawmills continued to decline heavily and seasonal contractions were also reported in construction and in canning operations.

A more favourable situation was indicated in all sections of the country, except British Columbia, where the trend continued downward. The expansion in Ontario and the Prairie Provinces was the most pronounced, that in the former district occurring mainly in automobile factories and logging camps, while in the Prairie district increased activity in coal mining and in railway transportation accounted for the gain. Employment in all provinces was in greater volume than during the corresponding period of last year, as will be seen from the following table of index numbers:

	Relative weight	Sept. 30, 1922	Oct. 31, 1922	Oct. 31, 1921
Maritime Provinces....	8.3	91.8	91.7	91.4
Quebec and Ontario....	68.7	93.0	94.0	87.2
Prairie Provinces.....	14.5	101.9	105.0	102.6
British Columbia.....	8.5	100.1	100.2	94.3
Canada	100	94.6	95.8	90.2

No change in the situation was reported by employers in Montreal during October. Fluctuations were shown in a number of industries, but the net result was a nominal increase only. Textiles, leather, electrical appliance and confectionery plants afforded increased employment. On the other hand, tobacco and electric current concerns were slacker and employment on street railways showed a falling off. Statements were tabulated from 787 firms employing 110,800 workers as compared with 110,792 employees at the close of September. Fairly large additions to staff were registered in Toronto, where 1,409 persons were added to the staffs of the 916 concerns making returns. As their total working force included 110,235 employees this indicated a gain of 1.3 per cent. The manufacturing industries, generally, were more active although rubber factories were hardly as fully employed. Building construction showed improvement, but construction operations on streets and roads were somewhat curtailed. In Ottawa, returns compiled from 142

firms with an aggregate payroll of 13,100 persons, showed that they had enlarged their staffs by 193 workers or 1.5 per cent. Textile, pulp and paper factories were somewhat busier, while employment in lumber mills continued to decline. The tendency in Hamilton also was favourable. Statements were received from 222 firms employing 28,030 persons as compared with 27,707 at the close of September, an expansion of 1.2 per cent. The manufacturers in that city reported a more favourable situation while the construction industries suffered seasonal declines. Almost static conditions were indicated by Winnipeg concerns, 418 of whom employed 31,893 workers as compared with 31,828 at the close of September. Retail trade was much more active and confectionery, flour and cereal factories recorded some improvement. On the other hand, printing shops, sawmills and electric current plants manifested increased slackness, and building operations were somewhat curtailed. In Vancouver, contractions were again registered, 1,506 workers having been released by the 284 concerns reporting, whose payrolls included 22,599 persons. The greater part of this 6 per cent decline occurred in shipping and stevedoring. The index numbers of employment in these cities as at the end of September and at the end of October are given in the following table:—

	Relative weight	Sept. 30, 1922	Oct. 31, 1922
Montreal	14.1	92.3	92.6
Toronto	14.0	90.9	92.2
Ottawa	1.7	98.4	100.6
Hamilton	3.6	87.4	88.4
Winnipeg	4.1	98.8	99.5
Vancouver	2.9	100.7	94.9

The Manufacturing Industries

Employment in the manufacturing industries increased by almost 1 per cent in October and the index number stood higher than at any period in 1921 or 1922. The situation again compared favourably with that indicated during the corresponding month of last year, when very little change had been shown. As mentioned above, a considerable share of the increases in iron and steel during the month being surveyed were in the nature of recovery and the marked gains which occurred also in the textile industries represented revival from the seasonal depression that existed during the summer. Pronounced improvement was indicated in the leather industries; musical instrument, glass, electrical appliance, brass and kodak factories also reported increased activity. Sawmills continued to register severe curtailment of operations and fruit and vegetable canneries showed further contractions. Tobacco manufacturers and producers of electric current moreover showed smaller payrolls. Statements were compiled from 4,354 manufacturers with an aggregate working force of 436,198 persons, as compared with 432,300 employees on September 30.

ANIMAL PRODUCTS, EDIBLE.—Varying conditions were noted in this industry during October, operations in fish canneries in the Maritime provinces and British Columbia decreasing, while in Ontario and the Prairie Provinces greater activity was indicated in abattoirs and meat packing establishments. The tendency on the whole, however, was downward. Returns were received from 194 concerns employing 14,400 persons, as compared with 14,534 at the end of September, a decline of .9 per cent. During the corresponding period of

last year improvement had been indicated, but employment at that time was on a somewhat lower level than for the month under review.

LEATHER PRODUCTS.—A more favourable situation was reported in this group than for many months past, 887 persons having been added to the staffs of 211 manufacturers making returns. As the combined payroll included 18,265 persons as compared with 17,378 workers in the preceding month, this indicated an expansion of 5.1 per cent. All provinces shared in the upward movement to some extent, but the gains in Quebec were the most noteworthy. These increases, which carried on the upward trend manifested since the end of July, indicated largely revival in trade from dullness that had been registered during the greater part of the year. In October of last year moderate increases in payroll had been reported, but the index numbers for the two periods practically coincided.

LUMBER AND ITS PRODUCTS.—Statements compiled from 787 concerns in this group showed an aggregate payroll of 50,431 persons as compared with 54,928 workers at the close of September, a contraction of 8.2 per cent. Considerable curtailment of operations was recorded in lumber mills and activity in container factories also declined. On the other hand, furniture, carriage and match establishments were busier. Recessions were registered in all provinces, but those in Ontario were decidedly more extensive than elsewhere. Decreases on a smaller scale had also been recorded during October, 1921, but the index number at that time stood approximately 13 points lower.

MUSICAL INSTRUMENTS.—The upward tendency indicated in this group during the last two months continued during October, when 307 persons were added to the staffs of the 48 manufacturers making returns who employed 3,324 workers. Practically all this increase of 10 per cent occurred in Ontario. The situation again compared favourably

with that reported during the corresponding period of 1921.

PLANT PRODUCTS, EDIBLE.—The conclusion of the season's operations in fruit and vegetable canneries caused large numbers of workers to be released from such establishments, particularly in Ontario and British Columbia. On the other hand, activity in flour and cereal mills, sugar refineries, chocolate and confectionery factories increased considerably. Returns were received from 377 concerns employing 29,247 persons as compared with 29,580 workers on September 30, the difference representing a decline of 1.1 per cent. Somewhat less extensive reductions in personnel had been reported during October, 1921, but the level of employment was practically the same as for the month under review.

PULP AND PAPER PRODUCTS.—Marked improvement was manifested in this group, increased activity being indicated by manufacturers of pulp and paper and of paper products and in lesser degree in printing and publishing shops. The additions to staffs in Quebec were particularly large, but improvement was also shown in Ontario and the Maritime provinces. Statements were tabulated from 506 concerns with a total payroll of 51,312 persons, or 2.7 per cent more than in September. Increases of practically the same size had been recorded during October of last year, but the situation then was considerably less favourable than during the period under review.

RUBBER PRODUCTS.—Employment in rubber footwear factories declined during the month, and tire factories also were somewhat slacker. Thirty-one manufacturers of rubber products reported that they employed 9,959 persons as compared with 10,075 workers at the close of September, a decline of 1.2 per cent. Practically all the loss took place in Ontario. Improvement had been reported during October of last year, although employment at that time was on a very slightly lower level.

TEXTILE PRODUCTS.—The upward movement indicated in this industry during September was again in evidence in October, 2,196 persons having been added to the staff of the 646 manufacturers making returns. As their total payroll included 71,834 persons as compared with 69,638 employees in their last report, this indicated an advance of 3.2 per cent. The improvement was widespread in application, being registered to some degree in all districts. Ontario firms, however, absorbed more than half of the additionally employed workers. Garment, cotton, woollen, hosiery, knitting, lace, carpet and bag factories were decidedly busier. Employment during the corresponding period in 1921 had also shown expansion, but the situation was not so favourable as in October of this year.

TOBACCO, DISTILLED AND MALT LIQUORS.—Tobacco factories were not as fully engaged as in September, mainly in Quebec. Reports were compiled from 106 concerns with a total working force of 11,548 persons, or 267 less than in the preceding month, a contraction of 2.3 per cent.

CLAY, GLASS AND STONE PRODUCTS.—The production of glass showed an increase during October, but brick, tile and cement concerns were less active. The 129 manufacturers making returns reported a combined payroll of 9,714 persons, as compared with 9,450 employees on their staffs in September. Quebec and Ontario shared equally in this expansion of 2.8 per cent. An increase in employment on a somewhat smaller scale had been indicated during October 1921, and the index number at that time was rather more than 3 points lower than for the same month of this year.

ELECTRIC CURRENT.—The favourable movement indicated by producers of electric current for many months appeared to be checked during October and there were contractions in em-

ployment involving the release of 236 persons, or 2.1 per cent of the payroll. Returns were tabulated from 103 concerns with a staff of 11,090 workers as compared with 11,326 employees on September 30. The decline was reported mainly in Quebec and Ontario.

ELECTRICAL APPARATUS.—Employment in this industry continued to increase during October, the gains being registered almost entirely in Ontario. A combined working force of 6,761 persons was indicated by the 31 concerns making returns, who had employed 6,406 workers at the end of September, an increase of 5.5 per cent. The level of activity in this group was considerably higher than during the same month of last year.

IRON AND STEEL PRODUCTS.—Considerable revival was reported in this group, particularly in automobile factories in Ontario. The production of general machinery, heating appliances and tools also showed an increase, while shipyards, foundries and machine shops recorded improvement. Rolling and forging mills, however, were slacker. Reports were compiled from 759 concerns, whose payroll aggregated 115,699 persons as compared with 112,171 employees on September 30, the difference representing an increase of 3.1 per cent. All provinces except Quebec shared in the progressive movement. The tendency during October of a year ago had been downward and employment during the month under review was in greater volume than at that time.

NON-FERROUS METAL PRODUCTS.—Brass, bronze and copper factories in Ontario were more fully employed than in the preceding month and nickel-copper smelters and refineries also were busier. The 123 concerns making returns in the non-ferrous metal products group, whose payroll included 10,694 persons, reported that they had enlarged their working force by 282 employees, or 2.7 per cent dur-

ing the month. Minor increases in personnel had also been registered during October 1921, but the level of employment was lower than for the same month of this year.

Logging

Further extension of operations was recorded in this group during October, when the additions to payrolls exceeded those indicated during any month of 1921 or 1922 to date. Returns were tabulated from 192 employers with a total working force of 23,933 persons on October 31, as compared with 16,217 in the last report. This increase of 7,716 men, or 47.6 per cent, was shared to some extent by all provinces; the gains in Ontario, however, were the largest. Seasonal activity had also been shown during October, 1921. The index number for the period under review, however, stood slightly over 6 points higher than at that time.

Mining

COAL MINING.—Marked improvement was evidenced in the employment afforded in both eastern and western coal fields, 1,970 persons having been added to the staffs of the 86 operators making returns. Their working force included 30,245 persons as compared with 28,275 in September, there being, therefore, an increase of 7 per cent. Less pronounced expansion had been reported during the corresponding month of last year, but the situation was scarcely as favourable as in October, 1922.

NON-METALLIC MINERALS.—Activity in asbestos mines in Quebec declined considerably, and quarries also were slacker. Returns were tabulated from 68 concerns employing 5,726 men, as compared with 6,140 workers on September 30, the difference representing a contraction of 6.7 per cent. Employment in this group was in considerably greater volume than during the corresponding period of last year, the

index number being some 19 points higher than on October 31, 1921.

Transportation

STREET RAILWAY AND CARTAGE.—Statements were received from 117 concerns in this group employing 21,472 persons or 666 less than on September 30. The greater part of this 3 per cent decline occurred on street railways in Ontario, although in Quebec the tendency was downward also. Expansion had been indicated during October, 1921, but the situation was not so good as in the same month this year.

RAILWAYS.—Continuation of the favourable movement indicated recently in railway transportation was apparent during the month under review. A combined working force of 78,900 persons was recorded by the 130 concerns and divisional superintendents making returns. As they had employed 77,398 workers on September 30, this was an increase of 1.9 per cent. Of the net increase in personnel of 1,502 persons reported by all the railways making returns, more than 1,000 were absorbed by the Canadian Pacific Railway, approximately 100 by the Grand Trunk and not quite 400 by the Canadian National Railways. The majority of the additional employees were employed by the railways in the Prairie provinces, although increased activity was also manifested in Quebec and Ontario. The tendency during October, 1921, had also been upward, but the index number then was slightly lower than for the month under review.

SHIPPING AND STEVEDORING.—Further reductions in payroll were registered in water transportation during October, mainly in Ontario and British Columbia. The 67 concerns from which statements were received employed 14,669 workers as compared with 15,082 at the close of September, a decrease of 2.7 per cent. Improvement had also been reported during October of last year, but the index number was considerably lower than for the period being surveyed.

Construction

All three divisions of the construction industry suffered curtailment of operations during October. The losses were especially heavy in the employment afforded on highways and roads, those in

building and railway construction being on a much smaller scale. A group payroll of 73,552 workers was recorded by the 439 concerns from which returns were tabulated, who had employed 80,702 persons in their last report, a decline of 7,150 persons or 8.9 per cent. Of that number over 4,900 were released from highway construction, slightly more than 900 by building contractors and approximately 1,300 by the construction and maintenance departments of the railways. All provinces shared in the retrogressive movement. The tendency in the construction industries as a whole had also been downward during the corresponding period of last year, and the index number stood some 14 points lower than in October, 1922. The volume of employment afforded by the railway construction had been somewhat larger, but the other two divisions of the group were not as active as during this autumn.

Trade

Marked improvement was reported in retail establishments during October, and

increases in personnel on a smaller scale were also recorded in wholesale houses. The gains were of a general character except in British Columbia, where conditions showed very little change. Statements were received from 723 employers in the trade group employing a total sales force of 57,671 persons, or 1,281 more than at the end of September. This was a gain of 2.3 per cent. Increases in employment on a much smaller scale had been indicated during October 1921, and the index numbers for the two periods were practically on a level.

The table on opposite page gives the index numbers of employment as reported by employers in the various industries as at September 30 and October 31 of this year and October 31, 1921. The first column represents the proportion of workers in each industrial group in relation to the total number of workers in all groups for the month under review. (Number of workers employed on January 17, 1920 equals 100).

FAIR WAGE CONTRACTS, NOVEMBER, 1922

DURING November the Department of Labour received for insertion in the LABOUR GAZETTE the following information relative to sixteen fair wage contracts, fourteen of which were awarded by the Department of Public Works and two by the Department of Railways and Canals. These contracts contain the usual fair wage clause which provides for the prompt payment of such wages as are current in the district in which the work is to be performed, and for observance on the various works under contract of the prevailing hours of labour, and which otherwise prevents abuses and secures the legitimate rights of the labour employed.

A statement was also received as to the supplies ordered by the Post Office Department, subject to the Regulations for the Suppression of the Sweating

System and the securing of fair wages, etc.

DEPARTMENT OF PUBLIC WORKS.

Construction of wharf, Canso, N.S. Name of contractor, The Sydney Construction Company, Limited, Sydney, N.S. Date of contract, Oct. 21, 1922. Amount of contract, unit prices.

Breakwater improvements, Friar's Head, N.S. Name of contractor, E. M. Dickson, Louisburg, N.S. Date of contract, Oct. 14, 1922. Amount of contract, unit prices.

Construction of wharf, St. Etienne de Malbaie, La Malbaie, Que. Name of contractor, Onésime & Jos. Poliquin, Portneuf, Que. Date of contract, Oct. 28, 1922. Amount of contract, unit prices.

Supply and installation of automatic fire proof steel rolling doors at Printing Bureau, Ottawa, Ont. Name of contractor, The A. B. Ormsby Co., Ltd., Toronto, Ont. Date of contract, Nov. 1, 1922. Amount of contract, \$5,742.

Repairs and extension to wharf, Betsiamites (Betsiamites), Que. Name of contractor, Elz. Méthot and Nap. Fournier, Montmagny, Que. Date of contract, Nov. 7, 1922. Amount of contract, unit prices.

Construction of wharf, Aultsville, Ont. Name of contractor, Fallon Bros., Cornwall, Ont. Date of contract, Nov. 8, 1922. Amount of contract, unit prices.

Repairs and extension to breakwater, Devil's Island, N.S. Name of contractor, D. G. Kirk and Son, Ltd., Antigonish, N.S. Date of contract, Nov. 8, 1922. Amount of contract, unit prices.

Dredging, Courtenay River (Comox-Alberni), B.C. Name of contractor, Grant Smith & Co. and McDonnell, Vancouver, B.C. Date of contract, Nov. 3, 1922. Amount of contract, Class "B" \$0.85 per cu. yd. (in situ).

Reconstruction of wharf, Vananda (Texada Island), B.C. Name of contractor, R. Bumstead, Vancouver, B.C. Date of contract, Nov. 9, 1922. Amount of contract, \$3,673.

Construction of wharf, Davis Bay (Comox-Alberni), B.C. Name of contractor, R. Bumstead, Vancouver, B.C. Date of contract, Nov. 9, 1922. Amount of contract, \$5,245.

Repairs to wharf and renewal of float, Quatsino (Comox-Alberni), B.C. Name of contractors, McDonald, Watson & Wither, Victoria, B.C. Date of contract, Nov. 9, 1922. Amount of contract, unit prices.

Repairs to piers, Kincardine, Ont. Name of contractors, David Keys and

John Keys, Kincardine, Ont. Date of contract, Nov. 13, 1922. Amount of contract, unit prices.

Alterations and additions to Post Office fittings, Clark's Harbour, N.S. Name of contractor, Geo. W. Thomson, Halifax, N.S. Date of contract, Nov. 13, 1922. Amount of contract, \$856.

Alterations to Post Office building and fittings, Prescott, Ont. Name of contractor, Geo. A. Armstrong, Spencer-ville, Ont. Date of contract, Nov. 18, 1922. Amount of contract, \$3,200.

DEPARTMENT OF RAILWAYS AND CANALS.

Dredging on the Balsam-Simcoe Division of the Trent Canal. Name of contractor, Fred A. Robertson and Company. Date of contract, Nov. 15, 1922. Amount of contract, schedule rates.

Construction of bridge over Welland Canal at foot of Lock 25. Name of contractor, The Hamilton Bridge Works Co., Ltd. Date of contract, Nov. 28, 1922. Amount of contract, schedule rates.

POST OFFICE DEPARTMENT.

The following is a statement of payments made in November for supplies ordered by the Post Office Department, subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages, and the performance of work under sanitary conditions.

Nature of order	Amount of order
Making metal dating stamps and type, and other hand stamps and brass crown seals	\$ 1 344.31
Making and repairing rubber stamps, daters, etc.....	269.79
Making up and supplying letter carriers' uniforms, etc.....	6,345.67
Repairing letter boxes, etc., and hampers	465.00
Repairing scales	34.30
Supplying mail bag fittings.....	12,672.56
Supplying ink	63.38

PRICES, RETAIL AND WHOLESALE, IN CANADA, NOVEMBER, 1922

IN prices both the index number of wholesale prices and the family budget of retail prices advanced to slightly higher levels. The movement in both was influenced by seasonal changes in agricultural products, though in wholesale prices other groups showed some important fluctuations.

In retail prices the average cost of a weekly family budget of twenty-nine staple foods in terms of the average prices in some sixty cities was \$10.29 at the beginning of November as compared with \$10.23 at the beginning of October; \$11.08 for November, 1921; \$16.92 for June, 1920 (the peak); and \$7.96 for November, 1914. The total for food, fuel, and rent was \$20.88 at the beginning of November as compared with \$20.86 at the beginning of October; \$21.60 for November, 1921; \$26.92 for July, 1920 (the peak); and \$14.36 for November, 1914. In foods average prices are now back to levels of the spring of 1917, while for the total budget the recession has been less because rents have not yet fallen and fuel has not fallen substantially. The chief changes for the month were increases in sugar and tea and seasonal increases in milk, butter, and cheese and a substantial seasonal increase in eggs. There were no violent declines, but meats, bread, flour, rolled oats, beans evaporated apples, and potatoes were lower. Fuel and lighting and rentals were down somewhat.

In wholesale prices the Departmental index number showed a small advance, the first since July, due partly to seasonal advances in grains and fodder and in dairy products, though these were offset somewhat by declines, also seasonal, in cattle and hogs. The index stood at 221.7 for November as compared with 219.8 for October; 227.3 for November, 1921; 304.2 for November, 1920; 356.6 for May, 1920 (the peak); and 137.5

for November, 1914. The most important advances were in grains, except flaxseed which was lower, bran and shorts, butter, cheese, milk, eggs, flour, and sugar; and less important increases in sheep, some fruits, raw and manufactured cottons, hides, spruce, nails, linseed oil and turpentine, and some metals. Declines occurred in cattle and beef, live and dressed hogs, poultry, some vegetables, jutes and hessians, coke, gasoline, and raw furs. As compared with a year ago all groups were lower except grains and fodder, animals and meats, textiles, hides and leather, metals, and fuel.

The index number of wholesale prices is based on the quotations for 271 commodities and is the simple average of the percentages of current prices for the several commodities in relation to the average prices for the base period, 1890-1899, these being, therefore, made equal to 100. The quotations for most farm products are obtained weekly and averaged for the month; the quotations for other commodities are taken for the middle of the month. The table of index numbers shows the changes by groups and sub-groups for the previous month and for the corresponding months back to 1913.

A special index number (comprising fifty of the more important commodities selected from the 271 in the Departmental list) including twenty foods, fifteen raw materials and fifteen manufactured goods, based upon price levels in 1913 as 100, showed an advance to 152.1 in November as compared with 147.3 in October; 147.2 in November, 1921; 211.9 in November, 1920; and 102.5 in November, 1914. Twenty-one commodities advanced, five declined, and twenty-two showed no change. Advances occurred in grains, dairy products, flour, sugar, cotton, hides, leather, spruce, linseed oil and turpentine; de-

clines occurred in cattle and beef, hogs, gasoline and rope.

The index number of wholesale prices in Canada published by the United States Federal Reserve Board, which included thirty-three raw materials, twenty-eight semi-manufactured or producers' goods, and thirty-eight finished or consumers' goods, and based upon price levels in 1913 as 100 showed an advance in October to 145 as compared with 144 in September; 149 in August; 154 in July; and 149 in October, 1921. As compared with September all groups were higher, while as compared with a year ago goods imported and producers' goods were higher but the other groups were lower.

The Canadian Bank of Commerce index number of exports rose from 144.71 in mid-October to 145.82 in mid-November while the index of imports fell from 166.46 to 162.44. The decline in imports more than offset the rise in exports, and the combined index number fell from 155.58 in October to 154.13 in November.

Professor Michell's revised index number of wholesale prices in Canada from 1919 to date, based on forty articles, twenty foods and twenty manufacturers' goods, with prices during 1900 to 1909 as 100, advanced to 168.3 in November as compared with 166.2 for October; 162.9 for September; 164.9 for November, 1921; 225.4 for November, 1920; and 118.4 for November, 1914. Both foods and manufacturers' goods advanced.

The table of retail prices and rentals shows the prices at the beginning of November of seventy-two staple food-stuffs, groceries, coal, wood and coal oil, and the rent for six-roomed houses in some sixty cities throughout Canada. All prices are for delivered goods. The exact quality, for which the quotation is given, is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity, in order that

the statistics may be available for purposes of comparison from month to month, from city to city, etc. The prices of foods and groceries in each city, except milk and bread, are the averages of quotations reported to the Department and to the Dominion Bureau of Statistics by a number of representative butchers and grocers in each. The prices of fuel and the rates for rent are reported by the correspondents of the LABOUR GAZETTE.

Statistics similar to these were published each month from 1910 to 1920, the figures during this period being secured at the middle of each month by the correspondents of the LABOUR GAZETTE resident in each locality from dealers who did a considerable business with workingmen's households. From 1910 to 1915 the table contained a list of only the twenty-nine foods included in the family budget, with laundry starch, coal, wood, coal oil and rent. In 1915, when monthly publication of the budget in the LABOUR GAZETTE was begun, it was decided to extend the list of foods to 40, and in 1920 the list of foods and groceries was still further extended to include over 100 items.

Beginning with October 1922, a number of commodities were dropped from the list and in the case of a number of articles the average prices of the grades most sold have been given owing to the impossibility of securing prices for uniform grades for the various cities from month to month.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts, with good modern conveniences. The second class is of houses in fair condition less desirably located, but still fairly central, without modern conveniences.

The weekly budget of a family of five, calculated in terms of the average

COST PER WEEK OF A FAMILY BUDGET OF STAPLE FOODS, FUEL AND LIGHTING, AND RENT IN TERMS OF THE AVERAGE PRICES IN SIXTY CITIES IN CANADA.

prices in the cities for which reports are received, includes twenty-nine staple foods, laundry starch, coal, wood, coal oil, and rent, these being the items for which statistics have been obtained each month and published in the LABOUR GAZETTE since January, 1910. The quantities of each commodity included are modifications of those employed in similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance, the only fruits are evaporated apples and prunes, and the only fresh vegetable is potatoes. But as market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportion of expenditure on the various classes of foods tends to be maintained. At times when the price of an article heavily weighted for this purpose rises (or falls) abnormally the increase (or decrease) in food prices so indicated is exaggerated, and this should be taken into account in using the budget as an indicator of changes in the cost of living. In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the differences in the heating value of the various fuels. It was estimated, when the budget was first published in 1912, that these calculations represented from sixty to eighty per cent of the expenditure of an ordinary family, according to the total income. For the average family of five the expenditure on these items of food, fuel, light and rent would be perhaps two-thirds or about sixty-five per cent of the total income. While the budget serves to show the increase or decrease from time to time in the cost of the items included, it does not purport to show the minimum cost of food

and fuel supplies for an average family in the Dominion or in any one province. The quantities of meats, dairy products, cereals, etc., included were adopted as affording a liberal supply for the healthy family of a man at hard physical work. On the other hand an average family with an income sufficient to do so would buy less meat, etc., but more fruits, fresh and canned vegetables, etc., so that comparative expenditure would be little changed.

Retail Prices.

Meats all averaged lower in November. Sirloin steak was down from 29.1c per pound to 27.7c. The decline was general in all provinces. Round steak showed about the same general decline as sirloin and averaged 22.6c per pound. Rib roast declined from 22c per pound to 20.9c. Shoulder roast was lower about 1c per pound to 15c. Veal averaged 18.4c per pound as compared with 18.7c in October. Mutton fell from 27.2c per pound to 26.9c, all provinces showing a decline except New Brunswick and Quebec which were up slightly. Pork roast was lower about 2c per pound at 27.9c. The decline was general. Mess pork averaged 25.9c in November as compared with 26.9c in October. Bacon and hams were down somewhat in the average, the former from 41.6c per pound to 40.9c and the latter from 65.2c per pound to 63c. In fresh fish, cod, halibut and whitefish were lower. Salt herrings and salt cod were down slightly. Canned salmon was down 4c per pound tin, averaging 37.8c. Lard was up slightly at 22.9c.

Dairy products showed a general advance. Fresh eggs averaged 51.6c in November as compared with 41.7c in October and 35.8c in September. The advance was substantial in all provinces. Cooking eggs rose from 37.4c in October to 43.7c in November. Milk was slightly higher at 11.7c per quart, increases occurring in Sydney, Montreal, Kingston, and Calgary, while other localities were unchanged. Dairy butter was up from 38.4c to 38.8c per pound, the increase

being general except in Quebec which averaged slightly lower. Creamery butter was up about 1c per pound to 43.7c. Nova Scotia and Quebec averaged slightly lower, but all other provinces showed advances. Cheese was up from 27.6c to 28.5c per pound.

Bread was slightly lower at 6.7c per pound. Most localities were unchanged. Flour averaged 4.4c per pound as compared with 4.5c in October, Nova Scotia, Quebec, Ontario, Manitoba, and Saskatchewan averaging slightly lower. Rice was steady while tapioca was up somewhat at 12.5c per pound. Canned tomatoes, peas, and corn were down slightly. Onions fell from 5c per pound to 4.5c. Potatoes were again slightly lower, being \$1.15 per ninety pound bag as compared with \$1.21 in October and \$1.44 in September. Evaporated apples declined from 23.9c per pound to 22.6c while prunes advanced slightly to 19.8c per pound. Raisins were down about 1½c per pound to 23.3c, while currants were steady. Raspberry jam and canned peaches showed little change. Orange marmalade was down slightly at 83.2c per four pound tin. Granulated sugar showed a general advance from 8.7c to 9c per pound. Tea was ½c per pound higher at 59c while coffee was slightly lower. Vinegar and salt were steady. Laundry starch and soap were unchanged.

Anthracite coal was down in the average from \$18.61 in October to \$18.48 in November. Prices were lower in Sherbrooke, Brockville, Kingston, Orillia, Brantford, Stratford, St. Thomas, Windsor, and Port Arthur but advanced in Three Rivers, St. Hyacinthe, Peterborough, Hamilton, Woodstock, Chatham, and Brandon. Bituminous coal showed little change at \$12.30 per ton in the average. Hard wood, four foot length, averaged \$12.66 in November as compared with \$12.84 in October, declines occurring in New Glasgow, Galt, and Woodstock. Soft wood was practically unchanged at \$9.47 per cord. Coal oil was steady. Rent was slightly lower in the average, an increase at

Charlottetown being more than offset by a decrease at Sault Ste. Marie.

Wholesale Prices.

GRAINS AND FODDER.—Wheat No. 1 Manitoba Northern, at Winnipeg, rose from \$1.06 per bushel at the beginning of November to \$1.14 the third week and then declined to \$1.08 toward the end of the month. Ontario winter wheat at Toronto rose from \$1.10 per bushel the last week in October to \$1.14 about the middle of November and then fell to \$1.10. Barley at Winnipeg rose from 53c per bushel to 55c. Oats at Winnipeg rose from 47c per bushel to 50c and then declined to 46½c. Oats and corn at Toronto were steady. Flax seed, which had risen in October to \$2.45 per bushel, declined to \$2.02 by the end of November. Rye advanced from 79c per bushel to 83c and then fell to 77c. Hay at Toronto fell \$1 per ton to \$15, while straw advanced slightly to \$10 per ton. Bran and shorts advanced \$3 per ton, the former to \$23 and the latter to \$25.

ANIMALS AND MEATS.—Cattle at Winnipeg declined 25c per hundred pounds to \$4.75 and then recovered to \$5.00. Choice steers at Toronto, which were quoted at \$6.75 toward the end of October, declined to \$6.25 about the middle of the month, and then rose to \$6.75. Dressed beef hindquarters declined from 17c per pound to 15c. Veal was steady. Live hogs at Toronto, which were quoted at \$11.50 per hundred pounds at the beginning of October, declined to \$9.65 the last week in October and recovered to \$10.10 by the end of November. Dressed hogs at Toronto were slightly lower at 17c per pound. Bacon and hams were steady. Sheep advanced from \$6.50 per hundred pounds to \$7.50. Mutton and lamb were unchanged. Poultry at Montreal was lower, dressed fowl being down from 28c per pound to 25c and dressed turkeys from 45c per pound to 43c.

DAIRY PRODUCTS.—Creamery butter at Montreal advanced from 35½c per pound at the beginning of October to

*Preliminary figures. †Nine commodities off the market, fruits, vegetables, etc. One line of spelter was dropped in 1915. ‡Number of commodities varies from month to month.

37c at the beginning of November and then declined slightly toward the end of the month. Cheese rose from 21c per pound to 24c. Fresh eggs at Montreal advanced from 58c to 65c and at Toronto from 60c to 80c. Milk at Montreal was 4c per gallon higher at 25c, while prices at Toronto and Victoria were steady at the recent advances.

FISH.—The export market for codfish was reported better, as stocks in foreign markets had diminished but prices for export were still relatively low. The price of Lunenburg bank dried cod was reported nominal at \$6.50 per quintal delivered at Halifax. The market for pickled fish was unchanged and herring were reported at the low figure of \$4.00 per barrel and mackerel at \$7.50, with very few orders coming in. Fresh halibut at Canso rose from 10c per pound to 12c and whitefish at Toronto declined from 14c per pound to 12½c.

FRUITS AND VEGETABLES. — Early winter apples advanced from \$3.00-\$5.50 per barrel to \$4-\$6. Bananas at Toronto were slightly higher at 8½c per pound. Lemons rose from \$6.50 per box to \$8.00 while oranges declined from \$9.50 per box to \$7.00. Evaporated apples were up slightly to 18c per pound. Currants were also higher at 20c per pound. Potatoes and beans were steady. Onions declined from \$1.75 per seventy-five pound bag to \$1.50. Turnips declined from 75c per seventy-five pound bag to 50c. Canned vegetables were unchanged.

MISCELLANEOUS FOODS.—Rolled oats rose from \$3.15 per ninety pound bag to \$3.50. Tapioca advanced ½c per pound to 8½c. Flour, Manitoba patents, which had declined steadily from \$8.00 in July to \$6.60 in October, rose to \$7.10 in November. Granulated sugar advanced 25c per hundred pounds to \$8.14.

TEXTILES.—Woollen goods showed no change. Raw cotton advanced from 22.45c per pound to 26.3c. Coloured cottons were also up slightly to 78.18c per pound. Raw silk was up from \$8.15

per pound to \$8.40. Hessians were down slightly at 12.05c per yard. Flax tow rose 1c per pound to 15c. Table oilcloth advanced from \$3.96 per piece to \$4.20.

HIDES, LEATHER, BOOTS, AND SHOES.—Hides, steers' and cows', were up from 11c per pound to 12c, and calf skins from 14c per pound to 16c. Leather advanced slightly.

METALS AND IMPLEMENTS. — Black sheets were down 15c per hundred pounds to \$4.90. Aluminum, antimony, lead, spelter, and tin were higher, while copper and quicksilver were down somewhat. Bar silver at New York declined from 67¼c per ounce to 63½c. Solder bar was higher 2½c per pound at 26½c.

FUEL AND LIGHTING.—Coal at Montreal was steady. Connellsville coke at the ovens was down from \$9.00 per ton to \$7.25. Gasoline declined from 32c per gallon to 29c while coal oil advanced 1c per gallon to 21c.

BUILDING MATERIALS. — Spruce deals rose from \$24 per M to \$25. Red oak was \$5 per M higher at \$135. Pine and hemlock were steady. Iron pipe advanced from \$12.58 per hundred feet to \$12.75. Red lead was slightly higher. Wire nails were up 10c per keg to \$3.75. Sash cord rose from 55c per pound to 58c. Linseed oil and turpentine both advanced, the former from \$1.02 per gallon to \$1.08 and the latter from \$2.20 per gallon to \$2.30. Benzine was down from 32c per gallon to 29c. Window glass advanced slightly.

HOUSE FURNISHINGS.—Sad irons rose from \$1.81 per set to \$2.00.

DRUGS AND CHEMICALS.—Soda ash was slightly lower at \$2.45 per pound. Other lines were unchanged.

MISCELLANEOUS.—In raw furs muskrat fell from \$1.35-\$1.85 each to \$1.00-\$1.50. Skunk was also down 25c per skin at \$1.50-\$3.50. Manilla rope was 1c per pound lower at 20c. Raw rubber advanced from 19c per pound to 21½c.

PRICES IN GREAT BRITAIN AND OTHER COUNTRIES

THE following notes and the accompanying tables give the latest information available as to the movement of prices in other countries as compared with Canada.

The index numbers of retail prices which are listed are from official sources unless otherwise stated. The authorities for the wholesale price index numbers are named in all cases.

Great Britain.

WHOLESALE PRICES.—The Board of Trade index number of wholesale prices (1913=100) stood at 154.8 for October, a rise of about 0.6 per cent from the September level. With the exception of September, however, the index number for October is lower than any month since the price slump. During October all groups rose with the exception of meat and fish, iron and steel, other metals and minerals, and cotton.

The *Economist* index number of wholesale prices was at the end of November 23 points or 0.6 per cent above the October level, a much smaller increase than during the previous month. There was an advance of 4 per cent in textiles, the only other advance being a very slight one in grocery food products. Cereals and meats declined considerably, and both minerals and the miscellaneous group (rubber, timber, oils, etc.) showed slight drops.

The *Statist* index number, in continuation of Sauerbeck's figures stood at 130.1 at October 31, an increase of 1.7 per cent. All groups advanced except animal food, which declined 1.8 per cent. All food stuffs rose 1.4 per cent,

and materials rose 2.1 per cent. The general index number is 51 per cent below the peak of April, 1920, and 53.1 per cent above the pre-war average.

COST OF LIVING.—The index number of cost of living computed by the Ministry of Labour was 180 for December 1, which was the same as for the previous month. Food prices increased 2 points, to 178, and clothing decreased 5 points, to 225. Other groups showed no change.

Austria

COST OF LIVING.—The index number calculated by the Paritatische Kommission of a complete budget for one person at Vienna, prices in July, 1914=100, showed for September an increase for the total budget of 91 per cent over the previous month, thus reaching 1,130,600. This was contributed to by increases in foods of 87 per cent the index number reaching 1,353,100, in clothing of 78 per cent, with an index number of 1,915,900, and in heat and light of 135 per cent, to 1,265,800. Rent remained unchanged at 3,300.

The steep rise during September was apparently due to the fact that the Austrian crown fell to half its August value, with the result that many household necessities doubled in price. The government regulated prices per kilogram were raised as follows: flour, from 5,000 to 8,550 crowns; rice, from 4,750 to 8,450 crowns; bacon, from 11,500 to 26,000 crowns. The price of a loaf of bread increased from 3,140 to 6,460 crowns for 1,200 grams. A man's suit (pre-war price, 45 crowns) which cost 450,000 crowns in August, increased to

990,000 crowns in September, and a pair of shoes (pre-war price, 14 crowns) cost 140,000 crowns in August and 270,000 crowns in September.

Belgium.

WHOLESALE PRICES.—The official index number of wholesale prices calculated by the Ministry of Industry and Labour, which has as base, prices in April, 1914=100, was at 364 for September, an increase of 1.1 per cent on the August level. The chief increases were: tar and its products, 5 per cent; clay products, 8 per cent; resin products, 8 per cent; raw rubber, 11 per cent. Food products decreased 5 per cent. In other groups there was little or no change. The textile groups as a whole showed no change, but of its components, wools increased 8 and linens 15 per cent, while cottons decreased 6 per cent and jutes and hemp 13 per cent.

COST OF LIVING.—As stated in the November issue of the LABOUR GAZETTE, there are several index numbers published by the Ministry of Industry and Labour. The unweighted index number for the Kingdom showed an increase of 5 points or 1.3 per cent for October, and that for Brussels alone an increase of one per cent. The weighted index number of 30 foods, which showed an increase of 4 per cent last month took an additional sharp rise of 22 points or 5.7 per cent.

Bulgaria

WHOLESALE PRICES.—The index number of wholesale prices published by the Director General of Statistics has as base, prices in 1913=100. This index number, by yearly averages from 1914 to 1921, and at intervals during 1921 and 1922 is as follows:

Year	Index number	Year	Index number
1914	121	1918	831
1915	185	1919	1,166
1916	268	1920	2,392
1917	667	1921	2,006
	1921	1922	
January ..	2,392	2,172	
April	2,006	2,514	
July	1,721	2,489	
October ...	2,052	2,531 (September)	

COST OF LIVING.—The official index number of retail prices of 47 articles in four chief cities, published by the Director-General of Bulgarian Statistics, on the base prices in 1901-1910=100, which was 3,324 for June, 1922, rose to 3,397 for July, and 3,442 for August.

France.

WHOLESALE PRICES.—The index number of the Statistique Générale (Base, prices 1901-1910=100), stood at 390.0 for October, an increase of 2.4 per cent on the September level. During this period the increase in all industrial materials was 5.4 per cent. At the same time there was a decrease of 1.5 per cent in foods due chiefly to a decided drop in the "sugar, coffee and cocoa" group. The general index number of wholesale prices rose again in November to 407.0, or 4.4 per cent. Index numbers of groups are not yet available. This is the highest figure since March, 1921.

COST OF LIVING.—The Statistique Générale index number of cost of 13 commodities at Paris—prices in 1901-1910=1000—was 3,120 in October, a decrease of 0.4 per cent on the previous month's level, and 3,191 in November, an increase of 2.3 per cent on the October level.

*For South Africa, Australia and New Zealand base is taken as 1000 instead of 100. a. Average for year. b. Quarter beginning in specified month. c. 230 commodities, 1890-1909; 272, 1910-1914; 271, 1915-1922. d. New index number is joined to old index number (38 commodities) and all converted to base 1913-100. e. The commodities in these two new index numbers are in the one case, articles chiefly exported, in the other case, articles chiefly imported. f. First of month. g. Middle of month. h. End of month. j. Monthly average. k. Now Göteborgs Handels och Sjöfartstidning.

Germany.

WHOLESALE PRICES.—On an average for the month of October the Reichsmark was worth .0332 American cents, or just less than one-half the September value. In accordance with this and the general economic situation prices have kept on increasing more and more sharply. The index number of the Federal Statistical Office shows an increase of 49 per cent for the month under review. Goods produced rose 56 per cent or to 258 times the pre-war price, and imported goods rose 33 per cent, and are thus 431 times the price in 1913. The *Frankfurter Zeitung* index number by groups for the past three months is as follows, on the base, prices in July, 1914=1.

Date	Food	Textiles or leather	Minerals	Miscellaneous	Industrial products	All
Sept. 1.....	292	364	426	216	194	289
Oct. 1.....	386	727	549	321	350	441
Nov. 1.....	890	1,539	1,290	720	577	945

Thus the monthly increase from October 1 until November 1 is one of 114 per cent, or in other words, prices were considerably more than doubled during that month. This is not only the highest level yet reached by the index number, but also the highest percentage increase yet recorded.

COST OF LIVING.—The Federal Statistical Office now calculates an index number for clothing, and consequently a new cost of living index number has appeared, which includes food, rent, heat and light, and clothing. The change took place at the beginning of April, but the old index number of cost of living exclusive of clothing still continues to be

published. With a pre-war base period the sum of 13.93 marks was fixed on as the average expenditure of a family of five over a four weeks' period. The expenditure in four weeks for the entire budget on the pre-war estimate was 104.86 marks. The new cost of living index number for the family budget, for 71 cities, average prices in 1913-14=100, is as follows:

1922	Food	Heat and light	Rent	Clothing	All
April	4,356	3,497	287	4,829	3,436
May	4,680	4,411	300	5,688	3,803
June	5,119	4,822	313	6,519	4,147
July	6,836	5,939	343	8,016	5,392
August	9,746	7,716	403	12,571	7,765
September	15,417	16,112	417	26,623	13,319
October	26,623	38,664	22,066

The comparatively low level of rentals is due to Government control of the same.

Italy

WHOLESALE PRICES.—The index number of wholesale prices in Milan, published by the Chamber of Commerce and Industry was for September 104.11, an increase of 1.7 per cent above the August level. An increase of 1.7 per cent followed in October, when both food and industrial materials again showed increases. The index numbers for October were as follows (average prices, May-December, 1921=100), foods, 103.35, industrial materials, 107.07, general average, 105.95.

Poland

COST OF LIVING.—The official index number published in "Labour Statistics

of the Polish Republic," of cost of living of a working class family of four, at Warsaw, taking as base, prices in 1914=1, increased to 908, or 15 per cent in August. Food increased 15 per cent, clothing, 18 per cent, fuel and light, 16 per cent, and sundries, 13 per cent. Lodging and water rates showed no change for the month.

Soviet Russia

WHOLESALE PRICES. — The Department of National Economy of the Commissariat of Finance of Soviet Russia has published index numbers of wholesale prices in Russia. On the base, prices in 1913=1, the index numbers for the whole country are as follows:—

1921

September.	62,854
October.	64,121
November.	81,421
December.	102,771

1922

February.	448,043
March.	894,143
April.	1,949,511
May.	3,655,733
June.	4,173,154
July.	4,618,967
August.	5,026,074

Thus prices in August are shown by this index number to have been over five million times as great as in 1913.

India

COST OF LIVING.—The official index number of cost of living in Bombay, compiled by the Bombay Labour Office, dropped 3 points, or 1.8 per cent during October. Food prices decreased 4.9 per cent, all food-grains, with the exception of rice, taking part in the fall, as well as ghee, potatoes and sugar. Fuel and lighting and house rent remained unchanged and clothing dropped 7.6 per cent.

United States

WHOLESALE PRICES.—The Bureau of Labour Statistics index number of wholesale prices of commodities rose to 154 (1913=100) in October, an increase of 1 point on the September level, or $\frac{3}{4}$ of one per cent.

Farm products increased $3\frac{3}{4}$ per cent due to advance in grains, cotton, hay, eggs and hides. Miscellaneous commodities increased $3\frac{1}{2}$ per cent; foods $1\frac{1}{2}$ per cent and cloths and clothing $3\frac{3}{4}$ per cent. Building materials and house-furnishing goods increased $1\frac{3}{4}$ per cent. Fuel and lighting materials continued to decrease in the face of increased production. Chemicals and drugs showed no change.

The index number calculated by the Federal Reserve Board rose one point in October, thus reaching the level of July and August. Whilst goods produced remained at the same level for October as September, imported goods rose 7 points. Raw materials dropped slightly for the second time, producers' goods rose 3 points, continuing the advance which has been uninterrupted since March, and consumers' goods rose 2 points. Goods exported, which declined sharply in September, recovered in October.

The *Annalist* index number of price of a food budget of twenty-five foods, taking the average of 1890-99 as 100, was 194.158 on October 15, and 195.619 on November 18. The general trend of this index number was upward from the end of November, 1921, until the beginning of September of the current year, when the peak for 1922 was reached. Since that time the general trend has been downwards. In common with the other United States index numbers, there

was a rising tendency in October, but at December 2 the figure was down again below the level at the beginning of July.

Gibson's average index number of wholesale prices of 22 articles of food for November showed another slight increase, standing at 72.2, which is 3.4 per cent above the previous month's level.

Wholesale prices as measured by *Bradstreet's* index number continued to advance in November. The rise was less sharp, however, than during the previous month. The index number at December 1 was \$13.7835, a gain of 3.3 per cent on the previous month's level. The greatest increases were food products and textiles, while fruits, fuel, metals and naval stores declines somewhat in price. In all, thirty-seven commodities advanced, twenty-one declined, and forty-eight remained unchanged.

Dun's index number of wholesale commodity quotations reached \$185.462 by

December 1, an advance of 1.7 per cent for the month. The index number is now 12.8 per cent above its level at January 1, last. During the month under review the dairy and garden group increased by 3.4 per cent; breadstuffs rose 3.2 per cent; clothing, 2.3 per cent; the miscellaneous group, 2.2 per cent, and "other food," 1.9 per cent. Meats declined slightly, and metals declined 1.6 per cent.

COST OF LIVING.—The index number of retail prices of 43 foods in 51 cities compiled by the Bureau of Labour Statistics showed an increase of 2 per cent for the month of October. During the month from September 15 until October 15, 14 articles increased in price, the chief increases being strictly fresh eggs, 21 per cent; rolled oats, 10 per cent; butter, 9 per cent. Nineteen articles decreased in price, the chief decreases being: onions, 14 per cent, navy beans, raisins and oranges, 6 per cent.

RECENT LEGAL DECISIONS AFFECTING LABOUR

THE three legal decisions which are summarized below have reference respectively to a claim for wages in Manitoba, the hypothecation of a

bequest to satisfy a judgment of Workmen's Compensation in Quebec, and a case of employers' liability in Quebec.

Workman suing for wages under Manitoba Builders' and Workmen's Act has no right of appeal if his action is dismissed.

The agent of the proprietor of a farm in Manitoba made a contract with a certain man to work the farm at so much an acre for any work that could be figured on an acre basis and at an agreed price for any other work, the contractor to supply the labour. The contractor hired a man as a gasoline tractor operator about August 15, 1921. In the following month the contractor abscond-

ed and the tractor operator brought an action against the proprietor of the farm for a balance of \$123 in wages, at the rate of \$150 per month. The action was dismissed by a county court judge, and the plaintiff appealed to the Court of Appeal of Manitoba.

It was held by the Court of Appeal that the plaintiff had a right of action

against the proprietor under the Builders' and Workmen's Act, but that his claim to be paid at the rate of \$150 a month and his board was excessive; the rate of \$95 a month in the opinion of the Court would be entirely adequate. While the Court held that the trial judge erred in dismissing the case, the plaintiff, however, was debarred from appealing

from the decision, as the law provides that there is no appeal from any judgment in any action provided for by the Act unless the amount of the judgment exceeds \$200. Where the plaintiff has lost his case and his action has been dismissed he has no right of appeal.

The appeal was therefore dismissed.
(*Manitoba—Sigurdson vs. Leistikow.*)

Bequests exempted from seizure by terms of will cannot be hypothecated to satisfy claim for workmen's compensation.

A workman in Quebec obtained a judgment against his employer under the Quebec Workmen's Compensation Act, and subsequently he obtained a judgment in the Superior Court hypothecating, for the purpose of collecting this compensation, certain immoveables which had been bequeathed to the employer by his father. The executors, of whom the employer was one, appealed against this judgment on the ground that the father had declared in his will that all the goods which he left to his children should be exempt from seizure in respect either to capital or revenue for any debt contracted by his legatees. They therefore asked that the registration of this judgment be annulled. The workman entered the plea that by the first judgment respecting compensation he had been awarded an annuity, and that it was an alimentary debt, for the satisfaction of which the inherited goods could be seized notwithstanding the exemption clause contained in the will.

It was held by the Court of King's Bench that the judgment of the Superior Court was badly founded for the follow-

ing reasons. The father of the employer had the right to dispose of his property as he wished, and was violating no law in rendering exempt from seizure the immoveables which the workman sought to hypothecate. On account of this clause in the will, therefore, these immoveables could not be hypothecated. The debt due to a workman under the Workmen's Compensation Act is not an alimentary debt because that presupposes need on the one side and means on the other, whereas compensation for industrial accidents is not governed by the needs of the victims or the wealth of the employers, but is the same for rich and poor, and not being an alimentary debt it is therefore not a preferred claim.

The Court in its judgment declared the registration of the judgment in favour of the defendant workman to be null and illegal, and ordered the annulment of this registration upon the two immoveables, with costs of both courts against the defendant.

(*Quebec—Routhier and another vs. Bigras.*)

An action within scope of Quebec Workmen's Compensation law cannot be tried under common law.

The mother of a boy who was killed while at work, in the Province of Quebec, brought an action at common law against the company for which he had worked. She claimed damages amounting to \$9,999 alleging that the accident was due to the fault and negligence of his employers, and she testified that he had been her principal support. The Superior Court awarded her \$2,000 damages. The Company appealed in the Court of King's Bench against this decision on the ground that the plaintiff had no right of action under the common law. It was held by the Court that the declaration of the plaintiff brought the case under the Workmen's Compensation Act, as by an amendment of 1919, the law applied when a son who was the

victim of an industrial accident, was the principal support of his parents, the law up to that time having required that such a son be the sole support of his parents. While the right of action under the common law still exists for those who cannot avail themselves of the Workmen's Compensation Act, for those who are under the Act the provisions of the Act govern.

The Court therefore in its judgment maintained the appeal with costs, annulled the judgment of the Superior Court, and voided the action with costs, but reserved to the plaintiff all rights she might have by virtue of the law of Workmen's Compensation.
